122 papers	9,173 citations	38742 50 h-index	46799 89 g-index
127 all docs	127 docs citations	127 times ranked	7933 citing authors

#	Article	IF	Citations
1	Use of novel lab assays to examine the effect of pyrethroid-treated bed nets on blood-feeding success and longevity of highly insecticide-resistant Anopheles gambiae s.l. mosquitoes. Parasites and Vectors, 2022, 15, 111.	2.5	10
2	Impact and cost-effectiveness of a lethal house lure against malaria transmission in central CÃ´te d'Ivoire: a two-arm, cluster-randomised controlled trial. Lancet, The, 2021, 397, 805-815.	13.7	29
3	A non-destructive sugar-feeding assay for parasite detection and estimating the extrinsic incubation period of Plasmodium falciparum in individual mosquito vectors. Scientific Reports, 2021, 11, 9344.	3.3	14
4	Microbes increase thermal sensitivity in the mosquito Aedes aegypti, with the potential to change disease distributions. PLoS Neglected Tropical Diseases, 2021, 15, e0009548.	3.0	16
5	Threats to the effectiveness of insecticide-treated bednets for malaria control: thinking beyond insecticide resistance. The Lancet Global Health, 2021, 9, e1325-e1331.	6.3	94
6	The role of human and mosquito behaviour in the efficacy of a house-based intervention. Philosophical Transactions of the Royal Society B: Biological Sciences, 2021, 376, 20190815.	4.0	6
7	Spatial targeting of Screening + Eave tubes (SET), a house-based malaria control intervention, in CÃ´te dâ€™Ivoire: A geostatistical modelling study. PLOS Global Public Health, 2021, 1, e0000030.	1.6	1
8	Evaluation of the interaction between insecticide resistance-associated genes and malaria transmission in Anopheles gambiae sensu lato in central CÃ´te dâ€™Ivoire. Parasites and Vectors, 2021, 14, 581.	2.5	9
9	Fine scale spatial investigation of multiple insecticide resistance and underlying target-site and metabolic mechanisms in Anopheles gambiae in central CÃ´te dâ€™Ivoire. Scientific Reports, 2020, 10, 15066.	3.3	28
10	The influence of feeding behaviour and temperature on the capacity of mosquitoes to transmit malaria. Nature Ecology and Evolution, 2020, 4, 940-951.	7.8	17
11	The Role of Vector Trait Variation in Vector-Borne Disease Dynamics. Frontiers in Ecology and Evolution, 2020, 8, .	2.2	57
12	Use of alternative bioassays to explore the impact of pyrethroid resistance on LLIN efficacy. Parasites and Vectors, 2020, 13, 179.	2.5	11
13	Epidemics on the move: Climate change and infectious disease. PLoS Biology, 2020, 18, e3001013.	5.6	27
14	Thermal biology of mosquitoâ€borne disease. Ecology Letters, 2019, 22, 1690-1708.	6.4	349
15	Semi-field evaluation of the cumulative effects of a â€œLethal House Lureâ€•on malaria mosquito mortality. Malaria Journal, 2019, 18, 298.	2.3	8
16	Sublethal effects of mixed fungal infections on the Moroccan locust, Dociostaurus maroccanus. Journal of Invertebrate Pathology, 2019, 161, 61-69.	3.2	3
17	Exploring the lower thermal limits for development of the human malaria parasite, <i>Plasmodium falciparum</i>. Biology Letters, 2019, 15, 20190275.	2.3	17
18	Field Relevant Variation in Ambient Temperature Modifies Density-Dependent Establishment of Plasmodium falciparum Gametocytes in Mosquitoes. Frontiers in Microbiology, 2019, 10, 2651.	3.5	12

#	Article	IF	Citations
19	Integrating Models of Diffusion and Behavior to Predict Innovation Adoption, Maintenance, and Social Diffusion. Journal of Health Communication, 2018, 23, 264-271.	2.4	23
20	The interplay between dose and immune system activation determines fungal infection outcome in the African malaria mosquito, Anopheles gambiae. Developmental and Comparative Immunology, 2018, 85, 125-133.	2.3	17
21	Transmission traits of malaria parasites within the mosquito: Genetic variation, phenotypic plasticity, and consequences for control. Evolutionary Applications, 2018, 11, 456-469.	3.1	52
22	Biological control of human disease vectors: a perspective on challenges and opportunities. BioControl, 2018, 63, 61-69.	2.0	76
23	Insights from agriculture for the management of insecticide resistance in disease vectors. Evolutionary Applications, 2018, 11, 404-414.	3.1	32
24	Empirical and theoretical investigation into the potential impacts of insecticide resistance on the effectiveness of insecticideâ€treated bed nets. Evolutionary Applications, 2018, 11, 431-441.	3.1	47
25	Cryogenically preserved RBCs support gametocytogenesis of Plasmodium falciparum in vitro and gametogenesis in mosquitoes. Malaria Journal, 2018, 17, 457.	2.3	16
26	Comparative effects of temperature and thermoregulation on candidate strains of entomopathogenic fungi for Moroccan locust Dociostaurus maroccanus control. BioControl, 2018, 63, 819-831.	2.0	6
27	Screening and field performance of powder-formulated insecticides on eave tube inserts against pyrethroid resistant Anopheles gambiae s.l.: an investigation into â€˜activesâ€™ prior to a randomized controlled trial in CÃ´te dâ€™Ivoire. Malaria Journal, 2018, 17, 374.	2.3	11
28	Evaluating the impact of screening plus eave tubes on malaria transmission compared to current best practice in central CÃ´te dâ€™Ivoire: a two armed cluster randomized controlled trial. BMC Public Health, 2018, 18, 894.	2.9	23
29	Semi-field studies to better understand the impact of eave tubes on mosquito mortality and behaviour. Malaria Journal, 2018, 17, 306.	2.3	11
30	Rethinking the extrinsic incubation period of malaria parasites. Parasites and Vectors, 2018, 11, 178.	2.5	93
31	Microclimate variables of the ambient environment deliver the actual estimates of the extrinsic incubation period of Plasmodium vivax and Plasmodium falciparum: a study from a malaria-endemic urban setting, Chennai in India. Malaria Journal, 2018, 17, 201.	2.3	25
32	The importance of temperature fluctuations in understanding mosquito population dynamics and malaria risk. Royal Society Open Science, 2017, 4, 160969.	2.4	88
33	Increasing the potential for malaria elimination by targeting zoophilic vectors. Scientific Reports, 2017, 7, 40551.	3.3	47
34	Priorities for Broadening the Malaria Vector Control Tool Kit. Trends in Parasitology, 2017, 33, 763-774.	3.3	47
35	Resting and feeding preferences of Anopheles stephensi in an urban setting, perennial for malaria. Malaria Journal, 2017, 16, 111.	2.3	50
36	Quantifying the effects of temperature on mosquito and parasite traits that determine the transmission potential of human malaria. PLoS Biology, 2017, 15, e2003489.	5.6	179

#	Article	IF	Citations
37	Detecting the impact of temperature on transmission of Zika, dengue, and chikungunya using mechanistic models. PLoS Neglected Tropical Diseases, 2017, 11, e0005568.	3.0	430
38	Eave tubes for malaria control in Africa: an introduction. Malaria Journal, 2016, 15, 404.	2.3	54
39	Eave tubes for malaria control in Africa: initial development and semi-field evaluations in Tanzania. Malaria Journal, 2016, 15, 447.	2.3	50
40	Eave tubes for malaria control in Africa: a modelling assessment of potential impact on transmission. Malaria Journal, 2016, 15, 449.	2.3	22
41	The threat (or not) of insecticide resistance for malaria control. Proceedings of the National Academy of Sciences of the United States of America, 2016, 113, 8900-8902.	7.1	46
42	Larval food quantity affects the capacity of adult mosquitoes to transmit human malaria. Proceedings of the Royal Society B: Biological Sciences, 2016, 283, 20160298.	2.6	74
43	Global threat to agriculture from invasive species. Proceedings of the National Academy of Sciences of the United States of America, 2016, 113, 7575-7579.	7.1	563
44	Fitness consequences of altered feeding behavior in immune-challenged mosquitoes. Parasites and Vectors, 2016, 9, 113.	2.5	20
45	Immune response and insulin signalling alter mosquito feeding behaviour to enhance malaria transmission potential. Scientific Reports, 2015, 5, 11947.	3.3	35
46	The potential for fungal biopesticides to reduce malaria transmission under diverse environmental conditions. Journal of Applied Ecology, 2015, 52, 1558-1566.	4.0	18
47	Influence of biotic and abiotic factors on the persistence of aBeauveria bassianabiopesticide in laboratory and high-rise poultry house settings. Biocontrol Science and Technology, 2015, 25, 1317-1332.	1.3	6
48	Climate, environmental and socio-economic change: weighing up the balance in vector-borne disease transmission. Philosophical Transactions of the Royal Society B: Biological Sciences, 2015, 370, 20130551.	4.0	215
49	Interactions between a fungal entomopathogen and malaria parasites within a mosquito vector. Malaria Journal, 2015, 14, 22.	2.3	9
50	Persistence and efficacy of a<i>Beauveria bassiana</i>biopesticide against the house fly,<i>Musca domestica</i>, on typical structural substrates of poultry houses. Biocontrol Science and Technology, 2015, 25, 697-715.	1.3	11
51	Potential for biocontrol of house flies,<i>Musca domestica,</i>using fungal biopesticides. Biocontrol Science and Technology, 2015, 25, 513-524.	1.3	22
52	Temperature alters Plasmodium blocking by Wolbachia. Scientific Reports, 2015, 4, 3932.	3.3	109
53	The Influence of Diurnal Temperature Variation on Degree-Day Accumulation and Insect Life History. PLoS ONE, 2015, 10, e0120772.	2.5	18
54	Malaria Mosquitoes Host-Locate and Feed upon Caterpillars. PLoS ONE, 2014, 9, e108894.	2.5	12

#	Article	IF	Citations
55	Evaluating the efficacy of biological and conventional insecticides with the new â€˜MCD bottleâ€™ bioassay. Malaria Journal, 2014, 13, 499.	2.3	25
56	Capacity of mosquitoes to transmit malaria depends on larval environment. Parasites and Vectors, 2014, 7, 593.	2.5	110
57	Downscaling reveals diverse effects of anthropogenic climate warming on the potential for local environments to support malaria transmission. Climatic Change, 2014, 125, 479-488.	3.6	13
58	Alterations in mosquito behaviour by malaria parasites: potential impact on force of infection. Malaria Journal, 2014, 13, 164.	2.3	50
59	Local adaptation to temperature and the implications for vector-borne diseases. Trends in Parasitology, 2014, 30, 115-122.	3.3	107
60	Ambient temperature and dietary supplementation interact to shape mosquito vector competence for malaria. Journal of Insect Physiology, 2014, 67, 37-44.	2.0	39
61	Characterizing microclimate in urban malaria transmission settings: a case study from Chennai, India. Malaria Journal, 2013, 12, 84.	2.3	57
62	Complex environmental drivers of immunity and resistance in malaria mosquitoes. Proceedings of the Royal Society B: Biological Sciences, 2013, 280, 20132030.	2.6	78
63	House flies delay fungal infection by fevering: at a cost. Ecological Entomology, 2013, 38, 1-10.	2.2	27
64	â€˜Manipulationâ€™ without the parasite: altered feeding behaviour of mosquitoes is not dependent on infection with malaria parasites. Proceedings of the Royal Society B: Biological Sciences, 2013, 280, 20130711.	2.6	97
65	Temperature-Dependent Pre-Bloodmeal Period and Temperature-Driven Asynchrony between Parasite Development and Mosquito Biting Rate Reduce Malaria Transmission Intensity. PLoS ONE, 2013, 8, e55777.	2.5	52
66	Discriminating Fever Behavior in House Flies. PLoS ONE, 2013, 8, e62269.	2.5	25
67	Malaria Mosquitoes Attracted by Fatal Fungus. PLoS ONE, 2013, 8, e62632.	2.5	36
68	Lessons from Agriculture for the Sustainable Management of Malaria Vectors. PLoS Medicine, 2012, 9, e1001262.	8.4	73
69	Warmer temperatures reduce the vectorial capacity of malaria mosquitoes. Biology Letters, 2012, 8, 465-468.	2.3	104
70	Complex effects of temperature on mosquito immune function. Proceedings of the Royal Society B: Biological Sciences, 2012, 279, 3357-3366.	2.6	139
71	Effects of Beauveria bassiana on Survival, Blood-Feeding Success, and Fecundity of Aedes aegypti in Laboratory and Semi-Field Conditions. American Journal of Tropical Medicine and Hygiene, 2012, 86, 656-664.	1.4	71
72	Do malaria parasites manipulate mosquitoes?. Trends in Parasitology, 2012, 28, 466-470.	3.3	93
