citing authors

#	ARTICLE	IF	CITATIONS
1	Neural Substrates Mediating Human Delay and Trace Fear Conditioning. <i>Journal of Neuroscience</i> , 2004, 24, 218-228.	3.6	243
2	Amygdala and hippocampal activity during acquisition and extinction of human fear conditioning. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2004, 4, 317-325.	2.0	211
3	Functional MRI of human amygdala activity during Pavlovian fear conditioning: Stimulus processing versus response expression.. <i>Behavioral Neuroscience</i> , 2003, 117, 3-10.	1.2	136
4	Item memory, source memory, and the medial temporal lobe: Concordant findings from fMRI and memory-impaired patients. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2006, 103, 9351-9356.	7.1	133
5	Medial Temporal Lobe Activity during Retrieval of Semantic Memory Is Related to the Age of the Memory. <i>Journal of Neuroscience</i> , 2009, 29, 930-938.	3.6	124
6	Human amygdala activity during the expression of fear responses.. <i>Behavioral Neuroscience</i> , 2006, 120, 1187-1195.	1.2	113
7	Experience-Dependent Eye Movements, Awareness, and Hippocampus-Dependent Memory. <i>Journal of Neuroscience</i> , 2006, 26, 11304-11312.	3.6	89
8	Declarative Memory, Awareness, and Transitive Inference. <i>Journal of Neuroscience</i> , 2005, 25, 10138-10146.	3.6	86
9	Functional MRI of human Pavlovian fear conditioning. <i>NeuroReport</i> , 1999, 10, 3665-3670.	1.2	80
10	Functional MRI of human amygdala activity during Pavlovian fear conditioning: Stimulus processing versus response expression.. <i>Behavioral Neuroscience</i> , 2003, 117, 3-10.	1.2	78
11	The Hippocampus Supports Both Recollection and Familiarity When Memories Are Strong. <i>Journal of Neuroscience</i> , 2011, 31, 15693-15702.	3.6	74
12	Comparison of explicit and incidental learning strategies in memory-impaired patients. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2014, 111, 475-479.	7.1	64
13	Experience-Dependent Eye Movements Reflect Hippocampus-Dependent (Aware) Memory. <i>Journal of Neuroscience</i> , 2008, 28, 12825-12833.	3.6	53
14	Acquisition of Differential Delay Eyeblink Classical Conditioning Is Independent of Awareness.. <i>Behavioral Neuroscience</i> , 2005, 119, 78-86.	1.2	49
15	When recognition memory is independent of hippocampal function. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2014, 111, 9935-9940.	7.1	42
16	Losing memories overnight: A unique form of human amnesia. <i>Neuropsychologia</i> , 2010, 48, 2833-2840.	1.6	27
17	Different nonlinear functions in hippocampus and perirhinal cortex relating functional MRI activity to memory strength. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2011, 108, 5783-5788.	7.1	26
18	The nature of anterograde and retrograde memory impairment after damage to the medial temporal lobe. <i>Neuropsychologia</i> , 2013, 51, 2709-2714.	1.6	22

#	ARTICLE	IF	CITATIONS
19	Human brain activity and functional connectivity as memories age from one hour to one month. <i>Cognitive Neuroscience</i> , 2022, 13, 115-133.	1.4	15
20	When eye movements express memory for old and new scenes in the absence of awareness and independent of hippocampus. <i>Learning and Memory</i> , 2017, 24, 95-103.	1.3	14
21	Eye movements support the link between conscious memory and medial temporal lobe function. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2018, 115, 7599-7604.	7.1	13
22	Retrograde memory for public events in mild cognitive impairment and its relationship to anterograde memory and neuroanatomy.. <i>Neuropsychology</i> , 2014, 28, 959-972.	1.3	11
23	Awareness of what is learned as a characteristic of hippocampus-dependent memory. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2018, 115, 11947-11952.	7.1	11
24	True and false memories, parietal cortex, and confidence judgments. <i>Learning and Memory</i> , 2015, 22, 557-562.	1.3	9
25	Impaired Behavioral Pattern Separation in Refractory Temporal Lobe Epilepsy and Mild Cognitive Impairment. <i>Journal of the International Neuropsychological Society</i> , 2022, 28, 550-562.	1.8	9
26	The Functional and Structural Neuroanatomy of Systems Consolidation for Autobiographical and Semantic Memory. <i>Current Topics in Behavioral Neurosciences</i> , 2016, 37, 119-150.	1.7	8
27	Amnesia: Declarative and Nondeclarative Memory. , 2009, , 289-294.		1
