CHENCYE DI

#	Article	IF	CITATIONS
1	Electrocardiographic and electrophysiological characteristics of idiopathic ventricular arrhythmias with acute successful ablation at the left ventricular basal inferoseptum recess near the mitral annulus. Journal of Interventional Cardiac Electrophysiology, 2023, 66, 281-290.	1.3	1
2	Tachycardia atrial cycle length equal to that during sinus rhythm: What is the mechanism?. Journal of Cardiovascular Electrophysiology, 2022, 33, 1045-1047.	1.7	0
3	"lrregular―tachycardia atrial cycle length and activation sequence with relatively constant ventricular cycle length: What is the mechanism?. Journal of Cardiovascular Electrophysiology, 2022, 33, 1325-1327.	1.7	0
4	Wide QRS complex tachycardia mechanism discovered through the analysis of the cardiac resynchronization therapyâ€defibrillator intracardiac electrogram. Journal of Cardiovascular Electrophysiology, 2022, 33, 1893-1896.	1.7	0
5	Electrocardiographic and electrophysiological characteristics of idiopathic ventricular arrhythmias with acute successful ablation at the superior portion of the mitral annulus. BMC Cardiovascular Disorders, 2021, 21, 397.	1.7	2
6	A single-loop macroreentrant biatrial flutter identified by the Rhythmia mapping system. Journal of Electrocardiology, 2020, 60, 107-109.	0.9	1
7	Atrial tachycardia with negative P wave in the inferior leads: What is the mechanism?. PACE - Pacing and Clinical Electrophysiology, 2020, 43, 1016-1019.	1.2	0
8	Intraprocedural Conversion Efficacy of Intravenous Nifekalant Administration for Persistent Atrial Fibrillation after Pulmonary Vein Isolation. International Heart Journal, 2020, 61, 1157-1164.	1.0	4
9	Atrial cycle length alternans during typical atrial flutter: What is the mechanism?. Journal of Cardiovascular Electrophysiology, 2019, 30, 2134-2136.	1.7	0
10	Atrial dissociation uncovered by a transesophageal electrophysiological study. Journal of Cardiovascular Electrophysiology, 2019, 30, 2539-2541.	1.7	0
11	The V1–V3 transition index as a novel electrocardiographic criterion for differentiating left from right ventricular outflow tract ventricular arrhythmias. Journal of Interventional Cardiac Electrophysiology, 2019, 56, 37-43.	1.3	16
12	Irregular narrow QRS complex tachycardia with intermittent Pâ€waves linked to two QRS complexes: What is the mechanism?. Journal of Cardiovascular Electrophysiology, 2019, 30, 1384-1387.	1.7	1
13	Pseudoâ€Abnormal Ventricular Pulses in a Patient with a DDDR Pacemaker: What is the Mechanism?. PACE - Pacing and Clinical Electrophysiology, 2015, 38, 1018-1020.	1.2	0
14	Managed Ventricular Pacing below the Lower Rate Limit during DDD to AAI Transition: What is the Mechanism?. PACE - Pacing and Clinical Electrophysiology, 2015, 38, 286-288.	1.2	2
