#	ARTICLE	IF	CITATIONS
1	Relationship between TV watching during childhood and adolescence and fitness in adulthood in the Raine Study cohort. <i>European Journal of Sport Science</i> , 2023, 23, 423-431.	1.4	2
2	Associations of 12-year sleep behaviour trajectories from childhood to adolescence with myopia and ocular biometry during young adulthood. <i>Ophthalmic and Physiological Optics</i> , 2022, 42, 19-27.	1.0	11
3	Physical activity at work may not be health enhancing. A systematic review with meta-analysis on the association between occupational physical activity and cardiovascular disease mortality covering 23 studies with 655 892 participants. <i>Scandinavian Journal of Work, Environment and Health</i> , 2022, 48, 86-98.	1.7	40
4	Young children's agency with digital technologies. <i>Children and Society</i> , 2022, 36, 541-563.	1.0	3
5	Heritability of musculoskeletal pain and pain sensitivity phenotypes: 2 generations of the Raine Study. <i>Pain</i> , 2022, 163, e580-e587.	2.0	2
6	The anticipatory response to stress and symptoms of depression and anxiety in early adulthood. <i>Psychoneuroendocrinology</i> , 2022, 136, 105605.	1.3	5
7	Changes in body composition in patients with malignant pleural mesothelioma and the relationship with activity levels and dietary intake. <i>European Journal of Clinical Nutrition</i> , 2022, 76, 979-986.	1.3	5
8	Does intra-lumbar flexion during lifting differ in manual workers with and without a history of low back pain? A cross-sectional laboratory study. <i>Ergonomics</i> , 2022, 65, 1380-1396.	1.1	1
9	“There’s good and bad”: parent perspectives on the influence of mobile touch screen device use on prenatal attachment. <i>Ergonomics</i> , 2022, 65, 1593-1608.	1.1	3
10	Designing industrial work to be “just right” to promote health: a study protocol for a goldilocks work intervention. <i>BMC Public Health</i> , 2022, 22, 381.	1.2	3
11	Mental health and behavioural factors involved in road traffic crashes by young adults: analysis of the Raine Study. <i>Journal of Epidemiology and Community Health</i> , 2022, 76, 556-562.	2.0	2
12	Can Occupational Health Professionals successfully apply the Goldilocks Work Paradigm in a simulated work redesign?. <i>Ergonomics</i> , 2022, , 1-35.	1.1	3
13	The Surveillance of Physical Activity, Sedentary Behavior, and Sleep: Protocol for the Development and Feasibility Evaluation of a Novel Measurement System. <i>JMIR Research Protocols</i> , 2022, 11, e35697.	0.5	3
14	Movement quantity and quality: How do they relate to pain and disability in dancers?. <i>PLoS ONE</i> , 2022, 17, e0268444.	1.1	2
15	Reimagining physical activity for children following the systemic disruptions from the COVID-19 pandemic in Australia. <i>British Journal of Sports Medicine</i> , 2022, 56, 899-900.	3.1	4
16	Postpandemic hybrid work: opportunities and challenges for physical activity and public health. <i>British Journal of Sports Medicine</i> , 2022, 56, 1203-1204.	3.1	13
17	“Just Right” job design: A conceptual framework for sustainable work in rail driving using the Goldilocks Work Paradigm. <i>Applied Ergonomics</i> , 2022, 105, 103806.	1.7	2
18	Privileging the privileged: the public health focus on leisure time physical activity has contributed to widening socioeconomic inequalities in health. <i>British Journal of Sports Medicine</i> , 2021, 55, 525-526.	3.1	16

#	ARTICLE	IF	CITATIONS
19	Workplace physical activity promotion: why so many failures and few successes? The need for new thinking. <i>British Journal of Sports Medicine</i> , 2021, 55, 650-651.	3.1	19
20	Workforce perceptions of human factors as indicators of plant reliability and process safety. <i>Ergonomics</i> , 2021, 64, 171-183.	1.1	1
21	Is Neck Posture Subgroup in Late Adolescence a Risk Factor for Persistent Neck Pain in Young Adults? A Prospective Study. <i>Physical Therapy</i> , 2021, 101, .	1.1	10
22	A cluster-randomized trial of workplace ergonomics and neck-specific exercise versus ergonomics and health promotion for office workers to manage neck pain – a secondary outcome analysis. <i>BMC Musculoskeletal Disorders</i> , 2021, 22, 68.	0.8	11
23	Convergent Validity of the Fitbit Charge 2 to Measure Sedentary Behavior and Physical Activity in Overweight and Obese Adults. <i>Journal for the Measurement of Physical Behaviour</i> , 2021, 4, 39-46.	0.5	8
24	Prenatal and childhood stress exposure and the sex specific response to psychosocial stress in adulthood. <i>Psychoneuroendocrinology</i> , 2021, 125, 105109.	1.3	8
25	Development and Implementation of “Just Right”™ Physical Behavior in Industrial Work Based on the Goldilocks Work Principle – A Feasibility Study. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 4707.	1.2	15
26	Physical Activity and Cardiovascular Fitness During Childhood and Adolescence: Association With Retinal Nerve Fibre Layer Thickness in Young Adulthood. <i>Journal of Glaucoma</i> , 2021, 30, 813-819.	0.8	1
27	Developmental trajectories of sleep during childhood and adolescence are related to health in young adulthood. <i>Acta Paediatrica, International Journal of Paediatrics</i> , 2021, 110, 2435-2444.	0.7	16
28	Insight into the longitudinal relationship between chronic subclinical inflammation and obesity from adolescence to early adulthood: a dual trajectory analysis. <i>Inflammation Research</i> , 2021, 70, 799-809.	1.6	5
29	Development of a Machine Learning Model for the Estimation of Hip and Lumbar Angles in Ballet Dancers. <i>Medical Problems of Performing Artists</i> , 2021, 36, 61-71.	0.2	3
30	The Association Between Different Trajectories of Low Back Pain and Degenerative Imaging Findings in Young Adult Participants within The Raine Study. <i>Spine</i> , 2021, Publish Ahead of Print, .	1.0	6
31	Exploring lumbar and lower limb kinematics and kinetics for evidence that lifting technique is associated with LBP. <i>PLoS ONE</i> , 2021, 16, e0254241.	1.1	8
32	The association of mobile touch screen device use with parent-child attachment: a systematic review. <i>Ergonomics</i> , 2021, 64, 1606-1622.	1.1	14
33	The Predictive Ability of the Full and Short Versions of the Orebro Questionnaire for Absenteeism and Presenteeism Over the Subsequent 12 – Months, in a Cohort of Young Community-Based Adult Workers. <i>Journal of Occupational and Environmental Medicine</i> , 2021, Publish Ahead of Print, 1058-1064.	0.9	1
34	Prevalence and patterns of multimorbidity in Australian baby boomers: the Busselton healthy ageing study. <i>BMC Public Health</i> , 2021, 21, 1539.	1.2	14
35	Participation in sport in childhood and adolescence: Implications for adult fitness. <i>Journal of Science and Medicine in Sport</i> , 2021, 24, 908-912.	0.6	6
36	Only one fifth of young Australian adults have beliefs about medical imaging for low back pain that align with current evidence: A cross-sectional study. <i>Musculoskeletal Science and Practice</i> , 2021, 56, 102460.	0.6	3

#	ARTICLE	IF	CITATIONS
37	Psychological distress in early childhood and the risk of adolescent spinal pain with impact. <i>European Journal of Pain</i> , 2021, , .	1.4	2
38	Does Childcare Work Promote Cardiorespiratory Fitness and Health? A Cross-Sectional Study of Danish Childcare Workers Based on Accelerometry and Heart Rate Measurements. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 12496.	1.2	0
39	“Coronavirus Changed the Rules on Everything” Parent Perspectives on How the COVID-19 Pandemic Influenced Family Routines, Relationships and Technology Use in Families with Infants. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 12865.	1.2	8
40	What does best practice care for musculoskeletal pain look like? Eleven consistent recommendations from high-quality clinical practice guidelines: systematic review. <i>British Journal of Sports Medicine</i> , 2020, 54, 79-86.	3.1	486
41	Decreased Physical Working Capacity in Adolescents With Nonalcoholic Fatty Liver Disease Associates With Reduced Iron Availability. <i>Clinical Gastroenterology and Hepatology</i> , 2020, 18, 1584-1591.	2.4	3
42	To Flex or Not to Flex? Is There a Relationship Between Lumbar Spine Flexion During Lifting and Low Back Pain? A Systematic Review With Meta-analysis. <i>Journal of Orthopaedic and Sports Physical Therapy</i> , 2020, 50, 121-130.	1.7	48
43	The association of early life stressors with pain sensitivity and pain experience at 22 years. <i>Pain</i> , 2020, 161, 220-229.	2.0	18
44	Informing retention in longitudinal cohort studies through a social marketing lens: Raine Study Generation 2 participants’ perspectives on benefits and barriers to participation. <i>BMC Medical Research Methodology</i> , 2020, 20, 202.	1.4	5
45	Exploring the Reliability and Validity of the TechU-Q to Evaluate Device and Purpose Specific Screen Use in Preschool Children and Parents. <i>Journal of Child and Family Studies</i> , 2020, 29, 2879-2889.	0.7	2
46	Energy drink intake and metabolic syndrome: A prospective investigation in young adults. <i>Nutrition, Metabolism and Cardiovascular Diseases</i> , 2020, 30, 1679-1684.	1.1	6
47	Rationale, Design and Methods Protocol for Participatory Design of an Online Tool to Support Industry Service Provision Regarding Digital Technology Use “with, by and for” Young Children. <i>International Journal of Environmental Research and Public Health</i> , 2020, 17, 8819.	1.2	2
48	Adolescent Spinal Pain-Related Absenteeism as an Antecedent for Early Adulthood Work Presenteeism. <i>Journal of Occupational and Environmental Medicine</i> , 2020, 62, 1046-1051.	0.9	2
49	Can Childcare Work Be Designed to Promote High Intensity Physical Activity for Improved Fitness and Health? A Proof of Concept Study of the Goldilocks Principle. <i>International Journal of Environmental Research and Public Health</i> , 2020, 17, 7419.	1.2	11
50	Long overdue remarriage for better physical activity advice for all: bringing together the public health and occupational health agendas. <i>British Journal of Sports Medicine</i> , 2020, 54, 1377-1378.	3.1	17
51	Process evaluation of a workplace-based health promotion and exercise cluster-randomised trial to increase productivity and reduce neck pain in office workers: a RE-AIM approach. <i>BMC Public Health</i> , 2020, 20, 180.	1.2	21
52	Patient-centred care: the cornerstone for high-value musculoskeletal pain management. <i>British Journal of Sports Medicine</i> , 2020, 54, 1240-1242.	3.1	40
53	The contributions of fetal growth restriction and gestational age to developmental outcomes at 12 months of age: A cohort study. <i>Early Human Development</i> , 2020, 142, 104951.	0.8	4
54	A prospective longitudinal study of mobile touch screen device use and musculoskeletal symptoms and visual health in adolescents. <i>Applied Ergonomics</i> , 2020, 85, 103028.	1.7	29

#	ARTICLE	IF	CITATIONS
55	An Exploration of Machine-Learning Estimation of Ground Reaction Force from Wearable Sensor Data. <i>Sensors</i> , 2020, 20, 740.	2.1	12
56	Towards a better understanding of the "physical activity paradox": the need for a research agenda. <i>British Journal of Sports Medicine</i> , 2020, 54, 1055-1057.	3.1	37
57	Associations between meeting sleep, physical activity or screen time behaviour guidelines and academic performance in Australian school children. <i>BMC Public Health</i> , 2020, 20, 520.	1.2	33
58	Rationale and protocol for the 7- and 8-year longitudinal assessments of eye health in a cohort of young adults in the Raine Study. <i>BMJ Open</i> , 2020, 10, e033440.	0.8	5
59	Thigh-worn accelerometry for measuring movement and posture across the 24-hour cycle: a scoping review and expert statement. <i>BMJ Open Sport and Exercise Medicine</i> , 2020, 6, e000874.	1.4	39
60	Can childcare work be designed to promote moderate and vigorous physical activity, cardiorespiratory fitness and health? Study protocol for the Goldilocks-childcare randomised controlled trial. <i>BMC Public Health</i> , 2020, 20, 237.	1.2	6
61	Supporting Workers to Sit Less and Move More Through the Web-Based BeUpstanding Program: Protocol for a Single-Arm, Repeated Measures Implementation Study. <i>JMIR Research Protocols</i> , 2020, 9, e15756.	0.5	15
62	Multimorbidity is common among young workers and related to increased work absenteeism and presenteeism: results from the population-based Raine Study cohort. <i>Scandinavian Journal of Work, Environment and Health</i> , 2020, 46, 218-227.	1.7	15
63	Are serum ferritin and transferrin saturation risk markers for restless legs syndrome in young adults? Longitudinal and cross-sectional data from the Western Australian Pregnancy Cohort (Raine) Study. <i>Journal of Sleep Research</i> , 2019, 28, e12741.	1.7	10
64	Does "Animal Fun" improve aiming and catching, and balance skills in young children?. <i>Research in Developmental Disabilities</i> , 2019, 84, 122-130.	1.2	9
65	The 2018 Physical Activity Guidelines for Americans: What's New? Implications for Clinicians and the Public. <i>Journal of Orthopaedic and Sports Physical Therapy</i> , 2019, 49, 487-490.	1.7	18
66	Associations of autozygosity with a broad range of human phenotypes. <i>Nature Communications</i> , 2019, 10, 4957.	5.8	84
67	Using hidden Markov models with raw, triaxial wrist accelerometry data to determine sleep stages. <i>Australian and New Zealand Journal of Statistics</i> , 2019, 61, 273-298.	0.4	4
68	An Exploration of Pre-Professional Dancers' Beliefs of the Low Back and Dance-Specific Low Back Movements. <i>Medical Problems of Performing Artists</i> , 2019, 34, 141-146.	0.2	4
69	Standing Desks in a Grade 4 Classroom over the Full School Year. <i>International Journal of Environmental Research and Public Health</i> , 2019, 16, 3590.	1.2	9
70	"From the moment I wake up I will use it" every day, very hour: a qualitative study on the patterns of adolescents' mobile touch screen device use from adolescent and parent perspectives. <i>BMC Pediatrics</i> , 2019, 19, 30.	0.7	36
71	Associations of physical activity or sedentary behaviour with pain sensitivity in young adults of the Raine Study. <i>Scandinavian Journal of Pain</i> , 2019, 19, 679-691.	0.5	4
72	Evidence to design "just right" work using active workstations is currently limited. <i>Occupational and Environmental Medicine</i> , 2019, 76, 279-280.	1.3	6

#	ARTICLE	IF	CITATIONS
73	Higher Levels of Education Are Associated With Full-Time Work in Adults With Cystic Fibrosis. <i>Respiratory Care</i> , 2019, 64, 1116-1122.	0.8	7
74	The musculoskeletal and cognitive effects of under-desk cycling compared to sitting for office workers. <i>Applied Ergonomics</i> , 2019, 79, 76-85.	1.7	4
75	Associations Between Musculoskeletal Pain Experience and Pressure and Cold Pain Sensitivity. <i>Clinical Journal of Pain</i> , 2019, 35, 56-64.	0.8	8
76	Associations of screen work with neck and upper extremity symptoms: a systematic review with meta-analysis. <i>Occupational and Environmental Medicine</i> , 2019, 76, 502-509.	1.3	27
77	Body composition and nutritional status in malignant pleural mesothelioma: implications for activity levels and quality of life. <i>European Journal of Clinical Nutrition</i> , 2019, 73, 1412-1421.	1.3	14
78	The Early Growth Genetics (EGG) and EARly Genetics and Lifecourse Epidemiology (EAGLE) consortia: design, results and future prospects. <i>European Journal of Epidemiology</i> , 2019, 34, 279-300.	2.5	26
79	Infographic. 11 best practice recommendations for care in musculoskeletal pain. <i>British Journal of Sports Medicine</i> , 2019, 53, 1250-1250.	3.1	1
80	Relationship Between Vitamin D Status From Childhood to Early Adulthood With Body Composition in Young Australian Adults. <i>Journal of the Endocrine Society</i> , 2019, 3, 563-576.	0.1	2
81	Reply. <i>Journal of Pediatrics</i> , 2019, 207, 262-263.	0.9	0
82	Workplace interventions for increasing standing or walking for decreasing musculoskeletal symptoms in sedentary workers. <i>The Cochrane Library</i> , 2019, 2019, .	1.5	34
83	Mobile touch screen device use and associations with musculoskeletal symptoms and visual health in a nationally representative sample of Singaporean adolescents. <i>Ergonomics</i> , 2019, 62, 778-793.	1.1	47
84	Early life factors are associated with trajectories of consistent organized sport participation over childhood and adolescence: Longitudinal analysis from the Raine Study. <i>Journal of Science and Medicine in Sport</i> , 2019, 22, 456-461.	0.6	6
85	Organized Sport Participation From Childhood to Adolescence Is Associated With Bone Mass in Young Adults From the Raine Study. <i>Journal of Bone and Mineral Research</i> , 2019, 34, 67-74.	3.1	12
86	Sedentary and Physical Activity Behavior in "Blue-Collar" Workers: A Systematic Review of Accelerometer Studies. <i>Journal of Physical Activity and Health</i> , 2019, 16, 1060-1069.	1.0	25
87	Western Australian pregnancy cohort (Raine) Study: Generation 1. <i>BMJ Open</i> , 2019, 9, e026276.	0.8	28
88	Improving Nutrition and Activity Behaviors Using Digital Technology and Tailored Feedback: Protocol for the Tailored Diet and Activity (ToDAy) Randomized Controlled Trial. <i>JMIR Research Protocols</i> , 2019, 8, e12782.	0.5	14
89	Promoting health and physical capacity during productive work: the Goldilocks Principle. <i>Scandinavian Journal of Work, Environment and Health</i> , 2019, 45, 90-97.	1.7	53
90	The impact of workplace ergonomics and neck-specific exercise versus ergonomics and health promotion interventions on office worker productivity: A cluster-randomized trial. <i>Scandinavian Journal of Work, Environment and Health</i> , 2019, 45, 42-52.	1.7	49

#	ARTICLE	IF	CITATIONS
91	Poor overall quality of clinical practice guidelines for musculoskeletal pain: a systematic review. <i>British Journal of Sports Medicine</i> , 2018, 52, 337-343.	3.1	56
92	Texting with touchscreen and keypad phones - A comparison of thumb kinematics, upper limb muscle activity, exertion, discomfort, and performance. <i>Applied Ergonomics</i> , 2018, 70, 232-239.	1.7	38
93	Associations of office workers's objectively assessed occupational sitting, standing and stepping time with musculoskeletal symptoms. <i>Ergonomics</i> , 2018, 61, 1187-1195.	1.1	17
94	Health-related quality of life and pelvic floor dysfunction in advanced-stage ovarian cancer survivors: associations with objective activity behaviors and physiological characteristics. <i>Supportive Care in Cancer</i> , 2018, 26, 2239-2246.	1.0	12
95	A detailed description of the short-term musculoskeletal and cognitive effects of prolonged standing for office computer work. <i>Ergonomics</i> , 2018, 61, 877-890.	1.1	41
96	Activity Behaviors and Physiological Characteristics of Women With Advanced-Stage Ovarian Cancer: A Preliminary Cross-sectional Investigation. <i>International Journal of Gynecological Cancer</i> , 2018, 28, 604-613.	1.2	7
97	Working (longer than) 9 to 5: are there cardiometabolic health risks for young Australian workers who report longer than 38-h working weeks?. <i>International Archives of Occupational and Environmental Health</i> , 2018, 91, 403-412.	1.1	9
98	Differences in heart rate reserve of similar physical activities during work and in leisure time – A study among Danish blue-collar workers. <i>Physiology and Behavior</i> , 2018, 186, 45-51.	1.0	21
99	Accelerometer-Derived Activity Phenotypes in Young Adults: a Latent Class Analysis. <i>International Journal of Behavioral Medicine</i> , 2018, 25, 558-568.	0.8	10
100	Urogenital symptoms: prevalence, bother, associations and impact in 22-year-old women of the Raine Study. <i>International Urogynecology Journal</i> , 2018, 29, 1807-1815.	0.7	9
101	Associations of occupational standing with musculoskeletal symptoms: a systematic review with meta-analysis. <i>British Journal of Sports Medicine</i> , 2018, 52, 176-183.	3.1	83
102	The "Goldilocks Principle": designing physical activity at work to be "just right" for promoting health. <i>British Journal of Sports Medicine</i> , 2018, 52, 818-819.	3.1	40
103	Laboratory and home comparison of wrist-activity monitors and polysomnography in middle-aged adults. <i>Sleep and Biological Rhythms</i> , 2018, 16, 85-97.	0.5	41
104	Use of a footrest to reduce low back discomfort development due to prolonged standing. <i>Applied Ergonomics</i> , 2018, 67, 218-224.	1.7	19
105	Mobile technology dominates school children's IT use in an advantaged school community and is associated with musculoskeletal and visual symptoms. <i>Ergonomics</i> , 2018, 61, 658-669.	1.1	32
106	Development and validation of an algorithm to temporally align polysomnography and actigraphy data. <i>Biomedical Physics and Engineering Express</i> , 2018, 4, 025014.	0.6	1
107	The physical activity paradox: six reasons why occupational physical activity (OPA) does not confer the cardiovascular health benefits that leisure time physical activity does. <i>British Journal of Sports Medicine</i> , 2018, 52, 149-150.	3.1	349
108	Young Children and Digital Technology: Australian Early Childhood Education and Care Sector Adults' Perspectives. <i>Australasian Journal of Early Childhood</i> , 2018, 43, 14-22.	0.8	44

#	ARTICLE	IF	CITATIONS
109	Results from Australia's 2018 Report Card on Physical Activity for Children and Youth. <i>Journal of Physical Activity and Health</i> , 2018, 15, S315-S317.	1.0	36
110	Evaluating Short-Term Musculoskeletal Pain Changes in Desk-Based Workers Receiving a Workplace Sitting-Reduction Intervention. <i>International Journal of Environmental Research and Public Health</i> , 2018, 15, 1975.	1.2	20
111	Do highly physically active workers die early? A systematic review with meta-analysis of data from 193 696 participants. <i>British Journal of Sports Medicine</i> , 2018, 52, 1320-1326.	3.1	221
112	Does a Classroom Standing Desk Intervention Modify Standing and Sitting Behaviour and Musculoskeletal Symptoms during School Time and Physical Activity during Waking Time?. <i>International Journal of Environmental Research and Public Health</i> , 2018, 15, 1668.	1.2	30
113	Musculoskeletal and Cognitive Effects of a Movement Intervention During Prolonged Standing for Office Work. <i>Human Factors</i> , 2018, 60, 947-961.	2.1	13
114	Correlates of physical activity and sedentary time in young adults: the Western Australian Pregnancy Cohort (Raine) Study. <i>BMC Public Health</i> , 2018, 18, 916.	1.2	6
115	The Short Term Musculoskeletal and Cognitive Effects of Prolonged Sitting During Office Computer Work. <i>International Journal of Environmental Research and Public Health</i> , 2018, 15, 1678.	1.2	89
116	Exercise training improves vascular function and secondary health measures in survivors of pediatric oncology related cerebral insult. <i>PLoS ONE</i> , 2018, 13, e0201449.	1.1	25
117	Conflicting Guidelines on Young Children's Screen Time and Use of Digital Technology Create Policy and Practice Dilemmas. <i>Journal of Pediatrics</i> , 2018, 202, 300-303.	0.9	91
118	The association of adolescent spinal-pain-related absenteeism with early adulthood work absenteeism: A six-year follow-up data from a population-based cohort. <i>Scandinavian Journal of Work, Environment and Health</i> , 2018, 44, 521-529.	1.7	6
119	Trajectories of Low Back Pain From Adolescence to Young Adulthood. <i>Arthritis Care and Research</i> , 2017, 69, 403-412.	1.5	60
120	Cohort Profile: The Western Australian Pregnancy Cohort (Raine) Study's "Generation 2. <i>International Journal of Epidemiology</i> , 2017, 46, dyw308.	0.9	136
121	Workplace interventions for increasing standing or walking for preventing musculoskeletal symptoms in sedentary workers. <i>The Cochrane Library</i> , 2017, . .	1.5	9
122	Addressing Disparities in Low Back Pain Care by Developing Culturally Appropriate Information for Aboriginal Australians: "My Back on Track, My Future" <i>Pain Medicine</i> , 2017, 18, pnw314.	0.9	16
123	Abdominal bracing during lifting alters trunk muscle activity and body kinematics. <i>Applied Ergonomics</i> , 2017, 63, 91-98.	1.7	15
124	Feasibility of objectively measured physical activity and sedentary behavior in patients with malignant pleural effusion. <i>Supportive Care in Cancer</i> , 2017, 25, 3133-3141.	1.0	22
125	Pre-existing low-back symptoms impact adversely on sitting time reduction in office workers. <i>International Archives of Occupational and Environmental Health</i> , 2017, 90, 609-618.	1.1	8
126	Head, trunk and arm posture amplitude and variation, muscle activity, sedentariness and physical activity of 3 to 5 year-old children during tablet computer use compared to television watching and toy play. <i>Applied Ergonomics</i> , 2017, 65, 41-50.	1.7	34

#	ARTICLE	IF	CITATIONS
127	An Investigation of Self-reported Health-related Productivity Loss in Office Workers and Associations With Individual and Work-related Factors Using an Employer's Perspective. <i>Journal of Occupational and Environmental Medicine</i> , 2017, 59, e138-e144.	0.9	17
128	Work Productivity Loss in Young Workers Is Substantial and Is Associated With Spinal Pain and Mental Ill-health Conditions. <i>Journal of Occupational and Environmental Medicine</i> , 2017, 59, 237-245.	0.9	15
