| #  | ARTICLE   | IF  | CITATIONS |
|----|---|-----|-----------|
| 1  | Parietal Lobe and Episodic Memory: Bilateral Damage Causes Impaired Free Recall of Autobiographical Memory. <i>Journal of Neuroscience</i> , 2007, 27, 14415-14423.                   | 3.6 | 255       |
| 2  | tDCS selectively improves working memory in older adults with more education. <i>Neuroscience Letters</i> , 2012, 521, 148-151.   | 2.1 | 253       |
| 3  | Dissociation Between Memory Accuracy and Memory Confidence Following Bilateral Parietal Lesions. <i>Cerebral Cortex</i> , 2010, 20, 479-485.  | 2.9 | 204       |
| 4  | Some surprising findings on the involvement of the parietal lobe in human memory. <i>Neurobiology of Learning and Memory</i> , 2009, 91, 155-165.                                     | 1.9 | 138       |
| 5  | Longitudinal Neurostimulation in Older Adults Improves Working Memory. <i>PLoS ONE</i> , 2015, 10, e0121904.  | 2.5 | 126       |
| 6  | A selective working memory impairment after transcranial direct current stimulation to the right parietal lobe. <i>Neuroscience Letters</i> , 2010, 479, 312-316.                     | 2.1 | 117       |
| 7  | Hits and misses: leveraging tDCS to advance cognitive research. <i>Frontiers in Psychology</i> , 2014, 5, 800.  | 2.1 | 108       |
| 8  | Older Adults Improve on Everyday Tasks after Working Memory Training and Neurostimulation. <i>Brain Stimulation</i> , 2016, 9, 553-559.   | 1.6 | 107       |
| 9  | Parietal Contributions to Visual Working Memory Depend on Task Difficulty. <i>Frontiers in Psychiatry</i> , 2012, 3, 81.  | 2.6 | 96        |
| 10 | The right parietal lobe is critical for visual working memory. <i>Neuropsychologia</i> , 2008, 46, 1767-1774.   | 1.6 | 89        |
| 11 | The Gestalt principle of similarity benefits visual working memory. <i>Psychonomic Bulletin and Review</i> , 2013, 20, 1282-1289.   | 2.8 | 87        |
| 12 | The strategy and motivational influences on the beneficial effect of neurostimulation: A tDCS and fNIRS study. <i>NeuroImage</i> , 2015, 105, 238-247.                                | 4.2 | 84        |
| 13 | Is the posterior parietal lobe involved in working memory retrieval?. <i>Neuropsychologia</i> , 2008, 46, 1775-1786.  | 1.6 | 82        |
| 14 | Insights from neuropsychology: pinpointing the role of the posterior parietal cortex in episodic and working memory. <i>Frontiers in Integrative Neuroscience</i> , 2012, 6, 31.      | 2.1 | 75        |
| 15 | Similarities and differences between parietal and frontal patients in autobiographical and constructed experience tasks. <i>Neuropsychologia</i> , 2010, 48, 1385-1393.               | 1.6 | 72        |
| 16 | Real-world objects are more memorable than photographs of objects. <i>Frontiers in Human Neuroscience</i> , 2014, 8, 837.   | 2.0 | 71        |
| 17 | Frontoparietal theta-gamma interactions track working memory enhancement with training and tDCS. <i>NeuroImage</i> , 2020, 211, 116615.   | 4.2 | 68        |
| 18 | Shifting Attention among Working Memory Representations: Testing Cue Type, Awareness, and Strategic Control. <i>Quarterly Journal of Experimental Psychology</i> , 2012, 65, 426-438. | 1.1 | 67        |

| #  | ARTICLE   | IF  | CITATIONS |
|----|---|-----|-----------|
| 19 | Cognitive Effects of Transcranial Direct Current Stimulation in Healthy and Clinical Populations. <i>Journal of ECT</i> , 2018, 34, e25-e35.  | 0.6 | 59        |
| 20 | Impaired perception of mnemonic oldness, but not mnemonic newness, after parietal lobe damage. <i>Neuropsychologia</i> , 2014, 56, 409-417.   | 1.6 | 55        |
| 21 | At the intersection of attention and memory: The mechanistic role of the posterior parietal lobe in working memory. <i>Neuropsychologia</i> , 2011, 49, 1306-1315.  | 1.6 | 54        |
| 22 | Vibrotactile temporal summation: probability summation or neural integration?. <i>Somatosensory &amp; Motor Research</i> , 1999, 16, 229-242.   | 0.9 | 52        |
| 23 | True memory, false memory, and subjective recollection deficits after focal parietal lobe lesions.. <i>Neuropsychology</i> , 2010, 24, 465-475.   | 1.3 | 51        |
| 24 | Working memory capacity differentially influences responses to tDCS and HD-tDCS in a retro-cue task. <i>Neuroscience Letters</i> , 2016, 629, 105-109.  | 2.1 | 47        |
| 25 | Frontoparietal neurostimulation modulates working memory training benefits and oscillatory synchronization. <i>Brain Research</i> , 2017, 1667, 28-40.  | 2.2 | 44        |
| 26 | COMT and ANKK1-Taq-Ia Genetic Polymorphisms Influence Visual Working Memory. <i>PLoS ONE</i> , 2013, 8, e55862.   | 2.5 | 41        |
| 27 | The mental wormhole: Internal attention shifts without regard for distance. <i>Attention, Perception, and Psychophysics</i> , 2012, 74, 1199-1215.  | 1.3 | 40        |
| 28 | Frontoparietal tDCS Benefits Visual Working Memory in Older Adults With Low Working Memory Capacity. <i>Frontiers in Aging Neuroscience</i> , 2018, 10, 57.   | 3.4 | 38        |
| 29 | Task demands, tDCS intensity, and the COMT val158met polymorphism impact tDCS-linked working memory training gains. <i>Scientific Reports</i> , 2017, 7, 13463.   | 3.3 | 37        |
| 30 | Contralateral delay activity tracks the influence of Gestalt grouping principles on active visual working memory representations. <i>Attention, Perception, and Psychophysics</i> , 2015, 77, 2270-2283.  | 1.3 | 36        |
| 31 | Editorial: Revisiting the Effectiveness of Transcranial Direct Current Brain Stimulation for Cognition: Evidence, Challenges, and Open Questions. <i>Frontiers in Human Neuroscience</i> , 2017, 11, 448. | 2.0 | 36        |
| 32 | Enhanced long-term memory encoding after parietal neurostimulation. <i>Experimental Brain Research</i> , 2014, 232, 4043-4054.  | 1.5 | 33        |
| 33 | On the minimization of task switch costs following long-term training. <i>Attention, Perception, and Psychophysics</i> , 2009, 71, 503-514.   | 1.3 | 30        |
| 34 | Longitudinal tDCS: Consistency across Working Memory Training Studies. <i>AIMS Neuroscience</i> , 2017, 4, 71-86.   | 2.3 | 30        |
| 35 | Smooth Pursuit of Nonvisual Motion. <i>Journal of Neurophysiology</i> , 2006, 96, 461-465.  | 1.8 | 28        |
| 36 | Differential Frontal Involvement in Shifts of Internal and Perceptual Attention. <i>Brain Stimulation</i> , 2013, 6, 675-682.   | 1.6 | 28        |

| #  | ARTICLE  | IF  | CITATIONS |
|----|--|-----|-----------|
| 37 | Orienting attention in visual working memory requires central capacity: Decreased retro-cue effects under dual-task conditions. <i>Attention, Perception, and Psychophysics</i> , 2014, 76, 715-724. | 1.3 | 28        |
| 38 | Impaired distance perception and size constancy following bilateral occipitoparietal damage. <i>Experimental Brain Research</i> , 2009, 194, 381-393.  | 1.5 | 26        |
| 39 | Invalid retro-cues can eliminate the retro-cue benefit: Evidence for a hybridized account.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2014, 40, 1748-1754.       | 0.9 | 26        |
| 40 | Bilateral parietal cortex damage does not impair associative memory for paired stimuli. <i>Cognitive Neuropsychology</i> , 2009, 26, 606-619.  | 1.1 | 25        |
| 41 | Cognitive Rehabilitation After Traumatic Brain Injury. <i>OTJR Occupation, Participation and Health</i> , 2015, 35, 5-22.  | 0.8 | 25        |
| 42 | Individual differences in autistic trait load in the general population predict visual working memory performance. <i>Quarterly Journal of Experimental Psychology</i> , 2013, 66, 1182-1195.        | 1.1 | 24        |
| 43 | The steady-state visual evoked potential reveals neural correlates of the items encoded into visual working memory. <i>Neuropsychologia</i> , 2014, 63, 145-153.                                     | 1.6 | 23        |
| 44 | Replacing tDCS with theta tACS provides selective, but not general WM benefits. <i>Brain Research</i> , 2019, 1720, 146324.  | 2.2 | 23        |
| 45 | Smooth Pursuit and Saccades after Sport-Related Concussion. <i>Journal of Neurotrauma</i> , 2020, 37, 340-346.   | 3.4 | 23        |
| 46 | The locus of color sensation: Cortical color loss and the chromatic visual evoked potential. <i>Journal of Vision</i> , 2013, 13, 15-15.   | 0.3 | 17        |
| 47 | The representation of object distance: evidence from neuroimaging and neuropsychology. <i>Frontiers in Human Neuroscience</i> , 2009, 3, 43.   | 2.0 | 16        |
| 48 | Impaired visual working memory and reduced connectivity in undergraduates with a history of mild traumatic brain injury. <i>Scientific Reports</i> , 2021, 11, 2789.                                 | 3.3 | 13        |
| 49 | Individual predictors and electrophysiological signatures of working memory enhancement in aging. <i>NeuroImage</i> , 2022, 250, 118939.   | 4.2 | 13        |
| 50 | Multimodal access to verbal name codes. <i>Perception &amp; Psychophysics</i> , 2007, 69, 628-640.   | 2.3 | 12        |
| 51 | Predicting Working Memory Training Benefits From Transcranial Direct Current Stimulation Using Resting-State fMRI. <i>Frontiers in Psychology</i> , 2020, 11, 570030.                                | 2.1 | 11        |
| 52 | Effects of Directional Uncertainty on Visually-Guided Joystick Pointing. <i>Perceptual and Motor Skills</i> , 2005, 100, 267-274.  | 1.3 | 10        |
| 53 | Intraparietal regions play a material general role in working memory: Evidence supporting an internal attentional role. <i>Neuropsychologia</i> , 2015, 73, 12-24.                                   | 1.6 | 10        |
| 54 | Synesthetic grapheme-color percepts exist for newly encountered Hebrew, Devanagari, Armenian and Cyrillic graphemes. <i>Consciousness and Cognition</i> , 2013, 22, 944-954.                         | 1.5 | 9         |

| #  | ARTICLE   | IF  | CITATIONS |
|----|---|-----|-----------|
| 55 | Induced and Evoked Human Electrophysiological Correlates of Visual Working Memory Set-Size Effects at Encoding. PLoS ONE, 2016, 11, e0167022.   | 2.5 | 9         |
| 56 | No tDCS augmented working memory training benefit in undergraduates rewarded with course credit. Brain Stimulation, 2020, 13, 1524-1526.  | 1.6 | 9         |
| 57 | Smooth pursuit under stimulus-response uncertainty. Cognitive Brain Research, 2004, 19, 100-102.  | 3.0 | 8         |
| 58 | Electrophysiological correlates of encoding processes in a full-report visual working memory paradigm. Cognitive, Affective and Behavioral Neuroscience, 2018, 18, 353-365.                     | 2.0 | 7         |
| 59 | Tasks determine what is learned in visual statistical learning. Psychonomic Bulletin and Review, 2018, 25, 1847-1854.   | 2.8 | 7         |
| 60 | Visual working memory deficits in undergraduates with a history of mild traumatic brain injury. Attention, Perception, and Psychophysics, 2019, 81, 2597-2603.                                  | 1.3 | 7         |
| 61 | Directional Uncertainty in Visually Guided Pointing. Perceptual and Motor Skills, 2006, 102, 125-132.   | 1.3 | 6         |
| 62 | Effect of uncertainty on the time course for selection of verbal name codes. Perception & Psychophysics, 2005, 67, 1437-1445.   | 2.3 | 4         |
| 63 | A calendar savant with episodic memory impairments. Neurocase, 2010, 16, 208-218.   | 0.6 | 4         |
| 64 | Caught in the ACTS: Defining Abstract Cognitive Task Sequences as an Independent Process. Journal of Cognitive Neuroscience, 2022, 34, 1103-1113.   | 2.3 | 4         |
| 65 | Serial reaction time performance following right parietal lobe damage. Journal of Neuropsychology, 2008, 2, 509-514.  | 1.4 | 2         |
| 66 | Visual statistical learning deficits in memory-impaired individuals. Neurocase, 2018, 24, 259-265.  | 0.6 | 2         |
| 67 | The neural fate of individual item representations in visual working memory. Visual Cognition, 2013, 21, 708-711.   | 1.6 | 1         |
| 68 | Influences on the beneficial effect of neurostimulation. Visual Cognition, 2014, 22, 1034-1038.   | 1.6 | 1         |
| 69 | Individual differences reveal limited mixed-category effects during a visual working memory task. Neuropsychologia, 2019, 122, 1-10.  | 1.6 | 1         |
| 70 | Latency of smooth pursuit under conditions of stimulus-response uncertainty. Journal of Vision, 2010, 2, 179-179.   | 0.3 | 0         |
| 71 | Can Noninvasive Neurostimulation and Working Memory Training Facilitate Transfer Gains in Healthy Older Adults?. American Journal of Occupational Therapy, 2015, 69, 6911520073p1-6911520073p1. | 0.3 | 0         |
| 72 | Encoding-related neural correlates of set-size limitations of working memory. Journal of Vision, 2015, 15, 298.   | 0.3 | 0         |

| #  | ARTICLE  | IF  | CITATIONS |
|----|--|-----|-----------|
| 73 | Non-linear neural interactions at the time of encoding underlie grouping benefits in working memory. Journal of Vision, 2015, 15, 299.   | 0.3 | 0         |
| 74 | Enhancing Everyday Cognition in Older Adults via Working Memory Training and Transcranial Direct Current Stimulation. American Journal of Occupational Therapy, 2016, 70, 7011520298p1-7011520298p1. | 0.3 | 0         |
| 75 | A stimulus biased contralateral bias in intraparietal sulcus.. Journal of Vision, 2016, 16, 1064.  | 0.3 | 0         |
| 76 | Visual working memory training with non-invasive neurostimulation increases low frequency phase synchrony. Journal of Vision, 2016, 16, 760.   | 0.3 | 0         |
| 77 | Visual statistical learning faces interference from response and executive demands. Journal of Vision, 2017, 17, 959.  | 0.3 | 0         |
| 78 | Evidence of limited cross-category visual statistical learning in amnesia. Journal of Vision, 2017, 17, 353.   | 0.3 | 0         |
| 79 | Frequency domain analyses of EEG reveal neural correlates of visual working memory capacity limitations observed during encoding using a full report paradigm.. Journal of Vision, 2017, 17, 123.    | 0.3 | 0         |
| 80 | Task-relevant category differences strongly influence temporal visual statistical learning. Journal of Vision, 2018, 18, 1308.   | 0.3 | 0         |
| 81 | Examining the relationship between eye movement kinematics and schizotypy in the normal population. Journal of Vision, 2019, 19, 126b.   | 0.3 | 0         |
| 82 | The Effects of Concussion Can Be Long-Lasting. Frontiers for Young Minds, 0, 8, .  | 0.8 | 0         |
