#	ARTICLE	IF	CITATIONS
1	A Short History of High-Resolution Esophageal Manometry. <i>Dysphagia</i> , 2023, 38, 586-595.	1.0	7
2	Validation of Clinically Relevant Thresholds of Esophagogastric Junction Obstruction Using FLIP Panometry. <i>Clinical Gastroenterology and Hepatology</i> , 2022, 20, e1250-e1262.	2.4	25
3	Validation of secondary peristalsis classification using FLIP panometry in 741 subjects undergoing manometry. <i>Neurogastroenterology and Motility</i> , 2022, 34, e14192.	1.6	33
4	A fully resolved multiphysics model of gastric peristalsis and bolus emptying in the upper gastrointestinal tract. <i>Computers in Biology and Medicine</i> , 2022, 143, 104948.	3.9	7
5	Deep learning-based artificial intelligence model for identifying swallow types in esophageal high-resolution manometry. <i>Neurogastroenterology and Motility</i> , 2022, 34, e14290.	1.6	7
6	Heterogeneity of primary and secondary peristalsis in systemic sclerosis: A new model of œscleroderma esophagus. <i>Neurogastroenterology and Motility</i> , 2022, 34, e14284.	1.6	3
7	AGA Clinical Practice Update on the Personalized Approach to the Evaluation and Management of GERD: Expert Review. <i>Clinical Gastroenterology and Hepatology</i> , 2022, 20, 984-994.e1.	2.4	99
8	Retrograde upper esophageal sphincter function and dysfunction. <i>Neurogastroenterology and Motility</i> , 2022, 34, e14328.	1.6	9
9	Myotomy technique and esophageal contractility impact blown-out myotomy formation in achalasia: an in silico investigation. <i>American Journal of Physiology - Renal Physiology</i> , 2022, 322, G500-G512.	1.6	9
10	Review article: rethinking the œladder approach to reflux-like symptom management in the era of <sc>PPI</sc> œresistance œ a multidisciplinary perspective. <i>Alimentary Pharmacology and Therapeutics</i> , 2022, 55, 1492-1500.	1.9	5
11	Knowledge gaps in the management of refractory reflux-like symptoms: Healthcare provider survey. <i>Neurogastroenterology and Motility</i> , 2022, 34, e14387.	1.6	3
12	Normative values of intra-bolus pressure and esophageal compliance based on <sc>4D</sc> high-resolution impedance manometry. <i>Neurogastroenterology and Motility</i> , 2022, 34, .	1.6	1
13	Normal Functional Luminal Imaging Probe Panometry Findings Associate With Lack of Major Esophageal Motility Disorder on High-Resolution Manometry. <i>Clinical Gastroenterology and Hepatology</i> , 2021, 19, 259-268.e1.	2.4	31
14	Achalasia subtypes can be identified with functional luminal imaging probe (FLIP) panometry using a supervised machine learning process. <i>Neurogastroenterology and Motility</i> , 2021, 33, e13932.	1.6	21
15	Blown-out myotomy: an adverse event of laparoscopic Heller myotomy and peroral endoscopic myotomy for achalasia. <i>Gastrointestinal Endoscopy</i> , 2021, 93, 861-868.e1.	0.5	26
16	Esophagogastric Junction Opening Parameters Are Consistently Abnormal in Untreated Achalasia. <i>Clinical Gastroenterology and Hepatology</i> , 2021, 19, 1058-1060.e1.	2.4	17
17	Assessment of esophageal body peristaltic work using functional lumen imaging probe panometry. <i>American Journal of Physiology - Renal Physiology</i> , 2021, 320, G217-G226.	1.6	9
18	What is new in Chicago Classification version 4.0?. <i>Neurogastroenterology and Motility</i> , 2021, 33, e14053.	1.6	74

#	ARTICLE	IF	CITATIONS
19	Ambulatory Reflux Monitoring Guides Proton Pump Inhibitor Discontinuation in Patients With Gastroesophageal Reflux Symptoms: A Clinical Trial. <i>Gastroenterology</i> , 2021, 160, 174-182.e1.	0.6	42
20	Regurgitation matters. <i>Gut</i> , 2021, 70, 445-446.	6.1	1
21	Mechanics informed fluoroscopy of esophageal transport. <i>Biomechanics and Modeling in Mechanobiology</i> , 2021, 20, 925-940.	1.4	11
22	Development of quality indicators for the diagnosis and management of achalasia. <i>Neurogastroenterology and Motility</i> , 2021, 33, e14118.	1.6	9
23	Pumping Patterns and Work Done During Peristalsis in Finite-Length Elastic Tubes. <i>Journal of Biomechanical Engineering</i> , 2021, 143, .	0.6	9
24	Chicago Classification update (v4.0): Technical review of high-resolution manometry metrics for EGJ barrier function. <i>Neurogastroenterology and Motility</i> , 2021, 33, e14113.	1.6	20
25	Estimation of mechanical work done to open the esophagogastric junction using functional lumen imaging probe panometry. <i>American Journal of Physiology - Renal Physiology</i> , 2021, 320, G780-G790.	1.6	6
26	Letter to the editor by the American Foregut Society Bariatric Committee on Combined Magnetic Sphincter Augmentation and Bariatric Surgery. <i>Surgery for Obesity and Related Diseases</i> , 2021, 17, 1034-1035.	1.0	0
27	Umbrella review of 42 systematic reviews with meta-analyses: the safety of proton pump inhibitors. <i>Alimentary Pharmacology and Therapeutics</i> , 2021, 54, 129-143.	1.9	37
28	Letter: mind the gap—search and publication date of systematic reviews and meta-analysis. Authors' reply. <i>Alimentary Pharmacology and Therapeutics</i> , 2021, 54, 733-733.	1.9	0
29	Prediction of Esophageal Retention: A Study Comparing High-Resolution Manometry and Functional Luminal Imaging Probe Panometry. <i>American Journal of Gastroenterology</i> , 2021, 116, 2032-2041.	0.2	15
30	How Updates in Chicago Classification Impact Clinical Practice. <i>Foregut</i> , 2021, 1, 207-215.	0.3	2
31	Editorial: time to retire Rome IV and the Montreal definition?. <i>Alimentary Pharmacology and Therapeutics</i> , 2021, 54, 1081-1082.	1.9	1
32	Esophageal motility disorders on high-resolution manometry: Chicago classification version 4.0 [©] . <i>Neurogastroenterology and Motility</i> , 2021, 33, e14058.	1.6	468
33	ESNM/ANMS consensus paper: Diagnosis and management of refractory gastroesophageal reflux disease. <i>Neurogastroenterology and Motility</i> , 2021, 33, e14075.	1.6	68
34	The tapestry of reflux syndromes: translating new insight into clinical practice. <i>British Journal of General Practice</i> , 2021, 71, 470-473.	0.7	6
35	Classifying Esophageal Motility by FLIP Panometry: A Study of 722 Subjects With Manometry. <i>American Journal of Gastroenterology</i> , 2021, 116, 2357-2366.	0.2	53
36	Phenotypes of Gastroesophageal Reflux Disease: Where Rome, Lyon, and Montreal Meet. <i>Clinical Gastroenterology and Hepatology</i> , 2020, 18, 767-776.	2.4	90

#	ARTICLE	IF	CITATIONS
37	Functional Luminal Imaging Probe Panometry Identifies Achalasia-Type Esophagogastric Junction Outflow Obstruction. <i>Clinical Gastroenterology and Hepatology</i> , 2020, 18, 2209-2217.	2.4	64
38	Repetitive antegrade contraction: a novel response to sustained esophageal distension is modulated by cholinergic influence. <i>American Journal of Physiology - Renal Physiology</i> , 2020, 319, G696-G702.	1.6	5
39	Advances in the diagnosis and management of gastroesophageal reflux disease. <i>BMJ, The</i> , 2020, 371, m3786.	3.0	75
40	Four-dimensional impedance manometry derived from esophageal high-resolution impedance-manometry studies: a novel analysis paradigm. <i>Therapeutic Advances in Gastroenterology</i> , 2020, 13, 175628482096905.	1.4	5
41	Managing Chronic Cough as a Symptom in Children and Management Algorithms. <i>Chest</i> , 2020, 158, 303-329.	0.4	63
42	Esophageal Hypervigilance and Visceral Anxiety Are Contributors to Symptom Severity Among Patients Evaluated With High-Resolution Esophageal Manometry. <i>American Journal of Gastroenterology</i> , 2020, 115, 367-375.	0.2	51
43	Editorial: upright manometryâ€”a lot more to swallow. <i>Alimentary Pharmacology and Therapeutics</i> , 2020, 51, 913-914.	1.9	1
44	Editorial: alginatesâ€”navigating beyond the â€œraftâ€™™ and acid pocket. <i>Alimentary Pharmacology and Therapeutics</i> , 2020, 52, 1071-1072.	1.9	1
45	How I Approach Dysphagia. <i>Current Gastroenterology Reports</i> , 2019, 21, 49.	1.1	12
46	GI Manifestations With a Focus on the Esophagus: Recent Progress in Understanding Pathogenesis. <i>Current Rheumatology Reports</i> , 2019, 21, 42.	2.1	9
47	Effect of Peroral Endoscopic Myotomy vs Pneumatic Dilation on Symptom Severity and Treatment Outcomes Among Treatment-Naive Patients With Achalasia. <i>JAMA - Journal of the American Medical Association</i> , 2019, 322, 134.	3.8	271
48	Esophageal motility classification can be established at the time of endoscopy: a study evaluating real-time functional luminal imaging probe panometry. <i>Gastrointestinal Endoscopy</i> , 2019, 90, 915-923.e1.	0.5	48
49	Editorial: gastric bypass for GERD in class II & III obesityâ€”still the best option?. <i>Alimentary Pharmacology and Therapeutics</i> , 2019, 49, 1535-1536.	1.9	1
50	Chronic Cough and Gastroesophageal Reflux in Children. <i>Chest</i> , 2019, 156, 131-140.	0.4	35
51	Upright Integrated Relaxation Pressure Facilitates Characterization of Esophagogastric Junction Outflow Obstruction. <i>Clinical Gastroenterology and Hepatology</i> , 2019, 17, 2218-2226.e2.	2.4	68
52	Esophagogastric Junction Distensibility on Functional Lumen Imaging Probe Topography Predicts Treatment Response in Achalasiaâ€”Anatomy Matters!. <i>American Journal of Gastroenterology</i> , 2019, 114, 1455-1463.	0.2	55
53	The dysphagia stress test for rapid assessment of swallowing difficulties in esophageal conditions. <i>Neurogastroenterology and Motility</i> , 2019, 31, e13512.	1.6	3
54	Reflux Disease and Idiopathic Lung Fibrosis. <i>Chest</i> , 2019, 155, 5-6.	0.4	5

#	ARTICLE	IF	CITATIONS
55	Normal Values of Esophageal Distensibility and Distension-Induced Contractility Measured by Functional Luminal Imaging Probe Panometry. <i>Clinical Gastroenterology and Hepatology</i> , 2019, 17, 674-681.e1.	2.4	107
56	Acid-Suppression Therapy for Gastroesophageal Reflux Disease and the Therapeutic Gap. , 2019, , 228-233.		0
57	Assessing Esophageal Function in Achalasia: The Old and the New. <i>American Journal of Gastroenterology</i> , 2018, 113, 213-215.	0.2	1
58	Management Options for Patients With GERD and Persistent Symptoms on Proton Pump Inhibitors: Recommendations From an Expert Panel. <i>American Journal of Gastroenterology</i> , 2018, 113, 980-986.	0.2	78
59	Studies of abnormalities of the lower esophageal sphincter during esophageal emptying based on a fully coupled bolusâ€“esophagealâ€“gastric model. <i>Biomechanics and Modeling in Mechanobiology</i> , 2018, 17, 1069-1082.	1.4	8
60	Correlation between novel 3D highâ€“resolution manometry esophagogastric junction metrics and <sc>pH</sc>â€“metry in reflux disease patients. <i>Neurogastroenterology and Motility</i> , 2018, 30, e13344.	1.6	7
61	Modern diagnosis of GERD: the Lyon Consensus. <i>Gut</i> , 2018, 67, 1351-1362.	6.1	991
62	Advances in Management of Esophageal Motility Disorders. <i>Clinical Gastroenterology and Hepatology</i> , 2018, 16, 1692-1700.	2.4	77
63	Editorial: symptom association probability during reflux testingâ€“what is the gain?. <i>Alimentary Pharmacology and Therapeutics</i> , 2018, 47, 1317-1318.	1.9	3
64	Improved Assessment of Bolus Clearance in Patients With Achalasia Using High-Resolution Impedance Manometry. <i>Clinical Gastroenterology and Hepatology</i> , 2018, 16, 672-680.e1.	2.4	21
65	Highâ€“resolution manometry assessment of the lower esophageal sphincter afterâ€“contraction: Normative values and clinical correlation. <i>Neurogastroenterology and Motility</i> , 2018, 30, e13156.	1.6	6
66	The â€œdangersâ€“of chronic proton pump inhibitor use. <i>Journal of Allergy and Clinical Immunology</i> , 2018, 141, 79-81.	1.5	36
67	Psychosocial Distress and Quality of Life Impairment Are Associated With Symptom Severity in PPI Non-Responders With Normal Impedance-pH Profiles. <i>American Journal of Gastroenterology</i> , 2018, 113, 31-38.	0.2	30
68	Postprandial High-Resolution Impedance Manometry Identifies Mechanisms of Nonresponse to Proton Pump Inhibitors. <i>Clinical Gastroenterology and Hepatology</i> , 2018, 16, 211-218.e1.	2.4	67
69	The relationship between esophageal acid exposure and the esophageal response to volumetric distention. <i>Neurogastroenterology and Motility</i> , 2018, 30, e13240.	1.6	36
70	The 2018 ISDE achalasia guidelines. <i>Ecological Management and Restoration</i> , 2018, 31, .	0.2	221
71	Mechanisms of repetitive retrograde contractions in response to sustained esophageal distension: a study evaluating patients with postfundoplication dysphagia. <i>American Journal of Physiology - Renal Physiology</i> , 2018, 314, G334-G340.	1.6	23
72	Endoscopic atlas of motility disorders. <i>Techniques in Gastrointestinal Endoscopy</i> , 2018, 20, 146-151.	0.3	0

#	ARTICLE	IF	CITATIONS
73	Clinical measurement of gastrointestinal motility and function: who, when and which test?. <i>Nature Reviews Gastroenterology and Hepatology</i> , 2018, 15, 568-579.	8.2	44
74	Reply. <i>Clinical Gastroenterology and Hepatology</i> , 2017, 15, 320.	2.4	0
75	Could the peristaltic transition zone be caused by non-uniform esophageal muscle fiber architecture? A simulation study. <i>Neurogastroenterology and Motility</i> , 2017, 29, e13022.	1.6	6
76	Recurrence of Barrett's Esophagus is Rare Following Endoscopic Eradication Therapy Coupled With Effective Reflux Control. <i>American Journal of Gastroenterology</i> , 2017, 112, 556-566.	0.2	69
77	When is proton pump inhibitor use appropriate?. <i>BMC Medicine</i> , 2017, 15, 36.	2.3	63
78	Treatments for achalasia in 2017. <i>Current Opinion in Gastroenterology</i> , 2017, 33, 270-276.	1.0	35
79	Peroral Endoscopic Myotomy (POEM) Versus Pneumatic Dilatation in Therapy-Naive Patients with Achalasia: Results of a Randomized Controlled Trial. <i>Gastroenterology</i> , 2017, 152, S139.	0.6	25
80	Novel 3D high-resolution manometry metrics for quantifying esophagogastric junction contractility. <i>Neurogastroenterology and Motility</i> , 2017, 29, e13054.	1.6	11
81	Simulation studies of the role of esophageal mucosa in bolus transport. <i>Biomechanics and Modeling in Mechanobiology</i> , 2017, 16, 1001-1009.	1.4	10
82	Advances in the management of oesophageal motility disorders in the era of high-resolution manometry: a focus on achalasia syndromes. <i>Nature Reviews Gastroenterology and Hepatology</i> , 2017, 14, 677-688.	8.2	84
83	Clinical Practice Update: The Use of Per-Oral Endoscopic Myotomy in Achalasia: Expert Review and Best Practice Advice From the AGA Institute. <i>Gastroenterology</i> , 2017, 153, 1205-1211.	0.6	129
84	A continuum mechanics-based musculo-mechanical model for esophageal transport. <i>Journal of Computational Physics</i> , 2017, 348, 433-459.	1.9	21
85	Editorial: when to be suspicious of malignancy-associated pseudoachalasia. <i>Alimentary Pharmacology and Therapeutics</i> , 2017, 46, 198-198.	1.9	0
86	Benchmarks for the interpretation of esophageal high-resolution manometry. <i>Neurogastroenterology and Motility</i> , 2017, 29, e12971.	1.6	12
87	High-resolution impedance manometry parameters enhance the esophageal motility evaluation in non-obstructive dysphagia patients without a major Chicago Classification motility disorder. <i>Neurogastroenterology and Motility</i> , 2017, 29, e12941.	1.6	40
88	Validation of criteria for the definition of transient lower esophageal sphincter relaxations using high-resolution manometry. <i>Neurogastroenterology and Motility</i> , 2017, 29, e12920.	1.6	78
89	Incidence and Prevalence of Achalasia in Central Chicago, 2004-2014, Since the Widespread Use of High-Resolution Manometry. <i>Clinical Gastroenterology and Hepatology</i> , 2017, 15, 366-373.	2.4	116
90	Emerging dilemmas in the diagnosis and management of gastroesophageal reflux disease. <i>F1000Research</i> , 2017, 6, 1748.	0.8	4

#	ARTICLE	IF	CITATIONS
91	Ineffective Esophageal Motility Progressing into Distal Esophageal Spasm and Then Type III Achalasia. ACG Case Reports Journal, 2016, 3, e183.	0.2	8
92	Pressure topography metrics for high-resolution pharyngeal-esophageal manofluorography—a normative study of younger and older adults. Neurogastroenterology and Motility, 2016, 28, 721-731.	1.6	65
93	Per-oral Endoscopic Myotomy (POEM) After the Learning Curve. Annals of Surgery, 2016, 264, 508-517.	2.1	134
94	Turning the Pathogenesis of Acute Peptic Esophagitis Inside Out. JAMA - Journal of the American Medical Association, 2016, 315, 2077.	3.8	6
95	Chronic Cough Due to Gastroesophageal Reflux in Adults. Chest, 2016, 150, 1341-1360.	0.4	158
96	How to Effectively Use High-Resolution Esophageal Manometry. Gastroenterology, 2016, 151, 789-792.	0.6	22
97	High-Resolution Impedance Manometry Metrics of the Esophagogastric Junction for the Assessment of Treatment Response in Achalasia. American Journal of Gastroenterology, 2016, 111, 1702-1710.	0.2	32
98	Histopathologic patterns among achalasia subtypes. Neurogastroenterology and Motility, 2016, 28, 139-145.	1.6	99
99	Development and validation of the brief esophageal dysphagia questionnaire. Neurogastroenterology and Motility, 2016, 28, 1854-1860.	1.6	70
100	Evaluation of Esophageal Motility Utilizing the Functional Lumen Imaging Probe. American Journal of Gastroenterology, 2016, 111, 1726-1735.	0.2	181
101	Severity of endoscopically identified esophageal rings correlates with reduced esophageal distensibility in eosinophilic esophagitis. Endoscopy, 2016, 48, 794-801.	1.0	68
102	Reply. Clinical Gastroenterology and Hepatology, 2016, 14, 481-482.	2.4	0
