#	ARTICLE	IF	CITATIONS
1	Association between developmental dyslexia and anxiety/depressive symptoms among children in China: The chain mediating of time spent on homework and stress. <i>Journal of Affective Disorders</i> , 2022, 297, 495-501.	4.1	18
2	Association between urinary propylene oxide metabolite and the risk of dyslexia. <i>Environmental Pollution</i> , 2022, 292, 118469.	7.5	7
3	Association between urinary dialkylphosphate metabolites and dyslexia among children from three cities of China: The READ program. <i>Science of the Total Environment</i> , 2022, 814, 151852.	8.0	6
4	Quality of life in Chinese children with developmental dyslexia: a cross-sectional study. <i>BMJ Open</i> , 2022, 12, e052278.	1.9	4
5	Internet addiction: Prevalence and relationship with academic burnout among undergraduates during widespread online learning. <i>Perspectives in Psychiatric Care</i> , 2022, 58, 2303-2309.	1.9	16
6	Relationship between school bullying and mental health status of adolescent students in China: A nationwide cross-sectional study. <i>Asian Journal of Psychiatry</i> , 2022, 70, 103043.	2.0	20
7	Behavioral problems of pediatric patients recovered from COVID-19 in Wuhan, China. <i>Acta Psychologica</i> , 2022, 226, 103571.	1.5	2
8	Alteration of the fecal microbiota in Chinese children with autism spectrum disorder. <i>Autism Research</i> , 2022, 15, 996-1007.	3.8	13
9	Psychological Symptom Progression in School-Aged Children After COVID-19 Home Confinement: A Longitudinal Study. <i>Frontiers in Psychiatry</i> , 2022, 13, 809107.	2.6	9
10	The prevalence of behavioral problems among school-aged children in home quarantine during the COVID-19 pandemic in china. <i>Journal of Affective Disorders</i> , 2021, 279, 412-416.	4.1	102
11	Knowledge, attitudes, and practices towards COVID-19 among primary school students in Hubei Province, China. <i>Children and Youth Services Review</i> , 2021, 120, 105735.	1.9	38
12	Factors Affecting Children's Mental Health During the Coronavirus Disease 2019 Epidemic—Reply. <i>JAMA Pediatrics</i> , 2021, 175, 320.	6.2	3
13	Comprehensive Integrative Analyses Identify <i>TIGD5</i> rs75547282 as a Risk Variant for Autism Spectrum Disorder. <i>Autism Research</i> , 2021, 14, 631-644.	3.8	6
14	Problematic Internet Use Was Associated With Psychological Problems Among University Students During COVID-19 Outbreak in China. <i>Frontiers in Public Health</i> , 2021, 9, 675380.	2.7	18
15	The association of glycemic level and prevalence of tuberculosis: a meta-analysis. <i>BMC Endocrine Disorders</i> , 2021, 21, 123.	2.2	8
16	The associations of zinc and GRIN2B genetic polymorphisms with the risk of dyslexia. <i>Environmental Research</i> , 2020, 191, 110207.	7.5	10
17	Association of health-risk behaviors and depressive symptoms and anxiety symptoms: a school-based sample of Chinese adolescents. <i>Journal of Public Health</i> , 2020, 42, e189-e198.	1.8	9
18	Association between NT5C2 rs11191580 and autism spectrum disorder in the Chinese Han population. <i>Asian Journal of Psychiatry</i> , 2020, 53, 102231.	2.0	2

#	ARTICLE	IF	CITATIONS
19	Integrative analyses indicate an association between ITIH3 polymorphisms with autism spectrum disorder. <i>Scientific Reports</i> , 2020, 10, 5223.	3.3	6
20	Mental Health Status Among Children in Home Confinement During the Coronavirus Disease 2019 Outbreak in Hubei Province, China. <i>JAMA Pediatrics</i> , 2020, 174, 898.	6.2	720
21	Urine metals concentrations and dyslexia among children in China. <i>Environment International</i> , 2020, 139, 105707.	10.0	22
22	Birth weight prediction models for the different gestational age stages in a Chinese population. <i>Scientific Reports</i> , 2019, 9, 10834.	3.3	4
23	Dyslexia associated functional variants in Europeans are not associated with dyslexia in Chinese. <i>American Journal of Medical Genetics Part B: Neuropsychiatric Genetics</i> , 2019, 180, 488-495.	1.7	8
24	The role of depressive symptoms, anxiety symptoms, and school functioning in the association between peer victimization and internet addiction: A moderated mediation model. <i>Journal of Affective Disorders</i> , 2019, 256, 125-131.	4.1	40
25	Polymorphisms of Ionotropic Glutamate Receptor-Related Genes and the Risk of Autism Spectrum Disorder in a Chinese Population. <i>Psychiatry Investigation</i> , 2019, 16, 379-385.	1.6	2
26	Development of Orthographic Awareness, Morphological Awareness and Rapid Automatized Naming of Elementary-level Students in China: A Longitudinal Analysis from Grades 1 to 4. <i>Current Medical Science</i> , 2018, 38, 336-341.	1.8	2
27	Neurexin gene family variants as risk factors for autism spectrum disorder. <i>Autism Research</i> , 2018, 11, 37-43.	3.8	53
28	Validity and Reliability of the Dyslexia Checklist for Chinese Children. <i>Frontiers in Psychology</i> , 2018, 9, 1915.	2.1	26
29	Association analysis of two synapse-related gene mutations with autism spectrum disorder in a Chinese population. <i>Research in Autism Spectrum Disorders</i> , 2018, 53, 67-72.	1.5	0
30	Educational and Behavioral Counseling in a Methadone Maintenance Treatment Program in China: A Randomized Controlled Trial. <i>Frontiers in Psychiatry</i> , 2018, 9, 113.	2.6	9
31	Genetic variants in the CNTNAP2 gene are associated with gender differences among dyslexic children in China. <i>EBioMedicine</i> , 2018, 34, 165-170.	6.1	27
32	Pathways linking socioeconomic status to small-for-gestational-age (SGA) infants among primiparae: a birth cohort study in China. <i>BMJ Open</i> , 2018, 8, e020694.	1.9	16
33	Prenatal chromium exposure and risk of preterm birth: a cohort study in Hubei, China. <i>Scientific Reports</i> , 2017, 7, 3048.	3.3	30
34	A gradient relationship between low birth weight and IQ: A meta-analysis. <i>Scientific Reports</i> , 2017, 7, 18035.	3.3	78
35	Association analysis of genetic variant of rs13331 in PSD95 gene with autism spectrum disorders: A case-control study in a Chinese population. <i>Journal of Huazhong University of Science and Technology [Medical Sciences]</i> , 2016, 36, 285-288.	1.0	6
36	Descriptive epidemiology of prenatal and perinatal risk factors in a Chinese population with reading disorder. <i>Scientific Reports</i> , 2016, 6, 36697.	3.3	37

#	ARTICLE	IF	CITATIONS
37	Opposite Associations between Individual KIAA0319 Polymorphisms and Developmental Dyslexia Risk across Populations: A Stratified Meta-Analysis by the Study Population. <i>Scientific Reports</i> , 2016, 6, 30454.	3.3	17
38	Genetic variant in DIP2A gene is associated with developmental dyslexia in Chinese population. <i>American Journal of Medical Genetics Part B: Neuropsychiatric Genetics</i> , 2016, 171, 203-208.	1.7	34
39	The Roles of Genes in the Neuronal Migration and Neurite Outgrowth Network in Developmental Dyslexia: Single- and Multiple-Risk Genetic Variants. <i>Molecular Neurobiology</i> , 2016, 53, 3967-3975.	4.0	43
40	Bladder neck preservation improves time to continence after radical prostatectomy: a systematic review and meta-analysis. <i>Oncotarget</i> , 2016, 7, 67463-67475.	1.8	60
41	Genetic Variant in MTRR, but Not MTR, Is Associated with Risk of Congenital Heart Disease: An Integrated Meta-Analysis. <i>PLoS ONE</i> , 2014, 9, e99609.	2.5	24
42	Dietary Mushroom Intake May Reduce the Risk of Breast Cancer: Evidence from a Meta-Analysis of Observational Studies. <i>PLoS ONE</i> , 2014, 9, e93437.	2.5	40
43	Does long time spending on the electronic devices affect the reading abilities? A cross-sectional study among Chinese school-aged children. <i>Research in Developmental Disabilities</i> , 2014, 35, 3645-3654.	2.2	23
44	A commonly carried genetic variant, rs9616915, in SHANK3 gene is associated with a reduced risk of autism spectrum disorder: replication in a Chinese population. <i>Molecular Biology Reports</i> , 2014, 41, 1591-1595.	2.3	13
45	Meta-analysis of the Association Between DCDC2 Polymorphisms and Risk of Dyslexia. <i>Molecular Neurobiology</i> , 2013, 47, 435-442.	4.0	24
46	A near-infrared brain function study of Chinese dyslexic children. <i>Neurocase</i> , 2013, 19, 382-389.	0.6	8
47	Prevalence and Associated Risk Factors of Dyslexic Children in a Middle-Sized City of China: A Cross-Sectional Study. <i>PLoS ONE</i> , 2013, 8, e56688.	2.5	55
48	Genetic variant in KIAA0319, but not in DYX1C1, is associated with risk of dyslexia: An integrated meta-analysis. <i>American Journal of Medical Genetics Part B: Neuropsychiatric Genetics</i> , 2012, 159B, 970-976.	1.7	38
49	The Prevalence and Associated Risk Factors of Children With Reading Disabilities in a Multiethnic City: A Cross-Sectional Study. <i>Frontiers in Pediatrics</i> , 0, 10, .	1.9	2
