#	ARTICLE	IF	CITATIONS
1	Fostering Coexistence Between People and Large Carnivores in Africa: Using a Theory of Change to Identify Pathways to Impact and Their Underlying Assumptions. <i>Frontiers in Conservation Science</i> , 2022, 2, .	1.9	11
2	The Coexistence Potential of Different Wildlife Conservation Frameworks in a Historical Perspective. <i>Frontiers in Conservation Science</i> , 2022, 2, .	1.9	8
3	Smartphone app reveals that lynx avoid human recreationists on local scale, but not home range scale. <i>Scientific Reports</i> , 2022, 12, 4787.	3.3	7
4	Evaluating expert-based habitat suitability information of terrestrial mammals with GPS-tracking data. <i>Global Ecology and Biogeography</i> , 2022, 31, 1526-1541.	5.8	6
5	Tales that were not included in the Jungle Book!. <i>World Development Perspectives</i> , 2022, 26, 100420.	2.0	0
6	Extreme home range sizes among Eurasian lynx at the northern edge of their biogeographic range. <i>Ecology and Evolution</i> , 2021, 11, 5001-5009.	1.9	7
7	Sharing Spaces and Entanglements With Big Cats: The Warli and Their Waghoba in Maharashtra, India. <i>Frontiers in Conservation Science</i> , 2021, 2, .	1.9	13
8	Body size and digestive system shape resource selection by ungulates: A cross-taxa test of the forage maturation hypothesis. <i>Ecology Letters</i> , 2021, 24, 2178-2191.	6.4	19
9	Effects of camera trap placement and number on detection of members of a mammalian assemblage. <i>Ecosphere</i> , 2021, 12, e03662.	2.2	16
10	Post-release Movement Behaviour and Survival of Kulan Reintroduced to the Steppes and Deserts of Central Kazakhstan. <i>Frontiers in Conservation Science</i> , 2021, 2, .	1.9	5
11	Coexistence of large mammals and humans is possible in Europe's anthropogenic landscapes. <i>IScience</i> , 2021, 24, 103083.	4.1	16
12	Camera trap records of leucistic Eurasian badgers (<i>Meles meles</i>) in central Norway. <i>Ecology and Evolution</i> , 2021, 11, 12902-12907.	1.9	6
13	Ecological correlates of large carnivore depredation on sheep in Europe. <i>Global Ecology and Conservation</i> , 2021, 30, e01798.	2.1	12
14	Identifying and correcting spatial bias in opportunistic citizen science data for wild ungulates in Norway. <i>Ecology and Evolution</i> , 2021, 11, 15191-15204.	1.9	13
15	Heuristics for the sustainable harvest of wildlife in stochastic social-ecological systems. <i>PLoS ONE</i> , 2021, 16, e0260159.	2.5	0
16	Diverse Locations and a Long History: Historical Context for Urban Leopards (<i>Panthera pardus</i>) in the Early Anthropocene From Seoul, Korea. <i>Frontiers in Conservation Science</i> , 2021, 2, .	1.9	1
17	Individual Movement - Sequence Analysis Method (IM-SAM): characterizing spatio-temporal patterns of animal habitat use across landscapes. <i>International Journal of Geographical Information Science</i> , 2020, 34, 1530-1551.	4.8	12
18	Harvest models of small populations of a large carnivore using Bayesian forecasting. <i>Ecological Applications</i> , 2020, 30, e02063.	3.8	10

#	ARTICLE	IF	CITATIONS
19	Using by-catch data from wildlife surveys to quantify climatic parameters and timing of phenology for plants and animals using camera traps. <i>Remote Sensing in Ecology and Conservation</i> , 2020, 6, 129-140.	4.3	27
20	Caching Behavior of Large Prey by Eurasian Lynx: Quantifying the Anti-Scavenging Benefits. <i>Diversity</i> , 2020, 12, 350.	1.7	6
21	Dynamics of Gastro-Intestinal Strongyle Parasites in a Group of Translocated, Wild-Captured Asiatic Wild Asses in Kazakhstan. <i>Frontiers in Veterinary Science</i> , 2020, 7, 598371.	2.2	3
22	Lack of Cascading Effects of Eurasian Lynx Predation on Roe Deer to Soil and Plant Nutrients. <i>Diversity</i> , 2020, 12, 352.	1.7	7
23	Can cultural ecosystem services contribute to satisfying basic human needs? A case study from the Lofoten archipelago, northern Norway. <i>Applied Geography</i> , 2020, 120, 102229.	3.7	23
24	Selective removal of problem individuals as an environmentally responsible approach for managing shark bites on humans. <i>Ocean and Coastal Management</i> , 2020, 194, 105266.	4.4	4
25	European agreements for nature conservation need to explicitly address wolf-dog hybridisation. <i>Biological Conservation</i> , 2020, 248, 108525.	4.1	28
26	The impact of human land use and landscape productivity on population dynamics of red fox in southeastern Norway. <i>Mammal Research</i> , 2020, 65, 503-516.	1.3	18
27	The challenges and opportunities of coexisting with wild ungulates in the human-dominated landscapes of Europe's Anthropocene. <i>Biological Conservation</i> , 2020, 244, 108500.	4.1	128
28	Conservation professionals' views on governing for coexistence with large carnivores. <i>Biological Conservation</i> , 2020, 248, 108668.	4.1	11
29	Wave-like Patterns of Plant Phenology Determine Ungulate Movement Tactics. <i>Current Biology</i> , 2020, 30, 3444-3449.e4.	3.9	52
30	Parturition dates in wild Eurasian lynx: evidence of a second oestrus?. <i>Mammalian Biology</i> , 2020, 100, 549-552.	1.5	3
31	Exploratory and confirmatory research in the open science era. <i>Journal of Applied Ecology</i> , 2020, 57, 842-847.	4.0	26
32	Ungulate management in European national parks: Why a more integrated European policy is needed. <i>Journal of Environmental Management</i> , 2020, 260, 110068.	7.8	33
33	Hunters as citizen scientists: Contributions to biodiversity monitoring in Europe. <i>Global Ecology and Conservation</i> , 2020, 23, e01077.	2.1	25
34	The impact of leopards (<i>Panthera pardus</i>) on livestock losses and human injuries in a human-use landscape in Maharashtra, India. <i>PeerJ</i> , 2020, 8, e8405.	2.0	8
35	The leopard that learnt from the cat and other narratives of carnivore-human coexistence in northern India. <i>People and Nature</i> , 2019, 1, 376-386.	3.7	25
36	Eurasian lynx fitness shows little variation across Scandinavian human-dominated landscapes. <i>Scientific Reports</i> , 2019, 9, 8903.	3.3	15

#	ARTICLE	IF	CITATIONS
37	Who are legitimate stakeholders? National and local perceptions of environmental change in the Lofoten islands, Norway. <i>Polar Geography</i> , 2019, 42, 236-252.	1.9	1
38	Framing pictures: A conceptual framework to identify and correct for biases in detection probability of camera traps enabling multi-species comparison. <i>Ecology and Evolution</i> , 2019, 9, 2320-2336.	1.9	83
39	The search for novelty continues for rewilding. <i>Biological Conservation</i> , 2019, 236, 584-585.	4.1	2
40	Integrating data from different survey types for population monitoring of an endangered species: the case of the Eld's deer. <i>Scientific Reports</i> , 2019, 9, 7766.	3.3	28
41	All carnivores are not equal in the rural people's view. Should we develop conservation plans for functional guilds or individual species in the face of conflicts?. <i>Global Ecology and Conservation</i> , 2019, 19, e00677.	2.1	13
42	Problem individuals among sharks: A response to Neff. <i>Conservation Letters</i> , 2019, 12, e12641.	5.7	3
43	Unravelling the Scientific Debate on How to Address Wolf-Dog Hybridization in Europe. <i>Frontiers in Ecology and Evolution</i> , 2019, 7, .	2.2	29
44	Right on track? Performance of satellite telemetry in terrestrial wildlife research. <i>PLoS ONE</i> , 2019, 14, e0216223.	2.5	52
45	Institutions for Achieving Human-Wildlife Coexistence. , 2019, , 288-310.		7
46	Towards Human-Wildlife Coexistence through the Integration of Human and Natural Systems. , 2019, , 384-413.		10
47	Mainstreaming human and large carnivore coexistence through institutional collaboration. <i>Conservation Biology</i> , 2019, 33, 1256-1265.	4.7	49
48	Failure to coordinate management in transboundary populations hinders the achievement of national management goals: The case of wolverines in Scandinavia. <i>Journal of Applied Ecology</i> , 2019, 56, 1905-1915.	4.0	13
49	Reintroducing rewilding to restoration â€“ Rejecting the search for novelty. <i>Biological Conservation</i> , 2019, 233, 255-259.	4.1	49
50	What form of human-wildlife coexistence is mandated by legislation? A comparative analysis of international and national instruments. <i>Biodiversity and Conservation</i> , 2019, 28, 1729-1741.	2.6	18
51	Top-down control of ecosystems and the case for rewilding: does it all add up?. , 2019, , 325-354.		6
52	Bringing back large carnivores to rewild landscapes. , 2019, , 248-279.		4
53	Species-specific spatiotemporal patterns of leopard, lion and tiger attacks on humans. <i>Journal of Applied Ecology</i> , 2019, 56, 585-593.	4.0	24
54	Individual shark profiling: An innovative and environmentally responsible approach for selectively managing human fatalities. <i>Conservation Letters</i> , 2019, 12, e12612.	5.7	13

#	ARTICLE	IF	CITATIONS
55	Large herbivore migration plasticity along environmental gradients in Europe: life-history traits modulate forage effects. <i>Oikos</i> , 2019, 128, 416-429.	2.7	44
56	“All about the Scenery” Tourists’ Perceptions of Cultural Ecosystem Services in the Lofoten Islands, Norway. <i>Arctic</i> , 2019, 72, 1-12.	0.4	3
57	Local perceptions of jaguar conservation and environmental justice in Goiás, Mato Grosso and Roraima states (Brazil). <i>Global Ecology and Conservation</i> , 2018, 13, e00369.	2.1	11
58	Moving in the Anthropocene: Global reductions in terrestrial mammalian movements. <i>Science</i> , 2018, 359, 466-469.	12.6	783
59	Conservation professionals agree on challenges to coexisting with large carnivores but not on solutions. <i>Biological Conservation</i> , 2018, 218, 223-232.	4.1	103
60	Truly sedentary? The multi-range tactic as a response to resource heterogeneity and unpredictability in a large herbivore. <i>Oecologia</i> , 2018, 187, 47-60.	2.0	24
61	Challenges for transboundary management of a European brown bear population. <i>Global Ecology and Conservation</i> , 2018, 16, e00488.	2.1	40
62	Genetic characterization of free-ranging Asiatic wild ass in Central Asia as a basis for future conservation strategies. <i>Conservation Genetics</i> , 2018, 19, 1169-1184.	1.5	6
63	Migration in geographic and ecological space by a large herbivore. <i>Ecological Monographs</i> , 2017, 87, 297-320.	5.4	46
64	Complacency or resilience? Perceptions of environmental and social change in Lofoten and Vesterålen in northern Norway. <i>Ocean and Coastal Management</i> , 2017, 138, 29-37.	4.4	15
65	Can we save large carnivores without losing large carnivore science?. <i>Food Webs</i> , 2017, 12, 64-75.	1.2	59
66	Ecosystem Services and Cultural Values as Building Blocks for “The Good life”. A Case Study in the Community of RÅst, Lofoten Islands, Norway. <i>Ecological Economics</i> , 2017, 140, 166-176.	5.7	58
67	Large carnivore science: non-experimental studies are useful, but experiments are better. <i>Food Webs</i> , 2017, 13, 49-50.	1.2	7
68	Plastic response by a small cervid to supplemental feeding in winter across a wide environmental gradient. <i>Ecosphere</i> , 2017, 8, e01629.	2.2	31
69	Don't forget to look down – Collaborative approaches to predator conservation. <i>Biological Reviews</i> , 2017, 92, 2157-2163.	10.4	157
70	The endangered Arctic fox in Norway – the failure and success of captive breeding and reintroduction. <i>Polar Research</i> , 2017, 36, 9.	1.6	42
71	International Wildlife Law: Understanding and Enhancing Its Role in Conservation. <i>BioScience</i> , 2017, 67, 784-790.	4.9	57
72	Interpreting “favourable conservation status” for large carnivores in Europe: how many are needed and how many are wanted?. <i>Biodiversity and Conservation</i> , 2017, 26, 37-61.	2.6	45

#	ARTICLE	IF	CITATIONS
73	Temporal variation in habitat selection breaks the catch ² of spatially contrasting predation risk from multiple predators. <i>Oikos</i> , 2017, 126, 624-632.	2.7	32
74	The cost of migratory prey: seasonal changes in semi-domestic reindeer distribution influences breeding success of Eurasian lynx in northern Norway. <i>Oikos</i> , 2017, 126, 642-650.	2.7	12
75	Norway's Wolf Policy and the Bern Convention on European Wildlife: Avoiding the "Manifestly Absurd" <i>Journal of International Wildlife Law and Policy</i> , 2017, 20, 155-167.	0.5	21
76	The range of the mange: Spatiotemporal patterns of sarcoptic mange in red foxes (<i>Vulpes vulpes</i>) as revealed by camera trapping. <i>PLoS ONE</i> , 2017, 12, e0176200.	2.5	34
77	Tourism livelihoods in Sm ^Å la, Norway. <i>Journal of Marine and Island Cultures</i> , 2017, 6, .	0.2	0
78	Co-Adaptation Is Key to Coexisting with Large Carnivores. <i>Trends in Ecology and Evolution</i> , 2016, 31, 575-578.	8.7	384
79	Intensity of space use reveals conditional sex-specific effects of prey and conspecific density on home range size. <i>Ecology and Evolution</i> , 2016, 6, 2957-2967.	1.9	35
80	Sharing data improves monitoring of trans-boundary populations: the case of wolverines in central Scandinavia. <i>Wildlife Biology</i> , 2016, 22, 95-106.	1.4	24
81	Mortality and lamb body mass growth in free-ranging domestic sheep – environmental impacts including lethal and non-lethal impacts of predators. <i>Ecography</i> , 2016, 39, 763-773.	4.5	7
82	A cat among the dogs: leopard (<i>Panthera pardus</i>) diet in a human-dominated landscape in western Maharashtra, India. <i>Oryx</i> , 2016, 50, 156-162.	1.0	108
83	How many routes lead to migration? Comparison of methods to assess and characterize migratory movements. <i>Journal of Animal Ecology</i> , 2016, 85, 54-68.	2.8	89
84	Perceptions of environmental justice and the conflict surrounding large carnivore management in Norway – Implications for conflict management. <i>Biological Conservation</i> , 2016, 203, 197-206.	4.1	43
85	Predation or scavenging? Prey body condition influences decision-making in a facultative predator, the wolverine. <i>Ecosphere</i> , 2016, 7, e01407.	2.2	53
86	Mainstreaming Coexistence with Wildlife: Reply to Gallagher. <i>Trends in Ecology and Evolution</i> , 2016, 31, 818-819.	8.7	4
87	Refugee fences fragment wildlife. <i>Nature</i> , 2016, 529, 156-156.	27.8	15
88	Solutions for Archiving Data in Long-Term Studies: A Reply to Whitlock et al.. <i>Trends in Ecology and Evolution</i> , 2016, 31, 85-87.	8.7	10
89	Predators That Kill Humans: Myth, Reality, Context and the Politics of Wolf Attacks on People. , 2016, , 357-371.		18
90	Border Security Fencing and Wildlife: The End of the Transboundary Paradigm in Eurasia?. <i>PLoS Biology</i> , 2016, 14, e1002483.	5.6	121

#	ARTICLE	IF	CITATIONS
91	Mapping value plurality towards ecosystem services in the case of Norwegian wildlife management: A Q analysis. <i>Ecological Economics</i> , 2015, 118, 198-206.	5.7	39
92	Life-history attributes and resource dynamics determine intraspecific home-range sizes in Carnivora. <i>Remote Sensing in Ecology and Conservation</i> , 2015, 1, 39-50.	4.3	34
93	Defining scales for managing biodiversity and natural resources in the face of conflicts. , 2015, , 212-225.		8
94	Eurasian lynx natal den site and maternal home-range selection in multi-use landscapes of Norway. <i>Journal of Zoology</i> , 2015, 297, 87-98.	1.7	26
95	Framing the relationship between people and nature in the context of European conservation. <i>Conservation Biology</i> , 2015, 29, 978-985.	4.7	114
96	Body mass relationships affect the age structure of predation across carnivore-ungulate systems: a review and synthesis. <i>Mammal Review</i> , 2015, 45, 253-266.	4.8	16
97	Carnivore coexistence: Wilderness not required. <i>Science</i> , 2015, 348, 871-872.	12.6	45
98	Sheep farming and large carnivores: What are the factors influencing claimed losses?. <i>Ecosphere</i> , 2015, 6, 1-17.	2.2	27
99	Compensatory immigration counteracts contrasting conservation strategies of wolverines (<i>Gulo</i>) Tj ETQq1 1 0.784314 rgBT /Overlo	4.1	31
100	Eurasian lynx habitat selection in human-modified landscape in Norway: Effects of different human habitat modifications and behavioral states. <i>Biological Conservation</i> , 2015, 191, 291-299.	4.1	40
101	Legal implications of range expansions in a terrestrial carnivore: the case of the golden jackal (<i>Canis</i>) Tj ETQq1 1 0.784314 rgBT /Overlo	2.6	108
102	Using Zero-Inflated Models to Predict the Relative Distribution and Abundance of Roe Deer Over Very Large Spatial Scales. <i>Annales Zoologici Fennici</i> , 2015, 52, 66-76.	0.6	9
103	Tolerance to anthropogenic disturbance by a large carnivore: the case of Eurasian lynx in south-eastern Norway. <i>Animal Conservation</i> , 2015, 18, 271-278.	2.9	33
104	Institutional stakeholders'™ views on jaguar conservation issues in central Brazil. <i>Global Ecology and Conservation</i> , 2015, 3, 814-823.	2.1	9
105	Landscape of risk to roe deer imposed by lynx and different human hunting tactics. <i>European Journal of Wildlife Research</i> , 2015, 61, 831-840.	1.4	31
106	Archiving Primary Data: Solutions for Long-Term Studies. <i>Trends in Ecology and Evolution</i> , 2015, 30, 581-589.	8.7	98
107	Bringing Large Mammals Back: Large Carnivores in Europe. , 2015, , 67-84.		26
108	Adaptable Neighbours: Movement Patterns of GPS-Collared Leopards in Human Dominated Landscapes in India. <i>PLoS ONE</i> , 2014, 9, e112044.	2.5	93

#	ARTICLE	IF	CITATIONS
109	Activity Patterns of Eurasian Lynx Are Modulated by Light Regime and Individual Traits over a Wide Latitudinal Range. <i>PLoS ONE</i> , 2014, 9, e114143.	2.5	58
110	A catch-22 conflict: Access to semi-domestic reindeer modulates Eurasian lynx depredation on domestic sheep. <i>Biological Conservation</i> , 2014, 179, 116-122.	4.1	10
111	A one night stand? Reproductive excursions of female roe deer as a breeding dispersal tactic. <i>Oecologia</i> , 2014, 176, 431-443.	2.0	32
112	The risks of learning: confounding detection and demographic trend when using count-based indices for population monitoring. <i>Ecology and Evolution</i> , 2014, 4, 4637-4648.	1.9	14
113	Recovery of large carnivores in Europe's modern human-dominated landscapes. <i>Science</i> , 2014, 346, 1517-1519.	12.6	1,319
114	The spatio-temporal distribution of wild and domestic ungulates modulates lynx kill rates in a multi-use landscape. <i>Journal of Zoology</i> , 2014, 292, 175-183.	1.7	45
115	Living and dying in a multi-predator landscape of fear: roe deer are squeezed by contrasting pattern of predation risk imposed by lynx and humans. <i>Oikos</i> , 2014, 123, 641-651.	2.7	154
116	One size fits all: Eurasian lynx females share a common optimal litter size. <i>Journal of Animal Ecology</i> , 2014, 83, 107-115.	2.8	20
117	Warring brothers: The complex interactions between wolves (<i>Canis lupus</i>) and dogs (<i>Canis familiaris</i>) in a conservation context. <i>Biological Conservation</i> , 2014, 171, 232-245.	4.1	71
118	Lynx predation on semi-domestic reindeer: do age and sex matter?. <i>Journal of Zoology</i> , 2014, 292, 56-63.	1.7	14
119	Movement and Activity Pattern of a Collared Tigress in a Human-Dominated Landscape in Central India. <i>Tropical Conservation Science</i> , 2014, 7, 75-86.	1.2	22
120	Physiologically Persistent Corpora lutea in Eurasian Lynx (<i>Lynx lynx</i>) – Longitudinal Ultrasound and Endocrine Examinations Intra-Vitam. <i>PLoS ONE</i> , 2014, 9, e90469.	2.5	27
121	The effect of rapid social changes during post-communist transition on perceptions of the human - wolf relationships in Macedonia and Kyrgyzstan. <i>Pastoralism</i> , 2013, 3, 4.	1.0	23
122	Predators, stewards, or sportsmen – how do Norwegian hunters perceive their role in carnivore management?. <i>International Journal of Biodiversity Science, Ecosystem Services & Management</i> , 2013, 9, 239-248.	2.9	23
123	Seasonality, weather and climate affect home range size in roe deer across a wide latitudinal gradient within Europe. <i>Journal of Animal Ecology</i> , 2013, 82, 1326-1339.	2.8	133
124	Is hunting large carnivores different from hunting ungulates? Some judgments made by Norwegian hunters. <i>Journal for Nature Conservation</i> , 2013, 21, 326-333.	1.8	12
125	An ontological crisis? A review of large felid conservation in India. <i>Biodiversity and Conservation</i> , 2013, 22, 2665-2681.	2.6	32
126	Understanding and managing conservation conflicts. <i>Trends in Ecology and Evolution</i> , 2013, 28, 100-109.	8.7	934
