XIIELI VANO

#	Article	IF	CITATIONS
1	A comprehensive 1000 Genomes–based genome-wide association meta-analysis of coronary artery disease. Nature Genetics, 2015, 47, 1121-1130.	21.4	2,054
2	Predicting the 10-Year Risks of Atherosclerotic Cardiovascular Disease in Chinese Population. Circulation, 2016, 134, 1430-1440.	1.6	377
3	Long-Term Exposure to Fine Particulate Matter and Cardiovascular Disease inÂChina. Journal of the American College of Cardiology, 2020, 75, 707-717.	2.8	164
4	Sugar sweetened beverages consumption and risk of coronary heart disease: A meta-analysis of prospective studies. Atherosclerosis, 2014, 234, 11-16.	0.8	159
5	Genome-wide association study in Chinese identifies novel loci for blood pressure and hypertension. Human Molecular Genetics, 2015, 24, 865-874.	2.9	157
6	Exome chip meta-analysis identifies novel loci and East Asian–specific coding variants that contribute to lipid levels and coronary artery disease. Nature Genetics, 2017, 49, 1722-1730.	21.4	129
7	Long term exposure to ambient fine particulate matter and incidence of stroke: prospective cohort study from the China-PAR project. BMJ, The, 2019, 367, 16720.	6.0	127
8	Long-Term Exposure to Fine Particulate Matter and Hypertension Incidence in China. Hypertension, 2019, 73, 1195-1201.	2.7	88
9	The 17-y spatiotemporal trend of PM _{2.5} and its mortality burden in China. Proceedings of the National Academy of Sciences of the United States of America, 2020, 117, 25601-25608.	7.1	83
10	Association of Lipids With Ischemic and Hemorrhagic Stroke. Stroke, 2019, 50, 3376-3384.	2.0	79
11	Long-term exposure to ambient fine particulate matter and incidence of diabetes in China: A cohort study. Environment International, 2019, 126, 568-575.	10.0	76
12	Ideal cardiovascular health and incidence of atherosclerotic cardiovascular disease among Chinese adults: the China-PAR project. Science China Life Sciences, 2018, 61, 504-514.	4.9	71
13	Potential Cardiovascular and Total Mortality Benefits of Air Pollution Control in Urban China. Circulation, 2017, 136, 1575-1584.	1.6	48
14	Long-Term Effects of High Exposure to Ambient Fine Particulate Matter on Coronary Heart Disease Incidence: A Population-Based Chinese Cohort Study. Environmental Science & Technology, 2020, 54, 6812-6821.	10.0	45
15	Associations of long-term exposure to ambient PM2.5 with mortality in Chinese adults: A pooled analysis of cohorts in the China-PAR project. Environment International, 2020, 138, 105589.	10.0	45
16	Common variants at 12q24 are associated with drinking behavior in Han Chinese. American Journal of Clinical Nutrition, 2013, 97, 545-551.	4.7	42
17	Tea consumption and the risk of atherosclerotic cardiovascular disease and all-cause mortality: The China-PAR project. European Journal of Preventive Cardiology, 2020, 27, 1956-1963.	1.8	41
18	Chronic Effects of High Fine Particulate Matter Exposure on Lung Cancer in China. American Journal of Respiratory and Critical Care Medicine, 2020, 202, 1551-1559.	5.6	40

XUELI YANG

#	Article	IF	CITATIONS
19	Incidence of type 2 diabetes and number of events attributable to abdominal obesity in <scp>C</scp> hina: A cohort study. Journal of Diabetes, 2016, 8, 190-198.	1.8	37
20	Predicting 10-Year and Lifetime Stroke Risk in Chinese Population. Stroke, 2019, 50, 2371-2378.	2.0	33
21	Usefulness of Low-Density Lipoprotein Cholesterol andÂNon–High-Density Lipoprotein Cholesterol asÂPredictors of Cardiovascular Disease in Chinese. American Journal of Cardiology, 2015, 116, 1063-1070.	1.6	31
22	Long-term exposure to ambient PM2.5 and stroke mortality among urban residents in northern China. Ecotoxicology and Environmental Safety, 2021, 213, 112063.	6.0	28
23	Association of BMI with total mortality and recurrent stroke among stroke patients: A meta-analysis of cohort studies. Atherosclerosis, 2016, 253, 94-101.	0.8	25
24	Associations between ambient air pollutants and blood pressure among children and adolescents: A systemic review and meta-analysis. Science of the Total Environment, 2021, 785, 147279.	8.0	24
25	Genetic Predisposition to Higher Blood Pressure Increases Risk of Incident Hypertension and Cardiovascular Diseases in Chinese. Hypertension, 2015, 66, 786-792.	2.7	22
26	Associations of egg consumption with incident cardiovascular disease and all-cause mortality. Science China Life Sciences, 2020, 63, 1317-1327.	4.9	22
27	Association between long-term exposure to fine particulate matter and diabetic retinopathy among diabetic patients: A national cross-sectional study in China. Environment International, 2021, 154, 106568.	10.0	22
28	A Gene-Based Analysis of Variants in the Serum/Glucocorticoid Regulated Kinase (SGK) Genes with Blood Pressure Responses to Sodium Intake: The GenSalt Study. PLoS ONE, 2014, 9, e98432.	2.5	21
29	Development and Validation of a Polygenic Risk Score for Stroke in the Chinese Population. Neurology, 2021, 97, e619-e628.	1.1	19
30	Associations of Epithelial Sodium Channel Genes With Blood Pressure Changes and Hypertension Incidence: The GenSalt Study. American Journal of Hypertension, 2014, 27, 1370-1376.	2.0	16
31	Fruit and vegetable consumption, cardiovascular disease, and all-cause mortality in China. Science China Life Sciences, 2022, 65, 119-128.	4.9	16
32	The association between long-term exposure to ambient fine particulate matter and glaucoma: A nation-wide epidemiological study among Chinese adults. International Journal of Hygiene and Environmental Health, 2021, 238, 113858.	4.3	16
33	Coding-sequence variants are associated with blood lipid levels in 14,473 Chinese. Human Molecular Genetics, 2016, 25, 4107-4116.	2.9	14
34	Associations Between Genetic Variants of NADPH Oxidase-Related Genes and Blood Pressure Responses to Dietary Sodium Intervention: The GenSalt Study. American Journal of Hypertension, 2017, 30, 427-434.	2.0	14
35	Long-term impacts of ambient fine particulate matter exposure on overweight or obesity in Chinese adults: The China-PAR project. Environmental Research, 2021, 201, 111611.	7.5	14
36	Down regulation of GALNT3 contributes to endothelial cell injury via activation of p38 MAPK signaling pathway. Atherosclerosis, 2016, 245, 94-100.	0.8	13

XUELI YANG

#	Article	IF	CITATIONS
37	Association between long-term exposure to Sulfur dioxide pollution and hypertension incidence in northern China: a 12-year cohort study. Environmental Science and Pollution Research, 2020, 27, 21826-21835.	5.3	13
38	Causal associations of alcohol consumption with cardiovascular diseases and all-cause mortality among Chinese males. American Journal of Clinical Nutrition, 2022, 116, 771-779.	4.7	13
39	Associations of Variants in the <i>CACNA1A</i> and <i>CACNA1C</i> Genes With Longitudinal Blood Pressure Changes and Hypertension Incidence: The GenSalt Study. American Journal of Hypertension, 2016, 29, 1301-1306.	2.0	12
40	Associations of behaviors, biological phenotypes and cardiovascular health with risks of stroke and stroke subtypes: A prospective cohort study. EClinicalMedicine, 2021, 33, 100791.	7.1	12
41	Validating World Health Organization cardiovascular disease risk charts and optimizing risk assessment in China. The Lancet Regional Health - Western Pacific, 2021, 8, 100096.	2.9	12
42	Adverse associations of sedentary behavior with cancer incidence and all-cause mortality: A prospective cohort study. Journal of Sport and Health Science, 2021, 10, 560-569.	6.5	12
43	Impact of healthy lifestyles on cancer risk in the Chinese population. Cancer, 2019, 125, 2099-2106.	4.1	11
44	Long-term exposure to fine particulate matter modifies the association between physical activity and hypertension incidence. Journal of Sport and Health Science, 2022, 11, 708-715.	6.5	10
45	Association of fasting glucose levels with incident atherosclerotic cardiovascular disease: An 8â€year followâ€up study in a Chinese population. Journal of Diabetes, 2017, 9, 14-23.	1.8	9
46	Associations of Maternal rs1801131 Genotype in MTHFR and Serum Folate and Vitamin B12 with Gestational Diabetes Mellitus in Chinese Pregnant Women. Nutrients, 2022, 14, 1169.	4.1	9
47	Impacts of Short-Term Fine Particulate Matter Exposure on Blood Pressure Were Modified by Control Status and Treatment in Hypertensive Patients. Hypertension, 2021, 78, 174-183.	2.7	7
48	Benefits of active commuting on cardiovascular health modified by ambient fine particulate matter in China: A prospective cohort study. Ecotoxicology and Environmental Safety, 2021, 224, 112641.	6.0	7
49	Declines in heart rate variability associated with short-term PM2.5 exposure were modified by blood pressure control and treatment: A multi-city panel study in China. Environmental Pollution, 2021, 287, 117572.	7.5	6
50	Genome-Wide Linkage and Regional Association Study of Blood Pressure Response to the Cold Pressor Test in Han Chinese. Circulation: Cardiovascular Genetics, 2014, 7, 521-528.	5.1	5
51	Associations of Endothelial System Genes With Blood Pressure Changes and Hypertension Incidence: The GenSalt Study. American Journal of Hypertension, 2015, 28, 780-788.	2.0	5
52	Association of short-term fine particulate matter exposure with pulmonary function in populations at intermediate to high-risk of cardiovascular disease: A panel study in three Chinese cities. Ecotoxicology and Environmental Safety, 2021, 220, 112397.	6.0	5
53	Ambulatory blood pressure and blood pressure load responses to low sodium intervention in Han Chinese population. Clinical and Experimental Hypertension, 2015, 37, 551-556.	1.3	4

#	Article	lF	CITATIONS
55	Central Blood Pressure Responses to Dietary Sodium and Potassium Interventions. American Journal of Hypertension, 2018, 31, 582-589.	2.0	3
56	Genetic variants of cGMP-dependent protein kinase genes and salt sensitivity of blood pressure: the GenSalt study. Journal of Human Hypertension, 2019, 33, 62-68.	2.2	3
57	Long-term exposure to high particulate matter pollution and incident hypertension: a 12-year cohort study in northern China. Journal of Human Hypertension, 2021, 35, 1129-1138.	2.2	3
58	Sex Differences in Cardiovascular Risk Associated With Long-Term PM2.5 Exposure: A Systematic Review and Meta-Analysis of Cohort Studies. Frontiers in Public Health, 2022, 10, 802167.	2.7	3
59	Associations Between Genetic Variants of the Natriuretic Peptide System and Blood Pressure Response to Dietary Sodium Intervention: The GenSalt Study. American Journal of Hypertension, 2016, 29, 397-404.	2.0	2
60	Longitudinal association of egg consumption habits with blood lipids among Chinese adults. Chinese Medical Journal, 2021, Publish Ahead of Print, .	2.3	1
61	Impacts of PM _{2.5} on Ambulatory Blood Pressure Monitoring Indicators Attenuated by Blood Pressure Control Status and Treatment — Two Cities and Two Municipalities, China, 2017â^'2019. China CDC Weekly, 2021, 3, 948-953.	2.3	1
