#	ARTICLE	IF	CITATIONS
1	Associations Between Eight Earth Observationâ€Derived Climate Variables and Enteropathogen Infection: An Independent Participant Data Metaâ€Analysis of Surveillance Studies With Broad Spectrum Nucleic Acid Diagnostics. <i>GeoHealth</i> , 2022, 6, e2021GH000452.	4.0	24
2	Intestinal Colonization With <i>Bifidobacterium longum</i> Subspecies Is Associated With Length at Birth, Exclusive Breastfeeding, and Decreased Risk of Enteric Virus Infections, but Not With Histo-Blood Group Antigens, Oral Vaccine Response or Later Growth in Three Birth Cohorts. <i>Frontiers in Pediatrics</i> , 2022, 10, 804798.	1.9	8
3	La Niña weather impacts dietary patterns and dietary diversity among children in the Peruvian Amazon. <i>Public Health Nutrition</i> , 2021, 24, 3477-3487.	2.2	5
4	Not water, sanitation and hygiene practice, but timing of stunting is associated with recovery from stunting at 24 months: results from a multi-country birth cohort study. <i>Public Health Nutrition</i> , 2021, 24, 1428-1437.	2.2	5
5	Higher Energy and Zinc Intakes from Complementary Feeding Are Associated with Decreased Risk of Undernutrition in Children from South America, Africa, and Asia. <i>Journal of Nutrition</i> , 2021, 151, 170-178.	2.9	7
6	Single-step RT-PCR assay for dual genotyping of GI and GII norovirus strains. <i>Journal of Clinical Virology</i> , 2021, 134, 104689.	3.1	34
7	Homotypic and Heterotypic Protection and Risk of Reinfection Following Natural Norovirus Infection in a Highly Endemic Setting. <i>Clinical Infectious Diseases</i> , 2021, 72, 222-229.	5.8	25
8	Associations among Household Animal Ownership, Infrastructure, and Hygiene Characteristics with Source Attribution of Household Fecal Contamination in Peri-Urban Communities of Iquitos, Peru. <i>American Journal of Tropical Medicine and Hygiene</i> , 2021, 104, 372-381.	1.4	4
9	Genomic Characterization of <i>Campylobacter jejuni</i> Adapted to the Guinea Pig (<i>Cavia porcellus</i>) Host. <i>Frontiers in Cellular and Infection Microbiology</i> , 2021, 11, 607747.	3.9	5
10	Enterotoxigenic <i>Escherichia coli</i> (ETEC) vaccines: Priority activities to enable product development, licensure, and global access. <i>Vaccine</i> , 2021, 39, 4266-4277.	3.8	60
11	Diarrhea as a Potential Cause and Consequence of Reduced Gut Microbial Diversity Among Undernourished Children in Peru. <i>Clinical Infectious Diseases</i> , 2020, 71, 989-999.	5.8	35
12	Gut Microbiota Features Associated With <i>Campylobacter</i> Burden and Postnatal Linear Growth Deficits in a Peruvian Birth Cohort. <i>Clinical Infectious Diseases</i> , 2020, 71, 1000-1007.	5.8	25
13	Factors associated with head circumference and indices of cognitive development in early childhood. <i>BMJ Global Health</i> , 2020, 5, e003427.	4.7	14
14	Intestinal and Extra-Intestinal Manifestations of <i>Campylobacter</i> in the Immunocompromised Host. Current Treatment Options in <i>Infectious Diseases</i> , 2020, 12, 361-374.	1.9	4
15	Validation of microbial source tracking markers for the attribution of fecal contamination in indoor-household environments of the Peruvian Amazon. <i>Science of the Total Environment</i> , 2020, 743, 140531.	8.0	8
16	Epidemiology of <i>Shigella</i> infections and diarrhea in the first two years of life using culture-independent diagnostics in 8 low-resource settings. <i>PLoS Neglected Tropical Diseases</i> , 2020, 14, e0008536.	3.0	51
17	Genomic epidemiology of <i>Campylobacter jejuni</i> associated with asymptomatic pediatric infection in the Peruvian Amazon. <i>PLoS Neglected Tropical Diseases</i> , 2020, 14, e0008533.	3.0	20
18	Associations between Household-Level Exposures and All-Cause Diarrhea and Pathogen-Specific Enteric Infections in Children Enrolled in Five Sentinel Surveillance Studies. <i>International Journal of Environmental Research and Public Health</i> , 2020, 17, 8078.	2.6	18

#	ARTICLE	IF	CITATIONS
19	Integrative Systems Praxis for Implementation Research (INSPIRE): An Implementation Methodology to Facilitate the Global Elimination of Cervical Cancer. <i>Cancer Epidemiology Biomarkers and Prevention</i> , 2020, 29, 1710-1719.	2.5	16
20	Protection From Natural Immunity Against Enteric Infections and Etiology-Specific Diarrhea in a Longitudinal Birth Cohort. <i>Journal of Infectious Diseases</i> , 2020, 222, 1858-1868.	4.0	27
21	Pathogen-Specific Impacts of the 2011-2012 La Niña-Associated Floods on Enteric Infections in the MAL-ED Peru Cohort: A Comparative Interrupted Time Series Analysis. <i>International Journal of Environmental Research and Public Health</i> , 2020, 17, 487.	2.6	26
22	Metabolic maturation in the first 2 years of life in resource-constrained settings and its association with postnatal growth. <i>Science Advances</i> , 2020, 6, eaay5969.	10.3	22
23	Genomic epidemiology of <i>Campylobacter jejuni</i> associated with asymptomatic pediatric infection in the Peruvian Amazon. <i>Access Microbiology</i> , 2020, 2, .	0.5	0
24	Optimisation, validation and field applicability of a ¹³ C-sucrose breath test to assess intestinal function in environmental enteropathy among children in resource poor settings: study protocol for a prospective study in Bangladesh, India, Kenya, Jamaica, Peru and Zambia. <i>BMJ Open</i> , 2020, 10, e035841.	1.9	2
25	Early Life Child Micronutrient Status, Maternal Reasoning, and a Nurturing Household Environment have Persistent Influences on Child Cognitive Development at Age 5 years: Results from MAL-ED. <i>Journal of Nutrition</i> , 2019, 149, 1460-1469.	2.9	20
26	Enteric dysfunction and other factors associated with attained size at 5 years: MAL-ED birth cohort study findings. <i>American Journal of Clinical Nutrition</i> , 2019, 110, 131-138.	4.7	47
27	A sparse covarying unit that describes healthy and impaired human gut microbiota development. <i>Science</i> , 2019, 365, .	12.6	136
28	Penalized regression models to select biomarkers of environmental enteric dysfunction associated with linear growth acquisition in a Peruvian birth cohort. <i>PLoS Neglected Tropical Diseases</i> , 2019, 13, e0007851.	3.0	3
29	Intestinal permeability and inflammation mediate the association between nutrient density of complementary foods and biochemical measures of micronutrient status in young children: results from the MAL-ED study. <i>American Journal of Clinical Nutrition</i> , 2019, 110, 1015-1025.	4.7	27
30	Use of earth observation-derived hydrometeorological variables to model and predict rotavirus infection (MAL-ED): a multisite cohort study. <i>Lancet Planetary Health</i> , The, 2019, 3, e248-e258.	11.4	22
31	<i>Campylobacter jejuni</i> capsule types in a Peruvian birth cohort and associations with diarrhoeal disease severity. <i>Epidemiology and Infection</i> , 2019, 147, e149.	2.1	2
32	Safety of <i>Lactobacillus Reuteri</i> DSM 17938 in Healthy Children 2-5 Years of Age. <i>Pediatric Infectious Disease Journal</i> , 2019, 38, e178-e180.	2.0	4
33	Effects of Child and Maternal Histo-Blood Group Antigen Status on Symptomatic and Asymptomatic Enteric Infections in Early Childhood. <i>Journal of Infectious Diseases</i> , 2019, 220, 151-162.	4.0	47
34	Determinants of <i>Campylobacter</i> infection and association with growth and enteric inflammation in children under 2 years of age in low-resource settings. <i>Scientific Reports</i> , 2019, 9, 17124.	3.3	27
35	A One Health approach to prevention, treatment, and control of campylobacteriosis. <i>Current Opinion in Infectious Diseases</i> , 2019, 32, 453-460.	3.1	15
36	Evolution of the <i>Bacillus Calmette-Guerin</i> Scar and Its Association with Birth and Pregnancy Characteristics in a Prospective Cohort of Infants in Iquitos, Peru. <i>American Journal of Perinatology</i> , 2019, 36, 1264-1270.	1.4	2

#	ARTICLE	IF	CITATIONS
37	Antibiotic Resistance of <i>Campylobacter</i> Species in a Pediatric Cohort Study. <i>Antimicrobial Agents and Chemotherapy</i> , 2019, 63, .	3.2	40
38	Minimally Invasive Saliva Testing to Monitor Norovirus Infection in Community Settings. <i>Journal of Infectious Diseases</i> , 2019, 219, 1234-1242.	4.0	22
39	Distribution of Capsular Types of <i>Campylobacter jejuni</i> Isolates from Symptomatic and Asymptomatic Children in Peru. <i>American Journal of Tropical Medicine and Hygiene</i> , 2019, 101, 541-548.	1.4	11
40	Social connectedness is associated with food security among peri-urban Peruvian Amazonian communities. <i>SSM - Population Health</i> , 2018, 4, 254-262.	2.7	21
41	Astrovirus Infection and Diarrhea in 8 Countries. <i>Pediatrics</i> , 2018, 141, .	2.1	50
42	Epidemiology and Risk Factors for Cryptosporidiosis in Children From 8 Low-income Sites: Results From the MAL-ED Study. <i>Clinical Infectious Diseases</i> , 2018, 67, 1660-1669.	5.8	41
43	Seasonality and within-subject clustering of rotavirus infections in an eight-site birth cohort study. <i>Epidemiology and Infection</i> , 2018, 146, 688-697.	2.1	15
44	Enteroaggregative <i>Escherichia coli</i> Subclinical Infection and Coinfections and Impaired Child Growth in the MAL-ED Cohort Study. <i>Journal of Pediatric Gastroenterology and Nutrition</i> , 2018, 66, 325-333.	1.8	32
45	Oral sampling methods are associated with differences in immune marker concentrations. <i>Laryngoscope</i> , 2018, 128, E214-E221.	2.0	3
46	Relationships among Common Illness Symptoms and the Protective Effect of Breastfeeding in Early Childhood in MAL-ED: An Eight-Country Cohort Study. <i>American Journal of Tropical Medicine and Hygiene</i> , 2018, 98, 904-912.	1.4	20
47	Use of quantitative molecular diagnostic methods to assess the aetiology, burden, and clinical characteristics of diarrhoea in children in low-resource settings: a reanalysis of the MAL-ED cohort study. <i>The Lancet Global Health</i> , 2018, 6, e1309-e1318.	6.3	251
48	Use of quantitative molecular diagnostic methods to investigate the effect of enteropathogen infections on linear growth in children in low-resource settings: longitudinal analysis of results from the MAL-ED cohort study. <i>The Lancet Global Health</i> , 2018, 6, e1319-e1328.	6.3	280
49	Food purchase patterns indicative of household food access insecurity, children's dietary diversity and intake, and nutritional status using a newly developed and validated tool in the Peruvian Amazon. <i>Food Security</i> , 2018, 10, 999-1011.	5.3	19
50	Near-Complete Genome Sequences of Several New Norovirus Genogroup II Genotypes. <i>Genome Announcements</i> , 2018, 6, .	0.8	19
51	Exploring the relationship between environmental enteric dysfunction and oral vaccine responses. <i>Future Microbiology</i> , 2018, 13, 1055-1070.	2.0	42
52	Evaluating meteorological data from weather stations, and from satellites and global models for a multi-site epidemiological study. <i>Environmental Research</i> , 2018, 165, 91-109.	7.5	62
53	Assessing development across cultures: Invariance of the Bayley-III Scales Across Seven International MAL-ED sites.. <i>School Psychology Quarterly</i> , 2018, 33, 604-614.	2.0	17
54	The other <i>Campylobacters</i> : Not innocent bystanders in endemic diarrhea and dysentery in children in low-income settings. <i>PLoS Neglected Tropical Diseases</i> , 2018, 12, e0006200.	3.0	28

#	ARTICLE	IF	CITATIONS
55	A Longitudinal Study of Household Water, Sanitation, and Hygiene Characteristics and Environmental Enteropathy Markers in Children Less than 24 Months in Iquitos, Peru. <i>American Journal of Tropical Medicine and Hygiene</i> , 2018, 98, 995-1004.	1.4	11
56	Environmental enteropathy is associated with cardiometabolic risk factors in Peruvian children. <i>Journal of Developmental Origins of Health and Disease</i> , 2017, 8, 337-348.	1.4	16
57	Causal Pathways from Enteropathogens to Environmental Enteropathy: Findings from the MAL-ED Birth Cohort Study. <i>EBioMedicine</i> , 2017, 18, 109-117.	6.1	183
58	Dynamics and Trends in Fecal Biomarkers of Gut Function in Children from 1â€“24 Months in the MAL-ED Study. <i>American Journal of Tropical Medicine and Hygiene</i> , 2017, 96, 465-472.	1.4	73
59	Rotavirus Infection and Disease in a Multisite Birth Cohort: Results From the MAL-ED Study. <i>Journal of Infectious Diseases</i> , 2017, 216, 305-316.	4.0	34
60	Age and Sex Normalization of Intestinal Permeability Measures for the Improved Assessment of Enteropathy in Infancy and Early Childhood. <i>Journal of Pediatric Gastroenterology and Nutrition</i> , 2017, 65, 31-39.	1.8	41
61	A methodologic framework for modeling and assessing biomarkers of environmental enteropathy as predictors of growth in infants: an example from a Peruvian birth cohort. <i>American Journal of Clinical Nutrition</i> , 2017, 106, 245-255.	4.7	25
62	Early Antibiotic Exposure in Lowâ€“resource Settings Is Associated With Increased Weight in the First Two Years of Life. <i>Journal of Pediatric Gastroenterology and Nutrition</i> , 2017, 65, 350-356.	1.8	24
63	Stable Isotope Techniques for the Assessment of Host and Microbiota Response During Gastrointestinal Dysfunction. <i>Journal of Pediatric Gastroenterology and Nutrition</i> , 2017, 64, 8-14.	1.8	11
64	Determinants and Impact of Giardia Infection in the First 2 Years of Life in the MAL-ED Birth Cohort. <i>Journal of the Pediatric Infectious Diseases Society</i> , 2017, 6, 153-160.	1.3	137
65	Surface Sampling Collection and Culture Methods for Escherichia coli in Household Environments with High Fecal Contamination. <i>International Journal of Environmental Research and Public Health</i> , 2017, 14, 947.	2.6	5
66	Epidemiology of enteroaggregative Escherichia coli infections and associated outcomes in the MAL-ED birth cohort. <i>PLoS Neglected Tropical Diseases</i> , 2017, 11, e0005798.	3.0	58
67	Use of antibiotics in children younger than two years in eight countries: a prospective cohort study. <i>Bulletin of the World Health Organization</i> , 2017, 95, 49-61.	3.3	146
68	Infant Nutritional Status, Feeding Practices, Enteropathogen Exposure, Socioeconomic Status, and Illness Are Associated with Gut Barrier Function As Assessed by the Lactulose Mannitol Test in the MAL-ED Birth Cohort. <i>American Journal of Tropical Medicine and Hygiene</i> , 2017, 97, 281-290.	1.4	31
69	In Vitro Study of Taenia solium Postoncospherical Form. <i>PLoS Neglected Tropical Diseases</i> , 2016, 10, e0004396.	3.0	11
70	Use of Pathogen-Specific Antibody Biomarkers to Estimate Waterborne Infections in Population-Based Settings. <i>Current Environmental Health Reports</i> , 2016, 3, 322-334.	6.7	22
71	Improving the detection of environmental enteric dysfunction: a lactulose, rhamnose assay of intestinal permeability in children aged under 5 years exposed to poor sanitation and hygiene. <i>BMJ Global Health</i> , 2016, 1, e000066.	4.7	56
72	Epidemiology and Impact of Campylobacter Infection in Children in 8 Low-Resource Settings: Results From the MAL-ED Study. <i>Clinical Infectious Diseases</i> , 2016, 63, ciw542.	5.8	163

#	ARTICLE	IF	CITATIONS
73	How multiple episodes of exclusive breastfeeding impact estimates of exclusive breastfeeding duration: report from the eight-site MAL-ED birth cohort study. <i>Maternal and Child Nutrition</i> , 2016, 12, 740-756.	3.0	21
74	Fecal Markers of Environmental Enteropathy and Subsequent Growth in Bangladeshi Children. <i>American Journal of Tropical Medicine and Hygiene</i> , 2016, 95, 694-701.	1.4	74
75	Accelerating to Zero: Strategies to Eliminate Malaria in the Peruvian Amazon. <i>American Journal of Tropical Medicine and Hygiene</i> , 2016, 94, 1200-1207.	1.4	16
76	Floors and Toilets: Association of Floors and Sanitation Practices with Fecal Contamination in Peruvian Amazon Peri-Urban Households. <i>Environmental Science & Technology</i> , 2016, 50, 7373-7381.	10.0	30
77	Plasma Tryptophan and the Kynurenine:Tryptophan Ratio are Associated with the Acquisition of Statural Growth Deficits and Oral Vaccine Underperformance in Populations with Environmental Enteropathy. <i>American Journal of Tropical Medicine and Hygiene</i> , 2016, 95, 928-937.	1.4	63
78	Early child health in an informal settlement in the Peruvian Amazon. <i>BMC International Health and Human Rights</i> , 2016, 16, 26.	2.5	3
79	A Comparison of Diarrheal Severity Scores in the MAL-ED Multisite Community-Based Cohort Study. <i>Journal of Pediatric Gastroenterology and Nutrition</i> , 2016, 63, 466-473.	1.8	27
80	Population genomics studies identify signatures of global dispersal and drug resistance in <i>Plasmodium vivax</i> . <i>Nature Genetics</i> , 2016, 48, 953-958.	21.4	194
81	Norovirus Infection and Acquired Immunity in 8 Countries: Results From the MAL-ED Study. <i>Clinical Infectious Diseases</i> , 2016, 62, 1210-1217.	5.8	84
82	Soil-Transmitted Helminth Infections Are Associated With an Increase in Human Papillomavirus Prevalence and a T-Helper Type 2 Cytokine Signature in Cervical Fluids. <i>Journal of Infectious Diseases</i> , 2016, 213, 723-730.	4.0	126
83	Biomarkers of Environmental Enteropathy, Inflammation, Stunting, and Impaired Growth in Children in Northeast Brazil. <i>PLoS ONE</i> , 2016, 11, e0158772.	2.5	164
84	Determinants of Caregivers' Use and Adoption of Household Water Chlorination: A Qualitative Study with Peri-Urban Communities in the Peruvian Amazon. <i>American Journal of Tropical Medicine and Hygiene</i> , 2015, 93, 626-635.	1.4	11
85	Cost-effectiveness of norovirus vaccination in children in Peru. <i>Vaccine</i> , 2015, 33, 3084-3091.	3.8	9
86	Assessment of an automated capillary system for <i>Plasmodium vivax</i> microsatellite genotyping. <i>Malaria Journal</i> , 2015, 14, 326.	2.3	8
87	Pathogen-specific burdens of community diarrhoea in developing countries: a multisite birth cohort study (MAL-ED). <i>The Lancet Global Health</i> , 2015, 3, e564-e575.	6.3	725
88	Geophagy is Associated with Environmental Enteropathy and Stunting in Children in Rural Bangladesh. <i>American Journal of Tropical Medicine and Hygiene</i> , 2015, 92, 1117-1124.	1.4	124
89	The MAL-ED Cohort Study: Methods and Lessons Learned When Assessing Early Child Development and Caregiving Mediators in Infants and Young Children in 8 Low- and Middle-Income Countries. <i>Clinical Infectious Diseases</i> , 2014, 59, S261-S272.	5.8	61
90	An instrument for the assessment of diarrhoeal severity based on a longitudinal community-based study. <i>BMJ Open</i> , 2014, 4, e004816-e004816.	1.9	32

#	ARTICLE	IF	CITATIONS
91	Microbiologic Methods Utilized in the MAL-ED Cohort Study. <i>Clinical Infectious Diseases</i> , 2014, 59, S225-S232.	5.8	93
92	Methods of Analysis of Enteropathogen Infection in the MAL-ED Cohort Study. <i>Clinical Infectious Diseases</i> , 2014, 59, S233-S238.	5.8	32
93	Lactulose. <i>Journal of Pediatric Gastroenterology and Nutrition</i> , 2014, 59, 544-550.	1.8	45
94	Effects of Shigella-, Campylobacter- and ETEC-associated Diarrhea on Childhood Growth. <i>Pediatric Infectious Disease Journal</i> , 2014, 33, 1004-1009.	2.0	70
95	Update on the burden of Campylobacter in developing countries. <i>Current Opinion in Infectious Diseases</i> , 2014, 27, 444-450.	3.1	110
96	Multiple Norovirus Infections in a Birth Cohort in a Peruvian Periurban Community. <i>Clinical Infectious Diseases</i> , 2014, 58, 483-491.	5.8	158
97	Detection of Campylobacter in Stool and Determination of Significance by Culture, Enzyme Immunoassay, and PCR in Developing Countries. <i>Journal of Clinical Microbiology</i> , 2014, 52, 1074-1080.	3.9	94
98	Assessment of Environmental Enteropathy in the MAL-ED Cohort Study: Theoretical and Analytic Framework. <i>Clinical Infectious Diseases</i> , 2014, 59, S239-S247.	5.8	127
99	Postpartum depressive symptoms across time and place: Structural invariance of the Self-Reporting Questionnaire among women from the international, multi-site MAL-ED study. <i>Journal of Affective Disorders</i> , 2014, 167, 178-186.	4.1	23
100	Evaluating Associations Between Vaccine Response and Malnutrition, Gut Function, and Enteric Infections in the MAL-ED Cohort Study: Methods and Challenges. <i>Clinical Infectious Diseases</i> , 2014, 59, S273-S279.	5.8	31
101	Santa Clara de Nanay: The MAL-ED Cohort in Peru. <i>Clinical Infectious Diseases</i> , 2014, 59, S310-S316.	5.8	67
102	A Phase One Safety Study of Lactobacillus reuteri Conducted in the Peruvian Amazon: Observations from the Field. <i>American Journal of Tropical Medicine and Hygiene</i> , 2014, 90, 777-780.	1.4	6
103	Measuring socioeconomic status in multicountry studies: results from the eight-country MAL-ED study. <i>Population Health Metrics</i> , 2014, 12, 8.	2.7	176
104	Infant feeding practices in the Peruvian Amazon: implications for programs to improve feeding. <i>Revista Panamericana De Salud Publica/Pan American Journal of Public Health</i> , 2014, 36, 150-7.	1.1	7
105	Hyperendemic malaria transmission in areas of occupation-related travel in the Peruvian Amazon. <i>Malaria Journal</i> , 2013, 12, 178.	2.3	56
106	Microgeographical Differences of Plasmodium vivax Relapse and Re-Infection in the Peruvian Amazon. <i>American Journal of Tropical Medicine and Hygiene</i> , 2013, 89, 326-338.	1.4	13
107	Comparison of the immune microenvironment of the oral cavity and cervix in healthy women. <i>Cytokine</i> , 2013, 64, 597-604.	3.2	23
108	Fecal Markers of Intestinal Inflammation and Permeability Associated with the Subsequent Acquisition of Linear Growth Deficits in Infants. <i>American Journal of Tropical Medicine and Hygiene</i> , 2013, 88, 390-396.	1.4	262
