| # | Article                                                                                                                                                                                                     | IF  | CITATIONS |
|---|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1 | The Sac1 Domain of <i> <scp>SYNJ</scp> 1 </i> Identified Mutated in a Family with Earlyâ€Onset Progressive <scp>P</scp> arkinsonism with Generalized Seizures. Human Mutation, 2013, 34, 1200-1207.         | 2.5 | 302       |
| 2 | Parkinson Sac Domain Mutation in Synaptojanin 1 Impairs Clathrin Uncoating at Synapses and Triggers Dystrophic Changes in Dopaminergic Axons. Neuron, 2017, 93, 882-896.e5.                                 | 8.1 | 136       |
| 3 | Loss of SYNJ1 dual phosphatase activity leads to early onset refractory seizures and progressive neurological decline. Brain, 2016, 139, 2420-2430.                                                         | 7.6 | 70        |
| 4 | Upregulation of Parkin in Endophilin Mutant Mice. Journal of Neuroscience, 2014, 34, 16544-16549.                                                                                                           | 3.6 | 50        |
| 5 | Presynaptic autophagy is coupled to the synaptic vesicle cycle via ATG-9. Neuron, 2022, 110, 824-840.e10.                                                                                                   | 8.1 | 41        |
| 6 | Absence of Sac2/INPP5F enhances the phenotype of a Parkinson's disease mutation of synaptojanin 1. Proceedings of the National Academy of Sciences of the United States of America, 2020, 117, 12428-12434. | 7.1 | 30        |
