#	ARTICLE	IF	CITATIONS
1	Subspecific origin and haplotype diversity in the laboratory mouse. <i>Nature Genetics</i> , 2011, 43, 648-655.	21.4	439
2	The Evolution of House Mice. <i>Annual Review of Ecology, Evolution, and Systematics</i> , 1993, 24, 119-152.	6.7	423
3	Most classical <i>Mus musculus domesticus</i> laboratory mouse strains carry a <i>Mus musculus musculus</i> Y chromosome. <i>Nature</i> , 1985, 315, 70-72.	27.8	242
4	Interpretation of Variation Across Marker Loci as Evidence of Selection. <i>Genetics</i> , 2001, 158, 1811-1823.	2.9	242
5	Species-wide homogeneity of nuclear ribosomal ITS2 sequences in the spider mite <i>Tetranychus urticae</i> contrasts with extensive mitochondrial COI polymorphism. <i>Heredity</i> , 1998, 80, 742-752.	2.6	229
6	Invasion from the cold past: extensive introgression of mountain hare (<i>Lepus timidus</i>) mitochondrial DNA into three other hare species in northern Iberia. <i>Molecular Ecology</i> , 2005, 14, 2459-2464.	3.9	183
7	Origin and radiation of the house mouse: mitochondrial DNA phylogeny. <i>Journal of Evolutionary Biology</i> , 1996, 9, 391-415.	1.7	169
8	Molecular phylogenies in the genus <i>Mus</i> : Comparative analysis of electrophoretic, scnDNA hybridization, and mtDNA RFLP data. <i>Biological Journal of the Linnean Society</i> , 1990, 41, 83-103.	1.6	164
9	Counterselection on sex chromosomes in the <i>Mus musculus</i> European hybrid zone. <i>Journal of Evolutionary Biology</i> , 1993, 6, 529-546.	1.7	153
10	Molecular technologies for biodiversity evaluation: Opportunities and challenges. <i>Nature Biotechnology</i> , 1997, 15, 625-628.	17.5	147
11	Absence of <i>Y</i> -chromosome introgression across the hybrid zone between <i>Mus musculus domesticus</i> and <i>Mus musculus musculus</i> . <i>Genetical Research</i> , 1986, 48, 191-197.	0.9	125
12	Origin and radiation of the house mouse: clues from nuclear genes. <i>Journal of Evolutionary Biology</i> , 1996, 9, 519-539.	1.7	119
13	Evolutionary correlation between control region sequence and restriction polymorphisms in the mitochondrial genome of a large Senegalese Mandenka sample.. <i>Molecular Biology and Evolution</i> , 1995, 12, 334-45.	8.9	116
14	Mitochondrial cytochrome oxidase I in tetranychid mites: a comparison between molecular phylogeny and changes of morphological and life history traits. <i>Bulletin of Entomological Research</i> , 1996, 86, 407-417.	1.0	116
15	Postzygotic isolation between the two European subspecies of the house mouse: estimates from fertility patterns in wild and laboratory-bred hybrids. <i>Biological Journal of the Linnean Society</i> , 2005, 84, 379-393.	1.6	116
16	Recombination explains isochores in mammalian genomes. <i>Trends in Genetics</i> , 2003, 19, 128-130.	6.7	111
17	The ubiquitous mountain hare mitochondria: multiple introgressive hybridization in hares, genus <i>Lepus</i> . <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2008, 363, 2831-2839.	4.0	111
18	Recurrent Introgression of Mitochondrial DNA Among Hares (<i>Lepus</i> spp.) Revealed by Species-Tree Inference and Coalescent Simulations. <i>Systematic Biology</i> , 2012, 61, 367.	5.6	111

#	ARTICLE	IF	CITATIONS
19	Inferences of selection and migration in the Danish house mouse hybrid zone. <i>Biological Journal of the Linnean Society</i> , 2005, 84, 593-616.	1.6	104
20	Isolation and gene flow: inferring the speciation history of European house mice. <i>Molecular Ecology</i> , 2011, 20, 5248-5264.	3.9	99
21	The rise and fall of the mountain hare (<i>Lepus timidus</i>) during Pleistocene glaciations: expansion and retreat with hybridization in the Iberian Peninsula. <i>Molecular Ecology</i> , 2006, 16, 605-618.	3.9	95
22	Genetic differentiation of the house mouse around the Mediterranean basin: matrilineal footprints of early and late colonization. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2011, 278, 1034-1043.	2.6	94
23	Wormy mice in a hybrid zone: A genetic control of susceptibility to parasite infection. <i>Journal of Evolutionary Biology</i> , 1991, 4, 679-687.	1.7	92
24	Discordant Phylogeographic Patterns Between the <i>Y</i> Chromosome and Mitochondrial DNA in the House Mouse: Selection on the <i>Y</i> Chromosome?. <i>Genetics</i> , 1997, 146, 1019-1034.	2.9	91
25	DetSel 1.0: A Computer Program to Detect Markers Responding to Selection. , 2003, 94, 429-431.		81
26	Population subdivision and gene flow in Danish house mice. <i>Molecular Ecology</i> , 1995, 4, 311-320.	3.9	79
27	The Elusive Nature of Adaptive Mitochondrial DNA Evolution of an Arctic Lineage Prone to Frequent Introgression. <i>Genome Biology and Evolution</i> , 2014, 6, 886-896.	2.5	78
28	A steep cline for mitochondrial DNA in Danish mice. <i>Genetical Research</i> , 1988, 52, 185-193.	0.9	76
29	Adaptive Evolution and Effective Population Size in Wild House Mice. <i>Molecular Biology and Evolution</i> , 2012, 29, 2949-2955.	8.9	73
30	The genomic impact of historical hybridization with massive mitochondrial DNA introgression. <i>Genome Biology</i> , 2018, 19, 91.	8.8	71
31	Heteroplasmy in mice with deletion of a large coding region of mitochondrial DNA.. <i>Molecular Biology and Evolution</i> , 1987, 4, 46-55.	8.9	69
32	The genomic legacy from the extinct <i>Lepus timidus</i> to the three hare species of Iberia: contrast between mtDNA, sex chromosomes and autosomes. <i>Molecular Ecology</i> , 2009, 18, 2643-2658.	3.9	69
33	Analyse génétique de la zone d'hybridation entre les deux sous-espèces de souris <i>Mus musculus domesticus</i> et <i>Mus musculus musculus</i> en Bulgarie. <i>Genome</i> , 1988, 30, 427-437.	2.0	66
34	The musculus-type Y Chromosome of the laboratory mouse is of Asian origin. <i>Mammalian Genome</i> , 1992, 3, 84-91.	2.2	64
35	Social structure of the mound-building mouse <i>Mus spicilegus</i> revealed by genetic analysis with microsatellites. <i>Molecular Ecology</i> , 1997, 6, 1009-1017.	3.9	64
36	Identification of evolutionary significant units in the Spanish wild goat, <i>Capra pyrenaica</i> (Mammalia). <i>Tj ETQq0 0 0 rBT /Overlock 10 Tf</i>	2.9	64

#	ARTICLE	IF	CITATIONS
37	Diversity of Prdm9 Zinc Finger Array in Wild Mice Unravels New Facets of the Evolutionary Turnover of this Coding Minisatellite. PLoS ONE, 2014, 9, e85021.	2.5	64
38	Nuclear ribosomal DNA monophyly versus mitochondrial DNA polyphyly in two closely related mite species: the influence of life history and molecular drive. Proceedings of the Royal Society B: Biological Sciences, 2003, 270, S124-7.	2.6	63
39	Speciation and paraphyly in western mediterranean hares (<i>Lepus castroviejo</i> , <i>L. europaeus</i> , <i>L.</i>) Tj ETQq1 1 0.784314 rgBT /Overlock 1 423-436.	1.7	57
40	Genetical variation and polyphyletic origin in Japanese <i>Mus musculus</i> . Heredity, 1989, 63, 299-308.	2.6	51
41	The Complex History of a Gene Proposed to Participate in a Sexual Isolation Mechanism in House Mice. Molecular Biology and Evolution, 2002, 19, 462-471.	8.9	50
42	Testing for selection on the androgen-binding protein in the Danish mouse hybrid zone. Biological Journal of the Linnean Society, 2005, 84, 447-459.	1.6	50
43	The Legacy of Recurrent Introgression during the Radiation of Hares. Systematic Biology, 2021, 70, 593-607.	5.6	47
44	Hares on thin ice: Introgression of mitochondrial DNA in hares and its implications for recent phylogenetic analyses. Molecular Phylogenetics and Evolution, 2006, 40, 640-641.	2.7	40
45	Genomic incompatibilities in the hybrid zone between house mice in Denmark: evidence from steep and non-coincident chromosomal clines for Robertsonian fusions. Genetical Research, 1996, 67, 123-134.	0.9	36
46	Range expansion underlies historical introgressive hybridization in the Iberian hare. Scientific Reports, 2017, 7, 40788.	3.3	35
47	The south-eastern house mouse <i>Mus musculus castaneus</i> (Rodentia: Muridae) is a polytypic subspecies. Biological Journal of the Linnean Society, 2012, 107, 295-306.	1.6	34
48	Phylogenetic distribution in the genus <i>Mus</i> of t-complex-specific DNA and protein markers: inferences on the origin of t-haplotypes.. Molecular Biology and Evolution, 1988, 5, 120-33.	8.9	33
49	Sexual selection against natural hybrids may contribute to reinforcement in a house mouse hybrid zone. Proceedings of the Royal Society B: Biological Sciences, 2014, 281, 20132733.	2.6	32
50	Home-loving boreal hare mitochondria survived several invasions in Iberia: the relative roles of recurrent hybridisation and allele surfing. Heredity, 2014, 112, 265-273.	2.6	30
51	Mitochondrial COI sequences in mites: evidence for variations in base composition. Insect Molecular Biology, 1996, 5, 281-285.	2.0	29
52	INTERSPECIFIC X-CHROMOSOME AND MITOCHONDRIAL DNA INTROGRESSION IN THE IBERIAN HARE: SELECTION OR ALLELE SURFING?. Evolution; International Journal of Organic Evolution, 2011, 65, 1956-1968.	2.3	29
53	Variations of a Y chromosome repeated sequence across subspecies of <i>Mus musculus</i> . Heredity, 1989, 63, 289-297.	2.6	27
54	Population genetic structure in a Robertsonian race of house mice: evidence from microsatellite polymorphism. Heredity, 1998, 80, 70-77.	2.6	27

#	ARTICLE	IF	CITATIONS
55	Comparison of Ribosomal ITS Regions Among <i>Androctonus</i> spp. Scorpions (Scorpionida: Buthidae) from Tunisia. <i>Journal of Medical Entomology</i> , 2000, 37, 787-790.	1.8	25
56	Whole exome sequencing of wild-derived inbred strains of mice improves power to link phenotype and genotype. <i>Mammalian Genome</i> , 2017, 28, 416-425.	2.2	25
57	New assays for Y Chromosome and p53 pseudogene clines among East Holstein house mice. <i>Mammalian Genome</i> , 1997, 8, 279-281.	2.2	24
58	Is chromosomal speciation occurring in house mice in Tunisia?. <i>Biological Journal of the Linnean Society</i> , 1999, 68, 387-399.	1.6	24
59	Seeking signatures of reinforcement at the genetic level: a hitchhiking mapping and candidate gene approach in the house mouse. <i>Molecular Ecology</i> , 2015, 24, 4222-4237.	3.9	24
60	Identification and characterization of t haplotypes in wild mice populations using molecular markers. <i>Genetical Research</i> , 2003, 81, 103-114.	0.9	22
61	Haplotypes that are mosaic for wild-type and t complex-specific alleles in wild mice.. <i>Genetics</i> , 1989, 123, 405-415.	2.9	22
62	Polymorphism of mitochondrial genes in populations of <i>Leporinus friderici</i> (Bloch, 1794): intraspecific structure and zoogeography of the Neotropical fish. <i>Genetica</i> , 1991, 84, 137-142.	1.1	20
63	B1 insertions as easy markers for mouse population studies. <i>Mammalian Genome</i> , 2003, 14, 359-366.	2.2	18
64	Do changes in gene expression contribute to sexual isolation and reinforcement in the house mouse?. <i>Molecular Ecology</i> , 2017, 26, 5189-5202.	3.9	18
65	Mouse SNPs for evolutionary biology: Beware of ascertainment biases. <i>Genome Research</i> , 2006, 16, 1191-1192.	5.5	17
66	Mouse biodiversity in the genomic era. <i>Cytogenetic and Genome Research</i> , 2004, 105, 385-394.	1.1	15
67	The evolutionary fate of recently duplicated retrogenes in mice. <i>Journal of Evolutionary Biology</i> , 2007, 20, 617-626.	1.7	14
68	The House Mouse as a Ring Species?. , 1994, , 13-23.		13
69	A New Method for Locating Changes in a Tree Reveals Distinct Nucleotide Polymorphism vs Divergence Patterns in Mouse Mitochondrial Control Region. <i>Journal of Molecular Evolution</i> , 2000, 50, 224-231.	1.8	13
70	An Annotated Draft Genome of the Mountain Hare (<i>Lepus timidus</i>). <i>Genome Biology and Evolution</i> , 2020, 12, 3656-3662.	2.5	13
71	Species-wide homogeneity of nuclear ribosomal ITS2 sequences in the spider mite <i>Tetranychus urticae</i> contrasts with extensive mitochondrial COI polymorphism. <i>Heredity</i> , 1998, 80, 742-752.	2.6	11
72	Characterization of a centromeric marker on mouse Chromosome 11 and its introgression in a <i>domesticus/musculus</i> hybrid zone. <i>Mammalian Genome</i> , 2004, 15, 924-934.	2.2	9

#	ARTICLE	IF	CITATIONS
73	The evolutionary pathways for local adaptation in mountain hares. <i>Molecular Ecology</i> , 2022, 31, 1487-1503.	3.9	8
74	Sequence analysis of a deleted mitochondrial DNA molecule in heteroplasmic mice. <i>Mammalian Genome</i> , 1993, 4, 680-683.	2.2	4
75	Is chromosomal speciation occurring in house mice in Tunisia?. <i>Biological Journal of the Linnean Society</i> , 1999, 68, 387-399.	1.6	4
76	Population genetic structure in a Robertsonian race of house mice: evidence from microsatellite polymorphism. <i>Heredity</i> , 1998, 80, 70-77.	2.6	3
77	Androgen-binding protein (Abp) evolutionary history: Has positive selection caused fixation of different paralogs in different taxa of the genus <i>Mus</i> ?. <i>Genome Biology and Evolution</i> , 2021, 13, .	2.5	1
78	Evolution of the Y-Chromosome in the Wild Mouse. , 1994, , 41-55.		0
79	L'Évaluation génétique de la biodiversité. <i>Biofutur</i> , 1997, 1997, 29-33.	0.0	0
80	<i>Mus Musculus</i> . , 2001, , 1259-1261.		0
81	Partitioning of Genetic Diversity in the House Mouse. , 1998, , 431-434.		0
82	Génétique et Évolution du génome mitochondrial des Mammifères. <i>Genétique, Selection, Evolution</i> , 1986, 18, 73-98.	0.0	0
