#	ARTICLE	IF	CITATIONS
1	Personal, Family, Social, and Environmental Correlates of Active Commuting to School. <i>American Journal of Preventive Medicine</i> , 2006, 30, 45-51.	3.0	630
2	Perceptions about the local neighborhood and walking and cycling among children. <i>Preventive Medicine</i> , 2004, 38, 39-47.	3.4	623
3	Objectively measured physical activity and sedentary time in youth: the International children's accelerometry database (ICAD). <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2015, 12, 113.	4.6	556
4	Understanding Physical Activity Environmental Correlates: Increased Specificity for Ecological Models. <i>Exercise and Sport Sciences Reviews</i> , 2005, 33, 175-181.	3.0	549
5	Playing it safe: The influence of neighbourhood safety on children's physical activity – A review. <i>Health and Place</i> , 2008, 14, 217-227.	3.3	544
6	The clustering of diet, physical activity and sedentary behavior in children and adolescents: a review. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2014, 11, 4.	4.6	426
7	Effect of classroom-based physical activity interventions on academic and physical activity outcomes: a systematic review and meta-analysis. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2017, 14, 114.	4.6	378
8	Promoting Physical Activity Participation among Children and Adolescents. <i>Epidemiologic Reviews</i> , 2007, 29, 144-159.	3.5	299
9	Association of Family Environment with Children's Television Viewing and with Low Level of Physical Activity. <i>Obesity</i> , 2005, 13, 1939-1951.	4.0	269
10	Do features of public open spaces vary according to neighbourhood socio-economic status?. <i>Health and Place</i> , 2008, 14, 889-893.	3.3	256
11	The influence of urban design on neighbourhood walking following residential relocation: Longitudinal results from the RESIDE study. <i>Social Science and Medicine</i> , 2013, 77, 20-30.	3.8	252
12	Understanding meal patterns: definitions, methodology and impact on nutrient intake and diet quality. <i>Nutrition Research Reviews</i> , 2015, 28, 1-21.	4.1	251
13	A prospective examination of children's time spent outdoors, objectively measured physical activity and overweight. <i>International Journal of Obesity</i> , 2008, 32, 1685-1693.	3.4	240
14	Are children and adolescents less active if parents restrict their physical activity and active transport due to perceived risk?. <i>Social Science and Medicine</i> , 2010, 70, 1799-1805.	3.8	231
15	School site and the potential to walk to school: The impact of street connectivity and traffic exposure in school neighborhoods. <i>Health and Place</i> , 2011, 17, 545-550.	3.3	225
16	Understanding environmental influences on nutrition and physical activity behaviors: where should we look and what should we count?. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2006, 3, 33.	4.6	205
17	Development of a reliable measure of walking within and outside the local neighborhood: RESIDE's Neighborhood Physical Activity Questionnaire. <i>Preventive Medicine</i> , 2006, 42, 455-459.	3.4	201
18	Mismatch between perceived and objective measures of physical activity environments. <i>Preventive Medicine</i> , 2008, 47, 294-298.	3.4	197

#	ARTICLE	IF	CITATIONS
19	Physical activity, sedentary behavior and their correlates in children with Autism Spectrum Disorder: A systematic review. PLoS ONE, 2017, 12, e0172482.	2.5	187
20	Personal, social and environmental determinants of educational inequalities in walking: a multilevel study. Journal of Epidemiology and Community Health, 2007, 61, 108-114.	3.7	181
21	Implementation and scale up of population physical activity interventions for clinical and community settings: the PRACTIS guide. International Journal of Behavioral Nutrition and Physical Activity, 2018, 15, 51.	4.6	177
22	Children's fruit and vegetable intake: Associations with the neighbourhood food environment. Preventive Medicine, 2008, 46, 331-335.	3.4	169
23	Perceptions of local neighbourhood environments and their relationship to childhood overweight and obesity. International Journal of Obesity, 2005, 29, 170-175.	3.4	163
24	Agreement between activPAL and ActiGraph for assessing children's sedentary time. International Journal of Behavioral Nutrition and Physical Activity, 2012, 9, 15.	4.6	161
25	Trends in children's physical activity and weight status in high and low socio-economic status areas of Melbourne, Victoria, 1985-2001. Australian and New Zealand Journal of Public Health, 2005, 29, 337-342.	1.8	157
26	A hitchhiker's guide to assessing young people's physical activity: Deciding what method to use. Journal of Science and Medicine in Sport, 2009, 12, 518-525.	1.3	155
27	Neighbourhood socioeconomic inequalities in food access and affordability. Health and Place, 2009, 15, 578-585.	3.3	155
28	Walking and Cycling to School. American Journal of Preventive Medicine, 2009, 36, 195-200.	3.0	155
29	Parental use of restrictive feeding practices and child BMI z-score. A 3-year prospective cohort study. Appetite, 2010, 55, 84-88.	3.7	150
30	Understanding Dog Owners'™ Increased Levels of Physical Activity: Results From RESIDE. American Journal of Public Health, 2008, 98, 66-69.	2.7	141
31	Features of public open spaces and physical activity among children: Findings from the CLAN study. Preventive Medicine, 2008, 47, 514-518.	3.4	138
32	The longitudinal influence of home and neighbourhood environments on children's body mass index and physical activity over 5 years: the CLAN study. International Journal of Obesity, 2010, 34, 1177-1187.	3.4	135
33	Which food-related behaviours are associated with healthier intakes of fruits and vegetables among women?. Public Health Nutrition, 2007, 10, 256-265.	2.2	133
34	Obesity Management: Australian General Practitioners'™ Attitudes and Practices. Obesity, 2000, 8, 459-466.	4.0	132
35	Evaluation of the implementation of a state government community design policy aimed at increasing local walking: Design issues and baseline results from RESIDE, Perth Western Australia. Preventive Medicine, 2008, 46, 46-54.	3.4	124
36	The Use of Digital Platforms for Adults'™ and Adolescents'™ Physical Activity During the COVID-19 Pandemic (Our Life at Home): Survey Study. Journal of Medical Internet Research, 2021, 23, e23389.	4.3	124

#	ARTICLE	IF	CITATIONS
37	How far do children travel from their homes? Exploring children's activity spaces in their neighborhood. <i>Health and Place</i> , 2012, 18, 263-273.	3.3	123
38	A Longitudinal Study of the Family Physical Activity Environment and Physical Activity among Youth. <i>American Journal of Health Promotion</i> , 2011, 25, 159-167.	1.7	120
39	The School Food Environment. <i>American Journal of Preventive Medicine</i> , 2008, 35, 217-223.	3.0	112
40	Validity and reliability of a physical activity recall instrument among overweight and non-overweight men and women. <i>Journal of Science and Medicine in Sport</i> , 2003, 6, 477-491.	1.3	109
41	Individual, social and environmental correlates of physical activity among women living in socioeconomically disadvantaged neighbourhoods. <i>Social Science and Medicine</i> , 2010, 70, 2011-2018.	3.8	108
42	Increasing Children's Physical Activity. <i>Health Education and Behavior</i> , 2012, 39, 172-182.	2.5	105
43	On your bike! a cross-sectional study of the individual, social and environmental correlates of cycling to school. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2011, 8, 123.	4.6	103
44	Sedentary Behavior and Public Health: Integrating the Evidence and Identifying Potential Solutions. <i>Annual Review of Public Health</i> , 2020, 41, 265-287.	17.4	103
45	Parental concerns about childhood obesity and the strategies employed to prevent unhealthy weight gain in children. <i>Public Health Nutrition</i> , 2006, 9, 889-895.	2.2	101
46	Associations among Individual, Social, and Environmental Barriers and Children's Walking or Cycling to School. <i>American Journal of Health Promotion</i> , 2007, 22, 107-113.	1.7	101
47	Neighborhood Road Environments and Physical Activity Among Youth: The CLAN Study. <i>Journal of Urban Health</i> , 2008, 85, 532-544.	3.6	97
48	Love thy neighbour? Associations of social capital and crime with physical activity amongst women. <i>Social Science and Medicine</i> , 2010, 71, 807-814.	3.8	97
49	Compensation of Physical Activity and Sedentary Time in Primary School Children. <i>Medicine and Science in Sports and Exercise</i> , 2014, 46, 1564-1569.	0.4	97
50	Adoption, implementation and sustainability of school-based physical activity and sedentary behaviour interventions in real-world settings: a systematic review. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2019, 16, 120.	4.6	95
51	Five-year changes in school recess and lunchtime and the contribution to children's daily physical activity. <i>British Journal of Sports Medicine</i> , 2012, 46, 741-746.	6.7	93
52	Validity of a brief self-report instrument for assessing compliance with physical activity guidelines amongst adolescents. <i>Journal of Science and Medicine in Sport</i> , 2012, 15, 136-141.	1.3	92
53	Prevalence, Trends and Environmental Influences on Child and Youth Physical Activity. <i>Medicine and Sport Science</i> , 2007, 50, 183-199.	1.4	91
54	Parental chauffeurs: what drives their transport choice?. <i>Journal of Transport Geography</i> , 2013, 26, 72-77.	5.0	90

#	ARTICLE	IF	CITATIONS
55	Where Do Children Travel to and What Local Opportunities Are Available? The Relationship Between Neighborhood Destinations and Children's Independent Mobility. <i>Environment and Behavior</i> , 2013, 45, 679-705.	4.7	89
56	Predictors of time spent outdoors among children: 5-year longitudinal findings. <i>Journal of Epidemiology and Community Health</i> , 2010, 64, 400-406.	3.7	87
57	Neighbourhood fast food outlets and obesity in children and adults: the CLAN Study. <i>Pediatric Obesity</i> , 2008, 3, 249-256.	3.2	84
58	Is availability of public open space equitable across areas?. <i>Health and Place</i> , 2007, 13, 335-340.	3.3	82
59	Wearable Activity Tracker Use Among Australian Adolescents: Usability and Acceptability Study. <i>JMIR MHealth and UHealth</i> , 2018, 6, e86.	3.7	82
60	Are Safety-Related Features of the Road Environment Associated with Smaller Declines in Physical Activity among Youth?. <i>Journal of Urban Health</i> , 2010, 87, 29-43.	3.6	81
61	How active are people in metropolitan parks? An observational study of park visitation in Australia. <i>BMC Public Health</i> , 2015, 15, 610.	2.9	81
62	Quantifying and Characterizing Physical Activity among 5- to 6- and 10- to 12-Year-Old Children: The Children's Leisure Activities Study (CLASS). <i>Pediatric Exercise Science</i> , 2005, 17, 266-280.	1.0	79
63	Understanding children's sedentary behaviour: a qualitative study of the family home environment. <i>Health Education Research</i> , 2010, 25, 199-210.	1.9	79
64	Characterizing eating patterns: a comparison of eating occasion definitions. <i>American Journal of Clinical Nutrition</i> , 2015, 102, 1229-1237.	4.7	77
65	The influence of the built environment, social environment and health behaviors on body mass index. Results from RESIDE. <i>Preventive Medicine</i> , 2011, 53, 57-60.	3.4	76
66	Is the Neighbourhood Environment Associated with Sedentary Behaviour Outside of School Hours Among Children?. <i>Annals of Behavioral Medicine</i> , 2011, 41, 333-341.	2.9	74
67	Young and free? A study of independent mobility among urban and rural dwelling Australian children. <i>Journal of Science and Medicine in Sport</i> , 2012, 15, 505-510.	1.3	74
68	Weather and children's physical activity; how and why do relationships vary between countries?. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2017, 14, 74.	4.6	74
69	Are perceptions of the physical and social environment associated with mothers' walking for leisure and for transport? A longitudinal study. <i>Preventive Medicine</i> , 2008, 47, 188-193.	3.4	73
70	Perceptions of Neighborhood Safety and Physical Activity Among Youth: The CLAN Study. <i>Journal of Physical Activity and Health</i> , 2008, 5, 430-444.	2.0	73
71	Park attributes that encourage park visitation among adolescents: A conjoint analysis. <i>Landscape and Urban Planning</i> , 2017, 161, 52-58.	7.5	72
72	Does the walkability of neighbourhoods affect children's independent mobility, independent of parental, socio-cultural and individual factors?. <i>Children's Geographies</i> , 2014, 12, 393-411.	2.3	71

#	ARTICLE	IF	CITATIONS
73	Family influences on children's physical activity and fruit and vegetable consumption. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2009, 6, 34.	4.6	69
74	Physical Activity, Sedentary Behavior, and Depressive Symptoms Among Adolescents. <i>Journal of Physical Activity and Health</i> , 2011, 8, 152-156.	2.0	69
75	Do Logbooks Influence Recall of Physical Activity in Validation Studies?. <i>Medicine and Science in Sports and Exercise</i> , 2004, 36, 1181-1186.	0.4	68
76	5-Year Changes in Afterschool Physical Activity and Sedentary Behavior. <i>American Journal of Preventive Medicine</i> , 2013, 44, 605-611.	3.0	68
77	Physical Activity Parenting Measurement and Research: Challenges, Explanations, and Solutions. <i>Childhood Obesity</i> , 2013, 9, S-103-S-109.	1.5	68
78	The public's response to the obesity epidemic in Australia: weight concerns and weight control practices of men and women. <i>Public Health Nutrition</i> , 2000, 3, 417-424.	2.2	67
79	How is active transport associated with children's and adolescents' physical activity over time?. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2011, 8, 126.	4.6	67
80	Park proximity, quality and recreational physical activity among mid-older aged adults: moderating effects of individual factors and area of residence. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2015, 12, 46.	4.6	67
81	Family physical activity and sedentary environments and weight change in children. <i>Pediatric Obesity</i> , 2008, 3, 160-167.	3.2	66
82	Longitudinal examination of the family food environment and weight status among children. <i>Pediatric Obesity</i> , 2009, 4, 343-352.	3.2	66
83	Dog Ownership, Dog Walking, and Children's and Parents' Physical Activity. <i>Research Quarterly for Exercise and Sport</i> , 2010, 81, 264-271.	1.4	61
84	A hitchhiker's guide to assessing sedentary behaviour among young people: Deciding what method to use. <i>Journal of Science and Medicine in Sport</i> , 2013, 16, 28-35.	1.3	60
85	Availability of sports facilities as moderator of the intention-sports participation relationship among adolescents. <i>Health Education Research</i> , 2010, 25, 489-497.	1.9	59
86	Clustering of diet, physical activity and sedentary behaviour among Australian children: cross-sectional and longitudinal associations with overweight and obesity. <i>International Journal of Obesity</i> , 2015, 39, 1079-1085.	3.4	59
87	Direct and indirect associations between the family physical activity environment and sports participation among 10-12 year-old European children: testing the EnRG framework in the ENERGY project. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2013, 10, 15.	4.6	58
88	Tracking of children's body-mass index, television viewing and dietary intake over five-years. <i>Preventive Medicine</i> , 2011, 53, 268-270.	3.4	57
89	Associations Between Intrapersonal and Neighborhood Environmental Characteristics and Cycling for Transport and Recreation in Adults: Baseline Results From the RESIDE Study. <i>Journal of Physical Activity and Health</i> , 2010, 7, 423-431.	2.0	56
90	Total and domain-specific sitting time among employees in desk-based work settings in Australia. <i>Australian and New Zealand Journal of Public Health</i> , 2015, 39, 237-242.	1.8	56

#	ARTICLE	IF	CITATIONS
91	Socioeconomic Position and Children's Physical Activity and Sedentary Behaviors: Longitudinal Findings From the CLAN Study. <i>Journal of Physical Activity and Health</i> , 2009, 6, 289-298.	2.0	55
92	Individual, Social, and Physical Environment Factors Associated With Electronic Media Use Among Children: Sedentary Behavior at Home. <i>Journal of Physical Activity and Health</i> , 2011, 8, 613-625.	2.0	54
93	Too hot to move? Objectively assessed seasonal changes in Australian children's physical activity. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2015, 12, 77.	4.6	54
94	Meal Frequency but Not Snack Frequency Is Associated with Micronutrient Intakes and Overall Diet Quality in Australian Men and Women. <i>Journal of Nutrition</i> , 2016, 146, 2027-2034.	2.9	54
95	Association between maternal education and objectively measured physical activity and sedentary time in adolescents. <i>Journal of Epidemiology and Community Health</i> , 2016, 70, 541-548.	3.7	53
96	A New Urban Planning Code's Impact on Walking: The Residential Environments Project. <i>American Journal of Public Health</i> , 2013, 103, 1219-1228.	2.7	52
97	Are parental concerns for child TV viewing associated with child TV viewing and the home sedentary environment?. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2011, 8, 102.	4.6	50
98	Resilience to obesity among socioeconomically disadvantaged women: the READI study. <i>International Journal of Obesity</i> , 2012, 36, 855-865.	3.4	50
99	Family food involvement and frequency of family dinner meals among Australian children aged 10-12 years. Cross-sectional and longitudinal associations with dietary patterns. <i>Appetite</i> , 2014, 75, 64-70.	3.7	50
100	Designing parks for older adults: A qualitative study using walk-along interviews. <i>Urban Forestry and Urban Greening</i> , 2020, 54, 126768.	5.3	50
101	Parental Perspectives of a Wearable Activity Tracker for Children Younger Than 13 Years: Acceptability and Usability Study. <i>JMIR MHealth and UHealth</i> , 2019, 7, e13858.	3.7	50
102	Is dog ownership or dog walking associated with weight status in children and their parents?. <i>Health Promotion Journal of Australia</i> , 2008, 19, 60-63.	1.2	48
103	Physical activity in hypertrophic cardiomyopathy: prevalence of inactivity and perceived barriers. <i>Open Heart</i> , 2016, 3, e000484.	2.3	48
104	Built environment and physical activity among adolescents: the moderating effects of neighborhood safety and social support. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2019, 16, 132.	4.6	48
105	The Impact of Activity Based Working (ABW) on Workplace Activity, Eating Behaviours, Productivity, and Satisfaction. <i>International Journal of Environmental Research and Public Health</i> , 2018, 15, 1005.	2.6	47
106	Children's takeaway and fast-food intakes: associations with the neighbourhood food environment. <i>Public Health Nutrition</i> , 2009, 12, 1960-1964.	2.2	46
107	Cohort Profile: The Resilience for Eating and Activity Despite Inequality (READI) study. <i>International Journal of Epidemiology</i> , 2013, 42, 1629-1639.	1.9	45
108	Temporal eating patterns: associations with nutrient intakes, diet quality, and measures of adiposity. <i>American Journal of Clinical Nutrition</i> , 2017, 106, 1121-1130.	4.7	45

#	ARTICLE	IF	CITATIONS
109	Temporal eating patterns: a latent class analysis approach. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2017, 14, 3.	4.6	45
110	The REVAMP natural experiment study: the impact of a play-scape installation on park visitation and park-based physical activity. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2018, 15, 10.	4.6	45
111	The association between home environmental variables and soft drink consumption among adolescents. Exploration of mediation by individual cognitions and habit strength. <i>Appetite</i> , 2011, 56, 503-510.	3.7	44
112	Clustering of children's obesity-related behaviours: associations with sociodemographic indicators. <i>European Journal of Clinical Nutrition</i> , 2014, 68, 623-628.	2.9	43
113	Urban-rural comparison of weight status among women and children living in socioeconomically disadvantaged neighbourhoods. <i>Medical Journal of Australia</i> , 2010, 192, 137-140.	1.7	42
114	Do features of public open spaces vary between urban and rural areas?. <i>Preventive Medicine</i> , 2013, 56, 107-111.	3.4	42
115	Associations between activity patterns and cardio-metabolic risk factors in children and adolescents: A systematic review. <i>PLoS ONE</i> , 2018, 13, e0201947.	2.5	42
116	Neighbourhood physical activity environments and adiposity in children and mothers: a three-year longitudinal study. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2010, 7, 18.	4.6	41
117	Associations between sedentary behaviours and dietary intakes among adolescents. <i>Public Health Nutrition</i> , 2018, 21, 1115-1122.	2.2	41
118	Playability: Built and Social Environment Features That Promote Physical Activity Within Children. <i>Current Obesity Reports</i> , 2015, 4, 460-476.	8.4	40
119	A Cross-Sectional Investigation of the Importance of Park Features for Promoting Regular Physical Activity in Parks. <i>International Journal of Environmental Research and Public Health</i> , 2017, 14, 1335.	2.6	40
120	A natural experiment to examine the impact of park renewal on park-use and park-based physical activity in a disadvantaged neighbourhood: the REVAMP study methods. <i>BMC Public Health</i> , 2014, 14, 600.	2.9	39
121	Impact of an 8-Month Trial Using Height-Adjustable Desks on Children's Classroom Sitting Patterns and Markers of Cardio-Metabolic and Musculoskeletal Health. <i>International Journal of Environmental Research and Public Health</i> , 2016, 13, 1227.	2.6	39
122	What entices older adults to parks? Identification of park features that encourage park visitation, physical activity, and social interaction. <i>Landscape and Urban Planning</i> , 2022, 217, 104254.	7.5	39
123	Cross-sectional and Longitudinal Associations Between Parents' and Preschoolers' Physical Activity and Television Viewing: The HAPPY Study. <i>Journal of Physical Activity and Health</i> , 2016, 13, 269-274.	2.0	38
124	Exploring when and how adolescents sit: cross-sectional analysis of activPAL-measured patterns of daily sitting time, bouts and breaks. <i>BMC Public Health</i> , 2019, 19, 653.	2.9	38
125	The neighborhood social environment and body mass index among youth: a mediation analysis. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2012, 9, 31.	4.6	37
126	Development and reliability of a streetscape observation instrument for international use: MAPS-global. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2018, 15, 19.	4.6	37
