#	ARTICLE	IF	CITATIONS
1	The Disconnect Between Extracorporeal Circulation and the Microcirculation: A Review. ASAIO Journal, 2022, 68, 881-889.	0.9	7
2	Extracorporeal circulation impairs microcirculation perfusion and organ function. Journal of Applied Physiology, 2022, 132, 794-810.	1.2	6
3	Attenuating ischemia-reperfusion injury with polymerized albumin. Journal of Applied Physiology, 2022, 132, 489-496.	1.2	3
4	Nitric oxide releasing nanoparticles reduce inflammation in a small animal model of ARDS. Biomedicine and Pharmacotherapy, 2022, 148, 112705.	2.5	3
5	Implications of microvascular dysfunction and nitric oxide mediated inflammation in severe COVID-19 infection. American Journal of the Medical Sciences, 2022, 364, 251-256.	0.4	2
6	Apo-hemoglobin-haptoglobin (Apo-hb-Hp) Complex as a Vascular Protective Agent in Hypoxia Induced Vaso-occlusion in Sickle Cell Disease. FASEB Journal, 2022, 36, .	0.2	0
7	Hyperspectral Wide-Field-Of-View Imaging to Study Dynamic Microcirculatory Changes During Hypoxia. American Journal of Physiology - Heart and Circulatory Physiology, 2022, , .	1.5	1
8	The small molecule NLRP3 inhibitor RRx-001 potentiates regorafenib activity and attenuates regorafenib-induced toxicity in mice bearing human colorectal cancer xenografts.. American Journal of Cancer Research, 2022, 12, 1912-1918.	1.4	0
9	Safety profile of high molecular weight polymerized hemoglobins. Transfusion, 2021, 61, 212-224.	0.8	8
10	Resuscitation from hemorrhagic shock after traumatic brain injury with polymerized hemoglobin. Scientific Reports, 2021, 11, 2509.	1.6	18
11	RRx-001, a downregulator of the CD47- SIRP $\alpha$ checkpoint pathway, does not cause anemia or thrombocytopenia. Expert Opinion on Drug Metabolism and Toxicology, 2021, 17, 355-357.	1.5	10
12	In small cell lung cancer patients treated with RRx-001, a downregulator of CD47, decreased expression of PD-L1 on circulating tumor cells significantly correlates with clinical benefit. Translational Lung Cancer Research, 2021, 10, 274-278.	1.3	8
13	Negative pressure increases microvascular perfusion during severe hemorrhagic shock. Microvascular Research, 2021, 134, 104125.	1.1	2
14	Application of negative tissue interstitial pressure improves functional capillary density after hemorrhagic shock in the absence of volume resuscitation. Physiological Reports, 2021, 9, e14783.	0.7	2
15	Purification and analysis of a protein cocktail capable of scavenging cell-free hemoglobin, heme, and iron. Transfusion, 2021, 61, 1894-1907.	0.8	4
16	RRx-001 Increases Erythrocyte Preferential Adhesion to the Tumor Vasculature. International Journal of Molecular Sciences, 2021, 22, 4713.	1.8	4
17	High fat high sucrose diet-induced dyslipidemia in guinea pigs. Journal of Applied Physiology, 2021, 130, 1226-1234.	1.2	5
18	Human polymerized hemoglobin as an alternative to blood in resuscitation from hemorrhagic shock. FASEB Journal, 2021, 35, .	0.2	0

#	ARTICLE	IF	CITATIONS
19	Quantifying the Reduction in Microcirculation Perfusion After Extracorporeal Circulation. <i>FASEB Journal</i> , 2021, 35, .	0.2	0
20	Discovery of RRx-001, a Myc and CD47 Downregulating Small Molecule with Tumor Targeted Cytotoxicity and Healthy Tissue Cytoprotective Properties in Clinical Development. <i>Journal of Medicinal Chemistry</i> , 2021, 64, 7261-7271.	2.9	16
21	Red Blood Cells: Tethering, Vesiculation, and Disease in Micro-Vascular Flow. <i>Diagnostics</i> , 2021, 11, 971.	1.3	6
22	Polymerized albumin restores impaired hemodynamics in endotoxemia and polymicrobial sepsis. <i>Scientific Reports</i> , 2021, 11, 10834.	1.6	6
23	Vascular priming with RRx-001 to increase the uptake and accumulation of temozolomide and irinotecan in orthotopically implanted gliomas. <i>Journal of Drug Targeting</i> , 2021, 29, 998-1003.	2.1	8
24	Increased hemoglobin affinity for oxygen with GBT1118 improves hypoxia tolerance in sickle cell mice. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2021, 321, H400-H411.	1.5	7
25	The RBC's road to ghost and removal: splenic clearance. <i>Blood Advances</i> , 2021, 5, 4422-4425.	2.5	1
26	Heme Scavenging with Apohemoglobin-Haptoglobin Complex in Beta Thalassemia Intermedia Improves Anemia and Iron Indices: A Novel Therapeutic Approach. <i>Blood</i> , 2021, 138, 3082-3082.	0.6	0
27	Itaconate modulates tricarboxylic acid and redox metabolism to mitigate reperfusion injury. <i>Molecular Metabolism</i> , 2020, 32, 122-135.	3.0	83
28	Transfusion of Anaerobically or Conventionally Stored Blood After Hemorrhagic Shock. <i>Shock</i> , 2020, 53, 352-362.	1.0	28
29	Control of systemic inflammation through early nitric oxide supplementation with nitric oxide releasing nanoparticles. <i>Free Radical Biology and Medicine</i> , 2020, 161, 15-22.	1.3	12
30	Desperate Times, Desperate Measures: The Case for RRx-001 in the Treatment of COVID-19. <i>Seminars in Oncology</i> , 2020, 47, 305-308.	0.8	10
31	Polymerized human hemoglobin facilitated modulation of tumor oxygenation is dependent on tumor oxygenation status and oxygen affinity of the hemoglobin-based oxygen carrier. <i>Scientific Reports</i> , 2020, 10, 11372.	1.6	16
32	Apohemoglobin-haptoglobin complexes attenuate the hypertensive response to low-molecular-weight polymerized hemoglobin. <i>Blood Advances</i> , 2020, 4, 2739-2750.	2.5	5
33	Resuscitation After Hemorrhagic Shock in the Microcirculation: Targeting Optimal Oxygen Delivery in the Design of Artificial Blood Substitutes. <i>Frontiers in Medicine</i> , 2020, 7, 585638.	1.2	7
34	What determines blood viscosity at the highest city in the world?. <i>Journal of Physiology</i> , 2020, 598, 3817-3818.	1.3	1
35	Purification of <i>Lumbricus terrestris</i> Mega-Hemoglobin for Diverse Oxygen Therapeutic Applications. <i>ACS Biomaterials Science and Engineering</i> , 2020, 6, 4957-4968.	2.6	7
36	Resuscitation From Hemorrhagic Shock With Fresh and Stored Blood and Polymerized Hemoglobin. <i>Shock</i> , 2020, 54, 464-473.	1.0	15

#	ARTICLE	IF	CITATIONS
37	Tumor vascular status controls oxygen delivery facilitated by infused polymerized hemoglobins with varying oxygen affinity. PLoS Computational Biology, 2020, 16, e1008157.	1.5	5
38	Polymerized Hemoglobin With Increased Molecular Size Reduces Toxicity in Healthy Guinea Pigs. ACS Applied Bio Materials, 2020, 3, 2976-2985.	2.3	13
39	Balance between oxygen transport and blood rheology during resuscitation from hemorrhagic shock with polymerized bovine hemoglobin. Journal of Applied Physiology, 2020, 129, 97-107.	1.2	7
40	Enhanced Photodynamic Therapy Using the Apohemoglobin-Haptoglobin Complex as a Carrier of Aluminum Phthalocyanine. ACS Applied Bio Materials, 2020, 3, 4495-4506.	2.3	4
41	Numerical Model for the Determination of Erythrocyte Mechanical Properties and Wall Shear Stress in vivo From Intravital Microscopy. Frontiers in Physiology, 2020, 10, 1562.	1.3	6
42	A Review on Microvascular Hemodynamics. Critical Care Clinics, 2020, 36, 293-305.	1.0	15
43	Apohemoglobin-haptoglobin complex attenuates the pathobiology of circulating acellular hemoglobin and heme. American Journal of Physiology - Heart and Circulatory Physiology, 2020, 318, H1296-H1307.	1.5	12
44	Effects of Increased Hemoglobin Oxygen Affinity on Cerebrovascular Reserve Capacity in Sickle Cell Disease. FASEB Journal, 2020, 34, 1-1.	0.2	0
45	Visualization of the consequences of Succinate Dehydrogenase Inhibition on Oxygen utilization During Hemorrhagic Shock using Hyperspectral Imaging. FASEB Journal, 2020, 34, 1-1.	0.2	0
46	Implications of Systemic Hematocrit on the Radial Distribution of Red Cells in Arterioles. FASEB Journal, 2020, 34, 1-1.	0.2	0
47	Correlation of decreased expression of PD-L1 on circulating tumor cells and clinical benefit in SCLC Patients treated with RRx-001, a CD47 downregulator, in a phase II trial.. Journal of Clinical Oncology, 2020, 38, 9062-9062.	0.8	0
48	Cardiovascular effects of polymerized hemoglobin in a dyslipidemia model. FASEB Journal, 2020, 34, 1-1.	0.2	0
49	Polymerized Hemoglobin Maintains Cardiac Function After Extreme Anemia. FASEB Journal, 2020, 34, 1-1.	0.2	0
50	Apo $\epsilon$ hemoglobin and Haptoglobin Limit Acellular Hemoglobin Negative Effects. FASEB Journal, 2020, 34, 1-1.	0.2	0
51	Resuscitation from Hemorrhagic Shock after Traumatic Brain Injury with Polymerized Hemoglobin. FASEB Journal, 2020, 34, 1-1.	0.2	0
52	Polymerized human hemoglobin increases the effectiveness of cisplatin-based chemotherapy in non-small cell lung cancer. Oncotarget, 2020, 11, 3770-3781.	0.8	7
53	Prediction of Recovery From Severe Hemorrhagic Shock Using Logistic Regression. IEEE Journal of Translational Engineering in Health and Medicine, 2019, 7, 1-9.	2.2	6
54	RRx-001 protects normal tissues but not tumors via Nrf2 induction and Bcl-2 inhibition. Journal of Cancer Research and Clinical Oncology, 2019, 145, 2045-2050.	1.2	10

#	ARTICLE	IF	CITATIONS
55	Hepatocyte-specific HIF-1 $\beta$ ablation improves obesity-induced glucose intolerance by reducing first-pass GLP-1 degradation. <i>Science Advances</i> , 2019, 5, eaaw4176.	4.7	20
56	Response by Lundberg et al to Letter Regarding Article, "Hemoglobin $\beta$ 93 Cysteine Is Not Required for Export of Nitric Oxide Bioactivity From the Red Blood Cell". <i>Circulation</i> , 2019, 140, e760-e761.	1.6	0
57	Reducing Ischemia/Reperfusion Injury by the Targeted Delivery of Nitric Oxide from Magnetic-Field-Induced Localization of S-Nitrosothiol-Coated Paramagnetic Nanoparticles. <i>ACS Applied Bio Materials</i> , 2019, 2, 2907-2919.	2.3	10
58	Cardioprotective Effect of Phase 3 Clinical Anticancer Agent, RRx-001, in Doxorubicin-Induced Acute Cardiotoxicity in Mice. <i>Molecular Pharmaceutics</i> , 2019, 16, 2929-2934.	2.3	12
59	Hemoglobin $\beta$ 93 Cysteine Is Not Required for Export of Nitric Oxide Bioactivity From the Red Blood Cell. <i>Circulation</i> , 2019, 139, 2654-2663.	1.6	42
60	Doxorubicin-loaded red blood cells reduced cardiac toxicity and preserved anticancer activity. <i>Drug Delivery</i> , 2019, 26, 433-442.	2.5	32
61	Red Blood Cell Metabolic Responses to Torpor and Arousal in the Hibernator Arctic Ground Squirrel. <i>Journal of Proteome Research</i> , 2019, 18, 1827-1841.	1.8	34
62	RRx-001 Acts as a Dual Small Molecule Checkpoint Inhibitor by Downregulating CD47 on Cancer Cells and SIRP- $\alpha$ on Monocytes/Macrophages. <i>Translational Oncology</i> , 2019, 12, 626-632.	1.7	66
63	Increased Hemoglobin Oxygen Affinity With 5-Hydroxymethylfurfural Supports Cardiac Function During Severe Hypoxia. <i>Frontiers in Physiology</i> , 2019, 10, 1350.	1.3	13
64	Nitrite may serve as a combination partner and a biomarker for the anti-cancer activity of RRx-001. <i>Biorheology</i> , 2019, 56, 221-235.	1.2	3
65	CX3CL1-Fc treatment prevents atherosclerosis in Ldlr KO mice. <i>Molecular Metabolism</i> , 2019, 20, 89-101.	3.0	21
66	Knockdown of ANT2 reduces adipocyte hypoxia and improves insulin resistance in obesity. <i>Nature Metabolism</i> , 2019, 1, 86-97.	5.1	71
67	Pharmacological Increase of Hb-O <sub>2</sub> Affinity with a Voxelotor Analog Does Not Decrease Brain Tissue pO <sub>2</sub> or Limit O <sub>2</sub> Extraction in Brain Tissues of Sickle Cell Mice. <i>Blood</i> , 2019, 134, 3564-3564.	0.6	4
68	RRx-001 is a phase III aerospace-derived small molecule that immunonormalizes the tumor microenvironment.. <i>Journal of Clinical Oncology</i> , 2019, 37, 156-156.	0.8	1
69	A Review of Clinical Radioprotection and Chemoprotection for Oral Mucositis. <i>Translational Oncology</i> , 2018, 11, 771-778.	1.7	63
70	GBT440 improves red blood cell deformability and reduces viscosity of sickle cell blood under deoxygenated conditions. <i>Clinical Hemorheology and Microcirculation</i> , 2018, 70, 95-105.	0.9	58
71	Do Skeletal Dynamics Mediate Sugar Uptake and Transport in Human Erythrocytes?. <i>Biophysical Journal</i> , 2018, 114, 1440-1454.	0.2	3
72	Emergent behaviors in RBCs flows in micro-channels using digital particle image velocimetry. <i>Microvascular Research</i> , 2018, 116, 77-86.	1.1	7

#	ARTICLE	IF	CITATIONS
73	Navigating the "No Man's Land" of TKI-Failed EGFR-Mutated Non-Small Cell Lung Cancer (NSCLC): A Review. <i>Neoplasia</i> , 2018, 20, 92-98.	2.3	24
74	Brief report: RRx-001 is a c-Myc inhibitor that targets cancer stem cells. <i>Oncotarget</i> , 2018, 9, 23439-23442.	0.8	17
75	Erythrocyte Aging, Protection via Vesiculation: An Analysis Methodology via Oscillatory Flow. <i>Frontiers in Physiology</i> , 2018, 9, 1607.	1.3	26
76	Enzyme promiscuity drives branched-chain fatty acid synthesis in adipose tissues. <i>Nature Chemical Biology</i> , 2018, 14, 1021-1031.	3.9	165
77	Implications Enzymatic Degradation of the Endothelial Glycocalyx on the Microvascular Hemodynamics and the Arteriolar Red Cell Free Layer of the Rat Cremaster Muscle. <i>Frontiers in Physiology</i> , 2018, 9, 168.	1.3	19
78	Quantitative analysis of spatial irregularities in RBCs flows. <i>Chaos, Solitons and Fractals</i> , 2018, 115, 349-355.	2.5	5
79	Platelet inhibitory effects of the Phase 3 anticancer and normal tissue cytoprotective agent, RRx-001. <i>Journal of Cellular and Molecular Medicine</i> , 2018, 22, 5076-5082.	1.6	11
80	Cardiac-specific knockout and pharmacological inhibition of Endothelin receptor type B lead to cardiac resistance to extreme hypoxia. <i>Journal of Molecular Medicine</i> , 2018, 96, 975-982.	1.7	10
81	Rrx-001 Is a Phase 3 Small Molecule Dual Inhibitor of CD47 and Sirpα with Activity in Multiple Myeloma. <i>Blood</i> , 2018, 132, 5623-5623.	0.6	3
82	Use of Logistic Regression to Determine Parameter Ability for Recovery Prediction in Experimental Rat Hemorrhagic Shock Model. <i>FASEB Journal</i> , 2018, 32, lb338.	0.2	0
83	Resuscitation from Hemorrhagic Shock with High Molecular Weight Polymerized Hemoglobin. <i>FASEB Journal</i> , 2018, 32, lb337.	0.2	0
84	Posttransfusion Increase of Hematocrit per se Does Not Improve Circulatory Oxygen Delivery due to Increased Blood Viscosity. <i>Anesthesia and Analgesia</i> , 2017, 124, 1547-1554.	1.1	28
85	RRx-001 protects against cisplatin-induced toxicities. <i>Journal of Cancer Research and Clinical Oncology</i> , 2017, 143, 1671-1677.	1.2	18
86	The macrophage stimulating anti-cancer agent, RRx-001, protects against ischemia-reperfusion injury. <i>Expert Review of Hematology</i> , 2017, 10, 575-582.	1.0	13
87	GBT1118, a potent allosteric modifier of hemoglobin O <sub>2</sub> affinity, increases tolerance to severe hypoxia in mice. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2017, 313, H381-H391.	1.5	28
88	RRx-001: a systemically non-toxic M2-to-M1 macrophage stimulating and prosensitizing agent in Phase II clinical trials. <i>Expert Opinion on Investigational Drugs</i> , 2017, 26, 109-119.	1.9	45
89	Blood Quality Diagnostic Device Detects Storage Differences Between Donors. <i>IEEE Transactions on Biomedical Circuits and Systems</i> , 2017, 11, 1400-1405.	2.7	7
90	RRx-001 Priming of PD-1 Inhibition in the Treatment of Small Cell Carcinoma of the Vagina: A Rare Gynecological Tumor. <i>Case Reports in Oncology</i> , 2017, 10, 276-280.	0.3	6

#	ARTICLE	IF	CITATIONS
91	Rat red blood cell storage lesions in various additive solutions. <i>Clinical Hemorheology and Microcirculation</i> , 2017, 67, 45-57.	0.9	9
92	Prospects for Human Erythrocyte Skeleton-Bilayer Dissociation during Splenic Flow. <i>Biophysical Journal</i> , 2017, 113, 900-912.	0.2	26
93	Acute kidney function and morphology following toplayer administration of recombinant hemoglobin solution. <i>Artificial Cells, Nanomedicine and Biotechnology</i> , 2017, 45, 24-30.	1.9	1
94	Cardiac function during resuscitation from hemorrhagic shock with polymerized bovine hemoglobin-based oxygen therapeutic. <i>Artificial Cells, Nanomedicine and Biotechnology</i> , 2017, 45, 686-693.	1.9	10
95	Role of glycocalyx in attenuation of shear stress on endothelial cells: From in vivo experiments to microfluidic circuits. , 2017, , .		1
96	DPIV analysis of RBCs flows in serpentine micro-channel. , 2017, , .		0
97	RRx-001 Reset: Chemoresensitization via NO-Mediated M1 Macrophage Repolarization. , 2017, , 35-56.		1
98	Abstract 966: Phase II clinical trial patient responses to the macrophage activating agent RRx-001 correlate to TGF- $\beta$ 2 pathway activation and markers for fibrosis. , 2017, , .		2
99	Polyethylene Glycol Camouflaged Earthworm Hemoglobin. <i>PLoS ONE</i> , 2017, 12, e0170041.	1.1	18
100	Mixtures of tense and relaxed state polymerized human hemoglobin regulate oxygen affinity and tissue construct oxygenation. <i>PLoS ONE</i> , 2017, 12, e0185988.	1.1	20
101	Partial Response in an RRx-001-Primed Patient with Refractory Small-Cell Lung Cancer after a Third Introduction of Platinum Doublets. <i>Case Reports in Oncology</i> , 2016, 9, 285-289.	0.3	12
102	Turning on the Radio: Epigenetic Inhibitors as Potential Radiopriming Agents. <i>Biomolecules</i> , 2016, 6, 32.	1.8	9
103	Targeting tumor hypoxia with the epigenetic anticancer agent, RRx-001: a superagonist of nitric oxide generation. <i>Medical Oncology</i> , 2016, 33, 85.	1.2	11
104	Partial Response to Platinum Doublets in Refractory EGFR-Positive Non-Small Cell Lung Cancer Patients after RRx-001: Evidence of Episensitization. <i>Case Reports in Oncology</i> , 2016, 9, 62-67.	0.3	16
105	Conversion of Platinum-Etoposide-Resistant to Sensitive SCLC after Treatment with the Epi-Immunotherapeutic RRx-001: A Case Report. <i>Oncology Research and Treatment</i> , 2016, 39, 720-723.	0.8	6
106	Partial response to carboplatin in an RRx-001 pretreated patient with EGFR-inhibitor-resistance and T790M-negative NSCLC. <i>Respiratory Medicine Case Reports</i> , 2016, 18, 62-65.	0.2	10
107	Immunoresponsive Gene 1 and Itaconate Inhibit Succinate Dehydrogenase to Modulate Intracellular Succinate Levels. <i>Journal of Biological Chemistry</i> , 2016, 291, 14274-14284.	1.6	342
108	A look inside the mechanistic black box: Are red blood cells the critical effectors of RRx-001 cytotoxicity?. <i>Medical Oncology</i> , 2016, 33, 63.	1.2	15

#	ARTICLE	IF	CITATIONS
109	Immune Reactivity and Pseudoprogression or Tumor Flare in a Serially Biopsied Neuroendocrine Patient Treated with the Epigenetic Agent RRx-001. <i>Case Reports in Oncology</i> , 2016, 9, 164-170.	0.3	15
110	Control of overweight and obesity in childhood through education in meal time habits. The “good manners for a healthy future” programme. <i>Pediatric Obesity</i> , 2016, 11, 484-490.	1.4	21
111	Senp1 drives hypoxia-induced polycythemia via GATA1 and Bcl-xL in subjects with Monge’s disease. <i>Journal of Experimental Medicine</i> , 2016, 213, 2729-2744.	4.2	29
112	RRx-001 in Refractory Small-Cell Lung Carcinoma: A Case Report of a Partial Response after a Third Reintroduction of Platinum Doublets. <i>Case Reports in Oncology</i> , 2016, 9, 171-176.	0.3	11
113	A Partial Response to Reintroduced Chemotherapy in a Resistant Small Cell Lung Cancer Patient after Priming with RRx-001. <i>Clinical Medicine Insights: Oncology</i> , 2016, 10, CMO.S40429.	0.6	12
114	Hyperthermia during exercise “a double-edged sword. <i>Temperature</i> , 2016, 3, 512-513.	1.6	3
115	Increases in core temperature counterbalance effects of haemoconcentration on blood viscosity during prolonged exercise in the heat. <i>Experimental Physiology</i> , 2016, 101, 332-342.	0.9	23
116	RRx-001, A novel dinitroazetidone radiosensitizer. <i>Investigational New Drugs</i> , 2016, 34, 371-377.	1.2	37
117	Inflammatory response to implantation of transparent nanocrystalline yttria-stabilized zirconia using a dorsal window chamber model. <i>Nanomedicine: Nanotechnology, Biology, and Medicine</i> , 2016, 12, 1757-1763.	1.7	17
118	RRx-001, an epigenetic-based radio- and chemosensitizer, has vascular normalizing effects on SCCVII and U87 tumors. <i>Clinical Epigenetics</i> , 2016, 8, 53.	1.8	20
119	Poly(ethylene glycol) hydrogels with cell cleavable groups for autonomous cell delivery. <i>Biomaterials</i> , 2016, 77, 186-197.	5.7	57
120	Notch-independent RBPJ controls angiogenesis in the adult heart. <i>Nature Communications</i> , 2016, 7, 12088.	5.8	43
121	Abstract 2165: Enhanced uptake and accumulation of temozolomide and irinotecan in orthotopically-implanted gliomas by vascular priming with RRx-001. <i>Cancer Research</i> , 2016, 76, 2165-2165.	0.4	2
122	Rockets, radiosensitizers, and RRx-001: an origin story part I. <i>Discovery Medicine</i> , 2016, 21, 173-80.	0.5	16
123	RRx-001, a novel clinical-stage chemosensitizer, radiosensitizer, and immunosensitizer, inhibits glucose 6-phosphate dehydrogenase in human tumor cells. <i>Discovery Medicine</i> , 2016, 21, 251-65.	0.5	16
124	Perfusion pressure and blood flow determine microvascular apparent viscosity. <i>Experimental Physiology</i> , 2015, 100, 977-987.	0.9	12
125	Flushing Out Carcinoid Syndrome: Beneficial Effect of the Anticancer Epigenetic Agent RRx-001 in a Patient with a Treatment-Refractory Neuroendocrine Tumor. <i>Case Reports in Oncology</i> , 2015, 8, 461-465.	0.3	13
126	From METS to malaria: RRx-001, a multi-faceted anticancer agent with activity in cerebral malaria. <i>Malaria Journal</i> , 2015, 14, 218.	0.8	15
