#	ARTICLE	IF	CITATIONS
1	Influence of alternative rice husk ash filler on bitumen emulsion-based recycled asphalt. Road Materials and Pavement Design, 2023, 24, 1507-1521.	4.0	0
2	Role of mineral filler in asphalt mixture. Road Materials and Pavement Design, 2022, 23, 247-286.	4.0	56
3	Laboratory performance of asphalt mixture with waste tyre rubber and APAO modified asphalt binder. International Journal of Pavement Engineering, 2022, 23, 59-69.	4.4	15
4	Discrete Element Simulation of the Internal Structures of Asphalt Mixtures with High Content of Tire Rubber. Lecture Notes in Civil Engineering, 2022, , 425-439.	0.4	0
5	High, intermediate and low temperature performance appraisal of elastomeric and plastomeric asphalt binders and mixes. Journal of Elastomers and Plastics, 2022, 54, 225-246.	1.5	7
6	Influence of silane-hydrolysate coupling agents on bitumenâ€™aggregate interfacial adhesion: An exploration from molecular dynamics simulation. International Journal of Adhesion and Adhesives, 2022, 112, 102993.	2.9	17
7	Laboratory Performance and Field Case Study of Asphalt Mixture with Sasobit Treated Aramid Fiber as Modifier. Transportation Research Record, 2022, 2676, 811-824.	1.9	11
8	Low-density polyethylene/ethyleneâ€™vinyl acetate compound modified asphalt: Optimal preparation process and high-temperature rheological properties. Construction and Building Materials, 2022, 314, 125688.	7.2	14
9	Influences of different modification methods on surface activation of waste tire rubber powder applied in cement-based materials. Construction and Building Materials, 2022, 314, 125191.	7.2	11
10	Discussion on molecular dynamics (MD) simulations of the asphalt materials. Advances in Colloid and Interface Science, 2022, 299, 102565.	14.7	63
11	Mechanical behaviors of asphalt mixtures modified with European rock bitumen and waste cooking oil. Construction and Building Materials, 2022, 319, 125909.	7.2	22
12	Virtual design of asphalt mixtures using a growth and contact model based on realistic aggregates. Construction and Building Materials, 2022, 320, 126322.	7.2	3
13	Viscoelastic Properties, Rutting Resistance, and Fatigue Resistance of Waste Wood-Based Biochar-Modified Asphalt. Coatings, 2022, 12, 89.	2.6	8
14	Review on Applications of Lignin in Pavement Engineering: A Recent Survey. Frontiers in Materials, 2022, 8, .	2.4	22
15	Research on the anti-aging mechanism of SBS-modified asphalt compounded with multidimensional nanomaterials based on atomic force microscopy. Construction and Building Materials, 2022, 317, 125808.	7.2	19
16	The effect of styrene-butadiene rubber modification on the properties of asphalt binders: Aging and restoring. Construction and Building Materials, 2022, 316, 126034.	7.2	9
17	Asphalt Mixture with Scrap Tire Rubber and Nylon Fiber from Waste Tires: Laboratory Performance and Preliminary M-E Design Analysis. Buildings, 2022, 12, 160.	3.1	18
18	Characteristics of mineral fillers and their effects on mastic fracture resistance at intermediate temperature 20 â„ƒ. Construction and Building Materials, 2022, 323, 126568.	7.2	5

#	ARTICLE	IF	CITATIONS
19	Chemical characteristics analyze of SBS-modified bitumen containing composite nanomaterials after aging by FTIR and GPC. Construction and Building Materials, 2022, 324, 126522.	7.2	10
20	The Performance Evaluation of Asphalt Mortar and Asphalt Mixture Containing Municipal Solid Waste Incineration Fly Ash. Materials, 2022, 15, 1387.	2.9	11
21	Temperature dependency of VOCs release characteristics of asphalt materials under varying test conditions. Journal of Traffic and Transportation Engineering (English Edition), 2022, 9, 280-292.	4.2	9
22	Atomistic-scale investigation of self-healing mechanism in Nano-silica modified asphalt through molecular dynamics simulation. Journal of Infrastructure Preservation and Resilience, 2022, 3, .	3.2	16
23	Experimental assessments of methanol-based foaming agent in latex modified foamed binders and warm asphalt mixtures. , 2022, 2, 84-97.		3
24	Highway constructions on the Qinghai-Tibet Plateau: Challenge, research and practice. , 2022, 2, 1-60.		25
25	Evaluation of test methods for fracture resistance of high modulus asphalt binders from rheological and mechanical perspectives. Construction and Building Materials, 2022, 329, 127216.	7.2	4
26	Moisture, Rutting, and Fatigue-Cracking Susceptibility of Water-Carrying, Wax-Based, and Chemical-Based Warm Mix Asphalt Systems. Journal of Materials in Civil Engineering, 2022, 34, .	2.9	2
27	Preparation process and performance of thermoplastic polyurethane/amorphous poly alpha olefin compound modified bitumen. Journal of Cleaner Production, 2022, 352, 131562.	9.3	15
28	Literature Review on the Discrete Element Method in Asphalt Mixtures. Frontiers in Materials, 2022, 9, .	2.4	7
29	Influence of sea salt on the interfacial adhesion of bitumenâ€“aggregate systems by molecular dynamics simulation. Construction and Building Materials, 2022, 336, 127471.	7.2	35
30	Optimal design of fresh sand fog seal mortar using response surface methodology (RSM): Towards to its workability and rheological properties. Construction and Building Materials, 2022, 340, 127638.	7.2	11
31	Evaluation of lab performance of stamp sand and acrylonitrile styrene acrylate waste composites without asphalt as road surface materials. Construction and Building Materials, 2022, 338, 127569.	7.2	22
32	New Methodology to Characterize the Workability of Asphaltic Concrete Mixtures Based on Kinematic Compaction Energy. Sustainability, 2022, 14, 6550.	3.2	0
33	Effect of Freezeâ€“Thaw cycles on the pavement performance of SBS modified and composite crumb rubber modified asphalt mixtures. Construction and Building Materials, 2022, 342, 127799.	7.2	13
34	A Detection Method for Pavement Cracks Combining Object Detection and Attention Mechanism. IEEE Transactions on Intelligent Transportation Systems, 2022, 23, 22179-22189.	8.0	19
35	Anti-Skid Characteristics of Asphalt Pavement Based on Partial Tire Aquaplane Conditions. Materials, 2022, 15, 4976.	2.9	4
36	Study on pre-compaction of pavement graded gravels via imaging technologies, artificial intelligent and numerical simulations. Construction and Building Materials, 2022, 345, 128380.	7.2	2

#	ARTICLE	IF	CITATIONS
37	Preparation and anti-icing performance of acrylic superhydrophobic asphalt pavement coating with microwave heating function. <i>Construction and Building Materials</i> , 2022, 344, 128289.	7.2	16
38	Laboratory shear bond test for chip-seal under varying environmental and material conditions. <i>International Journal of Pavement Engineering</i> , 2021, 22, 1107-1115.	4.4	13
39	Characteristics of cement-stabilized macadam containing surface-treated recycled aggregates. <i>Road Materials and Pavement Design</i> , 2021, 22, 2029-2043.	4.0	17
40	Investigation on the morphological and mineralogical properties of coarse aggregates under VSI crushing operation. <i>International Journal of Pavement Engineering</i> , 2021, 22, 1611-1624.	4.4	21
41	Short- and long-term properties of glass fiber reinforced asphalt mixtures. <i>International Journal of Pavement Engineering</i> , 2021, 22, 64-76.	4.4	35
42	Influence of ethylene-vinyl acetate on the performance improvements of low-density polyethylene-modified bitumen. <i>Journal of Cleaner Production</i> , 2021, 278, 123865.	9.3	25
43	Standardization to evaluate the lasting capacity of rubberized asphalt mixtures with different testing approaches. <i>Construction and Building Materials</i> , 2021, 269, 121341.	7.2	29
44	Unified characterizing fatigue performance of rubberized asphalt mixtures subjected to different loading modes. <i>Journal of Cleaner Production</i> , 2021, 279, 123740.	9.3	38
45	3-D virtual design and microstructural modeling of asphalt mixture based on a digital aggregate library. <i>Computers and Structures</i> , 2021, 242, 106378.	4.4	20
46	Leaching evaluation and performance assessments of asphalt mixtures with recycled cathode ray tube glass: A preliminary study. <i>Journal of Cleaner Production</i> , 2021, 279, 123716.	9.3	24
47	Effect of long-term aging on waste tire rubber and amorphous poly alpha olefin compound modified asphalt binder and its mixtures. <i>Construction and Building Materials</i> , 2021, 272, 121667.	7.2	20
48	Three-Dimensional Characterization and Evaluation of Aggregate Skeleton of Asphalt Mixture Based on Force-Chain Analysis. <i>Journal of Engineering Mechanics - ASCE</i> , 2021, 147, .	2.9	27
49	Workability, compactibility and engineering properties of rubber-modified asphalt mixtures prepared via wet process. <i>International Journal of Pavement Research and Technology</i> , 2021, 14, 560-569.	2.6	9
50	Physical, chemical and morphology characterisation of nano ceramic powder as bitumen modification. <i>International Journal of Pavement Engineering</i> , 2021, 22, 858-871.	4.4	15
51	Strength and fatigue performance for cement-treated aggregate base materials. <i>International Journal of Pavement Engineering</i> , 2021, 22, 690-699.	4.4	39
52	A numerical study on rutting behaviour of direct coal liquefaction residue modified asphalt mixture. <i>Road Materials and Pavement Design</i> , 2021, 22, 1454-1468.	4.0	7
53	Influence of air void structures on the coefficient of permeability of asphalt mixtures. <i>Powder Technology</i> , 2021, 377, 1-9.	4.2	21
54	Revealing compatibility mechanism of nanosilica in asphalt through molecular dynamics simulation. <i>Journal of Molecular Modeling</i> , 2021, 27, 81.	1.8	38

#	ARTICLE	IF	CITATIONS
55	Effect of Water Absorption and Loss Characteristics of Fine Aggregates on Aggregate-Asphalt Adhesion. KSCE Journal of Civil Engineering, 2021, 25, 2020-2035.	1.9	5
56	Characterization and evaluation of morphological features for aggregate in asphalt mixture: A review. Construction and Building Materials, 2021, 273, 121989.	7.2	26
57	Recycling fish scale powder in improving the performance of asphalt: A sustainable utilization of fish scale waste in asphalt. Journal of Cleaner Production, 2021, 288, 125682.	9.3	39
58	Relationship between Air Voids and Permeability: Effect on Water Scouring Resistance in HMA. Journal of Materials in Civil Engineering, 2021, 33, .	2.9	10
59	Cold In-Place Recycling Asphalt Mixtures: Laboratory Performance and Preliminary M-E Design Analysis. Materials, 2021, 14, 2036.	2.9	17
60	Effect of Coarse Aggregate Characteristics on Skid Resistance Deterioration of the Ultrathin Wearing Course. Journal of Materials in Civil Engineering, 2021, 33, .	2.9	7
61	Behavioural interface-bonding and chemical characterization of silane and wax based additives on latex modified asphalt binders. International Journal of Adhesion and Adhesives, 2021, 106, 102822.	2.9	6
62	Effect of crumb rubber size on the performance of rubberized asphalt with bio-oil pretreatment. Construction and Building Materials, 2021, 285, 122864.	7.2	25
63	Morphological simplification of asphaltic mixture components for micromechanical simulation using finite element method. Computer-Aided Civil and Infrastructure Engineering, 2021, 36, 1435-1452.	9.8	14
64	A New Method for Compaction Quality Evaluation of Asphalt Mixtures with the Intelligent Aggregate (IA). Materials, 2021, 14, 2422.	2.9	4
65	Towards an understanding of diffusion mechanism of bio-rejuvenators in aged asphalt binder through molecular dynamics simulation. Journal of Cleaner Production, 2021, 299, 126927.	9.3	80
66	Influence of Different Fillers on Mechanical Properties of Porous Asphalt Mixtures Using Microstructural Finite-Element Analysis. Journal of Transportation Engineering Part B: Pavements, 2021, 147, 04021004.	1.5	6
67	Stability prediction for asphalt mixture based on evolutionary characterization of aggregate skeleton. Computer-Aided Civil and Infrastructure Engineering, 2021, 36, 1453-1466.	9.8	29
68	Mechanical performance of asphalt rejuvenated with various vegetable oils. Construction and Building Materials, 2021, 293, 123485.	7.2	34
69	Influence on Polyurethane Synthesis Parameters Upon the Performance of Base Asphalt. Frontiers in Materials, 2021, 8, .	2.4	10
70	Surface-treated fish scale powder with silane coupling agent in asphalt for performance improvement: Conventional properties, rheology, and morphology. Journal of Cleaner Production, 2021, 311, 127772.	9.3	11
71	Effects of Sodium Sulfate Attack on Concrete Incorporated with Drying-Wetting Cycles. Advances in Civil Engineering, 2021, 2021, 1-12.	0.7	2
72	Application of Epoxy-Asphalt Composite in Asphalt Paving Industry: A Review with Emphasis on Physicochemical Properties and Pavement Performances. Advances in Materials Science and Engineering, 2021, 2021, 1-35.	1.8	17

#	ARTICLE	IF	CITATIONS
73	A Review of Characteristics of Bio-Oils and Their Utilization as Additives of Asphalts. <i>Molecules</i> , 2021, 26, 5049.	3.8	12
74	Evaluation of waste cooling oil and European Rock Asphalt modified asphalt with laboratory tests and economic cost comparison. <i>Journal of Cleaner Production</i> , 2021, 310, 127364.	9.3	21
75	A review on compatibility between crumb rubber and asphalt binder. <i>Construction and Building Materials</i> , 2021, 297, 123820.	7.2	70
76	Influence of concentration and packing of filler particles on the stiffening effect and shearing behaviour of asphalt mastic. <i>Construction and Building Materials</i> , 2021, 295, 123660.	7.2	15
77	Effect of physical hardening on low temperature performance of DCLR modified asphalt. <i>Construction and Building Materials</i> , 2021, 295, 123545.	7.2	9
78	Establishment and extension of digital aggregate database using auxiliary classifier Wasserstein GAN with gradient penalty. <i>Construction and Building Materials</i> , 2021, 300, 124217.	7.2	5
79	Waste cathode-ray-tube glass powder modified asphalt materials: Preparation and characterization. <i>Journal of Cleaner Production</i> , 2021, 314, 127949.	9.3	28
80	Concave distribution characterization of asphalt pavement surface segregation using smartphone and image processing based techniques. <i>Construction and Building Materials</i> , 2021, 301, 124111.	7.2	11
81	Preliminary study of modified asphalt binders with thermoplastics: The Rheology properties and interfacial adhesion between thermoplastics and asphalt binder. <i>Construction and Building Materials</i> , 2021, 301, 124373.	7.2	13
82	Automated pixel-level pavement distress detection based on stereo vision and deep learning. <i>Automation in Construction</i> , 2021, 129, 103788.	9.8	78
83	Rheological behavior of high modulus asphalt binder and its indication for fracture performances. <i>Construction and Building Materials</i> , 2021, 306, 124835.	7.2	5
84	Review on the fatigue properties of recycled asphalt concrete containing construction and demolition wastes. <i>Journal of Cleaner Production</i> , 2021, 327, 129478.	9.3	14
85	Mechanism and rheological characterization of MDI modified Wood-Based Bio-Oil asphalt. <i>Construction and Building Materials</i> , 2021, 309, 125113.	7.2	14
86	Improved Analytical Model and Algorithm for Computing Expansive Soil-Induced Stresses in Pavements. <i>International Journal of Geomechanics</i> , 2021, 21, .	2.7	3
87	New innovations in pavement materials and engineering: A review on pavement engineering research 2021. <i>Journal of Traffic and Transportation Engineering (English Edition)</i> , 2021, 8, 815-999.	4.2	59
88	Viscosity Property of Methylene Diphenyl Diisocyanate Modified Asphalt Based on Molecular Dynamics Simulation. , 2021, , .		2
89	A Review of Asphaltic Crack Healing Approaches and Its Mechanism. <i>Advances in Materials Science and Engineering</i> , 2021, 2021, 1-15.	1.8	3
90	Bio-Asphalt Diffusion Properties Based on Molecular Dynamics Simulation. , 2021, , .		0

#	ARTICLE	IF	CITATIONS
91	Engineering and microscopic characteristics of natural rubber latex modified binders incorporating silane additive. International Journal of Pavement Engineering, 2020, 21, 1874-1883.	4.4	16
92	Open-graded asphalt concrete grouted by latex modified cement mortar. Road Materials and Pavement Design, 2020, 21, 61-77.	4.0	38
93	A Review on Utilization of Electronic Waste Plastics for Use Within Asphaltic Concrete Materials: Development, Opportunities and Challenges for Successful Implementation. , 2020, , 737-749.		2
94	Laboratory investigation of fatigue parameters characteristics of aging asphalt mixtures: A dissipated energy approach. Construction and Building Materials, 2020, 230, 116972.	7.2	25
95	High-temperature rheological behavior and fatigue performance of lignin modified asphalt binder. Construction and Building Materials, 2020, 230, 117063.	7.2	107
96	Crack resistance of waste cooking oil modified cement stabilized macadam. Journal of Cleaner Production, 2020, 243, 118525.	9.3	17
97	Assessment and mechanism analysis of municipal solid waste incineration bottom ash as aggregate in cement stabilized macadam. Journal of Cleaner Production, 2020, 244, 118750.	9.3	45
98	Rheological properties and micro-characteristics of polyurethane composite modified asphalt. Construction and Building Materials, 2020, 234, 117395.	7.2	63
99	Performance assessments of open-graded cement stabilized macadam containing recycled aggregate. Construction and Building Materials, 2020, 233, 117326.	7.2	21
100	Impacts of recycled crumb rubber powder and natural rubber latex on the modified asphalt rheological behaviour, bonding, and resistance to shear. Construction and Building Materials, 2020, 234, 117357.	7.2	72
101	Performance and optimization of castor beans-based bio-asphalt and European rock-asphalt modified asphalt binder. Construction and Building Materials, 2020, 240, 117951.	7.2	29
102	Prediction of the coefficient of permeability of asphalt mixtures using the lattice Boltzmann method. Construction and Building Materials, 2020, 240, 117896.	7.2	18
103	Use of tung oil as a rejuvenating agent in aged asphalt: Laboratory evaluations. Construction and Building Materials, 2020, 239, 117783.	7.2	47
104	Rheological models for non-newtonian viscosity of modified asphalt binders and mastics. Egyptian Journal of Petroleum, 2020, 29, 105-112.	2.6	7
105	High modulus asphalt concrete: A state-of-the-art review. Construction and Building Materials, 2020, 237, 117653.	7.2	38
106	Investigation of anti-icing, anti-skid, and water impermeability performances of an acrylic superhydrophobic coating on asphalt pavement. Construction and Building Materials, 2020, 264, 120702.	7.2	31
107	Investigation of hot mixture asphalt with high ground tire rubber content. Journal of Cleaner Production, 2020, 277, 124037.	9.3	23
108	Investigating the mechanisms of rubber, styrene-butadiene-styrene and ethylene-vinyl acetate in asphalt binder based on rheological and distress-related tests. Construction and Building Materials, 2020, 262, 120744.	7.2	17
