#	ARTICLE	IF	CITATIONS
1	Associations of university student life challenges with mental health and self-rated health: A longitudinal study with 6 months follow-up. <i>Journal of Affective Disorders</i> , 2022, 296, 250-257.	4.1	15
2	Changes in health among 45-64-year-old Dutch persons before, during and after becoming unemployed or employed: a seven year follow-up study. <i>Scandinavian Journal of Work, Environment and Health</i> , 2022, 48, 283-292.	3.4	2
3	The influence of chronic diseases and poor working conditions in working life expectancy across educational levels among older employees in the Netherlands. <i>Scandinavian Journal of Work, Environment and Health</i> , 2022, 48, 391-398.	3.4	3
4	Associations of within-individual changes in working conditions, health behaviour and BMI with work ability and self-rated health: a fixed effects analysis among Dutch workers. <i>BMJ Open</i> , 2022, 12, e058574.	1.9	2
5	The effectiveness of workplace health promotion programs on self-perceived health of employees with a low socioeconomic position: An individual participant data meta-analysis. <i>SSM - Population Health</i> , 2021, 13, 100743.	2.7	11
6	Mental health among university students: The associations of effort-reward imbalance and overcommitment with psychological distress. <i>Journal of Affective Disorders</i> , 2021, 282, 953-961.	4.1	25
7	Working conditions and health behavior as causes of educational inequalities in self-rated health: an inverse odds weighting approach. <i>Scandinavian Journal of Work, Environment and Health</i> , 2021, 47, 127-135.	3.4	11
8	The influence of occupational class and physical workload on working life expectancy among older employees. <i>Scandinavian Journal of Work, Environment and Health</i> , 2021, 47, 5-14.	3.4	28
9	Decades of workplace health promotion research: marginal gains or a bright future ahead. <i>Scandinavian Journal of Work, Environment and Health</i> , 2021, 47, 561-564.	3.4	22
10	Industry mobility and disability benefits in heavy manual jobs: A cohort study of Swedish construction workers. <i>Scandinavian Journal of Work, Environment and Health</i> , 2021, 47, 217-223.	3.4	0
11	Industry mobility and disability benefits in heavy manual jobs: A cohort study of Swedish construction workers. <i>Scandinavian Journal of Work, Environment and Health</i> , 2021, 47, 217-223.	3.4	4
12	The influence of unhealthy behaviours on early exit from paid employment among workers with a chronic disease: A prospective study using the Lifelines cohort. <i>Preventive Medicine</i> , 2020, 139, 106228.	3.4	11
13	Socioeconomic inequalities in the effectiveness of workplace health promotion programmes on body mass index: An individual participant data meta-analysis. <i>Obesity Reviews</i> , 2020, 21, e13101.	6.5	16
14	Are workplace health promotion programmes effective for all socioeconomic groups? A systematic review. <i>Occupational and Environmental Medicine</i> , 2020, 77, 589-596.	2.8	22
15	Educational differences in duration of working life and loss of paid employment: working life expectancy in The Netherlands. <i>Scandinavian Journal of Work, Environment and Health</i> , 2020, 46, 77-84.	3.4	36
16	The contribution of health to educational inequalities in exit from paid employment in five European regions. <i>Scandinavian Journal of Work, Environment and Health</i> , 2019, 45, 346-355.	3.4	20
17	Quality of motivational interviewing matters: the effect on participation in health-promotion activities in a cluster randomized controlled trial. <i>Scandinavian Journal of Work, Environment and Health</i> , 2018, 44, 414-422.	3.4	7
18	Associations between common diseases and work ability and sick leave among health care workers. <i>International Archives of Occupational and Environmental Health</i> , 2017, 90, 685-693.	2.3	48

#	ARTICLE	IF	CITATIONS
19	A Blended Web-Based Gaming Intervention on Changes in Physical Activity for Overweight and Obese Employees: Influence and Usage in an Experimental Pilot Study. <i>JMIR Serious Games</i> , 2017, 5, e6.	3.1	9
20	The impact of menopause on work ability in women with severe menopausal symptoms. <i>Maturitas</i> , 2016, 90, 3-8.	2.4	56
21	The Prognostic Value of the Work Ability Index for Sickness Absence among Office Workers. <i>PLoS ONE</i> , 2015, 10, e0126969.	2.5	46
22	Providing personal informal care to older European adults: Should we care about the caregivers' health?. <i>Preventive Medicine</i> , 2015, 70, 64-68.	3.4	98
23	Educational Inequalities in Exit from Paid Employment among Dutch Workers: The Influence of Health, Lifestyle and Work. <i>PLoS ONE</i> , 2015, 10, e0134867.	2.5	66
24	Influence of work-related characteristics and work ability on changing employer or leaving the profession among nursing staff. <i>Journal of Nursing Management</i> , 2014, 22, 1065-1075.	3.4	23
25	How Work Impairments and Reduced Work Ability are Associated with Health Care Use in Workers with Musculoskeletal Disorders, Cardiovascular Disorders or Mental Disorders. <i>Journal of Occupational Rehabilitation</i> , 2014, 24, 631-639.	2.2	17
26	Barriers and facilitators for participation in health promotion programs among employees: a six-month follow-up study. <i>BMC Public Health</i> , 2014, 14, 573.	2.9	54
27	The importance of internal health beliefs for employees' participation in health promotion programs. <i>Preventive Medicine</i> , 2014, 67, 330-334.	3.4	17
28	The influence of chronic health problems on work ability and productivity at work: a longitudinal study among older employees. <i>Scandinavian Journal of Work, Environment and Health</i> , 2014, 40, 473-482.	3.4	84
29	How do Older Employees with Health Problems Remain Productive at Work?: A Qualitative Study. <i>Journal of Occupational Rehabilitation</i> , 2013, 23, 115-124.	2.2	17
30	Workplace Health Promotion. <i>American Journal of Preventive Medicine</i> , 2013, 44, 406-415.	3.0	402
31	Equity-Specific Effects of 26 Dutch Obesity-Related Lifestyle Interventions. <i>American Journal of Preventive Medicine</i> , 2013, 44, e61-e70.	3.0	61
32	Poor health, unhealthy behaviors, and unfavorable work characteristics influence pathways of exit from paid employment among older workers in Europe: a four year follow-up study. <i>Scandinavian Journal of Work, Environment and Health</i> , 2013, 39, 125-133.	3.4	180
33	Do work factors modify the association between chronic health problems and sickness absence among older employees?. <i>Scandinavian Journal of Work, Environment and Health</i> , 2013, 39, 477-485.	3.4	40
34	The contribution of overweight, obesity, and lack of physical activity to exit from paid employment: a meta-analysis. <i>Scandinavian Journal of Work, Environment and Health</i> , 2013, 39, 233-240.	3.4	104
35	Initial and Sustained Participation in an Internet-delivered Long-term Worksite Health Promotion Program on Physical Activity and Nutrition. <i>Journal of Medical Internet Research</i> , 2012, 14, e43.	4.3	62
36	Demographic, Behavioral, and Psychosocial Correlates of Using the Website Component of a Worksite Physical Activity and Healthy Nutrition Promotion Program: A Longitudinal Study. <i>Journal of Medical Internet Research</i> , 2010, 12, e44.	4.3	36

#	ARTICLE	IF	CITATIONS
37	Determinants of participation in worksite health promotion programmes: a systematic review. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2009, 6, 26.	4.6	342
38	The (cost-)effectiveness of an individually tailored long-term worksite health promotion programme on physical activity and nutrition: design of a pragmatic cluster randomised controlled trial. <i>BMC Public Health</i> , 2007, 7, 259.	2.9	28
