|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Frontline treatment patterns and outcomes among older adults with acute myeloid leukemia: A population-based analysis in the modern era. <i>Cancer</i> , 2022, 128, 139-149.                                                                                | 4.1 | 5         |
| 2  | Haploidentical vs sibling, unrelated, or cord blood hematopoietic cell transplantation for acute lymphoblastic leukemia. <i>Blood Advances</i> , 2022, 6, 339-357.                                                                                          | 5.2 | 35        |
| 3  | Chimeric antigen receptor T-cell therapy in adults with B-cell acute lymphoblastic leukemia. <i>Blood Advances</i> , 2022, 6, 1608-1618.                                                                                                                    | 5.2 | 15        |
| 4  | Historical perspective and a glance into the antibody-based conditioning regimens: A new era in the horizon?. <i>Blood Reviews</i> , 2022, 52, 100892.                                                                                                      | 5.7 | 1         |
| 5  | Adding Centralized Electronic Patient-Reported Outcome Data Collection to an Established International Clinical Outcomes Registry. <i>Transplantation and Cellular Therapy</i> , 2022, 28, 112.e1-112.e9.                                                   | 1.2 | 4         |
| 6  | Randomized Phase III BMT CTN Trial of Calcineurin Inhibitor-Free Chronic Graft-Versus-Host Disease Interventions in Myeloablative Hematopoietic Cell Transplantation for Hematologic Malignancies. <i>Journal of Clinical Oncology</i> , 2022, 40, 356-368. | 1.6 | 79        |
| 7  | Real-World Experience of Cryopreserved Allogeneic Hematopoietic Grafts during the COVID-19 Pandemic: A Single-Center Report. <i>Transplantation and Cellular Therapy</i> , 2022, 28, 215.e1-215.e10.                                                        | 1.2 | 11        |
| 8  | Outcomes of allogeneic transplantation after hypomethylating agents with venetoclax in acute myeloid leukemia. <i>American Journal of Hematology</i> , 2022, 97, .                                                                                          | 4.1 | 8         |
| 9  | Controversies in the Treatment of Adolescents and Young Adults with Philadelphia Chromosome-Negative B-Cell Acute Lymphoblastic Leukemia. <i>Current Oncology Reports</i> , 2022, , 1.                                                                      | 4.0 | 0         |
| 10 | Innovative Approaches to the Management of Acute Lymphoblastic Leukemia Across the Age Spectrum. <i>American Society of Clinical Oncology Educational Book / ASCO American Society of Clinical Oncology Meeting</i> , 2022, 42, 584-594.                    | 3.8 | 2         |
| 11 | Allogeneic Hematopoietic Cell Transplantation for Adult Acute Lymphoblastic Leukemia in the Modern Era. <i>Transplantation and Cellular Therapy</i> , 2022, , .                                                                                             | 1.2 | 3         |
| 12 | Disparities in trial enrollment and outcomes of Hispanic adolescent and young adult acute lymphoblastic leukemia. <i>Blood Advances</i> , 2022, 6, 4085-4092.                                                                                               | 5.2 | 10        |
| 13 | Outcomes with autologous stem cell transplant vs. non-transplant therapy in patients 70 years and older with multiple myeloma. <i>Bone Marrow Transplantation</i> , 2021, 56, 368-375.                                                                      | 2.4 | 8         |
| 14 | Hepatic veno-occlusive disease in allogeneic stem cell transplant recipients with prior exposure to gemtuzumab ozogamicin or inotuzumab ozogamicin. <i>Leukemia and Lymphoma</i> , 2021, 62, 257-263.                                                       | 1.3 | 10        |
| 15 | CD22-directed CAR T-cell therapy induces complete remissions in CD19-directed CAR-refractory large B-cell lymphoma. <i>Blood</i> , 2021, 137, 2321-2325.                                                                                                    | 1.4 | 51        |
| 16 | Routine use of gemtuzumab ozogamicin in 7â€‰%+â€‰%3-based inductions for all â€˜non-adverseâ€™™ risk AML. <i>Leukemia and Lymphoma</i> , 2021, 62, 1510-1513.                                                                                               | 1.3 | 3         |
| 17 | Immune reconstitution and infectious complications following axicabtagene ciloleucel therapy for large B-cell lymphoma. <i>Blood Advances</i> , 2021, 5, 143-155.                                                                                           | 5.2 | 92        |
| 18 | Azacitidine maintenance after allogeneic hematopoietic cell transplantation for MDS and AML. <i>Blood Advances</i> , 2021, 5, 1757-1759.                                                                                                                    | 5.2 | 9         |

| #  | ARTICLE                                                                                                                                                                                                                                                                  | IF   | CITATIONS |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 19 | Use of Backup Stem Cells for Stem Cell Boost and Second Transplant in Patients with Multiple Myeloma Undergoing Autologous Stem Cell Transplantation. <i>Transplantation and Cellular Therapy</i> , 2021, 27, 405.e1-405.e6.                                             | 1.2  | 4         |
| 20 | Outcomes after delayed and second autologous stem cell transplant in patients with relapsed multiple myeloma. <i>Bone Marrow Transplantation</i> , 2021, 56, 2664-2671.                                                                                                  | 2.4  | 9         |
| 21 | Prospective Randomized Study of Advance Directives in Allogeneic Hematopoietic Cell Transplantation Recipients. <i>Transplantation and Cellular Therapy</i> , 2021, 27, 615.e1-615.e7.                                                                                   | 1.2  | 0         |
| 22 | Stem Cell Mobilization in Multiple Myeloma: Comparing Safety and Efficacy of Cyclophosphamide +/- Plerixafor versus Granulocyte Colony-Stimulating Factor +/- Plerixafor in the Lenalidomide Era. <i>Transplantation and Cellular Therapy</i> , 2021, 27, 590.e1-590.e8. | 1.2  | 5         |
| 23 | CAR T cells with dual targeting of CD19 and CD22 in adult patients with recurrent or refractory B cell malignancies: a phase 1 trial. <i>Nature Medicine</i> , 2021, 27, 1419-1431.                                                                                      | 30.7 | 273       |
| 24 | Return to Work Among Young Adult Survivors of Allogeneic Hematopoietic Cell Transplantation in the United States. <i>Transplantation and Cellular Therapy</i> , 2021, 27, 679.e1-679.e8.                                                                                 | 1.2  | 10        |
| 25 | Concordance of peripheral blood and bone marrow measurable residual disease in adult acute lymphoblastic leukemia. <i>Blood Advances</i> , 2021, 5, 3147-3151.                                                                                                           | 5.2  | 21        |
| 26 | Measurable Residual Disease in Acute Lymphoblastic Leukemia: Optimization and Innovation in 2021 and Beyond. <i>Clinical Lymphoma, Myeloma and Leukemia</i> , 2021, 21, S85-S87.                                                                                         | 0.4  | 0         |
| 27 | Poster: CT-436: Chimeric Antigen Receptor-T Cell Therapy (CAR-T) in Adults with B-Cell Acute Lymphoblastic Leukemia (B-ALL): A Systematic Review and Meta-Analysis. <i>Clinical Lymphoma, Myeloma and Leukemia</i> , 2021, 21, S258.                                     | 0.4  | 1         |
| 28 | Measurable residual disease status and FLT3 inhibitor therapy in patients with FLT3-ITD mutated AML following allogeneic hematopoietic cell transplantation. <i>Bone Marrow Transplantation</i> , 2021, 56, 3091-3093.                                                   | 2.4  | 11        |
| 29 | Incidence and risk factors associated with bleeding and thrombosis following chimeric antigen receptor T-cell therapy. <i>Blood Advances</i> , 2021, 5, 4465-4475.                                                                                                       | 5.2  | 28        |
| 30 | Pretransplant Assessment for Hematopoietic Cell Transplantation Recipients and Donors. , 2021, , 55-72.                                                                                                                                                                  |      | 0         |
| 31 | Chronic medical conditions and late effects after acute myeloid leukaemia in adolescents and young adults: a population-based study. <i>International Journal of Epidemiology</i> , 2021, 50, 663-674.                                                                   | 1.9  | 11        |
| 32 | Enrollment Characteristics and Outcomes of Hispanic and Black AYA ALL Patients Enrolled on a U.S. Intergroup Clinical Trial: A Comparison of the CALGB 10403 (Alliance) Cohort with U.S. Population-Level Data. <i>Blood</i> , 2021, 138, 337-337.                       | 1.4  | 0         |
| 33 | Outcomes for Myelofibrosis Patients Following Myeloablative Allogeneic Stem Cell Transplantation Using the Orca-T Graft from HLA-Matched Related and Unrelated Donors. <i>Blood</i> , 2021, 138, 1819-1819.                                                              | 1.4  | 0         |
| 34 | Do PROs Tell the Whole Story? Differential Outcomes Based on Patient-Reported Outcomes (PROs) Versus Performance-Based Metrics (PBM) on Cognition for Patients Receiving Chimeric Antigen Receptor (CAR)-T Cell Therapy. <i>Blood</i> , 2021, 138, 3043-3043.            | 1.4  | 1         |
| 35 | Mgta-145 + Plerixafor Provides GCSF-Free Rapid and Reliable Hematopoietic Stem Cell Mobilization for Autologous Stem Cell Transplant in Patients with Multiple Myeloma: A Phase 2 Study. <i>Blood</i> , 2021, 138, 3885-3885.                                            | 1.4  | 2         |
| 36 | CD22-CAR T-Cell Therapy Mediates High Durable Remission Rates in Adults with Large B-Cell Lymphoma Who Have Relapsed after CD19-CAR T-Cell Therapy. <i>Blood</i> , 2021, 138, 741-741.                                                                                   | 1.4  | 4         |

| #  | ARTICLE                                                                                                                                                                                                                                                                                                                                  | IF  | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | Orca-T Results in High Cvhd-Free and Relapse-Free Survival Following Myeloablative Conditioning for Hematological Malignancies: Results of a Single Center Phase 2 and a Multicenter Phase 1b Study. <i>Blood</i> , 2021, 138, 98-98.                                                                                                    | 1.4 | 2         |
| 38 | Central Nervous System Relapse After Stem Cell Transplantation in Adolescents and Young Adults with Acute Lymphoblastic Leukemia: A Single-Institution Experience. <i>Journal of Adolescent and Young Adult Oncology</i> , 2020, 9, 166-171.                                                                                             | 1.3 | 6         |
| 39 | Outcomes with Autologous or Allogeneic Stem Cell Transplantation in Patients with Plasma Cell Leukemia in the Era of Novel Agents. <i>Biology of Blood and Marrow Transplantation</i> , 2020, 26, e328-e332.                                                                                                                             | 2.0 | 10        |
| 40 | Late Effects in Survivors of Adolescent and Young Adult Acute Lymphoblastic Leukemia. <i>JNCI Cancer Spectrum</i> , 2020, 4, pkaa025.                                                                                                                                                                                                    | 2.9 | 14        |
| 41 | Philadelphia chromosome positive acute lymphoblastic leukemia in adults: Therapeutic options and dilemmas in 2020. <i>Seminars in Hematology</i> , 2020, 57, 137-141.                                                                                                                                                                    | 3.4 | 7         |
| 42 | Nonmyeloablative allogeneic transplantation achieves clinical and molecular remission in cutaneous T-cell lymphoma. <i>Blood Advances</i> , 2020, 4, 4474-4482.                                                                                                                                                                          | 5.2 | 25        |
| 43 | Access to specialized care and outcomes in adults with acute leukemias. <i>Blood Advances</i> , 2020, 4, 1538-1538.                                                                                                                                                                                                                      | 5.2 | 0         |
