#	ARTICLE	IF	CITATIONS
1	A serial mediation model of attentional engagement with thin bodies on body dissatisfaction: The role of appearance comparisons and rumination. <i>Current Psychology</i> , 2023, 42, 1896-1904.	2.8	10
2	The independent roles of attentional engagement with, and disengagement from, negative information in intrusive re-experiencing of negative events. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2022, 75, 101722.	1.2	2
3	Attentional Bias to Alcohol Information: a Novel Dual-Probe Task. <i>International Journal of Behavioral Medicine</i> , 2022, 29, 820-826.	1.7	1
4	The Role of Facial Appearance Concern and Appraisal Perspective in the Experience of Task-Irrelevant Intrusions. <i>Cognitive Therapy and Research</i> , 2021, 45, 450-455.	1.9	2
5	Craving mediates the association between attentional bias to alcohol and in vivo alcoholic beverage consumption in young social drinkers.. <i>Psychology of Addictive Behaviors</i> , 2021, 35, 895-900.	2.1	3
6	Two probes and better than one: Development of a psychometrically reliable variant of the attentional probe task. <i>Behaviour Research and Therapy</i> , 2021, 138, 103805.	3.1	19
7	Attentional control moderates the relationship between social anxiety and selective attentional responding to negative social information: evidence from objective measures of attentional processes. <i>Cognition and Emotion</i> , 2021, 35, 1440-1446.	2.0	4
8	A multifaceted study of interpersonal functioning and cognitive biases towards social stimuli in adolescents with eating disorders and healthy controls. <i>Journal of Affective Disorders</i> , 2021, 295, 397-404.	4.1	12
9	When Alcohol Adverts Catch the Eye: A Psychometrically Reliable Dual-Probe Measure of Attentional Bias. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 13263.	2.6	3
10	Group rumination-focused cognitive-behavioural therapy (CBT) <i>v.</i> group CBT for depression: phase II trial. <i>Psychological Medicine</i> , 2020, 50, 11-19.	4.5	60
11	Trait anxiety and the alignment of attentional bias with controllability of danger. <i>Psychological Research</i> , 2020, 84, 743-756.	1.7	15
12	Cognitive bias modification to prevent depression (COPE): results of a randomised controlled trial. <i>Psychological Medicine</i> , 2020, 50, 2514-2525.	4.5	9
13	Anxiety & inhibition: dissociating the involvement of state and trait anxiety in inhibitory control deficits observed on the anti-saccade task. <i>Cognition and Emotion</i> , 2020, 34, 1746-1752.	2.0	16
14	GIVE me your attention: Differentiating goal identification and goal execution components of the anti-saccade effect. <i>PLoS ONE</i> , 2019, 14, e0222710.	2.5	2
15	Biased interpretation in perfectionistic concerns: an experimental investigation. <i>Anxiety, Stress and Coping</i> , 2019, 32, 259-269.	2.9	3
16	Anxiety-Linked Attentional Bias: Is It Reliable?. <i>Annual Review of Clinical Psychology</i> , 2019, 15, 529-554.	12.3	85
17	Authorsâ€™ reply. <i>British Journal of Psychiatry</i> , 2018, 212, 246-247.	2.8	1
18	Emotion-in-Motion, a Novel Approach for the Modification of Attentional Bias: An Experimental Proof-of-Concept Study. <i>JMIR Serious Games</i> , 2018, 6, e10993.	3.1	22

#	ARTICLE	IF	CITATIONS
19	Heightened ruminative disposition is associated with impaired attentional disengagement from negative relative to positive information: support for the "impaired disengagement" hypothesis. <i>Cognition and Emotion</i> , 2017, 31, 422-434.	2.0	40
20	A Positive Perspective on Attentional Bias: Positive Affectivity and Attentional Bias to Positive Information. <i>Journal of Happiness Studies</i> , 2017, 18, 1029-1043.	3.2	9
21	Prediction of pre-exam state anxiety from ruminative disposition: The mediating role of impaired attentional disengagement from negative information. <i>Behaviour Research and Therapy</i> , 2017, 91, 102-110.	3.1	11
22	Referential focus moderates depression-linked attentional avoidance of positive information. <i>Behaviour Research and Therapy</i> , 2017, 93, 47-54.	3.1	16
23	Confusing procedures with process when appraising the impact of cognitive bias modification on emotional vulnerability. <i>British Journal of Psychiatry</i> , 2017, 211, 266-271.	2.8	140
24	Integrating Personality Structure, Personality Process, and Personality Development. <i>European Journal of Personality</i> , 2017, 31, 503-528.	3.1	308
25	Attentional control predicts change in bias in response to attentional bias modification. <i>Behaviour Research and Therapy</i> , 2017, 99, 47-56.	3.1	31
26	Controlling the Bias: Inhibitory Attentional Control Moderates the Association between Social Anxiety and Selective Attentional Responding to Negative Social Information in Children and Adolescents. <i>Journal of Experimental Psychopathology</i> , 2016, 7, 423-436.	0.8	5
27	Stuck in a sad place: Biased attentional disengagement in rumination.. <i>Emotion</i> , 2016, 16, 63-72.	1.8	58
28	Anxiety-linked attentional bias and its modification: Illustrating the importance of distinguishing processes and procedures in experimental psychopathology research. <i>Behaviour Research and Therapy</i> , 2016, 86, 68-86.	3.1	73
29	One small step towards the spider, but a giant leap in anxiety: Biased attentional responding to spider stimuli causally contributes to the rate of growth in state anxiety during spider approach. <i>Australian Journal of Psychology</i> , 2016, 68, 178-190.	2.8	2
30	Selective attention in perfectionism: Dissociating valence from perfectionism-relevance. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2016, 51, 100-108.	1.2	14
31	Engaging With the Wrong People. <i>Clinical Psychological Science</i> , 2016, 4, 793-804.	4.0	22
32	Rumination-focused cognitive behaviour therapy vs. cognitive behaviour therapy for depression: study protocol for a randomised controlled superiority trial. <i>Trials</i> , 2015, 16, 344.	1.6	18
33	Validation of a novel attentional bias modification task: The future may be in the cards. <i>Behaviour Research and Therapy</i> , 2015, 65, 93-100.	3.1	41
34	For Ruminators, the Emotional Future Is Bound to the Emotional Past. <i>Clinical Psychological Science</i> , 2015, 3, 648-658.	4.0	8
35	RArandomised controlled trial to imProve depression and the quality of life of people with Dementia using cognitive bias modification: RAPID study protocol. <i>BMJ Open</i> , 2014, 4, e005623-e005623.	1.9	5
36	Enhanced probing of attentional bias: The independence of anxiety-linked selectivity in attentional engagement with and disengagement from negative information. <i>Cognition and Emotion</i> , 2014, 28, 1287-1302.	2.0	115

#	ARTICLE	IF	CITATIONS
37	Cognitive bias modification to prevent depression (COPE): study protocol for a randomised controlled trial. <i>Trials</i> , 2014, 15, 282.	1.6	9
38	When Ignorance is Bliss: Explicit Instruction and the Efficacy of CBM-A for Anxiety. <i>Cognitive Therapy and Research</i> , 2014, 38, 172-188.	1.9	38
39	Don't start what you can't stop: Differentiating individual differences in ruminative onset and ruminative persistence, and their contributions to dysphoria.. <i>Emotion</i> , 2013, 13, 1080-1085.	1.8	5
40	The ups and downs of cognitive bias: Dissociating the attentional characteristics of positive and negative affectivity. <i>Journal of Cognitive Psychology</i> , 2012, 24, 33-53.	0.9	23
41	Always Look on the Bright Side of Life: The Attentional Basis of Positive Affectivity. <i>European Journal of Personality</i> , 2012, 26, 133-144.	3.1	55
