1	Implications of Recent Clinical Trials for the National Cholesterol Education Program Adult Treatment Panel III Guidelines. <i>Circulation</i> , 2004, 110, 227-239.	1.6	5,602
2	2013 ACC/AHA Guideline on the Treatment of Blood Cholesterol to Reduce Atherosclerotic Cardiovascular Risk in Adults. <i>Circulation</i> , 2014, 129, S1-45.	1.6	4,842
3	2013 ACC/AHA Guideline on the Treatment of Blood Cholesterol to Reduce Atherosclerotic Cardiovascular Risk in Adults. <i>Journal of the American College of Cardiology</i> , 2014, 63, 2889-2934.	1.2	3,414
4	Implications of Recent Clinical Trials for the National Cholesterol Education Program Adult Treatment Panel III Guidelines. <i>Journal of the American College of Cardiology</i> , 2004, 44, 720-732.	1.2	1,207
5	Insights From the NHLBI-Sponsored Women's Ischemia Syndrome Evaluation (WISE) Study. <i>Journal of the American College of Cardiology</i> , 2006, 47, S21-S29.	1.2	727
6	Cardiovascular Disease in Women. <i>Circulation Research</i> , 2016, 118, 1273-1293.	2.0	699
7	Coronary Microvascular Reactivity to Adenosine Predicts Adverse Outcome in Women Evaluated for Suspected Ischemia. <i>Journal of the American College of Cardiology</i> , 2010, 55, 2825-2832.	1.2	660
8	ACC/AHA/NHLBI Clinical Advisory on the Use and Safety of Statins. <i>Circulation</i> , 2002, 106, 1024-1028.	1.6	657
9	Insights From the NHLBI-Sponsored Women's Ischemia Syndrome Evaluation (WISE) Study. <i>Journal of the American College of Cardiology</i> , 2006, 47, S4-S20.	1.2	620
10	ACC/AHA/NHLBI clinical advisory on the use and safety of statins ¹¹ When citing this document, the American College of Cardiology, American Heart Association, and National Heart, Lung and Blood Institute would appreciate the following citation format: Pasternak RC, Smith SC, Jr., Bairey-Merz CN, Grundy SM, Cleeman JI, Lenfant C. ACC/AHA/NHLBI Advisory on the Use and Safety of Statins. <i>J Am Coll Cardiol</i> 2002;40:568-73.22This document is available on the Web sites of the ACC (www.acc.org), the		

#	ARTICLE	IF	CITATIONS
19	Abnormal Myocardial Phosphorus-31 Nuclear Magnetic Resonance Spectroscopy in Women with Chest Pain but Normal Coronary Angiograms. <i>New England Journal of Medicine</i> , 2000, 342, 829-835.	13.9	382
20	Serum Amyloid A as a Predictor of Coronary Artery Disease and Cardiovascular Outcome in Women. <i>Circulation</i> , 2004, 109, 726-732.	1.6	379
21	The Prognostic Value of a Nomogram for Exercise Capacity in Women. <i>New England Journal of Medicine</i> , 2005, 353, 468-475.	13.9	365
22	Abnormal Coronary Vasomotion as a Prognostic Indicator of Cardiovascular Events in Women. <i>Circulation</i> , 2004, 109, 722-725.	1.6	346
23	International standardization of diagnostic criteria for vasospastic angina. <i>European Heart Journal</i> , 2017, 38, ehv351.	1.0	325
24	The Economic Burden of Angina in Women With Suspected Ischemic Heart Disease. <i>Circulation</i> , 2006, 114, 894-904.	1.6	299
25	Oxygenated Carotenoid Lutein and Progression of Early Atherosclerosis. <i>Circulation</i> , 2001, 103, 2922-2927.	1.6	297
26	Emergence of Nonobstructive Coronary Artery Disease. <i>Journal of the American College of Cardiology</i> , 2015, 66, 1918-1933.	1.2	257
27	Sex Differences in Blood Pressure Trajectories Over the Life Course. <i>JAMA Cardiology</i> , 2020, 5, 255.	3.0	249
28	Persistent chest pain predicts cardiovascular events in women without obstructive coronary artery disease: results from the NIH-NHLBI-sponsored Women's Ischaemia Syndrome Evaluation (WISE) study. <i>European Heart Journal</i> , 2005, 27, 1408-1415.	1.0	238
29	Meditation and Cardiovascular Risk Reduction. <i>Journal of the American Heart Association</i> , 2017, 6, .	1.6	237
30	Depression, Inflammation, and Incident Cardiovascular Disease in Women With Suspected Coronary Ischemia. <i>Journal of the American College of Cardiology</i> , 2007, 50, 2044-2050.	1.2	234
31	Metabolic Syndrome Modifies the Cardiovascular Risk Associated With Angiographic Coronary Artery Disease in Women. <i>Circulation</i> , 2004, 109, 714-721.	1.6	231
32	Contraceptive Hormone Use and Cardiovascular Disease. <i>Journal of the American College of Cardiology</i> , 2009, 53, 221-231.	1.2	224
33	Hypoestrogenemia of hypothalamic origin and coronary artery disease in premenopausal women: a report from the NHLBI-sponsored WISE study. <i>Journal of the American College of Cardiology</i> , 2003, 41, 413-419.	1.2	221
34	Obstructive Coronary Atherosclerosis and Ischemic Heart Disease: An Elusive Link!. <i>Journal of the American College of Cardiology</i> , 2012, 60, 951-956.	1.2	216
35	The triglyceride/high-density lipoprotein cholesterol ratio predicts all-cause mortality in women with suspected myocardial ischemia. <i>American Heart Journal</i> , 2009, 157, 548-555.	1.2	192
36	In women with symptoms of cardiac ischemia, nonobstructive coronary arteries, and microvascular dysfunction, angiotensin-converting enzyme inhibition is associated with improved microvascular function: A double-blind randomized study from the National Heart, Lung and Blood Institute Women's Ischemia Syndrome Evaluation (WISE). <i>American Heart Journal</i> , 2011, 162, 678-684.	1.2	185

#	ARTICLE	IF	CITATIONS
37	ACC/AHA/NHLBI Clinical Advisory on the Use and Safety of Statins. <i>Stroke</i> , 2002, 33, 2337-2341.	1.0	184
38	Effects of a Randomized Controlled Trial of Transcendental Meditation on Components of the Metabolic Syndrome in Subjects With Coronary Heart Disease. <i>Archives of Internal Medicine</i> , 2006, 166, 1218.	4.3	184
39	Cardiac Magnetic Resonance Myocardial Perfusion Reserve Index Is Reduced in Women With Coronary Microvascular Dysfunction. <i>Circulation: Cardiovascular Imaging</i> , 2015, 8, .	1.3	184
40	Ranolazine Improves Angina in Women With Evidence of Myocardial Ischemia But No Obstructive Coronary Artery Disease. <i>JACC: Cardiovascular Imaging</i> , 2011, 4, 514-522.	2.3	180
41	Safety of Coronary Reactivity Testing in Women With No Obstructive Coronary Artery Disease. <i>JACC: Cardiovascular Interventions</i> , 2012, 5, 646-653.	1.1	177
42	Heart Rate Response to Exercise Stress Testing in Asymptomatic Women. <i>Circulation</i> , 2010, 122, 130-137.	1.6	176
43	Knowledge, Attitudes, and Beliefs Regarding Cardiovascular Disease in Women. <i>Journal of the American College of Cardiology</i> , 2017, 70, 123-132.	1.2	172
44	An Intravascular Ultrasound Analysis in Women Experiencing Chest Pain in the Absence of Obstructive Coronary Artery Disease: A Substudy from the National Heart, Lung and Blood Institute's Sponsored Women's Ischemia Syndrome Evaluation (WISE). <i>Journal of Interventional Cardiology</i> , 2010, 23, 511-519.	0.5	162
45	Hypertension Across a Woman's Life Cycle. <i>Journal of the American College of Cardiology</i> , 2018, 71, 1797-1813.	1.2	159
46	Some Thoughts on the Vasculopathy of Women With Ischemic Heart Disease. <i>Journal of the American College of Cardiology</i> , 2006, 47, S30-S35.	1.2	156
47	Adverse outcomes among women presenting with signs and symptoms of ischemia and no obstructive coronary artery disease: Findings from the National Heart, Lung, and Blood Institute's sponsored Women's Ischemia Syndrome Evaluation (WISE) angiographic core laboratory. <i>American Heart Journal</i> , 2013, 166, 134-141.	1.2	153
48	A randomized, placebo-controlled trial of late Na current inhibition (ranolazine) in coronary microvascular dysfunction (CMD): impact on angina and myocardial perfusion reserve. <i>European Heart Journal</i> , 2016, 37, 1504-1513.	1.0	152
49	Impact of Abnormal Coronary Reactivity on Long-Term Clinical Outcomes in Women. <i>Journal of the American College of Cardiology</i> , 2019, 73, 684-693.	1.2	152
50	Depression, the Metabolic Syndrome and Cardiovascular Risk. <i>Psychosomatic Medicine</i> , 2008, 70, 40-48.	1.3	150
51	Sex differences in calcified plaque and long-term cardiovascular mortality: observations from the CAC Consortium. <i>European Heart Journal</i> , 2018, 39, 3727-3735.	1.0	141
52	Myocardial Ischemia in the Absence of Obstructive Coronary Artery Disease in Systemic Lupus Erythematosus. <i>JACC: Cardiovascular Imaging</i> , 2011, 4, 27-33.	2.3	138
53	Psychosocial Stress and Cardiovascular Disease: Pathophysiological Links. <i>Behavioral Medicine</i> , 2002, 27, 141-147.	1.0	137
54	Coronary Microvascular Function and Cardiovascular Risk Factors in Women With Angina Pectoris and No Obstructive Coronary Artery Disease: The iPOWER Study. <i>Journal of the American Heart Association</i> , 2016, 5, e003064.	1.6	131
