NEIL DEADCE

#	Article	IF	CITATIONS
1	Worldwide time trends in prevalence of symptoms of rhinoconjunctivitis in children: Global Asthma Network Phase I. Pediatric Allergy and Immunology, 2022, 33, .	2.6	29
2	Concussion and longâ€ŧerm cognitive function among rugby players—The BRAIN Study. Alzheimer's and Dementia, 2022, 18, 1164-1176.	0.8	11
3	The Evolving Usefulness of the Test-negative Design in Studying Risk Factors for COVID-19. Epidemiology, 2022, 33, e7-e8.	2.7	10
4	Infection with SARS oVâ€2 among children with asthma: evidence from Global Asthma Network. Pediatric Allergy and Immunology, 2022, 33, .	2.6	8
5	Asthma in pesticide users: an update from the Great Britain Prospective Investigation of Pesticide Applicators' Health (PIPAH) cohort study. Occupational and Environmental Medicine, 2022, 79, 380-387.	2.8	6
6	Vaccine effectiveness of heterologous CoronaVac plus BNT162b2 in Brazil. Nature Medicine, 2022, 28, 838-843.	30.7	85
7	No evidence that herpes zoster is associated with increased risk of dementia diagnosis. Annals of Clinical and Translational Neurology, 2022, 9, 363-374.	3.7	9
8	The burden of asthma, hay fever and eczema in adults in 17 countries: GAN Phase I study. European Respiratory Journal, 2022, 60, 2102865.	6.7	40
9	Occupational exposures to pesticides and other chemicals: a New Zealand motor neuron disease case–control study. Occupational and Environmental Medicine, 2022, 79, 412-420.	2.8	3
10	Effectiveness of CoronaVac, ChAdOx1 nCoV-19, BNT162b2, and Ad26.COV2.S among individuals with previous SARS-CoV-2 infection in Brazil: a test-negative, case-control study. Lancet Infectious Diseases, The, 2022, 22, 791-801.	9.1	84
11	CoronaVac vaccine is effective in preventing symptomatic and severe COVID-19 in pregnant women in Brazil: a test-negative case-control study. BMC Medicine, 2022, 20, 146.	5.5	14
12	Occupation and COVID-19 mortality in England: a national linked data study of 14.3 million adults. Occupational and Environmental Medicine, 2022, 79, 433-441.	2.8	72
13	Heart rate variability as a marker of autonomic nervous system activity in young people with eosinophilic and non-eosinophilic asthma. Journal of Asthma, 2022, , 1-9.	1.7	1
14	Excess mortality among essential workers in England and Wales during the COVID-19 pandemic. Journal of Epidemiology and Community Health, 2022, 76, 660-666.	3.7	15
15	A Systematic Review of Head Impacts and Acceleration Associated with Soccer. International Journal of Environmental Research and Public Health, 2022, 19, 5488.	2.6	7
16	Vaccination plus previous infection: protection during the omicron wave in Brazil. Lancet Infectious Diseases, The, 2022, 22, 945-946.	9.1	32
17	Investigation of a SARS-CoV-2 Outbreak at an Automotive Manufacturing Site in England. International Journal of Environmental Research and Public Health, 2022, 19, 6400.	2.6	10
18	COSPAR Sample Safety Assessment Framework (SSAF). Astrobiology, 2022, 22, S-186-S-216.	3.0	7

#	Article	IF	CITATIONS
19	Occupational differences in SARS-CoV-2 infection: analysis of the UK ONS COVID-19 infection survey. Journal of Epidemiology and Community Health, 2022, 76, 841-846.	3.7	25
20	Lung cancer risk in painters: results from the SYNERGY pooled case–control study consortium. Occupational and Environmental Medicine, 2021, 78, 269-278.	2.8	11
21	The COVID-19 pandemic and global environmental change: Emerging research needs. Environment International, 2021, 146, 106272.	10.0	157
22	Risk factors associated with rhinitis, allergic conjunctivitis and eczema among schoolchildren in Uganda. Clinical and Experimental Allergy, 2021, 51, 108-119.	2.9	7
23	Motor Neuron Disease Register for England, Wales and Northern Ireland—an analysis of incidence in England. Amyotrophic Lateral Sclerosis and Frontotemporal Degeneration, 2021, 22, 86-93.	1.7	10
24	CKD and CKDu in northern Peru: a cross-sectional analysis under the DEGREE protocol. BMC Nephrology, 2021, 22, 37.	1.8	2
25	Feasibility study of assessing the Preclinical Alzheimer Cognitive Composite (PACC) score via videoconferencing. Journal of Neurology, 2021, 268, 2228-2237.	3.6	7
26	Arguments about face masks and Covid-19 reflect broader methodologic debates within medical science. European Journal of Epidemiology, 2021, 36, 143-147.	5.7	2
27	Improving lung health in low-income and middle-income countries: from challenges to solutions. Lancet, The, 2021, 397, 928-940.	13.7	176
28	Anxiety disorders and asthma among adolescents in Uganda: role of early-life exposures. ERJ Open Research, 2021, 7, 00749-2020.	2.6	1
29	Occupational differences in COVID-19 incidence, severity, and mortality in the United Kingdom: Available data and framework for analyses. Wellcome Open Research, 2021, 6, 102.	1.8	13
30	Four childhood atopic dermatitis subtypes identified from trajectory and severity of disease and internally validated in a large UK birth cohort. British Journal of Dermatology, 2021, 185, 526-536.	1.5	17
31	Team Sport Risk Exposure Framework-2 (TS-REF-2) to identify sports activities and contacts at increased SARS-CoV-2 transmission risk during the COVID-19 pandemic. British Journal of Sports Medicine, 2021, 55, 1317-1318.	6.7	5
32	Blood cholesterol and risk of dementia in more than 1·8 million people over two decades: a retrospective cohort study. The Lancet Healthy Longevity, 2021, 2, e498-e506.	4.6	53
33	Evidence for causal associations between prenatal and postnatal antibiotic exposure and asthma in children, England. Clinical and Experimental Allergy, 2021, 51, 1438-1448.	2.9	13
34	Network on the Coordination and Harmonisation of European Occupational Cohorts (OMEGA-NET). ISEE Conference Abstracts, 2021, 2021, .	0.0	0
35	ISEE principles for evidence synthesis and evaluation in environmental health: comments from experience on advisory and regulatory committees. ISEE Conference Abstracts, 2021, 2021, .	0.0	0
36	Risk of bias assessments and evidence syntheses for observational epidemiologic studies of environmental and occupational exposures: strengths and limitations. ISEE Conference Abstracts, 2021, 2021.	0.0	0

#	Article	IF	CITATIONS
37	Geographical heterogeneity across England in associations between the neighbourhood built environment and body mass index. Health and Place, 2021, 71, 102645.	3.3	6
38	Environmental risk factors for reduced kidney function due to undetermined cause in India. Environmental Epidemiology, 2021, 5, e170.	3.0	2
39	Causal ordering among risk factors in the PURE study. Lancet, The, 2021, 397, 278.	13.7	2
40	Does death from Covid-19 arise from a multi-step process?. European Journal of Epidemiology, 2021, 36, 1-9.	5.7	11
41	The BRAIN-Q, a tool for assessing self-reported sport-related concussions for epidemiological studies. Epidemiology and Health, 2021, 43, e2021086.	1.9	4
42	Association between workplace bullying and common mental disorders in civil servants from a middle-income country. Industrial Health, 2021, 60, 121-132.	1.0	1
43	Worldwide trends in the burden of asthma symptoms in school-aged children: Global Asthma Network Phase I cross-sectional study. Lancet, The, 2021, 398, 1569-1580.	13.7	169
44	S-497â€Comparison of reported relative risks for health care, transport, and food processing workers. , 2021, , .		2
45	The role of workplace bullying in low back pain: a study with civil servants from a middle-income country. Journal of Pain, 2021, , .	1.4	0
46	Enhanced airway sensory nerve reactivity in non-eosinophilic asthma. BMJ Open Respiratory Research, 2021, 8, e000974.	3.0	3
47	Associations of Occupational Exposures to Electric Shocks and Extremely Low-Frequency Magnetic Fields With Motor Neurone Disease. American Journal of Epidemiology, 2021, 190, 393-402.	3.4	3
48	Impact of India's National Tobacco Control Programme on bidi and cigarette consumption: a difference-in-differences analysis. Tobacco Control, 2020, 29, 103-110.	3.2	10
49	Educational note: types of causes. International Journal of Epidemiology, 2020, 49, 676-685.	1.9	4
50	Risk of Bias Assessments and Evidence Syntheses for Observational Epidemiologic Studies of Environmental and Occupational Exposures: Strengths and Limitations. Environmental Health Perspectives, 2020, 128, 95002.	6.0	40
51	A Test-Negative Design with Additional Population Controls Can Be Used to Rapidly Study Causes of the SARS-CoV-2 Epidemic. Epidemiology, 2020, 31, 836-843.	2.7	52
52	Global Asthma Network Phase I Surveillance: Geographical Coverage and Response Rates. Journal of Clinical Medicine, 2020, 9, 3688.	2.4	28
53	Do neighbourhood characteristics act together to influence BMI? A cross-sectional study of urban parks and takeaway/fast-food stores as modifiers of the effect of physical activity facilities. Social Science and Medicine, 2020, 261, 113242.	3.8	20
54	Weekly COVID-19 testing with household quarantine and contact tracing is feasible and would probably end the epidemic. Royal Society Open Science, 2020, 7, 200915.	2.4	35

#	Article	IF	CITATIONS
55	Genetic risk of obesity as a modifier of associations between neighbourhood environment and body mass index: an observational study of 335 046 UK Biobank participants. BMJ Nutrition, Prevention and Health, 2020, 3, 247-255.	3.7	15
56	Re: Sponsorship by Big Oil, Like the Tobacco Industry, Should be Banned by the Research Community. Epidemiology, 2020, 31, e40-e41.	2.7	0
57	Draft for internal testing Scientific Committee guidance on appraising and integrating evidence from epidemiological studies for use in EFSA's scientific assessments. EFSA Journal, 2020, 18, e06221.	1.8	13
58	Prevalence and risk factors for chronic kidney disease of unknown cause in Malawi: a cross-sectional analysis in a rural and urban population. BMC Nephrology, 2020, 21, 387.	1.8	8
59	<p>Association Between Common Infections and Incident Post-Stroke Dementia: A Cohort Study Using the Clinical Practice Research Datalink</p> . Clinical Epidemiology, 2020, Volume 12, 907-916.	3.0	7
60	Accurate Statistics on COVID-19 Are Essential for Policy Guidance and Decisions. American Journal of Public Health, 2020, 110, 949-951.	2.7	112
61	Exposures to Fumigants and Residual Chemicals in Workers Handling Cargo from Shipping Containers and Export Logs in New Zealand. Annals of Work Exposures and Health, 2020, 64, 826-837.	1.4	7
62	Respiratory health in professional cleaners: Symptoms, lung function, and risk factors. Clinical and Experimental Allergy, 2020, 50, 567-576.	2.9	10
63	Comparisons between countries are essential for the control of COVID-19. International Journal of Epidemiology, 2020, 49, 1059-1062.	1.9	78
64	Trihalomethanes in Drinking Water and Bladder Cancer Burden in the European Union. Environmental Health Perspectives, 2020, 128, 17001.	6.0	101
65	Universal weekly testing as the UK COVID-19 lockdown exit strategy. Lancet, The, 2020, 395, 1420-1421.	13.7	127
66	Ethnicity and risk of diagnosed dementia after stroke: a cohort study using the Clinical Practice Research Datalink. Journal of Epidemiology and Community Health, 2020, 74, 114-119.	3.7	7
67	UK case control study of smoking and risk of amyotrophic lateral sclerosis. Amyotrophic Lateral Sclerosis and Frontotemporal Degeneration, 2020, 21, 222-227.	1.7	10
68	Concussion and long-term cognitive impairment among professional or elite sport-persons: a systematic review. Journal of Neurology, Neurosurgery and Psychiatry, 2020, 91, 455-468.	1.9	39
69	Comparison of individual-level and population-level risk factors for rhinoconjunctivitis, asthma, and eczema in the International Study of Asthma and Allergies in Childhood (ISAAC) Phase Three. World Allergy Organization Journal, 2020, 13, 100123.	3.5	14
70	Unwarranted optimism about vaccine efficacy. BMJ, The, 2020, 371, m4918.	6.0	2
71	Global prevalence of Chronic Kidney Disease of Unknown Etiology (CKDu) and recommendations for developing and strengthening national surveillance systems. ISEE Conference Abstracts, 2020, 2020, .	0.0	0
72	Environmental risk factors for acute kidney injury in female agricultural workers in Spain. ISEE Conference Abstracts, 2020, 2020, .	0.0	0

#	Article	IF	CITATIONS
73	Why using algorithms for evidence synthesis is wrong: triangulation is needed. ISEE Conference Abstracts, 2020, 2020, .	0.0	0
74	Exploring causality of the association between smoking and Parkinson's disease. International Journal of Epidemiology, 2019, 48, 912-925.	1.9	70
75	Identification of young adults at risk of an accelerated loss of kidney function in an area affected by Mesoamerican nephropathy. BMC Nephrology, 2019, 20, 21.	1.8	8
76	Are Environmental Factors for Atopic EczemaÂinÂISAAC Phase Three due to ReverseÂCausation?. Journal of Investigative Dermatology, 2019, 139, 1023-1036.	0.7	15
77	Clinical profile of predefined asthma phenotypes in a large cohort of UK primary care patients (Clinical Practice Research Datalink). Journal of Asthma and Allergy, 2019, Volume 12, 7-19.	3.4	6
78	Prevalence and risk factors for impaired kidney function in the district of Anuradhapura, Sri Lanka: a cross-sectional population-representative survey in those at risk of chronic kidney disease of unknown aetiology. BMC Public Health, 2019, 19, 763.	2.9	31
79	Blood pressure and risk of dementia and its subtypes: a historical cohort study with longâ€ŧerm followâ€up in 2.6Âmillion people. European Journal of Neurology, 2019, 26, 1479-1486.	3.3	13
80	Risk Factors for Workplace Bullying: A Systematic Review. International Journal of Environmental Research and Public Health, 2019, 16, 1945.	2.6	71
81	Combined impact of healthy lifestyle factors on risk of asthma, rhinoconjunctivitis and eczema in school children: ISAAC phase III. Thorax, 2019, 74, 531-538.	5.6	18
82	Baseline selection on a collider: a ubiquitous mechanism occurring in both representative and selected cohort studies. Journal of Epidemiology and Community Health, 2019, 73, 475-480.	3.7	12
83	CKD of Unknown Cause: AÂGlobal Epidemic?. Kidney International Reports, 2019, 4, 367-369.	0.8	18
84	Occupation and motor neuron disease: a New Zealand case–control study. Occupational and Environmental Medicine, 2019, 76, 309-316.	2.8	13
85	Prevalence of and risk factors for chronic kidney disease of unknown aetiology in India: secondary data analysis of three population-based cross-sectional studies. BMJ Open, 2019, 9, e023353.	1.9	27
86	Assessment of the healthy worker survivor effect in the relationship between psychosocial work-related factors and hypertension. Occupational and Environmental Medicine, 2019, 76, 414-421.	2.8	11
87	Let's take the heat out of the CKDu debate: more evidence is needed. Occupational and Environmental Medicine, 2019, 76, 357-359.	2.8	33
88	Case-Control Studies. JAMA - Journal of the American Medical Association, 2019, 321, 806.	7.4	5
89	P41â€Developing a healthy lifestyle index for asthma and allergy prevention in childhood. , 2019, ,		0
90	O6E.1â€Self-report occupational exposures and mnd in new zealand. Occupational and Environmental Medicine, 2019, 76, A59.1-A59.	2.8	0

#	Article	IF	CITATIONS
91	Rationale and population-based prospective cohort protocol for the disadvantaged populations at risk of decline in eGFR (CO-DEGREE). BMJ Open, 2019, 9, e031169.	1.9	20
92	O2A.1â€Pesticides and work-related asthma: how this relates to self-reported exposures. Occupational and Environmental Medicine, 2019, 76, A12.3-A13.	2.8	0
93	O2A.2â€Pesticides and respiratory health; the GB based pipah study. Occupational and Environmental Medicine, 2019, 76, A13.1-A13.	2.8	0
94	OP105â€Associations between neighbourhood environments and hospital admissions for CVD are modified by socioeconomic factors: a prospective study using UK biobank. , 2019, , .		0
95	P.1.29â€Communication and dissemination in the omega-net cost action. Occupational and Environmental Medicine, 2019, 76, A85.1-A85.	2.8	0
96	Test-Negative Designs. Epidemiology, 2019, 30, 838-844.	2.7	66
97	Epidemiology, molecular, and genetic methodologies to evaluate causes ofÂCKDuÂaroundÂthe world: report of the Working GroupÂfrom the ISN InternationalÂConsortium ofÂCollaborators onÂCKDu. Kidney International, 2019, 96, 1254-1260.	5.2	16
98	Environmental exposures in young adults with declining kidney function in a population at risk of Mesoamerican nephropathy. Occupational and Environmental Medicine, 2019, 76, 920-926.	2.8	27
99	Causal Inference in Environmental Epidemiology: Old and New Approaches. Epidemiology, 2019, 30, 311-316.	2.7	39
100	Re: Is the Smog Lifting?. Epidemiology, 2019, 30, e37-e37.	2.7	3
101	Calling time on asthma deaths in tropical regions—how much longer must people wait for essential medicines?. Lancet Respiratory Medicine,the, 2019, 7, 13-15.	10.7	28
102	The International Society of Nephrology's International Consortium ofÂCollaborators on Chronic Kidney Disease ofÂUnknown Etiology: report of the working groupÂon approaches to population-level detection strategies and recommendations forÂaÂminimumÂdataset. Kidney International, 2019, 95, 4-10.	5.2	45
103	Are environmental risk factors for current wheeze in the International Study of Asthma and Allergies in Childhood (ISAAC) phase three due to reverse causation?. Clinical and Experimental Allergy, 2019, 49, 430-441.	2.9	23
104	Germline CDH1 mutations are a significant contributor to the high frequency of early-onset diffuse gastric cancer cases in New Zealand MÄori. Familial Cancer, 2019, 18, 83-90.	1.9	33
105	Asthma control and management among schoolchildren in urban Uganda: results from a cross-sectional study. Wellcome Open Research, 2019, 4, 168.	1.8	11
106	Risk factors for asthma among schoolchildren who participated in a case-control study in urban Uganda. ELife, 2019, 8, .	6.0	21
107	An updated critique of the use of the Twin Spine Study (2009) to determine causation of low back disorder. New Zealand Medical Journal, 2019, 132, 57-59.	0.5	0
108	Acceptability of human papillomavirus self-sampling for cervical-cancer screening in under-screened MÄori and Pasifika women: a pilot study. New Zealand Medical Journal, 2019, 132, 21-31.	0.5	3

#	Article	IF	CITATIONS
109	How does the association of general and central adiposity with glycaemia and blood pressure differ by gender and area of residence in a Malawian population: a cross-sectional study. International Journal of Epidemiology, 2018, 47, 887-898.	1.9	8
110	Bias in matched case–control studies: DAGs are not enough. European Journal of Epidemiology, 2018, 33, 1-4.	5.7	10
111	Prevalence of obesity, hypertension, and diabetes, and cascade of care in sub-Saharan Africa: a cross-sectional, population-based study in rural and urban Malawi. Lancet Diabetes and Endocrinology,the, 2018, 6, 208-222.	11.4	246
112	Associations between fast food and physical activity environments and adiposity in mid-life: cross-sectional, observational evidence from UK Biobank. Lancet Public Health, The, 2018, 3, e24-e33.	10.0	99
113	Inequities in exposure to occupational risk factors between MÄori and non-MÄori workers in Aotearoa New Zealand. Journal of Epidemiology and Community Health, 2018, 72, 809-816.	3.7	8
114	Cohort Profile: The PROspective Québec (PROQ) Study on Work and Health. International Journal of Epidemiology, 2018, 47, 693-693i.	1.9	18
115	Morbidity in New Zealand pesticide producers exposed to 2,3,7,8-tetrachlorodibenzo- p -dioxin (TCDD). Environment International, 2018, 110, 22-31.	10.0	10
116	P5â€Exploring contextual predictors and modifiers of associations between the neighbourhood built environment and obesity across the UK. , 2018, , .		0
117	Classifying atopic dermatitis: protocol for a systematic review of subtypes (phenotypes) and associated characteristics. BMJ Open, 2018, 8, e023097.	1.9	10
118	Dietary Patterns and Breast Cancer Risk: A Multi-Centre Case Control Study among North Indian Women. International Journal of Environmental Research and Public Health, 2018, 15, 1946.	2.6	8
119	Understanding asthma phenotypes: the World Asthma Phenotypes (WASP) international collaboration. ERJ Open Research, 2018, 4, 00013-2018.	2.6	39
120	Myocardial Infarction and Ischemic Stroke after Exacerbations of Chronic Obstructive Pulmonary Disease. Annals of the American Thoracic Society, 2018, 15, 935-946.	3.2	52
121	126â€Baseline urinary findings in young adults at risk of chronic kidney disease of undetermined cause in northwestern nicaragua. , 2018, , .		0
122	The multistep hypothesis of ALS revisited. Neurology, 2018, 91, e635-e642.	1.1	146
123	From ideas to studies: how to get ideas and sharpen them into research questions. Clinical Epidemiology, 2018, Volume 10, 253-264.	3.0	19
124	What do epidemiological studies tell us about chronic kidney disease of undetermined cause in Meso-America? A systematic review and meta-analysis. CKJ: Clinical Kidney Journal, 2018, 11, 496-506.	2.9	73
125	Decline in Kidney Function among Apparently Healthy Young Adults at Risk of Mesoamerican Nephropathy. Journal of the American Society of Nephrology: JASN, 2018, 29, 2200-2212.	6.1	60
126	Carcinogenicity ofÂglyphosate: why isÂNewÂZealand'sÂEPAÂlostÂin the weeds?. New Zealand Medical Journal, 2018, 131, 82-89.	0.5	0

#	Article	IF	CITATIONS
127	Occupational causes of amyotrophic lateral sclerosis: where to from here?. Occupational and Environmental Medicine, 2017, 74, 83-84.	2.8	1
128	Rationale, description and baseline findings of a community-based prospective cohort study of kidney function amongst the young rural population of Northwest Nicaragua. BMC Nephrology, 2017, 18, 16.	1.8	18
129	New Zealanders working non-standard hours also have greater exposure to other workplace hazards. Chronobiology International, 2017, 34, 519-526.	2.0	9
130	Formalism or pluralism? A reply to commentaries on â€~Causality and causal inference in epidemiology'. International Journal of Epidemiology, 2017, 45, dyw298.	1.9	19
131	Cancer subtypes in aetiological research. European Journal of Epidemiology, 2017, 32, 353-361.	5.7	15
132	Psychosocial work factors and social inequalities in psychological distress: a population-based study. BMC Public Health, 2017, 17, 91.	2.9	26
133	Wood Dust in Joineries and Furniture Manufacturing: An Exposure Determinant and Intervention Study. Annals of Work Exposures and Health, 2017, 61, 416-428.	1.4	13
134	A comparison of sensitivity-specificity imputation, direct imputation and fully Bayesian analysis to adjust for exposure misclassification when validation data are unavailable. International Journal of Epidemiology, 2017, 46, 1063-1072.	1.9	20
135	Prospective Investigation of Pesticide Applicators' Health (PIPAH) study: a cohort study of professional pesticide users in Great Britain. BMJ Open, 2017, 7, e018212.	1.9	10
136	The benefit of evolving multidisciplinary care in ALS: a diagnostic cohort survival comparison. Amyotrophic Lateral Sclerosis and Frontotemporal Degeneration, 2017, 18, 569-575.	1.7	38
137	International Collaboration for the Epidemiology of eGFR in Low and Middle Income Populations - Rationale and core protocol for the Disadvantaged Populations eGFR Epidemiology Study (DEGREE). BMC Nephrology, 2017, 18, 1.	1.8	145
138	Evaluation of a community-based hypertension improvement program (ComHIP) in Ghana: data from a baseline survey. BMC Public Health, 2017, 17, 368.	2.9	32
139	Sex ratio of the offspring of New Zealand phenoxy herbicide producers exposed to 2,3,7,8-tetrachlorodibenzo-p-dioxin. Occupational and Environmental Medicine, 2017, 74, 24-29.	2.8	11
140	Determinants of hand dermatitis, urticaria and loss of skin barrier function in professional cleaners in New Zealand. International Journal of Occupational and Environmental Health, 2017, 23, 110-119.	1.2	12
141	BRain health and healthy AgeINg in retired rugby union players, the BRAIN Study: study protocol for an observational study in the UK. BMJ Open, 2017, 7, e017990.	1.9	9
142	0497â€Head trauma in sport and neurodegenerative disease: an introduction and review of the epidemiological evidence. , 2017, , .		2
