#	ARTICLE	IF	CITATIONS
1	Multidisciplinary management of locally advanced pancreatic adenocarcinoma: Biology is King. <i>Journal of Surgical Oncology</i> , 2021, 123, 1395-1404.	1.7	2
2	Accelerated single cell seeding in relapsed multiple myeloma. <i>Nature Communications</i> , 2020, 11, 3617.	12.8	41
3	Simple mucinous cysts of the pancreas have heterogeneous somatic mutations. <i>Human Pathology</i> , 2020, 101, 1-9.	2.0	14
4	The Evolutionary Origins of Recurrent Pancreatic Cancer. <i>Cancer Discovery</i> , 2020, 10, 792-805.	9.4	71
5	Multimodal radiomics and cyst fluid inflammatory markers model to predict preoperative risk in intraductal papillary mucinous neoplasms. <i>Journal of Medical Imaging</i> , 2020, 7, 1.	1.5	8
6	Preoperative risk prediction for intraductal papillary mucinous neoplasms by quantitative CT image analysis. <i>Hpb</i> , 2019, 21, 212-218.	0.3	36
7	CT radiomics associations with genotype and stromal content in pancreatic ductal adenocarcinoma. <i>Abdominal Radiology</i> , 2019, 44, 3148-3157.	2.1	37
8	Endoscopic versus percutaneous drainage of post-operative peripancreatic fluid collections following pancreatic resection. <i>Hpb</i> , 2019, 21, 434-443.	0.3	14
9	Survival Prediction in Pancreatic Ductal Adenocarcinoma by Quantitative Computed Tomography Image Analysis. <i>Annals of Surgical Oncology</i> , 2018, 25, 1034-1042.	1.5	92
10	Progression Patterns in the Remnant Pancreas after Resection of Non-Invasive or Micro-Invasive Intraductal Papillary Mucinous Neoplasms (IPMN). <i>Annals of Surgical Oncology</i> , 2018, 25, 1752-1759.	1.5	31
11	Development and Validation of a Multi-institutional Preoperative Nomogram for Predicting Grade of Dysplasia in Intraductal Papillary Mucinous Neoplasms (IPMNs) of the Pancreas. <i>Annals of Surgery</i> , 2018, 267, 157-163.	4.2	105
12	Multi-institutional Validation Study of Pancreatic Cyst Fluid Protein Analysis for Prediction of High-risk Intraductal Papillary Mucinous Neoplasms of the Pancreas. <i>Annals of Surgery</i> , 2018, 268, 340-347.	4.2	39
13	Intraductal Papillary Mucinous Neoplasm of the Pancreas in Young Patients: Tumor Biology, Clinical Features, and Survival Outcomes. <i>Journal of Gastrointestinal Surgery</i> , 2018, 22, 226-234.	1.7	16
14	Minimal functional driver gene heterogeneity among untreated metastases. <i>Science</i> , 2018, 361, 1033-1037.	12.6	223
15	<sc>CT</sc> radiomics to predict high-risk intraductal papillary mucinous neoplasms of the pancreas. <i>Medical Physics</i> , 2018, 45, 5019-5029.	3.0	76
16	Precancerous neoplastic cells can move through the pancreatic ductal system. <i>Nature</i> , 2018, 561, 201-205.	27.8	96
17	Limited heterogeneity of known driver gene mutations among the metastases of individual patients with pancreatic cancer. <i>Nature Genetics</i> , 2017, 49, 358-366.	21.4	316
18	Identification of unique neoantigen qualities in long-term survivors of pancreatic cancer. <i>Nature</i> , 2017, 551, 512-516.	27.8	854
