#	ARTICLE	IF	CITATIONS
1	Daily fluctuations of negative affect are only weakly associated with tremor symptoms in functional and organic tremor patients. <i>Journal of Psychosomatic Research</i> , 2021, 150, 110627.	2.6	2
2	Longitudinal bidirectional associations between internalizing mental disorders and cardiometabolic disorders in the general adult population. <i>Social Psychiatry and Psychiatric Epidemiology</i> , 2021, 56, 1611-1621.	3.1	2
3	The temporal order of fluctuations in atopic disease symptoms and attention-deficit/hyperactivity disorder symptoms: a time-series study in ADHD patients. <i>European Child and Adolescent Psychiatry</i> , 2020, 29, 137-144.	4.7	7
4	Seasonality of mood and affect in a large general population sample. <i>PLoS ONE</i> , 2020, 15, e0239033.	2.5	19
5	Single-Subject Research in Psychiatry: Facts and Fictions. <i>Frontiers in Psychiatry</i> , 2020, 11, 539777.	2.6	22
6	Predicting antidepressant response by monitoring early improvement of individual symptoms of depression: individual patient data meta-analysis. <i>British Journal of Psychiatry</i> , 2019, 214, 4-10.	2.8	26
7	Do troublesome pupils impact teacher perception of the behaviour of their classmates?. <i>European Journal of Special Needs Education</i> , 2019, 34, 114-123.	3.0	7
8	How to assess negative affective reactivity to daily life stress in depressed and nondepressed individuals?. <i>Psychiatry Research</i> , 2019, 279, 259-266.	3.3	14
9	Acute stress responses after indirect exposure to the MH17 airplane crash. <i>British Journal of Psychology</i> , 2019, 110, 790-813.	2.3	12
10	Affective variability in depression: Revisiting the inertiaâ€“instability paradox. <i>British Journal of Psychology</i> , 2019, 110, 814-827.	2.3	49
11	Capturing the risk of persisting depressive symptoms: A dynamic network investigation of patients' daily symptom experiences. <i>Psychiatry Research</i> , 2019, 271, 640-648.	3.3	33
12	Using bundle embeddings to predict daily cortisol levels in human subjects. <i>BMC Medical Research Methodology</i> , 2018, 18, 31.	3.1	0
13	The Temporal Order of Changes in Physical Activity and Subjective Sleep in Depressed Versus Nondepressed Individuals: Findings From the MOOVD Study. <i>Behavioral Sleep Medicine</i> , 2018, 16, 154-168.	2.1	4
14	The Reciprocity of Prosocial Behavior and Positive Affect in Daily Life. <i>Journal of Personality</i> , 2018, 86, 139-146.	3.2	76
15	Exploring the relation between visual mental imagery and affect in the daily life of previously depressed and never depressed individuals. <i>Cognition and Emotion</i> , 2018, 32, 1131-1138.	2.0	9
16	A qualitative approach to guide choices for designing a diary study. <i>BMC Medical Research Methodology</i> , 2018, 18, 140.	3.1	51
17	Teachersâ€™ perceptions of behavioral problems in Dutch primary education pupils: The role of relative age. <i>PLoS ONE</i> , 2018, 13, e0204718.	2.5	7
18	Differential association between affect and somatic symptoms at the betweenâ€“and withinâ€“individual level. <i>British Journal of Health Psychology</i> , 2017, 22, 270-280.	3.5	15

#	ARTICLE	IF	CITATIONS
19	The ten-year course of depression in primary care and long-term effects of psychoeducation, psychiatric consultation and cognitive behavioral therapy. <i>Journal of Affective Disorders</i> , 2017, 217, 174-182.	4.1	16
20	Seasonal affective disorder and non-seasonal affective disorders: Results from the NESDA study. <i>BJPsych Open</i> , 2017, 3, 196-203.	0.7	11
21	The association between positive and negative affect at the inter- and intra-individual level. <i>Personality and Individual Differences</i> , 2017, 105, 252-256.	2.9	5
22	An Exploratory Randomized Controlled Trial of Personalized Lifestyle Advice and Tandem Skydives as a Means to Reduce Anhedonia. <i>Behavior Therapy</i> , 2017, 48, 76-96.	2.4	37
23	Sleep quality predicts positive and negative affect but not vice versa. An electronic diary study in depressed and healthy individuals. <i>Journal of Affective Disorders</i> , 2017, 207, 260-267.	4.1	58
24	Temporal Dynamics of Health and Well-Being: A Crowdsourcing Approach to Momentary Assessments and Automated Generation of Personalized Feedback. <i>Psychosomatic Medicine</i> , 2017, 79, 213-223.	2.0	52
25	An investigation of emotion dynamics in major depressive disorder patients and healthy persons using sparse longitudinal networks. <i>PLoS ONE</i> , 2017, 12, e0178586.	2.5	48
26	A Primrose Path? Moderating Effects of Age and Gender in the Association between Green Space and Mental Health. <i>International Journal of Environmental Research and Public Health</i> , 2016, 13, 492.	2.6	42
27	Preserving Subjective Wellbeing in the Face of Psychopathology: Buffering Effects of Personal Strengths and Resources. <i>PLoS ONE</i> , 2016, 11, e0150867.	2.5	42
28	HowNutsAreTheDutch (HoeGekIsNL): A crowdsourcing study of mental symptoms and strengths. <i>International Journal of Methods in Psychiatric Research</i> , 2016, 25, 123-144.	2.1	78
29	The temporal dynamics of cortisol and affective states in depressed and non-depressed individuals. <i>Psychoneuroendocrinology</i> , 2016, 69, 16-25.	2.7	19
30	Group-Level Symptom Networks in Depression. <i>JAMA Psychiatry</i> , 2016, 73, 411.	11.0	39
31	Automating Vector Autoregression on Electronic Patient Diary Data. <i>IEEE Journal of Biomedical and Health Informatics</i> , 2016, 20, 631-643.	6.3	25
32	Using State Space Methods to Reveal Dynamical Associations Between Cortisol and Depression. <i>Nonlinear Dynamics, Psychology, and Life Sciences</i> , 2016, 20, 1-21.	0.2	1
33	Major depressive disorder as a nonlinear dynamic system: bimodality in the frequency distribution of depressive symptoms over time. <i>BMC Psychiatry</i> , 2015, 15, 222.	2.6	38
34	Decomposing the heterogeneity of depression at the person-, symptom-, and time-level: latent variable models versus multimode principal component analysis. <i>BMC Medical Research Methodology</i> , 2015, 15, 88.	3.1	19
35	Cortisol and $\hat{\pm}$ -Amylase Secretion Patterns between and within Depressed and Non-Depressed Individuals. <i>PLoS ONE</i> , 2015, 10, e0131002.	2.5	72
36	The temporal order of change in daily mindfulness and affect during mindfulness-based stress reduction.. <i>Journal of Counseling Psychology</i> , 2015, 62, 106-114.	2.0	68

#	ARTICLE	IF	CITATIONS
37	Time-Series Analysis of Daily Changes in Mindfulness, Repetitive Thinking, and Depressive Symptoms During Mindfulness-Based Treatment. <i>Mindfulness</i> , 2015, 6, 1053-1062.	2.8	21
38	Temporal dynamics of physical activity and affect in depressed and nondepressed individuals.. <i>Health Psychology</i> , 2015, 34, 1268-1277.	1.6	28
39	Ecological Momentary Assessments and Automated Time Series Analysis to Promote Tailored Health Care: A Proof-of-Principle Study. <i>JMIR Research Protocols</i> , 2015, 4, e100.	1.0	45
40	“Critical slowing down in depression” is a great idea that still needs empirical proof. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2014, 111, E878.	7.1	25
41	Mindfulness Training in a Heterogeneous Psychiatric Sample: Outcome Evaluation and Comparison of Different Diagnostic Groups. <i>Journal of Clinical Psychology</i> , 2014, 70, 60-71.	1.9	15
42	Individual variation in temporal relationships between stress and functional somatic symptoms. <i>Journal of Psychosomatic Research</i> , 2014, 77, 34-39.	2.6	32
43	Temporal Dynamics of Symptom and Treatment Variables in a Lifestyle-Oriented Approach to Anxiety Disorder: A Single-Subject Time-Series Analysis. <i>Psychotherapy and Psychosomatics</i> , 2012, 81, 253-255.	8.8	15
44	Revealing Causal Heterogeneity Using Time Series Analysis of Ambulatory Assessments. <i>Psychosomatic Medicine</i> , 2012, 74, 377-386.	2.0	81
45	Effectiveness of Systems Training for Emotional Predictability and Problem Solving (STEPPS) for Borderline Personality Problems in a “Real-World” Sample: Moderation by Diagnosis or Severity?. <i>Psychotherapy and Psychosomatics</i> , 2011, 80, 173-181.	8.8	26
46	Stressful life events as a link between problems in nonverbal communication and recurrence of depression. <i>Journal of Affective Disorders</i> , 2007, 97, 161-169.	4.1	24
47	Lack of association between conversation partners' nonverbal behavior predicts recurrence of depression, independently of personality. <i>Psychiatry Research</i> , 2006, 142, 79-88.	3.3	14
48	Cognitive, physiological, and personality correlates of recurrence of depression. <i>Journal of Affective Disorders</i> , 2005, 87, 221-229.	4.1	35
49	Non-verbal interaction involvement as an indicator of prognosis in remitted depressed subjects. <i>Psychiatry Research</i> , 2002, 113, 269-277.	3.3	11
