citing authors

#	ARTICLE	IF	CITATIONS
1	ExoPlaSim: Extending the Planet Simulator for exoplanets. Monthly Notices of the Royal Astronomical Society, 2022, 511, 3272-3303.	4.4	11
2	Fundamental challenges to remote sensing of exo-earths. Monthly Notices of the Royal Astronomical Society, 2022, 512, 3616-3626.	4.4	3
3	Climate uncertainties caused by unknown land distribution on habitable M-Earths. Monthly Notices of the Royal Astronomical Society, 2022, 513, 2761-2769.	4.4	6
4	Automated crater detection with human level performance. Computers and Geosciences, 2021, 147, 104645.	4.2	14
5	Climate diversity in the solar-like habitable zone due to varying background gas pressure. Icarus, 2021, 358, 114301.	2.5	9
6	Large Eddy Simulations of the Dusty Martian Convective Boundary Layer With MarsWRF. Journal of Geophysical Research E: Planets, 2021, 126, e2020JE006752.	3.6	17
7	Interannual, seasonal and regional variations in the Martian convective boundary layer derived from GCM simulations with a semi-interactive dust transport model. Journal of Geophysical Research E: Planets, 2021, 126, e2021JE006965.	3.6	3
8	Investigation of the Spatial Distribution of Methane Sources in the Greater Toronto Area Using Mobile Gas Monitoring Systems. Environmental Science & Technology, 2020, 54, 15671-15679.	10.0	17
9	Habitable Snowballs: Temperate Land Conditions, Liquid Water, and Implications for CO <sub>2</sub> Weathering. Journal of Geophysical Research E: Planets, 2019, 124, 2087-2100.	3.6	18
10	An initial assessment of the impact of postulated orbit-spin coupling on Mars dust storm variability in fully interactive dust simulations. Icarus, 2019, 317, 649-668.	2.5	20
11	Automated crater detection on Mars using deep learning. Planetary and Space Science, 2019, 170, 16-28.	1.7	51
12	The sensitivity of solsticial pauses to atmospheric ice and dust in the MarsWRF General Circulation Model. Icarus, 2018, 311, 23-34.	2.5	40
13	Simulating Titan's methane cycle with the TitanWRF General Circulation Model. Icarus, 2016, 267, 106-134.	2.5	37
14	Analysis of the radiative budget of the Venusian atmosphere based on infrared Net Exchange Rate formalism. Journal of Geophysical Research E: Planets, 2015, 120, 1186-1200.	3.6	28
15	Martian atmospheric collapse: Idealized GCM studies. Icarus, 2015, 250, 553-569.	2.5	35
16	Effects of obliquity and water vapor/trace gas greenhouses in the early martian climate. Journal of Geophysical Research E: Planets, 2013, 118, 560-576.	3.6	68
17	Models of Venus Atmosphere. , 2013, , 129-156.		23
18	Development of a fast, accurate radiative transfer model for the Martian atmosphere, past and present. Journal of Geophysical Research, 2012, 117, .	3.3	50

#	ARTICLE	IF	CITATIONS
19	The impact of resolution on the dynamics of the martian global atmosphere: Varying resolution studies with the MarsWRF GCM. <i>Icarus</i> , 2012, 221, 276-288.	2.5	97
20	Angular momentum conservation in a simplified Venus General Circulation Model. <i>Icarus</i> , 2012, 221, 1173-1176.	2.5	7
21	The Ashima/MIT Mars GCM and argon in the martian atmosphere. <i>Icarus</i> , 2012, 218, 1043-1070.	2.5	30
22	Stratospheric superrotation in the TitanWRF model. <i>Icarus</i> , 2011, 213, 636-654.	2.5	81
23	A Discrete Ordinate, Multiple Scattering, Radiative Transfer Model of the Venus Atmosphere from 0.1 to 260 $\mu\text{m}$ . <i>Journals of the Atmospheric Sciences</i> , 2011, 68, 1323-1339.	1.7	23
24	A bulk cloud parameterization in a Venus General Circulation Model. <i>Icarus</i> , 2010, 206, 662-668.	2.5	16
25	Convective instability in the martian middle atmosphere. <i>Icarus</i> , 2010, 208, 574-589.	2.5	25
