#	Article	IF	CITATIONS
1	Better long-term speech outcomes in stroke survivors who received early clinical speech and language therapy: What's driving recovery?. Neuropsychological Rehabilitation, 2022, 32, 2319-2341.	1.6	2
2	Utilising a systematic review-based approach to create a database of individual participant data for meta- and network meta-analyses: the RELEASE database of aphasia after stroke. Aphasiology, 2022, 36, 513-533.	2.2	3
3	Dosage, Intensity, and Frequency of Language Therapy for Aphasia: A Systematic Review–Based, Individual Participant Data Network Meta-Analysis. Stroke, 2022, 53, 956-967.	2.0	44
4	Precision rehabilitation for aphasia by patient age, sex, aphasia severity, and time since stroke? A prespecified, systematic review-based, individual participant data, network, subgroup meta-analysis. International Journal of Stroke, 2022, 17, 1067-1077.	5.9	12
5	Radiofrequency denervation of the lumbar facet joints: guidelines for the RADICAL randomised controlled trial. British Journal of Pain, 2021, 15, 204946372094105.	1.5	1
6	Active listening. Hearing Research, 2021, 399, 107998.	2.0	37
7	Individualised placement and support programme for people unemployed because of chronic pain: a feasibility study and the InSTEP pilot RCT. Health Technology Assessment, 2021, 25, 1-72.	2.8	Ο
8	Microdiscectomy compared with transforaminal epidural steroid injection for persistent radicular pain caused by prolapsed intervertebral disc: the NERVES RCT. Health Technology Assessment, 2021, 25, 1-86.	2.8	4
9	Simulating lesion-dependent functional recovery mechanisms. Scientific Reports, 2021, 11, 7475.	3.3	7
10	Reply: Broca's area: why was neurosurgery neglected for so long when seeking to re-establish the scientific truth? <i>and</i> Where is the speech production area? Evidence from direct cortical electrical stimulation mapping. Brain, 2021, 144, e62-e62.	7.6	2
11	Predictors of Poststroke Aphasia Recovery. Stroke, 2021, 52, 1778-1787.	2.0	46
12	Right cerebral motor areas that support accurate speech production following damage to cerebellar speech areas. NeuroImage: Clinical, 2021, 32, 102820.	2.7	2
13	Brain regions that support accurate speech production after damage to Broca's area. Brain Communications, 2021, 3, fcab230.	3.3	9
14	Damage to Broca's area does not contribute to long-term speech production outcome after stroke. Brain, 2021, 144, 817-832.	7.6	65
15	A Data-Based Approach for Selecting Pre- and Intra-Operative Language Mapping Tasks. Frontiers in Neuroscience, 2021, 15, 743402.	2.8	5
16	Dissociating the functions of three left posterior superior temporal regions that contribute to speech perception and production. NeuroImage, 2021, 245, 118764.	4.2	2
17	A functional dissociation of the left frontal regions that contribute to single word production tasks. NeuroImage, 2021, 245, 118734.	4.2	7
18	The impact of early language exposure on the neural system supporting language in deaf and hearing adults. NeuroImage, 2020, 209, 116411.	4.2	18

CATHY J PRICE

#	Article	IF	CITATIONS
19	A Review on Treatment-Related Brain Changes in Aphasia. Neurobiology of Language (Cambridge, Mass), 2020, 1, 402-433.	3.1	18
20	Degeneracy and Redundancy in Active Inference. Cerebral Cortex, 2020, 30, 5750-5766.	2.9	31
21	Acquisition of sensorimotor fMRI under general anaesthesia: Assessment of feasibility, the BOLD response and clinical utility. NeuroImage: Clinical, 2019, 23, 101923.	2.7	8
22	Generalizing post-stroke prognoses from research data to clinical data. NeuroImage: Clinical, 2019, 24, 102005.	2.7	12
23	A special role for the right posterior superior temporal sulcus during speech production. Neurolmage, 2019, 203, 116184.	4.2	14
24	Dissociating the functions of superior and inferior parts of the left ventral occipito-temporal cortex during visual word and object processing. NeuroImage, 2019, 199, 325-335.	4.2	10
25	Implementation of Patientâ€Reported Outcomes (PROMs) from specialist pain clinics in England and Wales: Experience from a nationwide study. European Journal of Pain, 2019, 23, 1368-1377.	2.8	10
26	The National Pain Audit for specialist pain services in England and Wales 2010–2014. British Journal of Pain, 2019, 13, 185-193.	1.5	16
27	How distributed processing produces false negatives in voxel-based lesion-deficit analyses. Neuropsychologia, 2018, 115, 124-133.	1.6	30
28	Lesion-site-dependent responses to therapy after aphasic stroke. Journal of Neurology, Neurosurgery and Psychiatry, 2018, 89, 1352-1354.	1.9	13
29	The evolution of cognitive models: From neuropsychology to neuroimaging and back. Cortex, 2018, 107, 37-49.	2.4	35
30	"Neural overlap of L1 and L2 semantic representations across visual and auditory modalities: a decoding approach― Neuropsychologia, 2018, 113, 68-77.	1.6	25
31	Interpreting and Utilising Intersubject Variability in Brain Function. Trends in Cognitive Sciences, 2018, 22, 517-530.	7.8	216
32	The impact of sample size on the reproducibility of voxel-based lesion-deficit mappings. Neuropsychologia, 2018, 115, 101-111.	1.6	67
33	How right hemisphere damage after stroke can impair speech comprehension. Brain, 2018, 141, 3389-3404.	7.6	53
34	Using transcranial magnetic stimulation of the undamaged brain to identify lesion sites that predict language outcome after stroke. Brain, 2017, 140, 1729-1742.	7.6	16
35	Deep temporal models and active inference. Neuroscience and Biobehavioral Reviews, 2017, 77, 388-402.	6.1	159
36	How many deficits in the same dyslexic brains? A behavioural and fMRI assessment of comorbidity in adult dyslexics. Cortex, 2017, 97, 125-142.	2.4	30

CATHY J PRICE

#	Article	IF	CITATIONS
37	Less is more: neural mechanisms underlying anomia treatment in chronic aphasic patients. Brain, 2017, 140, 3039-3054.	7.6	57
38	How Auditory Experience Differentially Influences the Function of Left and Right Superior Temporal Cortices. Journal of Neuroscience, 2017, 37, 9564-9573.	3.6	32
39	Ten problems and solutions when predicting individual outcome from lesion site after stroke. NeuroImage, 2017, 145, 200-208.	4.2	75
40	Visualising inter-subject variability in fMRI using threshold-weighted overlap maps. Scientific Reports, 2016, 6, 20170.	3.3	34
41	Why the left posterior inferior temporal lobe is needed for word finding. Brain, 2016, 139, 2823-2826.	7.6	10
42	Plasticity of white matter connectivity in phonetics experts. Brain Structure and Function, 2016, 221, 3825-3833.	2.3	15
43	Distinguishing the effect of lesion load from tract disconnection in the arcuate and uncinate fasciculi. NeuroImage, 2016, 125, 1169-1173.	4.2	44
44	The PLORAS Database: A data repository for Predicting Language Outcome and Recovery After Stroke. NeuroImage, 2016, 124, 1208-1212.	4.2	98
45	Identification of the regions involved in phonological assembly using a novel paradigm. Brain and Language, 2015, 150, 45-53.	1.6	16
46	A Trade-Off between Somatosensory and Auditory Related Brain Activity during Object Naming But Not Reading. Journal of Neuroscience, 2015, 35, 4751-4759.	3.6	8
47	Dissecting the functional anatomy of auditory word repetition. Frontiers in Human Neuroscience, 2014, 8, 246.	2.0	38
48	The Importance of Premotor Cortex for Supporting Speech Production after Left Capsular-Putaminal Damage. Journal of Neuroscience, 2014, 34, 14338-14348.	3.6	23
49	Predicting outcome and recovery after stroke with lesions extracted from MRI images. NeuroImage: Clinical, 2013, 2, 424-433.	2.7	207
50	Neuropathic pain: a pathway for care developed by the British Pain Society. British Journal of Anaesthesia, 2013, 111, 73-79.	3.4	33
51	The anatomy of language: a review of 100 fMRI studies published in 2009. Annals of the New York Academy of Sciences, 2010, 1191, 62-88.	3.8	1,143
52	Predicting language outcome and recovery after stroke: the PLORAS system. Nature Reviews Neurology, 2010, 6, 202-210.	10.1	133
53	Lesion identification using unified segmentation-normalisation models and fuzzy clustering. NeuroImage, 2008, 41, 1253-1266.	4.2	335
54	Exact and approximate judgements of visual and auditory numerosity: An fMRI study. Brain Research, 2006, 1106, 177-188.	2.2	248

CATHY J PRICE

#	Article	IF	CITATIONS
55	Design and analysis of fMRI studies with neurologically impaired patients. Journal of Magnetic Resonance Imaging, 2006, 23, 816-826.	3.4	123
56	The latest on functional imaging studies of aphasic stroke. Current Opinion in Neurology, 2005, 18, 429-434.	3.6	181
57	Reading and reading disturbance. Current Opinion in Neurobiology, 2005, 15, 231-238.	4.2	220
58	Metaâ€analyses of object naming: Effect of baseline. Human Brain Mapping, 2005, 25, 70-82.	3.6	186
59	Functional ontologies for cognition: The systematic definition of structure and function. Cognitive Neuropsychology, 2005, 22, 262-275.	1.1	298
60	Speech-specific auditory processing: where is it?. Trends in Cognitive Sciences, 2005, 9, 271-276.	7.8	136
61	The myth of the visual word form area. NeuroImage, 2003, 19, 473-481.	4.2	652
62	Functional Imaging Studies of Neuropsychological Patients: Applications and Limitations. Neurocase, 2002, 8, 345-354.	0.6	116
63	Degeneracy and cognitive anatomy. Trends in Cognitive Sciences, 2002, 6, 416-421.	7.8	456
64	Generative models, brain function and neuroimaging. Scandinavian Journal of Psychology, 2001, 42, 167-177.	1.5	42
65	The anatomy of language: contributions from functional neuroimaging. Journal of Anatomy, 2000, 197, 335-359.	1.5	1,240
66	The Effects of Presentation Rate During Word and Pseudoword Reading: A Comparison of PET and fMRI. Journal of Cognitive Neuroscience, 2000, 12, 145-156.	2.3	113
67	From objects to names: A cognitive neuroscience approach. Psychological Research, 1999, 62, 118-130.	1.7	173
68	Scanning patients with tasks they can perform. , 1999, 8, 102-108.		281
69	A multimodal language region in the ventral visual pathway. Nature, 1998, 394, 274-277.	27.8	349
70	Identifying global anatomical differences: Deformation-based morphometry. , 1998, 6, 348-357.		359
71	The temporal dynamics of reading: a PET study. Proceedings of the Royal Society B: Biological Sciences, 1997, 264, 1785-1791.	2.6	40
72	The anatomy of language: contributions from functional neuroimaging. , 0, .		9
