ASIEA MALID

#	Article	IF	CITATIONS
1	Cross-linguistic constraints and lineage-specific developments in the semantics of cutting and breaking in Japonic and Germanic. Linguistic Typology, 2023, 27, 41-75.	1.2	0
2	Stability and change in the colour lexicon of the Japonic languages. Studies in Language, 2022, 46, 323-351.	0.5	3
3	Embodied Spaceâ€pitch Associations are Shaped by Language. Cognitive Science, 2022, 46, e13083.	1.7	7
4	The perception of odor pleasantness is shared across cultures. Current Biology, 2022, 32, 2061-2066.e3.	3.9	33
5	Evidence for a Shared Instrument Prototype from English, Dutch, and German. Cognitive Science, 2022, 46, e13140.	1.7	2
6	Asifa Majid. Current Biology, 2022, 32, R555-R556.	3.9	0
7	The cultural landscape of emotions Between Us: How Cultures Create Emotions <i>Batja Mesquita</i> Norton, 2022. 304 pp Science, 2022, 377, 161-161.	12.6	2
8	Human Olfaction at the Intersection of Language, Culture, and Biology. Trends in Cognitive Sciences, 2021, 25, 111-123.	7.8	56
9	Consistent verbal labels promote odor category learning. Cognition, 2021, 206, 104485.	2.2	8
10	Wine experts' recognition of wine odors is not verbally mediated Journal of Experimental Psychology: General, 2021, 150, 545-559.	2.1	15
11	The Sound of Smell: Associating Odor Valence With Disgust Sounds. Cognitive Science, 2021, 45, e12980.	1.7	7
12	Olfactory Language Requires an Integrative and Interdisciplinary Approach. Trends in Cognitive Sciences, 2021, 25, 421-422.	7.8	7
13	Human sickness detection is not dependent on cultural experience. Proceedings of the Royal Society B: Biological Sciences, 2021, 288, 20210922.	2.6	7
14	Measuring the human "chromatic diet―and its relation to preference for color distributions across cultures. Journal of Vision, 2021, 21, 2514.	0.3	0
15	Environment and culture shape both the colour lexicon and the genetics of colour perception. Scientific Reports, 2021, 11, 19095.	3.3	17
16	Patterns of semantic variation differ across body parts: evidence from the Japonic languages. Cognitive Linguistics, 2021, 32, 455-486.	0.9	5
17	Is color discrimination influenced by the chromatic statistics of different visual environments?. Journal of Vision, 2021, 21, 1945.	0.3	0
18	Crossmodal Associations with Olfactory, Auditory, and Tactile Stimuli in Children and Adults. I-Perception, 2021, 12, 204166952110485.	1.4	12

#	Article	IF	CITATIONS
19	Grounding language in the neglected senses of touch, taste, and smell. Cognitive Neuropsychology, 2020, 37, 363-392.	1.1	33
20	Uncovering the language of wine experts. Natural Language Engineering, 2020, 26, 511-530.	2.5	21
21	Space-pitch associations differ in their susceptibility to language. Cognition, 2020, 196, 104073.	2.2	11
22	Gender is a multifaceted concept: evidence that specific life experiences differentially shape the concept of gender. Language and Cognition, 2020, 12, 649-678.	0.6	20
23	Limitations in odour simulation may originate from differential sensory embodiment. Philosophical Transactions of the Royal Society B: Biological Sciences, 2020, 375, 20190273.	4.0	18
24	Expertise Shapes Multimodal Imagery for Wine. Cognitive Science, 2020, 44, e12842.	1.7	27
25	Conceptualisations of landscape differ across European languages. PLoS ONE, 2020, 15, e0239858.	2.5	14
26	Anger stinks in Seri: Olfactory metaphor in a lesser-described language. Cognitive Linguistics, 2020, 31, 367-391.	0.9	12
27	Smell terms are not rara: A semantic investigation of odor vocabulary in Thai. Linguistics, 2020, 58, 937-966.	1.0	6
28	Thematic roles: Core knowledge or linguistic construct?. Psychonomic Bulletin and Review, 2019, 26, 1850-1869.	2.8	41
29	The geographical configuration of a language area influences linguistic diversity. PLoS ONE, 2019, 14, e0217363.	2.5	15
30	Iranian Herbalists, But Not Cooks, Are Better at Naming Odors Than Laypeople. Cognitive Science, 2019, 43, e12763.	1.7	3
31	The Challenge of Olfactory Ideophones: Reconsidering Ineffability from the Totonac-Tepehua Perspective. International Journal of American Linguistics, 2019, 85, 173-212.	0.1	15
32	Linguistic features of fragrances: The role of grammatical gender and gender associations. Attention, Perception, and Psychophysics, 2019, 81, 2063-2077.	1.3	6
33	Measuring Multisensory Imagery of Wine: the Vividness of Wine Imagery Questionnaire. Multisensory Research, 2019, 32, 179-195.	1.1	10
34	Mapping words reveals emotional diversity. Science, 2019, 366, 1444-1445.	12.6	6
35	Grammatical Gender in German Influences How Role-Nouns Are Interpreted: Evidence from ERPs. Discourse Processes, 2019, 56, 643-654.	1.8	21
36	Chapter 1. Perception metaphors. Converging Evidence in Language and Communication Research, 2019, , 1-16.	0.1	8

#	Article	IF	CITATIONS
37	Psycholinguistic variables matter in odor naming. Memory and Cognition, 2018, 46, 577-588.	1.6	20
38	An Exception to Mental Simulation: No Evidence for Embodied Odor Language. Cognitive Science, 2018, 42, 1146-1178.	1.7	18
39	Hunter-Gatherer Olfaction Is Special. Current Biology, 2018, 28, 409-413.e2.	3.9	93
40	Differential coding of perception in the world's languages. Proceedings of the National Academy of Sciences of the United States of America, 2018, 115, 11369-11376.	7.1	150
41	Respiration Modulates Olfactory Memory Consolidation in Humans. Journal of Neuroscience, 2018, 38, 10286-10294.	3.6	76
42	Vision dominates in perceptual language: English sensory vocabulary is optimized for usage. Cognition, 2018, 179, 213-220.	2.2	76
43	Smell Is Coded in Grammar and Frequent in Discourse: Cha'palaa Olfactory Language in Crossâ€Linguistic Perspective. Journal of Linguistic Anthropology, 2018, 28, 175-196.	1.3	24
44	Universal meaning extensions of perception verbs are grounded in interaction. Cognitive Linguistics, 2018, 29, 371-406.	0.9	41
45	Olfactory language and abstraction across cultures. Philosophical Transactions of the Royal Society B: Biological Sciences, 2018, 373, 20170139.	4.0	50
46	Superior olfactory language and cognition in odor-color synaesthesia Journal of Experimental Psychology: Human Perception and Performance, 2018, 44, 468-481.	0.9	11
47	What Makes a Better Smeller?. Perception, 2017, 46, 406-430.	1.2	49
48	Dutch modality exclusivity norms: Simulating perceptual modality in space. Behavior Research Methods, 2017, 49, 2204-2218.	4.0	40
49	Odor–color associations differ with verbal descriptors for odors: A comparison of three linguistically diverse groups. Psychonomic Bulletin and Review, 2017, 24, 1171-1179.	2.8	26
50	Hot and Cold Smells: Odor-Temperature Associations across Cultures. Frontiers in Psychology, 2017, 8, 1373.	2.1	18
51	How Changing Lifestyles Impact Seri Smellscapes and Smell Language. Anthropological Linguistics, 2016, 58, 107-131.	0.1	36
52	Nonrandom Associations of Graphemes with Colors in Arabic. Multisensory Research, 2016, 29, 223-252.	1.1	11
53	Not All Flavor Expertise Is Equal: The Language of Wine and Coffee Experts. PLoS ONE, 2016, 11, e0155845.	2.5	79

#	Article	IF	CITATIONS
55	Can Nomenclature for the Body be Explained by Embodiment Theories?. Topics in Cognitive Science, 2015, 7, 570-594.	1.9	22
56	Comparing Lexicons Cross-linguistically. , 2015, , .		7
57	Cultural Factors Shape Olfactory Language. Trends in Cognitive Sciences, 2015, 19, 629-630.	7.8	44
58	Semantic systems in closely related languages. Language Sciences, 2015, 49, 1-18.	1.0	43
59	Vision verbs dominate in conversation across cultures, but the ranking of non-visual verbs varies. Cognitive Linguistics, 2015, 26, 31-60.	0.9	115
60	Spatial metaphor in language can promote the development of crossâ€modal mappings in children. Developmental Science, 2014, 17, 636-643.	2.4	18
61	Differential Ineffability and the Senses. Mind and Language, 2014, 29, 407-427.	2.3	131
62	Manners of human gait: a crosslinguistic event-naming study. Cognitive Linguistics, 2014, 25, 701-741.	0.9	59
63	Prelinguistic Infants Are Sensitive to Space-Pitch Associations Found Across Cultures. Psychological Science, 2014, 25, 1256-1261.	3.3	119
64	Revisiting the limits of language: The odor lexicon of Maniq. Cognition, 2014, 131, 125-138.	2.2	100
65	Human locomotion in languages: Constraints on moving and meaning. Journal of Memory and Language, 2014, 74, 107-123.	2.1	43
66	Odors are expressible in language, as long as you speak the right language. Cognition, 2014, 130, 266-270.	2.2	266
67	Making semantics and pragmatics "sensory― Journal of Pragmatics, 2013, 58, 48-51.	1.5	9
68	Inferring semantic maps. Linguistic Typology, 2013, 17, 89-105.	1.2	21
69	Language is not necessary for color categories. Developmental Science, 2013, 16, 111-115.	2.4	17
70	The Thickness of Musical Pitch. Psychological Science, 2013, 24, 613-621.	3.3	172
71	How thought is mapped into words. Wiley Interdisciplinary Reviews: Cognitive Science, 2013, 4, 583-597.	2.8	91
72	The Island of Time: Yélî Dnye, the Language of Rossel Island. Frontiers in Psychology, 2013, 4, 61.	2.1	48

#	Article	IF	CITATIONS
73	Time in terms of space. Frontiers in Psychology, 2013, 4, 554.	2.1	18
74	Current Emotion Research in the Language Sciences. Emotion Review, 2012, 4, 432-443.	3.4	130
75	The Role of Language in a Science of Emotion. Emotion Review, 2012, 4, 380-381.	3.4	78
76	Shades of emotion: What the addition of sunglasses or masks to faces reveals about the development of facial expression processing. Cognition, 2012, 125, 195-206.	2.2	49
77	The Grammar of Exchange: A Comparative Study of Reciprocal Constructions Across Languages. Frontiers in Psychology, 2011, 2, 34.	2.1	4
78	The Senses in Language and Culture. Senses and Society, 2011, 6, 5-18.	0.5	105
79	Olfaction in Aslian Ideology and Language. Senses and Society, 2011, 6, 19-29.	0.5	85
80	A Guide to Stimulusâ \in Based Elicitation for Semantic Categories. , 2011, , .		4
81	WEIRD languages have misled us, too. Behavioral and Brain Sciences, 2010, 33, 103-103.	0.7	24
82	Do Language-Specific Categories Shape Conceptual Processing? Mandarin Classifier Distinctions Influence Eye Gaze Behavior, but only During Linguistic Processing. Journal of Cognition and Culture, 2010, 10, 39-58.	0.4	24
83	Words for Parts of the Body. , 2010, , 58-71.		62
84	Segmenting the Body into Parts: Evidence from Biases in Tactile Perception. Quarterly Journal of Experimental Psychology, 2009, 62, 500-512.	1.1	130
85	The influence of memory on perception: It's not what things look like, it's what you call them Journal of Experimental Psychology: Learning Memory and Cognition, 2009, 35, 1557-1562.	0.9	63
86	The cross-linguistic categorization of everyday events: A study of cutting and breaking. Cognition, 2008, 109, 235-250.	2.2	143
87	Conceptual maps using multivariate statistics: Building bridges between typological linguistics and psychology. Theoretical Linguistics, 2008, 34, .	0.2	2
88	A crosslinguistic perspective on semantic cognition. Behavioral and Brain Sciences, 2008, 31, 720-721.	0.7	1
89	Language does provide support for basic tastes. Behavioral and Brain Sciences, 2008, 31, 86-87.	0.7	10
90	Talking About Walking. Psychological Science, 2008, 19, 232-240.	3.3	81

#	Article	IF	CITATIONS
91	What are implicit causality and consequentiality?. Language and Cognitive Processes, 2007, 22, 780-788.	2.2	56
92	Questioning Children: Interactional Evidence of Implicit Bias in Medical Interviews. Social Psychology Quarterly, 2007, 70, 424-441.	2.1	93
93	The linguistic description of minimal social scenarios affects the extent of causal inference making. Journal of Experimental Social Psychology, 2007, 43, 918-932.	2.2	21
94	The semantic categories of cutting and breaking events: A crosslinguistic perspective. Cognitive Linguistics, 2007, 18, .	0.9	125
95	How similar are semantic categories in closely related languages? A comparison of cutting and breaking in four Germanic languages. Cognitive Linguistics, 2007, 18, .	0.9	32
96	Covariation and quantifier polarity: What determines causal attribution in vignettes?. Cognition, 2006, 99, 35-51.	2.2	12
97	Cross-linguistic categorisation of the body: Introduction. Language Sciences, 2006, 28, 137-147.	1.0	106
98	Body colouring task. Language Sciences, 2006, 28, 158-161.	1.0	19
99	Body part categorisation in Punjabi. Language Sciences, 2006, 28, 241-261.	1.0	28
100	W. PETER ROBINSON AND HOWARD GILES (eds.), The new handbook of language and social psychology. Chichester: John Wiley & Sons, 2001. Pp. 688. Hb \$125.00 Language in Society, 2004, 33, .	0.5	0
101	Antecedent frequency effects during the processing of pronouns. Cognition, 2004, 90, 255-264.	2.2	38
102	Can language restructure cognition? The case for space. Trends in Cognitive Sciences, 2004, 8, 108-114.	7.8	562
103	Frames of reference and language concepts. Trends in Cognitive Sciences, 2002, 6, 503-504.	7.8	13
104	The influence of types of character on processing background information in narrative discourse. Memory and Cognition, 1998, 26, 1323-1329.	1.6	14
