| #  | ARTICLE   | IF   | CITATIONS |
|----|---|------|-----------|
| 1  | Friends, family, and family friends: Predicting friendships of Dutch women. <i>Social Networks</i> , 2022, 70, 25-35.   | 2.1  | 8         |
| 2  | Balancing bias and burden in personal network studies. <i>Social Networks</i> , 2022, 70, 16-24.  | 2.1  | 13        |
| 3  | ESMvis: a tool for visualizing individual Experience Sampling Method (ESM) data. <i>Quality of Life Research</i> , 2021, 30, 3179-3188.   | 3.1  | 17        |
| 4  | Collecting large personal networks in a representative sample of Dutch women. <i>Social Networks</i> , 2021, 64, 63-71.   | 2.1  | 17        |
| 5  | Big Man. , 2021, , 570-571.   |      | 0         |
| 6  | Effect of Self-reported Height on Occupational Rank Among Police Officers: Especially for Women it Pays to be Tall. <i>Evolutionary Psychological Science</i> , 2021, 7, 411-418.   | 1.3  | 0         |
| 7  | Do Data from Large Personal Networks Support Cultural Evolutionary Ideas about Kin and Fertility?. <i>Social Sciences</i> , 2021, 10, 177.  | 1.4  | 7         |
| 8  | Explaining the Associations of Education and Occupation with Childlessness: The Role of Desires and Expectations to Remain Childless. <i>Population Review</i> , 2021, 60, 166-194. | 0.4  | 5         |
| 9  | Using Polygenic Scores in Social Science Research: Unraveling Childlessness. <i>Frontiers in Sociology</i> , 2019, 4, 74.   | 2.0  | 4         |
| 10 | How might life history theory contribute to life course theory?. <i>Advances in Life Course Research</i> , 2019, 41, 100281.  | 1.4  | 5         |
| 11 | Identifying the limits to socioeconomic influences on human growth. <i>Economics and Human Biology</i> , 2019, 34, 239-251.   | 1.7  | 7         |
| 12 | Hidden heritability due to heterogeneity across seven populations. <i>Nature Human Behaviour</i> , 2017, 1, 757-765.  | 12.0 | 137       |
| 13 | Assortative mating for human height: A meta-analysis. <i>American Journal of Human Biology</i> , 2017, 29, e22917.  | 1.6  | 70        |
| 14 | The Reproductive Ecology of Industrial Societies, Part II. <i>Human Nature</i> , 2016, 27, 445-470.   | 1.6  | 34        |
| 15 | The Reproductive Ecology of Industrial Societies, Part I. <i>Human Nature</i> , 2016, 27, 422-444.  | 1.6  | 64        |
| 16 | Evolutionary perspectives on human height variation. <i>Biological Reviews</i> , 2016, 91, 206-234.   | 10.4 | 153       |
| 17 | Wealth, fertility and adaptive behaviour in industrial populations. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2016, 371, 20150153.            | 4.0  | 45        |
| 18 | Big Man. , 2016, , 1-3.   |      | 0         |

| #  | ARTICLE  | IF  | CITATIONS |
|----|--|-----|-----------|
| 19 | Body Height Preferences and Actual Dimorphism in Stature between Partners in Two Non-Western Societies (Hadza and Tsimane'). <i>Evolutionary Psychology</i> , 2015, 13, 455-469.   | 0.9 | 13        |
| 20 | Finding your Soulmate: Homosexual and heterosexual age preferences in online dating. <i>Personal Relationships</i> , 2015, 22, 666-678.  | 1.5 | 22        |
| 21 | Human Fertility, Molecular Genetics, and Natural Selection in Modern Societies. <i>PLoS ONE</i> , 2015, 10, e0126821.  | 2.5 | 72        |
| 22 | The not-always-uniquely-predictive power of an evolutionary approach to understanding our not-so-computational nature. <i>Frontiers in Psychology</i> , 2015, 6, 419.  | 2.1 | 2         |
| 23 | Evolved biocultural beings (who invented computers). <i>Frontiers in Psychology</i> , 2015, 6, 1047.   | 2.1 | 5         |
| 24 | Fertility Theory: Theory of Life History Evolution. , 2015, , 40-45.   |     | 1         |
| 25 | Does natural selection favour taller stature among the tallest people on earth?. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2015, 282, 20150211.   | 2.6 | 66        |
| 26 | Taking the aggravation out of data aggregation: A conceptual guide to dealing with statistical issues related to the pooling of individual-level observational data. <i>American Journal of Primatology</i> , 2015, 77, 727-740. | 1.7 | 48        |
| 27 | Human Height Is Positively Related to Interpersonal Dominance in Dyadic Interactions. <i>PLoS ONE</i> , 2015, 10, e0117860.  | 2.5 | 82        |
| 28 | Body height preferences and actual dimorphism in stature between partners in two non-Western societies (Hadza and Tsimane'). <i>Evolutionary Psychology</i> , 2015, 13, 455-69.  | 0.9 | 2         |
| 29 | Preferred and Actual Relative Height among Homosexual Male Partners Vary with Preferred Dominance and Sex Role. <i>PLoS ONE</i> , 2014, 9, e86534.   | 2.5 | 31        |
| 30 | From computers to cultivation: reconceptualizing evolutionary psychology. <i>Frontiers in Psychology</i> , 2014, 5, 867.   | 2.1 | 26        |
| 31 | Non-linear associations between stature and mate choice characteristics for American men and their spouses. <i>American Journal of Human Biology</i> , 2014, 26, 530-537.  | 1.6 | 15        |
| 32 | A statistical approach to distinguish telomere elongation from error in longitudinal datasets. <i>Biogerontology</i> , 2014, 15, 99-103.   | 3.9 | 16        |
| 33 | Parental Social Status and Intrasexual Competitiveness among Adolescents. <i>Evolutionary Psychology</i> , 2014, 12, 1022-1037.  | 0.9 | 9         |
| 34 | Parental social status and intrasexual competitiveness among adolescents. <i>Evolutionary Psychology</i> , 2014, 12, 1022-37.  | 0.9 | 1         |
| 35 | Women want taller men more than men want shorter women. <i>Personality and Individual Differences</i> , 2013, 54, 877-883.   | 2.9 | 49        |
| 36 | The height of choosiness: mutual mate choice for stature results in suboptimal pair formation for both sexes. <i>Animal Behaviour</i> , 2013, 86, 37-46.   | 1.9 | 33        |

| #  | ARTICLE   | IF  | CITATIONS |
|----|---|-----|-----------|
| 37 | Born to win? Testing the fighting hypothesis in realistic fights: left-handedness in the Ultimate Fighting Championship. <i>Animal Behaviour</i> , 2013, 86, 839-843.                               | 1.9 | 32        |
| 38 | Tall claims? Sense and nonsense about the importance of height of US presidents. <i>Leadership Quarterly</i> , 2013, 24, 159-171.   | 5.8 | 113       |
| 39 | The pleasures and pitfalls of studying humans from a behavioral ecological perspective. <i>Behavioral Ecology</i> , 2013, 24, 1045-1046.  | 2.2 | 4         |
| 40 | Sex Differences in Risk Taking Behavior among Dutch Cyclists. <i>Evolutionary Psychology</i> , 2013, 11, 350-364.   | 0.9 | 58        |
| 41 | Are Human Mating Preferences with Respect to Height Reflected in Actual Pairings?. <i>PLoS ONE</i> , 2013, 8, e54186.   | 2.5 | 46        |
| 42 | The Golden Years: Men From The Forbes 400 Have Much Younger Wives When Remarrying Than the General US Population.. <i>Letters on Evolutionary Behavioral Science</i> , 2013, 4, 5-8.                | 0.3 | 13        |
| 43 | High and Mighty: Height Increases Authority in Professional Refereeing. <i>Evolutionary Psychology</i> , 2012, 10, 588-601.   | 0.9 | 39        |
| 44 | Male facial width is associated with death by contact violence: narrow-faced males are more likely to die from contact violence. <i>Evolution and Human Behavior</i> , 2012, 33, 551-556.           | 2.2 | 72        |
| 45 | Intralocus sexual conflict over human height. <i>Biology Letters</i> , 2012, 8, 976-978.  | 2.3 | 51        |
| 46 | Increased aggression during human group contests when competitive ability is more similar. <i>Biology Letters</i> , 2012, 8, 921-923.   | 2.3 | 16        |
| 47 | The effect of female height on reproductive success is negative in western populations, but more variable in non-western populations. <i>American Journal of Human Biology</i> , 2012, 24, 486-494. | 1.6 | 47        |
| 48 | A curvilinear effect of height on reproductive success in human males. <i>Behavioral Ecology and Sociobiology</i> , 2012, 66, 375-384.  | 1.4 | 65        |
| 49 | High and mighty: height increases authority in professional refereeing. <i>Evolutionary Psychology</i> , 2012, 10, 588-601.   | 0.9 | 5         |
| 50 | Parental Height Differences Predict the Need for an Emergency Caesarean Section. <i>PLoS ONE</i> , 2011, 6, e20497.   | 2.5 | 58        |
| 51 | Western scrub-jays conceal auditory information when competitors can hear but cannot see. <i>Biology Letters</i> , 2009, 5, 583-585.  | 2.3 | 49        |
