#	Article	IF	Citations
1	A Route Map for Successful Applications of Geographically Weighted Regression. Geographical Analysis, 2023, 55, 155-178.	1.9	45
2	Simulating grazing beef and sheep systems. Agricultural Systems, 2022, 195, 103307.	3.2	10
3	Comparisons of commercially available NIRS-based analyte predictions of haylage quality for equid nutrition. Animal Feed Science and Technology, 2022, 283, 115158.	1.1	0
4	The Importance of Scale and the MAUP for Robust Ecosystem Service Evaluations and Landscape Decisions. Land, 2022, 11, 399.	1.2	5
5	CO_2 fluxes from three different temperate grazed pastures using Eddy covariance measurements. Science of the Total Environment, 2022, 831, 154819.	3.9	6
6	Climate Change Impacts on Crop Yield of Winter Wheat (Triticum aestivum) and Maize (Zea mays) and Soil Organic Carbon Stocks in Northern China. Agriculture (Switzerland), 2022, 12, 614.	1.4	7
7	High-performance solutions of geographically weighted regression in R. Geo-Spatial Information Science, 2022, 25, 536-549.	2.4	10
8	gwverse: A Template for a New Generic Geographically Weighted R Package. Geographical Analysis, 2022, 54, 685-709.	1.9	2
9	The Forgotten Semantics of Regression Modeling in Geography. Geographical Analysis, 2021, 53, 113-134.	1.9	2
10	Key traits for ruminant livestock across diverse production systems in the context of climate change: perspectives from a global platform of research farms. Reproduction, Fertility and Development, 2021, 33, 1.	0.1	15
11	Using a lamb's early-life liveweight as a predictor of carcass quality. Animal, 2021, 15, 100018.	1.3	9
12	Current advisory interventions for grazing ruminant farming cannot close exceedance of modern background sediment loss – Assessment using an instrumented farm platform and modelled scaling out. Environmental Science and Policy, 2021, 116, 114-127.	2.4	15
13	Data to identify key drivers of animal growth and carcass quality for temperate lowland sheep production systems. Data in Brief, 2021, 35, 106977.	0.5	1
14	Within-field spatial variability of greenhouse gas fluxes from an extensive and intensive sheep-grazed pasture. Agriculture, Ecosystems and Environment, 2021, 312, 107355.	2.5	2
15	A Sensitivity Analysis of the SPACSYS Model. Agriculture (Switzerland), 2021, 11, 624.	1.4	4
16	Novel approaches to investigating spatial variability in channel bank total phosphorus at the catchment scale. Catena, 2021, 202, 105223.	2.2	10
17	Elucidating the performance of hybrid models for predicting extreme water flow events through variography and wavelet analyses. Journal of Hydrology, 2021, 598, 126442.	2.3	4
18	Nutritional value of suckler beef from temperate pasture systems. Animal, 2021, 15, 100257.	1.3	12

#	Article	IF	Citations
19	Quantifying the value of on-farm measurements to inform the selection of key performance indicators for livestock production systems. Scientific Reports, 2021, 11, 16874.	1.6	2
20	The Distribution of Soil Micro-Nutrients and the Effects on Herbage Micro-Nutrient Uptake and Yield in Three Different Pasture Systems. Agronomy, 2021, 11, 1731.	1.3	1
21	Inferring management and predicting sub-field scale C dynamics in UK grasslands using biogeochemical modelling and satellite-derived leaf area data. Agricultural and Forest Meteorology, 2021, 307, 108466.	1.9	8
22	A case study on the effects of data temporal resolution on the simulation of water flux extremes using a process-based model at the grassland field scale. Agricultural Water Management, 2021, 255, 107049.	2.4	2
23	Taking the steps toward sustainable livestock: our multidisciplinary global farm platform journey. Animal Frontiers, 2021, 11, 52-58.	0.8	10
24	Distance metric choice can both reduce and induce collinearity in geographically weighted regression. Environment and Planning B: Urban Analytics and City Science, 2020, 47, 489-507.	1.0	13
25	Understanding satellite-derived bathymetry using Sentinel 2 imagery and spatial prediction models. GIScience and Remote Sensing, 2020, 57, 271-286.	2.4	40
26	Influence of Geographical Effects in Hedonic Pricing Models for Grass-Fed Cattle in Uruguay. Agriculture (Switzerland), 2020, 10, 299.	1.4	1
27	Sediment source fingerprinting: benchmarking recent outputs, remaining challenges and emerging themes. Journal of Soils and Sediments, 2020, 20, 4160-4193.	1.5	124
28	Adjusting for Conditional Bias in Process Model Simulations of Hydrological Extremes: An Experiment Using the North Wyke Farm Platform. Frontiers in Artificial Intelligence, 2020, 3, 565859.	2.0	9
29	Satellite-derived bathymetry in optically complex waters using a model inversion approach and Sentinel-2 data. Estuarine, Coastal and Shelf Science, 2020, 241, 106814.	0.9	37
30	Elucidating three-way interactions between soil, pasture and animals that regulate nitrous oxide emissions from temperate grazing systems. Agriculture, Ecosystems and Environment, 2020, 300, 106978.	2.5	18
31	The 'Palo a Pique' Long-Term Research Platform: First 25 Years of a Crop–Livestock Experiment in Uruguay. Agronomy, 2020, 10, 441.	1.3	8
32	An evaluation of automated GPD threshold selection methods for hydrological extremes across different scales. Journal of Hydrology, 2020, 585, 124845.	2.3	17
33	Field scale temporal and spatial variability of $\delta^{13}C$, $\delta^{15}N$, TC and TN soil properties: Implications for sediment source tracing. Geoderma, 2019, 333, 108-122.	2.3	29
34	A Simulation Study on Specifying a Regression Model for Spatial Data: Choosing between Autocorrelation and Heterogeneity Effects. Geographical Analysis, 2019, 51, 151-181.	1.9	27
35	A comparison of Landsat 8, RapidEye and Pleiades products for improving empirical predictions of satellite-derived bathymetry. Remote Sensing of Environment, 2019, 233, 111414.	4.6	58
36	A response to 'A comment on geographically weighted regression with parameter-specific distance metrics'. International Journal of Geographical Information Science, 2019, 33, 1300-1312.	2.2	15

#	Article	IF	Citations
37	Quantifying the spatio-temporal drivers of planned vegetation restoration on ecosystem services at a regional scale. Science of the Total Environment, 2019, 650, 1029-1040.	3.9	115
38	Spatially explicit simulation of land use/land cover changes: Current coverage and future prospects. Earth-Science Reviews, 2019, 190, 398-415.	4.0	108
39	A framework for the regional critical zone classification: the case of the Chinese Loess Plateau. National Science Review, 2019, 6, 14-18.	4.6	20
40	The Importance of Scale in Spatially Varying Coefficient Modeling. Annals of the American Association of Geographers, 2019, 109, 50-70.	1.5	57
41	Assessment of empirical algorithms for bathymetry extraction using Sentinel-2 data. International Journal of Remote Sensing, 2019, 40, 2855-2879.	1.3	64
42	Investigating spatial error structures in continuous raster data. International Journal of Applied Earth Observation and Geoinformation, 2019, 74, 259-268.	1.4	13
43	When multi-functional landscape meets Critical Zone science: advancing multi-disciplinary research for sustainable human well-being. National Science Review, 2019, 6, 349-358.	4.6	13
44	Roles of instrumented farm-scale trials in trade-off assessments of pasture-based ruminant production systems. Animal, 2018, 12, 1766-1776.	1.3	33
45	Improvements to the calibration of a geographically weighted regression with parameter-specific distance metrics and bandwidths. Computers, Environment and Urban Systems, 2018, 71, 41-57.	3.3	47
46	Data to calculate emissions intensity for individual beef cattle reared on pasture-based production systems. Data in Brief, 2018, 17, 570-574.	0.5	1
47	Modelling field scale spatial variation in water run-off, soil moisture, N2O emissions and herbage biomass of a grazed pasture using the SPACSYS model. Geoderma, 2018, 315, 49-58.	2.3	21
48	Distributions of emissions intensity for individual beef cattle reared on pasture-based production systems. Journal of Cleaner Production, 2018, 171, 1672-1680.	4.6	58
49	Effect of long‐term drainage on plant community, soil carbon and nitrogen contents and stable isotopic ($\delta^{13}C$, $\delta^{15}N$) composition of a permanent grassland. European Journal of Soil Science, 2018, 69, 48-68.	1.8	5
50	Peri-urbanization may vary with vegetation restoration: A large scale regional analysis. Urban Forestry and Urban Greening, 2018, 29, 77-87.	2.3	31
51	Geographically weighted elastic net logistic regression. Journal of Geographical Systems, 2018, 20, 317-341.	1.9	9
52	Shp2graph: Tools to Convert a Spatial Network into an Igraph Graph in R. ISPRS International Journal of Geo-Information, 2018, 7, 293.	1.4	21
53	Hyper-local geographically weighted regression: extending GWR through local model selection and local bandwidth optimization. Journal of Spatial Information Science, 2018, , .	1.1	2
54	Geographically weighted regression with parameter-specific distance metrics. International Journal of Geographical Information Science, 2017, 31, 982-998.	2.2	83

#	Article	IF	Citations
55	Geographically weighted correspondence matrices for local error reporting and change analyses: mapping the spatial distribution of errors and change. Remote Sensing Letters, 2017, 8, 234-243.	0.6	23
56	Assessment of soil water, carbon and nitrogen cycling in reseeded grassland on the North Wyke Farm Platform using a process-based model. Science of the Total Environment, 2017, 603-604, 27-37.	3.9	21
57	The Application of a Geographically Weighted Principal Component Analysis for Exploring Twenty-three Years of Goat Population Change across Mongolia. Annals of the American Association of Geographers, 2017, 107, 1060-1074.	1.5	15
58	Introducing bootstrap methods to investigate coefficient non-stationarity in spatial regression models. Spatial Statistics, 2017, 21, 241-261.	0.9	23
59	Gauging policy-driven large-scale vegetation restoration programmes under a changing environment: Their effectiveness and socio-economic relationships. Science of the Total Environment, 2017, 607-608, 911-919.	3.9	48
60	A comparison of conventional and 137 Cs-based estimates of soil erosion rates on arable and grassland across lowland England and Wales. Earth-Science Reviews, 2017, 173, 49-64.	4.0	55
61	Quantifying the effect of ecological restoration on runoff and sediment yields. Progress in Physical Geography, 2017, 41, 753-774.	1.4	55
62	Phosphate stable oxygen isotope variability within a temperate agricultural soil. Geoderma, 2017, 285, 64-75.	2.3	29
63	Local variation in hedonic house pricing in Hanoi, Vietnam: a spatial analysis of status quality trade-off (SQTO) theory. International Conference on GIScience Short Paper Proceedings, 2016, 1, .	0.0	0
64	Geographically weighted evidence combination approaches for combining discordant and inconsistent volunteered geographical information. GeoInformatica, 2016, 20, 503-527.	2.0	11
65	Improving land cover classification using input variables derived from a geographically weighted principal components analysis. ISPRS Journal of Photogrammetry and Remote Sensing, 2016, 119, 347-360.	4.9	26
66	The North Wyke Farm Platform: effect of temperate grassland farming systems on soil moisture contents, runoff and associated water quality dynamics. European Journal of Soil Science, 2016, 67, 374-385.	1.8	81
67	The Minkowski approach for choosing the distance metric in geographically weighted regression. International Journal of Geographical Information Science, 2016, 30, 351-368.	2.2	49
68	Contextualized Geographically Weighted Principal Components Analysis for Investigating Baseline Soils Data on the North Wyke Farm Platform. , 2016, , 651-655.		2
69	Spatial Prediction of Coastal Bathymetry Based on Multispectral Satellite Imagery and Multibeam Data. Remote Sensing, 2015, 7, 13782-13806.	1.8	66
70	Calibrating a Geographically Weighted Regression Model with Parameter-specific Distance Metrics. Procedia Environmental Sciences, 2015, 26, 109-114.	1.3	15
71	Enhancements to a Geographically Weighted Principal Component Analysis in the Context of an Application to an Environmental Data Set. Geographical Analysis, 2015, 47, 146-172.	1.9	55
72	Using Bootstrap Methods to Investigate Coefficient Non-stationarity in Regression Models: An Empirical Case Study. Procedia Environmental Sciences, 2015, 27, 112-115.	1.3	4

#	Article	IF	Citations
73	**GWmodel**: An *R* Package for Exploring Spatial Heterogeneity Using Geographically Weighted Models. Journal of Statistical Software, 2015, 63, .	1.8	280
74	The Dublin SURGE Project: geochemical baseline for heavy metals in topsoils and spatial correlation with historical industry in Dublin, Ireland. Environmental Geochemistry and Health, 2014, 36, 235-254.	1.8	42
75	Geographically weighted methods and their use in network re-designs for environmental monitoring. Stochastic Environmental Research and Risk Assessment, 2014, 28, 1869-1887.	1.9	19
76	Multivariate Spatial Outlier Detection Using Robust Geographically Weighted Methods. Mathematical Geosciences, 2014, 46, 1-31.	1.4	42
77	Geographically weighted regression with a non-Euclidean distance metric: a case study using hedonic house price data. International Journal of Geographical Information Science, 2014, 28, 660-681.	2.2	225
78	The GWmodel R package: further topics for exploring spatial heterogeneity using geographically weighted models. Geo-Spatial Information Science, 2014, 17, 85-101.	2.4	193
79	Principal Component Analysis on Spatial Data: An Overview. Annals of the American Association of Geographers, 2013, 103, 106-128.	3.0	308
80	Portable X-Ray Fluorescence as a Rapid Technique for Surveying Elemental Distributions in Soil. Spectroscopy Letters, 2013, 46, 516-526.	0.5	28
81	The comap as a diagnostic tool for non-stationary kriging models. International Journal of Geographical Information Science, 2013, 27, 511-541.	2.2	6
82	Geographically Weighted Regression using a non-euclidean distance metric with simulation data. , 2012, , .		1
83	Visual Comparison of Moving-Window Kriging Models. Cartographica, 2011, 46, 211-226.	0.2	2
84	Estimating Freshwater Acidification Critical Load Exceedance Data for Great Britain Using Space-Varying Relationship Models. Mathematical Geosciences, 2011, 43, 265-292.	1.4	18
85	Links, comparisons and extensions of the geographically weighted regression model when used as a spatial predictor. Stochastic Environmental Research and Risk Assessment, 2011, 25, 123-138.	1.9	42
86	Geographically weighted principal components analysis. International Journal of Geographical Information Science, 2011, 25, 1717-1736.	2.2	160
87	Moving window kriging with geographically weighted variograms. Stochastic Environmental Research and Risk Assessment, 2010, 24, 1193-1209.	1.9	44
88	The Use of Geographically Weighted Regression forÂSpatial Prediction: AnÂEvaluation of Models Using Simulated Data Sets. Mathematical Geosciences, 2010, 42, 657-680.	1.4	142
89	Exploring spatial variation and spatial relationships in a freshwater acidification critical load data set for Great Britain using geographically weighted summary statistics. Computers and Geosciences, 2010, 36, 54-70.	2.0	32
90	Robust Geographically Weighted Regression: A Technique for Quantifying Spatial Relationships Between Freshwater Acidification Critical Loads and Catchment Attributes. Annals of the American Association of Geographers, 2010, 100, 286-306.	3.0	73
