#	ARTICLE	IF	CITATIONS
1	Out-of-hospital cardiac arrest and differential risk of cardiac and non-cardiac QT-prolonging drugs in 37%000 cases. <i>British Journal of Clinical Pharmacology</i> , 2022, 88, 820-829.	1.1	7
2	Fear of Sudden Death During Sport Activity and the Long QT Syndrome. , 2022, , 127-137.		0
3	Left Cardiac Sympathetic Denervation for Long QT Syndrome. <i>JACC: Clinical Electrophysiology</i> , 2022, 8, 281-294.	1.3	25
4	Stress, the autonomic nervous system, and sudden death. <i>Autonomic Neuroscience: Basic and Clinical</i> , 2022, 237, 102921.	1.4	10
5	Harmonization of the definition of sudden cardiac death in longitudinal cohorts of the European Sudden Cardiac Arrest network “ towards Prevention, Education, and New Effective Treatments (ESCAPE-NET) consortium. <i>American Heart Journal</i> , 2022, 245, 117-125.	1.2	9
6	An International Multicenter Cohort Study on β -Blockers for the Treatment of Symptomatic Children With Catecholaminergic Polymorphic Ventricular Tachycardia. <i>Circulation</i> , 2022, 145, 333-344.	1.6	28
7	Genome-wide association analyses identify new Brugada syndrome risk loci and highlight a new mechanism of sodium channel regulation in disease susceptibility. <i>Nature Genetics</i> , 2022, 54, 232-239.	9.4	55
8	Cardiac sympathetic denervation in the prevention of genetically mediated life-threatening ventricular arrhythmias. <i>European Heart Journal</i> , 2022, 43, 2096-2102.	1.0	22
9	European Heart Rhythm Association (EHRA)/Heart Rhythm Society (HRS)/Asia Pacific Heart Rhythm Society (APHRS)/Latin American Heart Rhythm Society (LAHRS) Expert Consensus Statement on the state of genetic testing for cardiac diseases. <i>Europace</i> , 2022, 24, 1307-1367.	0.7	108
10	European Heart Rhythm Association (EHRA)/Heart Rhythm Society (HRS)/Asia Pacific Heart Rhythm Society (APHRS)/Latin American Heart Rhythm Society (LAHRS) Expert Consensus Statement on the State of Genetic Testing for Cardiac Diseases. <i>Heart Rhythm</i> , 2022, 19, e1-e60.	0.3	78
11	European Heart Rhythm Association (<sc>EHRA</sc>)/Heart Rhythm Society (<sc>HRS</sc>)/Asia Pacific Heart Rhythm Society (<sc>APHRS</sc>)/Latin American Heart Rhythm Society (<sc>LAHRS</sc>) Expert Consensus Statement on the state of genetic testing for cardiac diseases. <i>Journal of Arrhythmia</i> . 2022, 38, 491-553.	0.5	24
12	Molecular genetic testing in athletes: Why and when a position statement from the Italian Society of Sports Cardiology. <i>International Journal of Cardiology</i> , 2022, 364, 169-177.	0.8	6
13	Implantable defibrillators in primary prevention of genetic arrhythmias. A shocking choice?. <i>European Heart Journal</i> , 2022, 43, 3029-3040.	1.0	17
14	<i>MTMR4</i> SNVs modulate ion channel degradation and clinical severity in congenital long QT syndrome: insights in the mechanism of action of protective modifier genes. <i>Cardiovascular Research</i> , 2021, 117, 767-779.	1.8	34
15	Recommendations for participation in leisure-time physical activity and competitive sports of patients with arrhythmias and potentially arrhythmogenic conditions. Part 2: ventricular arrhythmias, channelopathies, and implantable defibrillators. <i>Europace</i> , 2021, 23, 147-148.	0.7	47
16	NOS1AP polymorphisms reduce NOS1 activity and interact with prolonged repolarization in arrhythmogenesis. <i>Cardiovascular Research</i> , 2021, 117, 472-483.	1.8	22
17	1970“2020: 50 years of research on the long QT syndrome“from almost zero knowledge to precision medicine. <i>European Heart Journal</i> , 2021, 42, 1063-1072.	1.0	26
18	Infanticide vs. inherited cardiac arrhythmias. <i>Europace</i> , 2021, 23, 441-450.	0.7	21

#	ARTICLE	IF	CITATIONS
19	Enhancing rare variant interpretation in inherited arrhythmias through quantitative analysis of consortium disease cohorts and population controls. <i>Genetics in Medicine</i> , 2021, 23, 47-58.	1.1	57
20	Genetics of Peripartum Cardiomyopathy: Current Knowledge, Future Directions and Clinical Implications. <i>Genes</i> , 2021, 12, 103.	1.0	17
21	Precision Medicine and cardiac channelopathies: when dreams meet reality. <i>European Heart Journal</i> , 2021, 42, 1661-1675.	1.0	34
22	Cadherin 2-Related Arrhythmogenic Cardiomyopathy. <i>Circulation Genomic and Precision Medicine</i> , 2021, 14, e003097.	1.6	21
23	Management of Congenital Long-QT Syndrome: Commentary From the Experts. <i>Circulation: Arrhythmia and Electrophysiology</i> , 2021, 14, e009726.	2.1	5
24	Estimating the Posttest Probability of Long QT Syndrome Diagnosis for Rare <i>KCNH2</i> Variants. <i>Circulation Genomic and Precision Medicine</i> , 2021, 14, e003289.	1.6	10
25	Mutation location and <i>K</i> channels regulation in the arrhythmic risk of long QT syndrome type 1: the importance of the <i>KCNQ1</i> S6 region. <i>European Heart Journal</i> , 2021, 42, 4743-4755.	1.0	26
26	Remote Monitoring of the QT Interval and Emerging Indications for Arrhythmia Prevention. <i>Cardiac Electrophysiology Clinics</i> , 2021, 13, 523-530.	0.7	7
27	Long QT syndrome, artificial intelligence, and common sense. <i>European Heart Journal</i> , 2021, 42, 3962-3964.	1.0	16
28	Use of hiPSC-Derived Cardiomyocytes to Rule Out Proarrhythmic Effects of Drugs: The Case of Hydroxychloroquine in COVID-19. <i>Frontiers in Physiology</i> , 2021, 12, 730127.	1.3	4
29	Mothers with long QT syndrome are at increased risk for fetal death: findings from a multicenter international study. <i>American Journal of Obstetrics and Gynecology</i> , 2020, 222, 263.e1-263.e11.	0.7	34
30	Generation of the human induced pluripotent stem cell (hiPSC) line PSMi006-A from a patient affected by an autosomal recessive form of long QT syndrome type 1. <i>Stem Cell Research</i> , 2020, 42, 101658.	0.3	4
31	Risk factors for primary ventricular fibrillation during a first myocardial infarction: Clinical findings from PREDESTINATION (PRimary vEntricular fibrillation and suDden dEath during firST) Tj ETQq1 1 0.7843148gBT /Overlock	1.0	14
32	Exercise Training-Induced Repolarization Abnormalities Masquerading as Congenital Long QT Syndrome. <i>Circulation</i> , 2020, 142, 2405-2415.	1.6	36
33	Inherited cardiac arrhythmias. <i>Nature Reviews Disease Primers</i> , 2020, 6, 58.	18.1	146
34	Genotype Predicts Outcomes in Fetuses and Neonates With Severe Congenital Long QT Syndrome. <i>JACC: Clinical Electrophysiology</i> , 2020, 6, 1561-1570.	1.3	24
35	Prevalence and Phenotypic Correlations of Calmodulinopathy-Causative <i>CALM1-3</i> Variants Detected in a Multicenter Molecular Autopsy Cohort of Sudden Unexplained Death Victims. <i>Circulation Genomic and Precision Medicine</i> , 2020, 13, e003032.	1.6	3
36	<i>SCN5A</i> Mutation Type and a Genetic Risk Score Associate Variably With Brugada Syndrome Phenotype in <i>SCN5A</i> Families. <i>Circulation Genomic and Precision Medicine</i> , 2020, 13, e002911.	1.6	41

#	ARTICLE	IF	CITATIONS
37	Transethnic Genome-Wide Association Study Provides Insights in the Genetic Architecture and Heritability of Long QT Syndrome. <i>Circulation</i> , 2020, 142, 324-338.	1.6	83
38	Autonomic Control of the Heart and Its Clinical Impact. A Personal Perspective. <i>Frontiers in Physiology</i> , 2020, 11, 582.	1.3	26
39	Abnormal myocardial expression of SAP97 is associated with arrhythmogenic risk. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2020, 318, H1357-H1370.	1.5	13
40	The answers to questions surrounding left cardiac sympathetic denervation are in the library, covered by dust. <i>Heart Rhythm</i> , 2020, 17, 1646-1648.	0.3	1
41	Heart Rate Recovery After Exercise Is Associated With Arrhythmic Events in Patients With Catecholaminergic Polymorphic Ventricular Tachycardia. <i>Circulation: Arrhythmia and Electrophysiology</i> , 2020, 13, e007471.	2.1	10
42	An International Multicenter Evaluation of Type 5 Long QT Syndrome. <i>Circulation</i> , 2020, 141, 429-439.	1.6	39
43	There are 100 ways by which the sympathetic nervous system can trigger life-threatening arrhythmias. <i>European Heart Journal</i> , 2020, 41, 2180-2182.	1.0	13
44	Continued misuse of orphan drug legislation: a life-threatening risk for mexiletine. <i>European Heart Journal</i> , 2020, 41, 614-617.	1.0	15
45	Cardiac Repolarization and Stem Cells: An Emerging Path Toward Precision Medicine. , 2020, , 87-107.		1
46	Drug-Induced Long QT Syndrome and Torsades de Pointes. , 2020, , 185-200.		1
47	Long QT Syndrome. , 2020, , 3-24.		0
48	Neonatal ECG Screening: When Timing Matters. <i>Neonatology</i> , 2020, 117, 764-766.	0.9	0
49	Generation of two human induced pluripotent stem cell (hiPSC) lines from a long QT syndrome South African founder population. <i>Stem Cell Research</i> , 2019, 39, 101510.	0.3	3
50	Towards Precision Medicine With Human iPSCs for Cardiac Channelopathies. <i>Circulation Research</i> , 2019, 125, 653-658.	2.0	53
51	Genetic Mosaicism in Calmodulinopathy. <i>Circulation Genomic and Precision Medicine</i> , 2019, 12, 375-385.	1.6	33
52	Calmodulin mutations and life-threatening cardiac arrhythmias: insights from the International Calmodulinopathy Registry. <i>European Heart Journal</i> , 2019, 40, 2964-2975.	1.0	116
53	Implantable cardioverter-defibrillators in previously undiagnosed patients with catecholaminergic polymorphic ventricular tachycardia resuscitated from sudden cardiac arrest. <i>European Heart Journal</i> , 2019, 40, 2953-2961.	1.0	96
54	When prescribing drugs, do medical doctors and healthcare professionals realize that their patient has the long QT syndrome?. <i>European Heart Journal</i> , 2019, 40, 3118-3120.	1.0	4

#	ARTICLE	IF	CITATIONS
55	Physical Inactivity Is a Risk Factor for Primary Ventricular Fibrillation. <i>Journal of the American College of Cardiology</i> , 2019, 73, 2117-2118.	1.2	11
56	Generation of the human induced pluripotent stem cell (hiPSC) line PSMi005-A from a patient carrying the KCNQ1-R190W mutation. <i>Stem Cell Research</i> , 2019, 37, 101437.	0.3	1
57	Mexiletine Shortens the QT Interval in Patients With Potassium Channel-Mediated Type 2 Long QT Syndrome. <i>Circulation: Arrhythmia and Electrophysiology</i> , 2019, 12, e007280.	2.1	74
58	Generation of the human induced pluripotent stem cell (hiPSC) line PSMi007-A from a Long QT Syndrome type 1 patient carrier of two common variants in the NOS1AP gene. <i>Stem Cell Research</i> , 2019, 36, 101416.	0.3	2
59	Cardiac Sympathetic Denervation in Channelopathies. <i>Frontiers in Cardiovascular Medicine</i> , 2019, 6, 27.	1.1	25
60	Generation of the human induced pluripotent stem cell (hiPSC) line PSMi004-A from a carrier of the KCNQ1-R594Q mutation. <i>Stem Cell Research</i> , 2019, 37, 101431.	0.3	2
61	From patient-specific induced pluripotent stem cells to clinical translation in long QT syndrome Type 2. <i>European Heart Journal</i> , 2019, 40, 1832-1836.	1.0	69
62	Precision Versus Traditional Medicine—Clinical Questions Trigger Progress in Basic Science. <i>Circulation Research</i> , 2019, 124, 459-461.	2.0	5
63	Proarrhythmic proclivity of left-stellate ganglion stimulation in a canine model of drug-induced long-QT syndrome type 1. <i>International Journal of Cardiology</i> , 2019, 286, 66-72.	0.8	17
64	International Triadin Knockout Syndrome Registry. <i>Circulation Genomic and Precision Medicine</i> , 2019, 12, e002419.	1.6	32
65	Cardiac sympathetic denervation via a transtracheal approach: It's a long way to Tipperary. <i>Heart Rhythm</i> , 2019, 16, 125-127.	0.3	2
66	Long QT Syndrome Modelling with Cardiomyocytes Derived from Human-induced Pluripotent Stem Cells. <i>Arrhythmia and Electrophysiology Review</i> , 2019, 8, 105-110.	1.3	36
67	Generation of the human induced pluripotent stem cell (hiPSC) line PSMi002-A from a patient affected by the Jervell and Lange-Nielsen syndrome and carrier of two compound heterozygous mutations on the KCNQ1 gene. <i>Stem Cell Research</i> , 2018, 29, 157-161.	0.3	3
68	European Sudden Cardiac Arrest network: towards Prevention, Education and New Effective Treatments (ESCAPE-NET). <i>European Heart Journal</i> , 2018, 39, 86-88.	1.0	23
69	Determinants of occurrence and survival after sudden cardiac arrest—A European perspective: The ESCAPE-NET project. <i>Resuscitation</i> , 2018, 124, 7-13.	1.3	33
70	Generation of the human induced pluripotent stem cell (hiPSC) line PSMi003-A from a patient affected by an autosomal recessive form of Long QT Syndrome type 1. <i>Stem Cell Research</i> , 2018, 29, 170-173.	0.3	6
71	Sudden Infant Death Syndrome and Genetics. <i>Journal of the American College of Cardiology</i> , 2018, 71, 1228-1230.	1.2	5
72	Electronic gadgets and their health-related claims. <i>International Journal of Cardiology</i> , 2018, 258, 163-164.	0.8	8

#	ARTICLE	IF	CITATIONS
73	Identification of a targeted and testable antiarrhythmic therapy for long-QT syndrome type 2 using a patient-specific cellular model. <i>European Heart Journal</i> , 2018, 39, 1446-1455.	1.0	100
74	The genetics underlying idiopathic ventricular fibrillation: A special role for catecholaminergic polymorphic ventricular tachycardia?. <i>International Journal of Cardiology</i> , 2018, 250, 139-145.	0.8	42
75	Long and Short QT Syndromes. , 2018, , 893-904.		2
76	Cardiac arrest and Brugada syndrome: Is drug-induced type 1 ECG pattern always a marker of low risk?. <i>International Journal of Cardiology</i> , 2018, 254, 142-145.	0.8	13
77	Alberto Zanchetti. <i>Hypertension</i> , 2018, 72, 786-787.	1.3	0
78	Bongani Mayosi, 1967â€“2018. <i>European Heart Journal</i> , 2018, 39, 4051-4052.	1.0	0
79	Is Careful Assessment of Rare Variants in the <i>RYR2</i> Gene Piercing the Guidelinesâ€™ Strong Armor?. <i>Circulation Genomic and Precision Medicine</i> , 2018, 11, e002072.	1.6	1
80	Can genetics predict risk for sudden cardiac death? The relentless search for the Holy Grail. <i>European Heart Journal</i> , 2018, 39, 3970-3972.	1.0	8
81	Modifier genes for sudden cardiac death. <i>European Heart Journal</i> , 2018, 39, 3925-3931.	1.0	52
82	For neonatal ECG screening there is no reason to relinquish old Bazettâ€™s correction. <i>European Heart Journal</i> , 2018, 39, 2888-2895.	1.0	28
83	Long QT Syndrome and Sport: My Views. , 2018, , 269-278.		2
84	SCN5A mutations in 442 neonates and children: genotypeâ€“phenotype correlation and identification of higher-risk subgroups. <i>European Heart Journal</i> , 2018, 39, 2879-2887.	1.0	33
85	Letter concerning the editorial by Giustetto et al. <i>Int J Cardiol</i> 2018;254:170â€“171. <i>International Journal of Cardiology</i> , 2018, 268, 155.	0.8	0
86	Implantable cardioverter-defibrillator use in catecholaminergic polymorphic ventricular tachycardia: A systematic review. <i>Heart Rhythm</i> , 2018, 15, 1791-1799.	0.3	77
87	Alberto Zanchetti (27 July 1926). <i>European Heart Journal</i> , 2018, 39, 2344-2345.	1.0	1
88	A wearable remote monitoring system for the identification of subjects with a prolonged QT interval or at risk for drug-induced long QT syndrome. <i>International Journal of Cardiology</i> , 2018, 266, 89-94.	0.8	53
89	Risk stratification for sudden cardiac death in primary electrical disorders. , 2018, , 2322-2327.		0
90	Monogenic and oligogenic cardiovascular diseases: genetics of arrhythmiasâ€“catecholaminergic polymorphic ventricular tachycardia. , 2018, , .		0

#	ARTICLE	IF	CITATIONS
91	Identification of Cadherin 2 (<i>CDH2</i>) Mutations in Arrhythmogenic Right Ventricular Cardiomyopathy. <i>Circulation: Cardiovascular Genetics</i> , 2017, 10, .	5.1	123
92	Red Bull®: Red flag or red herring?. <i>International Journal of Cardiology</i> , 2017, 231, 179-180.	0.8	3
93	The KCNH2-IVS9-28A/G mutation causes aberrant isoform expression and hERG trafficking defect in cardiomyocytes derived from patients affected by Long QT Syndrome type 2. <i>International Journal of Cardiology</i> , 2017, 240, 367-371.	0.8	28
94	Desmoplakin missense and non-missense mutations in arrhythmogenic right ventricular cardiomyopathy: Genotype-phenotype correlation. <i>International Journal of Cardiology</i> , 2017, 249, 268-273.	0.8	70
95	Patient-Specific Induced Pluripotent Stem Cell-Based Disease Model for Pathogenesis Studies and Clinical Pharmacotherapy. <i>Circulation: Arrhythmia and Electrophysiology</i> , 2017, 10, .	2.1	10
96	Cardiac sympathetic denervation 100 years later: Jonnesco would have never believed it. <i>International Journal of Cardiology</i> , 2017, 237, 25-28.	0.8	27
97	Reference values of heart rate variability. <i>Heart Rhythm</i> , 2017, 14, 302-303.	0.3	24
98	Founder populations with channelopathies and church records reveal all sorts of interesting secrets: Some are scientifically relevant. <i>Heart Rhythm</i> , 2017, 14, 1882-1883.	0.3	1
99	Evolution in Managing Long QT Syndrome. <i>Journal of the American College of Cardiology</i> , 2017, 70, 463-465.	1.2	1
100	Rationale and design of a prospective study to assess the effect of left cardiac sympathetic denervation in chronic heart failure. <i>International Journal of Cardiology</i> , 2017, 248, 227-231.	0.8	18
101	Channelopathies as Causes of Sudden Cardiac Death. <i>Cardiac Electrophysiology Clinics</i> , 2017, 9, 537-549.	0.7	28
102	Regional Lack of Consistency in the Management of Atrial Fibrillation (from the RECORD-AF Trial). <i>American Journal of Cardiology</i> , 2017, 119, 47-51.	0.7	6
103	Elucidating arrhythmogenic mechanisms of long-QT syndrome CALM1-F142L mutation in patient-specific induced pluripotent stem cell-derived cardiomyocytes. <i>Cardiovascular Research</i> , 2017, 113, 531-541.	1.8	110
104	The expression of the rare caveolin-3 variant T78M alters cardiac ion channels function and membrane excitability. <i>Cardiovascular Research</i> , 2017, 113, 1256-1265.	1.8	19
105	Neural and Spinal Stimulation. , 2017, , 595-601.		1
106	Response to Letters Regarding Article, "Clinical Management of Catecholaminergic Polymorphic Ventricular Tachycardia: The Role of Left Cardiac Sympathetic Denervation". <i>Circulation</i> , 2016, 133, e366-7.	1.6	2
107	Management of survivors of cardiac arrest " the importance of genetic investigation. <i>Nature Reviews Cardiology</i> , 2016, 13, 560-566.	6.1	13
108	Response by Crotti et al to Letter Regarding Article, "Genetic Modifiers for the Long-QT Syndrome: How Important Is the Role of Variants in the 3' Untranslated Region of KCNQ1?". <i>Circulation: Cardiovascular Genetics</i> , 2016, 9, 581-582.	5.1	10
