#	ARTICLE	IF	CITATIONS
1	Cognitive control mediates age-related changes in flexible anticipatory processing during listening comprehension. <i>Brain Research</i> , 2021, 1768, 147573.	2.2	6
2	The use of context in resolving syntactic ambiguity: structural and semantic influences. <i>Language, Cognition and Neuroscience</i> , 2020, 35, 43-57.	1.2	2
3	Adaptation to Animacy Violations during Listening Comprehension. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2019, 19, 1247-1258.	2.0	3
4	Flexible predictions during listening comprehension: Speaker reliability affects anticipatory processes. <i>Neuropsychologia</i> , 2019, 135, 107225.	1.6	29
5	Electrophysiological evidence for an independent effect of memory retrieval on referential processing. <i>Journal of Memory and Language</i> , 2018, 102, 68-82.	2.1	23
6	Electrophysiological evidence for preserved primacy of lexical prediction in aging. <i>Neuropsychologia</i> , 2018, 117, 135-147.	1.6	27
7	Language context processing deficits in schizophrenia: The role of attentional engagement. <i>Neuropsychologia</i> , 2017, 96, 262-273.	1.6	12
8	Internal mechanisms underlying anticipatory language processing: Evidence from event-related-potentials and neural oscillations. <i>Neuropsychologia</i> , 2017, 102, 70-81.	1.6	31
9	Early processing of orthographic language membership information in bilingual visual word recognition: Evidence from ERPs. <i>Neuropsychologia</i> , 2017, 103, 183-190.	1.6	16
10	Goals and strategies influence lexical prediction during sentence comprehension. <i>Journal of Memory and Language</i> , 2017, 93, 203-216.	2.1	92
11	Electrophysiological Evidence for Impaired Control of Motor Output in Schizophrenia. <i>Cerebral Cortex</i> , 2016, 26, 1891-1899.	2.9	19
12	Cognitive Control of Episodic Memory in Schizophrenia: Differential Role of Dorsolateral and Ventrolateral Prefrontal Cortex. <i>Frontiers in Human Neuroscience</i> , 2015, 9, 604.	2.0	20
13	Graded expectations: Predictive processing and the adjustment of expectations during spoken language comprehension. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2015, 15, 607-624.	2.0	46
14	Language Membership Identification Precedes Semantic Access: Suppression during Bilingual Word Recognition. <i>Journal of Cognitive Neuroscience</i> , 2015, 27, 2108-2116.	2.3	23
15	Sensitivity to Referential Ambiguity in Discourse: The Role of Attention, Working Memory, and Verbal Ability. <i>Journal of Cognitive Neuroscience</i> , 2015, 27, 2309-2323.	2.3	42
16	Effects of prediction and contextual support on lexical processing: Prediction takes precedence. <i>Cognition</i> , 2015, 136, 135-149.	2.2	132
17	Evidence for priming across intervening sentences during on-line sentence comprehension. <i>Language, Cognition and Neuroscience</i> , 2014, 29, 289-311.	1.2	25
18	Memory availability and referential access. <i>Language, Cognition and Neuroscience</i> , 2014, 29, 60-87.	1.2	5

#	ARTICLE	IF	CITATIONS
19	Priming Prepositional Phrase Attachment: Evidence from Eye-Tracking and Event-Related Potentials. Quarterly Journal of Experimental Psychology, 2014, 67, 424-454.	1.1	13
20	Disrupted action monitoring in recent-onset psychosis patients with schizophrenia and bipolar disorder. Psychiatry Research - Neuroimaging, 2014, 221, 114-121.	1.8	33
21	Spared and Impaired Spoken Discourse Processing in Schizophrenia: Effects of Local and Global Language Context. Journal of Neuroscience, 2013, 33, 15578-15587.	3.6	17
22	ERP correlates of letter identity and letter position are modulated by lexical frequency. Brain and Language, 2013, 125, 11-27.	1.6	34
23	Effects of working memory span on processing of lexical associations and congruence in spoken discourse. Frontiers in Psychology, 2013, 4, 60.	2.1	27
24	Cognitive Control and Discourse Comprehension in Schizophrenia. Schizophrenia Research and Treatment, 2012, 2012, 1-7.	1.5	21
25	Cognitive control influences the use of meaning relations during spoken sentence comprehension. Neuropsychologia, 2012, 50, 2659-2668.	1.6	27
26	Does discourse congruence influence spoken language comprehension before lexical association? Evidence from event-related potentials. Language and Cognitive Processes, 2012, 27, 698-733.	2.2	30
27	Orthographic neighborhood effects as a function of word frequency: An event-related potential study. Psychophysiology, 2012, 49, 1277-1289.	2.4	33
28	The Role of Gender Information in Pronoun Resolution: Evidence from Chinese. PLoS ONE, 2012, 7, e36156.	2.5	23
29	Language-Related ERP Components. , 2011, , .		37
30	Speech and Span: Working Memory Capacity Impacts the Use of Animacy but Not of World Knowledge during Spoken Sentence Comprehension. Journal of Cognitive Neuroscience, 2010, 22, 2886-2898.	2.3	83
31	Electrophysiological and behavioral evidence of syntactic priming in sentence comprehension.. Journal of Experimental Psychology: Learning Memory and Cognition, 2009, 35, 19-45.	0.9	81
32	Syntactic Priming in Comprehension. Psychological Science, 2007, 18, 135-143.	3.3	117
33	The interplay of discourse congruence and lexical association during sentence processing: Evidence from ERPs and eye tracking. Journal of Memory and Language, 2007, 56, 103-128.	2.1	141
34	Processing new and repeated names: Effects of coreference on repetition priming with speech and fast RSVP. Brain Research, 2007, 1146, 172-184.	2.2	58
35	Electrophysiological differentiation of phonological and semantic integration in word and sentence contexts. Brain Research, 2007, 1146, 85-100.	2.2	66
36	Coreference and lexical repetition: Mechanisms of discourse integration. Memory and Cognition, 2007, 35, 801-815.	1.6	58

#	ARTICLE	IF	CITATIONS
37	Reading Words in Discourse: The Modulation of Lexical Priming Effects by Message-Level Context. Behavioral and Cognitive Neuroscience Reviews, 2006, 5, 107-127.	3.9	55
38	Separable Effects of Semantic Priming and Imageability on Word Processing in Human Cortex. Cerebral Cortex, 2004, 14, 521-529.	2.9	87
39	Electrophysiological Evidence for Reversed Lexical Repetition Effects in Language Processing. Journal of Cognitive Neuroscience, 2004, 16, 715-726.	2.3	73
40	Gapping: Electrophysiological evidence for immediate processing of "missing" verbs in sentence comprehension. Brain and Language, 2004, 89, 584-592.	1.6	24
41	Electrophysiological evidence for serial sentence processing: a comparison between non-preferred and ungrammatical continuations. Cognitive Brain Research, 2003, 17, 621-635.	3.0	64
42	Understanding words in sentence contexts: The time course of ambiguity resolution. Brain and Language, 2003, 86, 326-343.	1.6	79
43	Repair, Revision, and Complexity in Syntactic Analysis: An Electrophysiological Differentiation. Journal of Cognitive Neuroscience, 2003, 15, 98-110.	2.3	340
44	The brain circuitry of syntactic comprehension. Trends in Cognitive Sciences, 2002, 6, 350-356.	7.8	323
45	Separable effects of priming and imageability on word processing: an ERP study. Cognitive Brain Research, 2002, 15, 99-103.	3.0	91
46	Event-related potentials in cognitive neuropsychology: Methodological considerations and an example from studies of aphasia. Behavior Research Methods, 1998, 30, 157-170.	1.3	4
47	Understanding ambiguous words in sentence contexts: electrophysiological evidence for delayed contextual selection in Broca's aphasia. Neuropsychologia, 1998, 36, 737-761.	1.6	129
48	Spoken Sentence Comprehension in Aphasia: Event-related Potential Evidence for a Lexical Integration Deficit. Journal of Cognitive Neuroscience, 1997, 9, 39-66.	2.3	162
49	Lexical "semantic event" related potential effects in patients with left hemisphere lesions and aphasia, and patients with right hemisphere lesions without aphasia. Brain, 1996, 119, 627-649.	7.6	234
