#	ARTICLE	IF	CITATIONS
1	Fire influences reproductive outcomes by modifying flowering phenology and mate availability. <i>New Phytologist</i> , 2022, 233, 2083-2093.	7.3	7
2	Competition for pollination and isolation from mates differentially impact four stages of pollination in a model grassland perennial. <i>Journal of Ecology</i> , 2021, 109, 1356-1369.	4.0	9
3	Fires slow population declines of a long-lived prairie plant through multiple vital rates. <i>Oecologia</i> , 2021, 196, 679-691.	2.0	4
4	Fire synchronizes flowering and boosts reproduction in a widespread but declining prairie species. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2020, 117, 3000-3005.	7.1	27
5	Pollinator effectiveness in a composite: a specialist bee pollinates more florets but does not move pollen farther than other visitors. <i>American Journal of Botany</i> , 2019, 106, 1487-1498.	1.7	13
6	Pollinator-mediated mechanisms for increased reproductive success in early flowering plants. <i>Oikos</i> , 2018, 127, 1657-1669.	2.7	8
7	Mating Opportunity Increases with Synchrony of Flowering among Years More than Synchrony within Years in a Nonmasting Perennial. <i>American Naturalist</i> , 2018, 192, 379-388.	2.1	12
8	<i>Echinacea angustifolia</i> and its specialist antattended aphid: a multi-year study of manipulated and naturally occurring aphid infestation. <i>Ecological Entomology</i> , 2016, 41, 51-60.	2.2	2
9	Seed source impacts germination and early establishment of dominant grasses in prairie restorations. <i>Journal of Applied Ecology</i> , 2016, 53, 251-263.	4.0	40
10	The susceptibility of <i>Echinacea angustifolia</i> to a specialist aphid: an evolutionary perspective on genotypic variation and demographic consequences. <i>Journal of Ecology</i> , 2015, 103, 809-818.	4.0	9
11	How functional traits, herbivory, and genetic diversity interact in <i>Echinacea</i> : implications for fragmented populations. <i>Ecology</i> , 2015, 96, 1877-1886.	3.2	16
12	Mating between <i>Echinacea angustifolia</i> (Asteraceae) individuals increases with their flowering synchrony and spatial proximity. <i>American Journal of Botany</i> , 2014, 101, 180-189.	1.7	45
13	Both flowering time and distance to conspecific plants affect reproduction in <i>Echinacea angustifolia</i> , a common prairie perennial. <i>Journal of Ecology</i> , 2014, 102, 920-929.	4.0	41
14	Development and Evaluation of Microsatellite Markers for a Native Prairie Perennial, <i>Echinacea angustifolia</i> (Asteraceae). <i>Applications in Plant Sciences</i> , 2013, 1, 1300049.	2.1	5
15	Seedling Recruitment in the Long-Lived Perennial, <i>Echinacea angustifolia</i> : A 10-Year Experiment. <i>Restoration Ecology</i> , 2012, 20, 352-359.	2.9	8
16	The Effect of Plant Inbreeding and Stoichiometry on Interactions with Herbivores in Nature: <i>Echinacea angustifolia</i> and Its Specialist Aphid. <i>PLoS ONE</i> , 2011, 6, e24762.	2.5	14
17	Reproduction of <i>Echinacea angustifolia</i> in fragmented prairie is pollen-limited but not pollinator-limited. <i>Ecology</i> , 2010, 91, 733-742.	3.2	65
18	BIPARENTAL INBREEDING AND INTERREMNANT MATING IN A PERENNIAL PRAIRIE PLANT: FITNESS CONSEQUENCES FOR PROGENY IN THEIR FIRST EIGHT YEARS. <i>Evolution; International Journal of Organic Evolution</i> , 2010, 64, 761-771.	2.3	46

#	ARTICLE	IF	CITATIONS
19	Unifying Lifeâ€™History Analyses for Inference of Fitness and Population Growth. <i>American Naturalist</i> , 2008, 172, E35-E47.	2.1	164
20	Patch Aging and theâ€™Allee Effect: Breeding System Effects on the Demographic Response of Plants to Habitat Fragmentation. <i>American Naturalist</i> , 2007, 169, 383-397.	2.1	111
21	SCALE DEPENDENCE OF REPRODUCTIVE FAILURE IN FRAGMENTED <i>Echinacea</i> POPULATIONS. <i>Ecology</i> , 2006, 87, 931-941.	3.2	66
22	Style Persistence, Pollen Limitation, and Seed Set in the Common Prairie Plant <i>Echinacea angustifolia</i> (Asteraceae). <i>International Journal of Plant Sciences</i> , 2004, 165, 595-603.	1.3	38
23	COMMUNITY GENETICS: EXPANDING THE SYNTHESIS OF ECOLOGY AND GENETICS. <i>Ecology</i> , 2003, 84, 545-558.	3.2	110
