#	ARTICLE	IF	CITATIONS
1	The Seroprevalence of SARS-CoV-2 Antibodies among HealthCare Workers in University Hospital in Krakow before the Era of Vaccination. <i>International Journal of Environmental Research and Public Health</i> , 2022, 19, 4044.	2.6	6
2	Post-Discharge Clostridioides difficile Infection after Arthroplasties in Poland, Infection Prevention and Control as the Key Element of Prevention of C. difficile Infections. <i>International Journal of Environmental Research and Public Health</i> , 2022, 19, 3155.	2.6	2
3	Healthcare-Acquired Infection Surveillance in Neurosurgery Patients, Incidence and Microbiology, Five Years of Experience in Two Polish Units. <i>International Journal of Environmental Research and Public Health</i> , 2022, 19, 7544.	2.6	4
4	Antimicrobial Resistance of Enterobacteriaceae in Bloodstream Infections in Hospitalized Patients in Southern Poland. <i>Journal of Clinical Medicine</i> , 2022, 11, 3927.	2.4	2
5	Antimicrobial Resistance in Enterobacteriales Bacilli Isolated from Bloodstream Infection in Surgical Patients of Polish Hospitals. <i>International Journal of Microbiology</i> , 2021, 2021, 1-7.	2.3	1
6	Healthcare-Associated Laboratory-Confirmed Bloodstream Infectionsâ€™ Species Diversity and Resistance Mechanisms, a Four-Year Retrospective Laboratory-Based Study in the South of Poland. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 2785.	2.6	8
7	Is treated hypertension associated with a lower one-year mortality among older residents of long-term care facilities with multimorbidity?. <i>Polish Archives of Internal Medicine</i> , 2021, 131, 439-446.	0.4	2
8	Virulence and Drug-Resistance of Staphylococcus aureus Strains Isolated from Venous Ulcers in Polish Patients. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 4662.	2.6	2
9	Incidence of Surgical Site Infections in Multicenter Studyâ€™ Implications for Surveillance Practice and Organization. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 5374.	2.6	2
10	Patients Undergoing Hip or Knee Arthroplasty in Poland Based on National Dataâ€™ Challenge for Healthcare in Aging Society. <i>Healthcare (Switzerland)</i> , 2021, 9, 924.	2.0	4
11	Incidence of Vaccine-Preventable Childhood Diseases in the European Union and in the European Free Trade Association Countries. <i>Vaccines</i> , 2021, 9, 796.	4.4	3
12	Preparedness of Health Care Workers and Medical Students in University Hospital in Krakow for COVID-19 Pandemic within the CRACoV Project. <i>Journal of Clinical Medicine</i> , 2021, 10, 3487.	2.4	7
13	Explanatory survival model for nursing home residents- a 9-year retrospective cohort study. <i>Archives of Gerontology and Geriatrics</i> , 2021, 97, 104497.	3.0	7
14	Prevalence and Antimicrobial Susceptibility Profiles of Microorganisms Associated with Lower Reproductive Tract Infections in Women from Southern Polandâ€™ Retrospective Laboratory-Based Study. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 335.	2.6	12
15	Multidrug-Resistant Micro-Organisms Associated with Urinary Tract Infections in Orthopedic Patients: A Retrospective Laboratory-Based Study. <i>Antibiotics</i> , 2021, 10, 7.	3.7	5
16	Outpatient Antibiotic Prescriptions in Pregnant Women in MaÅ,opolska Province. <i>Antibiotics</i> , 2021, 10, 14.	3.7	3
17	Antibiotic consumption in long-term care facilities in Poland and other European countries in 2017. <i>Antimicrobial Resistance and Infection Control</i> , 2021, 10, 154.	4.1	3
18	What factors influence the long-term survival of nursing home residents with severe disabilities?. <i>Folia Medica Cracoviensia</i> , 2021, 61, 67-79.	0.3	0

#	ARTICLE	IF	CITATIONS
19	CRACoV-HHS: an interdisciplinary project for multi-specialist hospital and non-hospital care for patients with SARS-CoV-2 infection as well hospital staff assessment for infection exposure.. Folia Medica Cracoviensia, 2021, 61, 5-44.	0.3	7
20	Growing consumption of antibiotics and epidemiology of Clostridioides difficile infections in Poland: A need to develop new solutions. Acta Microbiologica Et Immunologica Hungarica, 2020, 67, 79-86.	0.8	0
21	Antimicrobial Resistance and Biofilm Formation by Staphylococcus aureus Isolated From Ocular Infections. Infection Control and Hospital Epidemiology, 2020, 41, s121-s122.	1.8	0
22	Interest in Working as an Infection Prevention and Control Nurse and Perception of This Position by Nursing Studentsâ€”Results of a Pilot Study. International Journal of Environmental Research and Public Health, 2020, 17, 7943.	2.6	3
23	Epidemiology of Surgical Site Infections Considering the NHSN Standardized Infection Ratio in Hip and Knee Arthroplasties. International Journal of Environmental Research and Public Health, 2020, 17, 3167.	2.6	12
24	Long-Term Antibiotic Prophylaxis in Urology and High Incidence of Clostridioides difficile Infections in Surgical Adult Patients. Microorganisms, 2020, 8, 810.	3.6	3
25	Consumption of Antibiotics and Epidemiology of Clostridioides difficile in the European Union in 2016â€”Opportunity for Practical Application of Aggregate ECDC Data. Antibiotics, 2020, 9, 127.	3.7	3
26	Multimodal strategy in surgical site infections control and prevention in orthopaedic patients â€” a 10-year retrospective observational study at a Polish hospital. Antimicrobial Resistance and Infection Control, 2020, 9, 20.	4.1	5
27	Infection-associated hospitalizations of women in labour. European Journal of Public Health, 2020, 30, 739-743.	0.3	1
28	Selected aspects of the knowledge and practice concerning hand hygiene guidelines in the context of infection control structures in hospitals and long-term care facilities â€” findings of a questionnaire survey. Medycyna Pracy, 2020, 71, 531-537.	0.8	2
29	Prevalence and Carbapenem Resistance of <i>Acinetobacter baumannii</i> and Other Than <i>A. baumannii</i> Isolates From Intensive Care Units (ICUs) and non-ICUs. Infection Control and Hospital Epidemiology, 2020, 41, s356-s357.	1.8	0
30	Analysis of the incidence of surgical site infections after open reposition of long bone fractures and closed fracture settings in a 7-year follow-up in an orthopedic and trauma ward in southern Poland. Przegląd Epidemiologiczny, 2020, 74, 336-345.	0.2	1
31	Healthcare-Associated Infections: Enterobacteriaceae Bloodstream Infections in the ICU Settings. Infection Control and Hospital Epidemiology, 2020, 41, s246-s247.	1.8	0
32	Neonate Bloodstream Infections in Organization for Economic Cooperation and Development Countries: An Update on Epidemiology and Prevention. Journal of Clinical Medicine, 2019, 8, 1750.	2.4	21
33	Can surgical site infections be controlled through microbiological surveillance? A three-year laboratory-based surveillance at an orthopaedic unit, retrospective observatory study. International Orthopaedics, 2019, 43, 2009-2016.	1.9	23
34	Epidemiology of Surgical Site Infections and Non-Surgical Infections in Neurosurgical Polish Patientsâ€”Substantial Changes in 2003â€”2017. International Journal of Environmental Research and Public Health, 2019, 16, 911.	2.6	10
35	Factors Shaping Attitudes of Medical Staff towards Acceptance of the Standard Precautions. International Journal of Environmental Research and Public Health, 2019, 16, 1050.	2.6	12
36	Assessment of medical staffâ€™s knowledge concerning the â€œfive moments for hand hygieneâ€”, 2019, 27, 155-161.	0.1	0

#	ARTICLE	IF	CITATIONS
37	Epidemiology, Drug Resistance, and Virulence of <i>Staphylococcus aureus</i> Isolated from Ocular Infections in Polish Patients. <i>Polish Journal of Microbiology</i> , 2019, 68, 541-548.	1.7	6
38	Hospital-acquired Enterobacteriaceae bloodstream infections in children. <i>Medycyna Wieku Rozwojowego</i> , 2019, 23, 131-136.	0.2	0
39	Outpatient post-partum antibiotic prescription: method of identification of infection control areas demanding improvements and verification of sensitivity of infection registration. <i>Journal of Antimicrobial Chemotherapy</i> , 2018, 73, 240-245.	3.0	7
40	Treatment of Cardiovascular Diseases Among Elderly Residents of Long-term Care Facilities. <i>Journal of the American Medical Directors Association</i> , 2018, 19, 428-432.	2.5	11
41	Antibiotic consumption versus the prevalence of multidrug-resistant <i>Acinetobacter baumannii</i> and <i>Clostridium difficile</i> infections at an ICU from 2014–2015. <i>Journal of Infection and Public Health</i> , 2018, 11, 626-630.	4.1	20
42	Practice of hand hygiene and use of protective gloves: Differences in the perception between patients and medical staff. <i>American Journal of Infection Control</i> , 2018, 46, 1074-1076.	2.3	11
43	Infections following surgical patent ductus arteriosus ligation in very-low-birthweight neonates. <i>Journal of Hospital Infection</i> , 2018, 99, 62-67.	2.9	0
44	Does surgical site infection after Caesarean section in Polish hospitals reflect high-quality patient care or poor postdischarge surveillance? Results from a 3-year multicenter study. <i>American Journal of Infection Control</i> , 2018, 46, 20-25.	2.3	16
45	Multi-locus sequence typing (MLST) of non-fermentative Gram-negative bacilli isolated from bloodstream infections in southern Poland. <i>Folia Microbiologica</i> , 2018, 63, 191-196.	2.3	5
46	Antibiotic consumption and antimicrobial resistance in Poland; findings and implications. <i>Antimicrobial Resistance and Infection Control</i> , 2018, 7, 136.	4.1	54
47	Is Vaginal Birth without an Episiotomy a Rarity in the 21st Century? Cross-Sectional Studies in Southern Poland. <i>International Journal of Environmental Research and Public Health</i> , 2018, 15, 2462.	2.6	10
48	Hospital-Wide Surveillance of Healthcare-Associated Infections as a Source of Information about Specific Hospital Needs. A 5-Year Observation in a Multiprofile Provincial Hospital in the South of Poland. <i>International Journal of Environmental Research and Public Health</i> , 2018, 15, 1956.	2.6	14
49	Nail microbial colonization following hand disinfection: a qualitative pilot study. <i>Journal of Hospital Infection</i> , 2018, 100, 207-210.	2.9	11
50	Patient as a Partner in Healthcare-Associated Infection Prevention. <i>International Journal of Environmental Research and Public Health</i> , 2018, 15, 624.	2.6	2
51	Epidemiology of Ventilator-Associated Pneumonia, microbiological diagnostics and the length of antimicrobial treatment in the Polish Intensive Care Units in the years 2013-2015. <i>BMC Infectious Diseases</i> , 2018, 18, 308.	2.9	25
52	Polish infection control nurses – Self-assessment of their duties and professional autonomy in different types of hospitals. <i>Medycyna Pracy</i> , 2018, 69, 605-612.	0.8	2
53	Severe infections caused by multidrug-resistant non-fermentative bacilli in southern Poland. <i>Advances in Clinical and Experimental Medicine</i> , 2018, 27, 401-407.	1.4	7
54	Epidemiology of healthcare-associated infections in Polish intensive care. A multicenter study based on active surveillance. <i>Biomedical Papers of the Medical Faculty of the University Palacky&#x0301;, Olomouc, Czechoslovakia</i> , 2018, 162, 190-197.	0.6	9

#	ARTICLE	IF	CITATIONS
55	Virulence factors genes and drug resistance in <i>Pseudomonas aeruginosa</i> strains derived from different forms of community and healthcare associated infections. <i>Postepy Higieny I Medycyny Doswiadczalnej</i> , 2018, 72, 751-759.	0.1	6
56	Alarming results of nosocomial bloodstream infections surveillance in Polish intensive care units. <i>Przegląd Epidemiologiczny</i> , 2018, 72, 33-44.	0.2	12
57	Molecular analysis of meticillin-resistant <i>Staphylococcus aureus</i> strains isolated from different types of infections from patients hospitalized in 12 regional, non-teaching hospitals in southern Poland. <i>Journal of Hospital Infection</i> , 2017, 95, 259-267.	2.9	18
58	<i>Acinetobacter baumannii</i> isolated from hospital-acquired infection: biofilm production and drug susceptibility. <i>Apmis</i> , 2017, 125, 1017-1026.	2.0	31
59	Identifying the Infection Control Areas Requiring Modifications in Thoracic Surgery Units: Results of a Two-Year Surveillance of Surgical Site Infections in Hospitals in Southern Poland. <i>Surgical Infections</i> , 2017, 18, 820-826.	1.4	10
60	Virulence and antimicrobial resistance of <i>Staphylococcus aureus</i> isolated from bloodstream infections and pneumonia in Southern Poland. <i>Journal of Global Antimicrobial Resistance</i> , 2017, 11, 100-104.	2.2	13
61	Longevity and gender as the risk factors of methicillin-resistant <i>Staphylococcus aureus</i> infections in southern Poland. <i>BMC Geriatrics</i> , 2017, 17, 51.	2.7	20
62	Poor Hand Hygiene Procedure Compliance among Polish Medical Students and Physicians – The Result of an Ineffective Education Basis or the Impact of Organizational Culture?. <i>International Journal of Environmental Research and Public Health</i> , 2017, 14, 1026.	2.6	16
63	Pathogenicity of Virulent Species of Group C Streptococci in Human. <i>Canadian Journal of Infectious Diseases and Medical Microbiology</i> , 2017, 2017, 1-5.	1.9	6
64	Is the hospital environment friendly for infection control in Poland? Experience after twenty years of modern infection control. <i>Journal of Hospital Infection</i> , 2016, 94, 228-229.	2.9	6
65	Molecular Epidemiology and Drug Resistance of <i>Acinetobacter baumannii</i> Isolated from Hospitals in Southern Poland: ICU as a Risk Factor for XDR Strains. <i>Microbial Drug Resistance</i> , 2016, 22, 328-335.	2.0	36
66	Device-associated pneumonia of very low birth weight infants in Polish Neonatal Intensive Care Units. <i>Advances in Medical Sciences</i> , 2016, 61, 90-95.	2.1	7
67	Virulence Potential of <i>Staphylococcus aureus</i> Strains Isolated from Diabetic Foot Ulcers Among Patients from Southern Poland. <i>Current Vascular Pharmacology</i> , 2016, 14, 547-551.	1.7	9
68	Infections and risk-adjusted length of stay and hospital mortality in Polish Neonatology Intensive Care Units. <i>International Journal of Infectious Diseases</i> , 2015, 35, 87-92.	3.3	19
69	The High Prevalence of Plasmid-Mediated Quinolone Resistance Among Very Low Birth-Weight Infants in Poland. <i>Microbial Drug Resistance</i> , 2015, 21, 391-397.	2.0	5
70	Molecular characterization of carbapenem-resistant <i>Pseudomonas aeruginosa</i> strains isolated from patients with urinary tract infections in Southern Poland. <i>Diagnostic Microbiology and Infectious Disease</i> , 2015, 83, 295-297.	1.8	21
71	Epidemiology, antibiotic consumption and molecular characterisation of <i>Staphylococcus aureus</i> infections – data from the Polish Neonatology Surveillance Network, 2009–2012. <i>BMC Infectious Diseases</i> , 2015, 15, 169.	2.9	16
72	Virulence and Antibiotic Resistance of <i>Pseudomonas aeruginosa</i> Isolated from Patients with Urinary Tract Infections in Southern Poland. <i>Chemotherapy</i> , 2015, 60, 253-260.	1.6	8

#	ARTICLE	IF	CITATIONS
73	Infection control in Polish medical wards—data from the PROHIBIT project. <i>Przegląd Epidemiologiczny</i> , 2015, 69, 495-501, 609-13.	0.2	5
74	Necrotising Enterocolitis in Preterm Infants: Epidemiology and Antibiotic Consumption in the Polish Neonatology Network Neonatal Intensive Care Units in 2009. <i>PLoS ONE</i> , 2014, 9, e92865.	2.5	32
75	Mode of delivery and other risk factors for <i>Escherichia coli</i> infections in very low birth weight infants. <i>BMC Pediatrics</i> , 2014, 14, 274.	1.7	11
76	Late-onset bloodstream infections of Very-Low-Birth-Weight infants: data from the Polish Neonatology Surveillance Network in 2009–2011. <i>BMC Infectious Diseases</i> , 2014, 14, 339.	2.9	29
77	The general status of patients and limited physical activity as risk factors of Methicillin-resistant <i>Staphylococcus aureus</i> occurrence in long-term care facilities residents in Kraków, Poland. <i>BMC Infectious Diseases</i> , 2014, 14, 271.	2.9	14
78	Organization and scope of surveillance of infections in Polish hospitals. Results of the project prohibit. <i>Przegląd Epidemiologiczny</i> , 2014, 68, 27-32, 117-20.	0.2	3
79	Infection control: point prevalence study versus incidence study in Polish long-term care facilities in 2009–2010 in the Małopolska Region. <i>Infection</i> , 2013, 41, 1-8.	4.7	18
80	Age and other risk factors of pneumonia among residents of Polish long-term care facilities. <i>International Journal of Infectious Diseases</i> , 2013, 17, e37-e43.	3.3	22
81	Molecular epidemiology, plasmid analysis, virulence, and resistance of <i>Escherichia coli</i> isolated from neonatal intensive care units in Poland. <i>Diagnostic Microbiology and Infectious Disease</i> , 2013, 76, 542-545.	1.8	14
82	Enterobacteriaceae Infections of Very Low Birth Weight Infants in Polish Neonatal Intensive Care Units. <i>Pediatric Infectious Disease Journal</i> , 2013, 32, 594-598.	2.0	18
83	Prevalence of antibiotic resistance in multi-drug resistant coagulase-negative staphylococci isolated from invasive infection in very low birth weight neonates in two Polish NICUs. <i>Annals of Clinical Microbiology and Antimicrobials</i> , 2013, 12, 41.	3.8	31
84	Incidence of maternal GBS colonization and neonatal GBS disease among Very Low Birth Weight Polish neonates. <i>Medical Science Monitor</i> , 2013, 19, 34-39.	1.1	12
85	Molecular characterization and drug resistance of <i>Escherichia coli</i> strains isolated from urine from long-term care facility residents in Cracow, Poland. <i>Medical Science Monitor</i> , 2013, 19, 317-326.	1.1	22
86	Early-onset Infections of Very-low-birth-weight Infants in Polish Neonatal Intensive Care Units. <i>Pediatric Infectious Disease Journal</i> , 2012, 31, 691-695.	2.0	23
87	Control of an outbreak of <i>Acinetobacter baumannii</i> infections using vaporized hydrogen peroxide. <i>Journal of Hospital Infection</i> , 2012, 81, 239-245.	2.9	58
88	Factors influencing the occurrence of nosocomial bloodstream infections observed in thoracic and cardiothoracic postoperative care units. <i>Anaesthesiology Intensive Therapy</i> , 2012, 44, 16-20.	1.0	4
89	The risk related to surgical site infections after hip endoarthroplasty—surveillance outcome analysis in two Polish orthopaedic centres. <i>Ortopedia Traumatologia Rehabilitacja</i> , 2009, 11, 253-63.	0.3	8
90	Comparison of SSI Rates in Endoarthroplasty of Hip and Knee in a Cracow Patient Population and the Importance of Postdischarge Surveillance. <i>Infection</i> , 2008, 36, 36-40.	4.7	19

#	ARTICLE	IF	CITATIONS
91	Hospital-Acquired Pneumonia in the Intensive Care Units of Polish Hospitals. Infection Control and Hospital Epidemiology, 2006, 27, 784-786.	1.8	10
92	Hospital-Acquired Pneumonia in the Intensive Care Units of Polish Hospitals. Infection Control and Hospital Epidemiology, 2006, 27, 784-786.	1.8	5
93	Epidemiological and microbiological surveillance of surgical site infections in orthopedic unit. Ortopedia Traumatologia Rehabilitacja, 2006, 8, 639-45.	0.3	5
