#	ARTICLE	IF	CITATIONS
1	Dust-acoustic solitary waves and double layers in dusty plasma with variable dust charge and two-temperature ions. <i>Physics of Plasmas</i> , 1999, 6, 3808-3816.	1.9	109
2	Effects of laser pulse shape and carrier envelope phase on pair production. <i>Physics Letters, Section B: Nuclear, Elementary Particle and High-Energy Physics</i> , 2013, 726, 820-826.	4.1	53
3	Dust acoustic waves in strongly coupled dissipative plasmas. <i>Physical Review E</i> , 2000, 62, 8501-8507.	2.1	35
4	Enhanced pair production in strong fields by multiple-slit interference effect with dynamically assisted Schwinger mechanism. <i>Physical Review D</i> , 2014, 89, .	4.7	34
5	Enhanced electron-positron pair creation by dynamically assisted combinational fields. <i>Physics Letters, Section B: Nuclear, Elementary Particle and High-Energy Physics</i> , 2012, 717, 465-469.	4.1	33
6	Pair production in differently polarized electric fields with frequency chirps. <i>Physical Review D</i> , 2019, 99, .	4.7	32
7	Momentum Vortices on Pairs Production by Two Counter-Rotating Fields. <i>Physical Review D</i> , 2017, 96, .	4.7	28
8	Electron-positron pair creation and correlation between momentum and energy level in a symmetric potential well. <i>Physical Review A</i> , 2013, 88, .	2.5	27
9	Effects of electric field polarizations on pair production. <i>Physical Review D</i> , 2015, 92, .	4.7	26
10	Electron-Positron Pair Production in an Elliptic Polarized Time Varying Field. <i>Chinese Physics Letters</i> , 2012, 29, 021102.	3.3	25
11	QED cascade induced by a high-energy $\gamma$ photon in a strong laser field. <i>Physical Review A</i> , 2014, 89, .	2.5	25
12	Multipeak solitons and nonlinear modulated solutions in plasma under relativistic electromagnetic field. <i>Physics of Plasmas</i> , 2006, 13, 074504.	1.9	23
13	Numerically optimized structures for dielectric asymmetric dual-grating laser accelerators. <i>Physics of Plasmas</i> , 2014, 21, 023110.	1.9	23
14	Solitary waves of laser pulse in a plasma channel. <i>Physics of Plasmas</i> , 2011, 18, 033104.	1.9	21
15	Dust shielding and correlation function for dusty plasmas. <i>Physics of Plasmas</i> , 1999, 6, 2997-3001.	1.9	20
16	Dust-acoustic waves in strongly coupled plasmas with variable dust charge. <i>Physics of Plasmas</i> , 2000, 7, 3137-3140.	1.9	20
17	Multiple-slit interference effect in the time domain for boson pair production. <i>Physical Review D</i> , 2014, 89, .	4.7	19
18	Effects of finite spatial extent on Schwinger pair production. <i>Physical Review D</i> , 2019, 100, .	4.7	19

#	ARTICLE	IF	CITATIONS
19	Enhanced electron-positron pair production by frequency chirping in one- and two-color laser pulse fields. Chinese Physics B, 2017, 26, 020301.	1.4	18
20	Energetic collimated ion bunch generation from an ultraintense laser interacting with thin concave targets. Physics of Plasmas, 2008, 15, 063104.	1.9	16
21	Electron trajectories and betatron oscillation in the wake bubble in laser-plasma interaction. Physics of Plasmas, 2009, 16, .	1.9	15
22	High quality ion acceleration from a double-layer target dominated by the radiation pressure of a transversely Gaussian laser pulse. Physics of Plasmas, 2010, 17, 103107.	1.9	15
23	Effects of ion mobility and positron fraction on solitary waves in weak relativistic electron-positron-ion plasma. Physical Review E, 2013, 88, 033109.	2.1	15
24	Modulation effect in multiphoton pair production. Physics Letters, Section B: Nuclear, Elementary Particle and High-Energy Physics, 2017, 768, 174-179.	4.1	15
25	Photon emission by bremsstrahlung and nonlinear Compton scattering in the interaction of ultraintense laser with plasmas. European Physical Journal D, 2017, 71, 1.	1.3	15
26	Steady bifurcation and solitons in relativistic laser plasmas interaction. Chaos, Solitons and Fractals, 2005, 25, 1161-1167.	5.1	14
27	Electron-positron pair production in frequency modulated laser fields. Physical Review D, 2020, 101, .	4.7	14
28	Asymmetric pulse effects on pair production in polarized electric fields. High Power Laser Science and Engineering, 0, 8, .	4.6	14
29	Optimum Effect of Asymmetric Laser Pulse Shape on Relativistic Laser-Plasma Wake Field. Physica Scripta, 2002, 65, 444-446.	2.5	12
30	Low frequency modes in strongly coupled magnetized dusty plasmas. Physics of Plasmas, 2004, 11, 3519-3524.	1.9	12
31	Electron acceleration by intense short laser pulse in the preplasma of a target. Physics of Plasmas, 2009, 16, 083104.	1.9	12
32	Chirp effects on pair production in oscillating electric fields with spatial inhomogeneity. Physics Letters, Section B: Nuclear, Elementary Particle and High-Energy Physics, 2020, 810, 135815.	4.1	12
33	Schwinger pair production in inhomogeneous electric fields with symmetrical frequency chirp. Physical Review D, 2021, 104, .	4.7	12
34	Heat conduction in a one-dimensional Yukawa chain. Europhysics Letters, 2005, 69, 358-364.	2.0	11
35	Energetic protons from an ultraintense laser interacting with a symmetric parabolic concave target. Physics of Plasmas, 2013, 20, 033112.	1.9	11
36	Pair production by three fields dynamically assisted Schwinger process. Physics Letters, Section B: Nuclear, Elementary Particle and High-Energy Physics, 2018, 777, 406-411.	4.1	11

#	ARTICLE	IF	CITATIONS
37	Boson pair production in arbitrarily polarized electric fields. <i>Physical Review D</i> , 2019, 100, .	4.7	11
38	Electron-positron pair production in an oscillating Sauter potential. <i>Physical Review A</i> , 2019, 100, .	2.5	11
39	Dynamically assisted pair production for various polarizations. <i>Physics Letters, Section B: Nuclear, Elementary Particle and High-Energy Physics</i> , 2020, 802, 135259.	4.1	11
40	Nonlinear laser-driven electron resonance acceleration in an inhomogeneous magnetic field. <i>Applied Physics Letters</i> , 2009, 95, .	3.3	10
41	Enhanced electron-positron pair creation by the frequency chirped laser pulse. <i>Chinese Physics B</i> , 2013, 22, 100307.	1.4	10
42	Scale invariance and scaling law of Thomson backscatter spectra of electrons moving in the resonance regime in combined laser and magnetic fields. <i>Physical Review A</i> , 2016, 94, .	2.5	10
43	Enhanced dynamically assisted pair production in spatial inhomogeneous electric fields with the frequency chirping. <i>Physical Review D</i> , 2021, 104, .	4.7	10
44	On existence of solitary waves in unmagnetized neutral hot pair plasma. <i>Physics of Plasmas</i> , 2013, 20, 112109.	1.9	9
45	Relativistic laser pulse compression in magnetized plasmas. <i>Physics of Plasmas</i> , 2015, 22, .	1.9	9
46	Nonperturbative signatures in pair production for general elliptic polarization fields. <i>Europhysics Letters</i> , 2015, 110, 51001.	2.0	9
47	Thomson backscattering in combined fields with a general elliptical polarization. <i>Europhysics Letters</i> , 2017, 117, 44002.	2.0	9
48	Electron acceleration in vacuum by subcycle laser pulse. <i>Physics of Plasmas</i> , 2008, 15, 023108.	1.9	8
49	Energy enhancement of proton acceleration in combinational radiation pressure and bubble by optimizing plasma density. <i>Physics of Plasmas</i> , 2012, 19, .	1.9	8
50	Enhanced Electron-Positron Pair Production of a Vacuum in a Strong Laser Pulse Field by Frequency Variation. <i>Chinese Physics Letters</i> , 2013, 30, 071201.	3.3	8
51	Electron-positron pair production in a strong asymmetric laser electric field. <i>Frontiers of Physics</i> , 2014, 9, 157-163.	5.0	8
52	Vortices in multiphoton pair production by two-color rotating laser fields. <i>Journal of Physics B: Atomic, Molecular and Optical Physics</i> , 2019, 52, 025601.	1.5	7
53	Modulational instability of short-wavelength ion waves in strongly coupled dusty plasmas. <i>Physical Review E</i> , 2002, 65, 027401.	2.1	6
54	Electron injection and acceleration in the plasma bubble regime driven by an ultraintense laser pulse combined with using dense-plasma wall and block. <i>Physics of Plasmas</i> , 2012, 19, .	1.9	6

#	ARTICLE	IF	CITATIONS
55	Solitary and shock waves in magnetized electron-positron plasma. <i>Physics of Plasmas</i> , 2014, 21, 022108.	1.9	6
56	Spectrum of electromagnetic solitons in relativistic plasma. <i>Physica Scripta</i> , 2006, 74, 638-641.	2.5	5
57	Allowable propagation of short pulse laser beam in a plasma channel and electromagnetic solitary waves. <i>Physics Letters, Section A: General, Atomic and Solid State Physics</i> , 2011, 375, 4022-4028.	2.1	5
58	Analytical Study of Pair Production Rate from Vacuum in an Elliptic Polarized Field by a Two-Level Transition Technique. <i>Communications in Theoretical Physics</i> , 2012, 57, 422-426.	2.5	5
59	Electron-Positron Pair Creation from Vacuum by using Negative Frequency Chirping Laser Pulses. <i>Chinese Physics Letters</i> , 2013, 30, 111201.	3.3	5
60	Effect of symmetrical frequency chirp on pair production*. <i>Chinese Physics B</i> , 2021, 30, 060204.	1.4	5
61	High quality ion acceleration through the interaction of two matched counterpropagating transversely polarized Gaussian lasers with a flat foil target. <i>Physical Review Accelerators and Beams</i> , 2018, 21, .	1.6	5
62	IONIZATION OF Na2 BY HIGHLY CHARGED PARTICLES. <i>International Journal of Modern Physics B</i> , 2005, 19, 2886-2891.	2.0	4
63	Solitary waves in asymmetric electron-positron-ion plasmas. <i>Journal of Plasma Physics</i> , 2015, 81, .	2.1	4
64	Electron-positron pair production in the low-density approximation. <i>Frontiers of Physics</i> , 2015, 10, 1-7.	5.0	4
65	Guiding and collimating the fast electrons by using a low-density-core target with buried high density layers. <i>Plasma Physics and Controlled Fusion</i> , 2017, 59, 025006.	2.1	4
66	Effect of the electron heating transition on the proton acceleration in a strongly magnetized plasma. <i>Physics of Plasmas</i> , 2019, 26, 103101.	1.9	4
67	Noise driven configuration of dust clusters by molecular dynamics simulation. <i>Physics of Plasmas</i> , 2002, 9, 4851-4855.	1.9	3
68	Electrons trajectories around a bubble regime in intense laser plasma interaction. <i>Physics of Plasmas</i> , 2013, 20, .	1.9	3
69	Enhanced laser radiation pressure acceleration of protons with a gold cone-capillary. <i>Physics of Plasmas</i> , 2017, 24, 033122.	1.9	3
70	Spatial Characteristics of Thomson Scattering Spectra in Laser and Magnetic Fields. <i>Chinese Physics Letters</i> , 2019, 36, 074101.	3.3	3
71	Schwinger pair production correction in thermal system. <i>Physical Review D</i> , 2019, 100, .	4.7	3
72	Ultrabright $\hat{\nu}^3$ -ray emission from the interaction of an intense laser pulse with a near-critical-density plasma. <i>Chinese Physics B</i> , 0, , .	1.4	3

#	ARTICLE	IF	CITATIONS
73	Efficient proton acceleration and focusing by an ultraintense laser interacting with a parabolic double concave target with an extended rear. <i>Physics of Plasmas</i> , 2013, 20, .	1.9	2
74	Dynamically assisted pair production for scalar QED by two fields. <i>Frontiers of Physics</i> , 2015, 10, 155-160.	5.0	2
75	Delicate scale multipeak and flat-top structures of solitary waves in multi-component plasmas. <i>Plasma Science and Technology</i> , 2017, 19, 035002.	1.5	2
76	Electron-Positron Pair Production in Strong Fields Characterized by Conversion Energy. <i>Communications in Theoretical Physics</i> , 2017, 67, 76.	2.5	2
77	Pair production in strong SU(2) background fields. <i>Frontiers of Physics</i> , 2017, 12, 1.	5.0	2
78	Analytical Thomson backscattering spectra and new scaling laws in laser and magnetic fields. <i>Europhysics Letters</i> , 2019, 127, 54001.	2.0	2
79	Simulation Study of a Bright Attosecond $\hat{\gamma}$ -ray Source Generation by Irradiating an Intense Laser on a Cone Target. <i>Applied Sciences (Switzerland)</i> , 2022, 12, 4361.	2.5	2
80	Nonlinear instabilities in plasma with highly correlated dust grains. <i>Physics of Plasmas</i> , 2002, 9, 717-720.	1.9	1
81	Solitons in relativistic laser-plasma interactions. <i>Frontiers of Physics in China</i> , 2007, 2, 178-185.	1.0	1
82	Enhanced photon emission and pair production in laser-irradiated plasmas. <i>Plasma Science and Technology</i> , 2017, 19, 075201.	1.5	1
83	Accelerating and guiding of C6+ by an intense laser irradiating on a foil target with a tapered channel. <i>Physics of Plasmas</i> , 2017, 24, 083114.	1.9	1
84	High density $\hat{\gamma}$ -ray emission and dense positron production via multi-laser driven circular target. <i>Plasma Science and Technology</i> , 2019, 21, 085201.	1.5	1
85	Pair production in asymmetric Sauter potential well. <i>Physica Scripta</i> , 2021, 96, 055305.	2.5	1
86	Thomson backscattering in combined uniform magnetic and envelope modulating circularly polarized laser fields. <i>Journal of the Optical Society of America B: Optical Physics</i> , 2019, 36, 1835.	2.1	1
87	Effect of dust-charge variation on ion-wave decay interaction in dusty plasma. <i>IEEE Transactions on Plasma Science</i> , 2002, 30, 1384-1386.	1.3	0
88	Enhanced Correlation of Electron-Positron Pair in Two and Three Dimensions. <i>Chinese Physics Letters</i> , 2014, 31, 011203.	3.3	0
89	Studies on convergence and scaling law of Thomson backscattering spectra in strong fields. <i>Chinese Physics B</i> , 2017, 26, 124101.	1.4	0
90	Transverse magnetic field effect on the transport of relativistic electrons beam in laser irradiating plasmas. <i>Physics of Plasmas</i> , 2017, 24, .	1.9	0
