#	ARTICLE	IF	CITATIONS
1	Bile Acids Are Important Contributors to AKI Associated with Liver Disease: PRO. <i>Kidney360</i> , 2022, 3, 17-20.	2.1	3
2	A novel score predicts mortality after transjugular intrahepatic portosystemic shunt: MOTS â€• Modified TIPS Score. <i>Liver International</i> , 2022, 42, 1849-1860.	3.9	10
3	Acute Liver Failure after Ingestion of Fried Rice Balls: A Case Series of <i>Bacillus cereus</i> Food Poisonings. <i>Toxins</i> , 2022, 14, 12.	3.4	16
4	Liver Fibrosisâ€•4 index indicates atrial fibrillation in acute ischemic stroke. <i>European Journal of Neurology</i> , 2022, 29, 2283-2288.	3.3	5
5	Regulation of autophagy by bile acids and in cholestasis - CholestoPHAGY or CholeSTOPagy. <i>Biochimica Et Biophysica Acta - Molecular Basis of Disease</i> , 2021, 1867, 166017.	3.8	16
6	Non-invasive markers of liver fibrosis and outcome in large vessel occlusion stroke. <i>Therapeutic Advances in Neurological Disorders</i> , 2021, 14, 175628642110372.	3.5	19
7	Secondary (iso)BAs cooperate with endogenous ligands to activate FXR under physiological and pathological conditions. <i>Biochimica Et Biophysica Acta - Molecular Basis of Disease</i> , 2021, 1867, 166153.	3.8	5
8	Downregulation of TGR5 (GPBAR1) in biliary epithelial cells contributes to the pathogenesis of sclerosing cholangitis. <i>Journal of Hepatology</i> , 2021, 75, 634-646.	3.7	51
9	Impaired Bile Acid Metabolism and Gut Dysbiosis in Mice Lacking Lysosomal Acid Lipase. <i>Cells</i> , 2021, 10, 2619.	4.1	8
10	Clinical-Pathological Conference Series from the Medical University of Graz. <i>Wiener Klinische Wochenschrift</i> , 2021, 133, 515-522.	1.9	0
11	Hypercortisolism in patients with cholestasis is associated with disease severity. <i>BMC Gastroenterology</i> , 2021, 21, 460.	2.0	3
12	Drug Therapies for Chronic Cholestatic Liver Diseases. <i>Annual Review of Pharmacology and Toxicology</i> , 2020, 60, 503-527.	9.4	44
13	Cholemic Nephropathy Reloaded. <i>Seminars in Liver Disease</i> , 2020, 40, 091-100.	3.6	19
14	Histological demonstration of BSEP/ABCB11 inhibition in transient neonatal cholestasis: a case report. <i>BMC Pediatrics</i> , 2020, 20, 340.	1.7	3
15	Secondary Sclerosing Cholangitis in Critically Ill Patients Alters the Gutâ€•Liver Axis: A Case Control Study. <i>Nutrients</i> , 2020, 12, 2728.	4.1	5
16	Clinical-Pathological Conference Series from the Medical University of Graz. <i>Wiener Klinische Wochenschrift</i> , 2020, 132, 551-559.	1.9	0
17	Changes in the Intestinal Microbiome during a Multispecies Probiotic Intervention in Compensated Cirrhosis. <i>Nutrients</i> , 2020, 12, 1874.	4.1	25
18	FXR-dependent Rubicon induction impairs autophagy in models of human cholestasis. <i>Journal of Hepatology</i> , 2020, 72, 1122-1131.	3.7	47

#	ARTICLE	IF	CITATIONS
19	Norursodeoxycholic acid versus placebo in the treatment of non-alcoholic fatty liver disease: a double-blind, randomised, placebo-controlled, phase 2 dose-finding trial. The Lancet Gastroenterology and Hepatology, 2019, 4, 781-793.	8.1	58
20	Biomarkers for oralization during long-term proton pump inhibitor therapy predict survival in cirrhosis. Scientific Reports, 2019, 9, 12000.	3.3	53
21	Bile acids increase steroidogenesis in cholemic mice and induce cortisol secretion in adrenocortical H295R cells via S1<sc>PR</sc>2, <sc>ERK</sc> and <sc>SF</sc>. Liver International, 2019, 39, 2112-2123.	3.9	12
22	Obeticholic acid may increase the risk of gallstone formation in susceptible patients. Journal of Hepatology, 2019, 71, 986-991.	3.7	44
23	A novel way to avoid reoperation for biliary strictures after liver transplantation: cholangioscopy-assisted guidewire placement. Endoscopy, 2019, 51, E314-E316.	1.8	5
24	Metabolic disease and ABHD6 alter the circulating bis(monoacylglycerol)phosphate profile in mice and humans. Journal of Lipid Research, 2019, 60, 1020-1031.	4.2	25
25	Preface - Animal models in liver disease. Biochimica Et Biophysica Acta - Molecular Basis of Disease, 2019, 1865, 867-868.	3.8	1
26	Gut pathobionts as triggers for liver diseases. Nature Microbiology, 2019, 4, 380-381.	13.3	1
27	Future Medical Treatment of PSC. Current Hepatology Reports, 2019, 18, 96-106.	0.9	6
28	Chronic gastric ulcer disease complicating selective internal radiation therapy (SIRT) in a patient with cholangiocellular carcinoma. Zeitschrift Fur Gastroenterologie, 2019, 57, 1304-1308.	0.5	4
29	Bile acids and glucocorticoid metabolism in health and disease. Biochimica Et Biophysica Acta - Molecular Basis of Disease, 2019, 1865, 243-251.	3.8	18
30	Pharmacologic IL-6RÎ± inhibition in cholangiocarcinoma promotes cancer cell growth and survival. Biochimica Et Biophysica Acta - Molecular Basis of Disease, 2019, 1865, 308-321.	3.8	11
31	Is This the Last Requiem for Simtuzumab?. Hepatology, 2019, 69, 476-479.	7.3	15
32	Case of nasogastric tube dysfunction. Gut, 2019, 68, 206-262.	12.1	1
33	To salt or not to salt?â€”That is the question in cirrhosis. Liver International, 2018, 38, 1148-1159.	3.9	27
34	Lysyl oxidase-like protein 2 (LOXL2) modulates barrier function in cholangiocytes in cholestasis. Journal of Hepatology, 2018, 69, 368-377.	3.7	27
35	Genetic loss of the muscarinic M₃ receptor markedly alters bile formation and cholestatic liver injury in mice. Hepatology Research, 2018, 48, E68-E77.	3.4	10
36	Cholemic nephropathy â€” Historical notes and novel perspectives. Biochimica Et Biophysica Acta - Molecular Basis of Disease, 2018, 1864, 1356-1366.	3.8	39

#	ARTICLE	IF	CITATIONS
37	Calnexin Depletion by Endoplasmic Reticulum Stress During Cholestasis Inhibits the Na ⁺ /Taurocholate Cotransporting Polypeptide. <i>Hepatology Communications</i> , 2018, 2, 1550-1566.	4.3	13
38	NorUDCA promotes degradation of Δ 1-antitrypsin mutant Z protein by inducing autophagy through AMPK/ULK1 pathway. <i>PLoS ONE</i> , 2018, 13, e0200897.	2.5	27
39	Clinical-Pathological Conference Series from the Medical University of Graz. <i>Wiener Klinische Wochenschrift</i> , 2018, 130, 545-556.	1.9	0
40	Time for the dawn of multimodal therapies and the dusk for mono-therapeutic trials for cholestatic liver diseases?. <i>Liver International</i> , 2018, 38, 991-994.	3.9	5
41	NorUrsodeoxycholic acid ameliorates cholemic nephropathy in bile duct ligated mice. <i>Journal of Hepatology</i> , 2017, 67, 110-119.	3.7	44
42	Role of endoscopy in primary sclerosing cholangitis: European Society of Gastrointestinal Endoscopy (ESGE) and European Association for the Study of the Liver (EASL) Clinical Guideline. <i>Journal of Hepatology</i> , 2017, 66, 1265-1281.	3.7	87
43	Role of endoscopy in primary sclerosing cholangitis: European Society of Gastrointestinal Endoscopy (ESGE) and European Association for the Study of the Liver (EASL) Clinical Guideline. <i>Endoscopy</i> , 2017, 49, 588-608.	1.8	154
44	Animal Models of Biliary Disease: Current Approaches and Limitations. , 2017, , 63-84.		0
45	norUrsodeoxycholic acid improves cholestasis in primary sclerosing cholangitis. <i>Journal of Hepatology</i> , 2017, 67, 549-558.	3.7	202
46	Austrian consensus guidelines on the management and treatment of portal hypertension (Billroth-III). <i>Wiener Klinische Wochenschrift</i> , 2017, 129, 135-158.	1.9	111
47	Biliary bile acids in hepatobiliary injury – What is the link?. <i>Journal of Hepatology</i> , 2017, 67, 619-631.	3.7	141
48	New liver cancer biomarkers: PI3K/AKT/mTOR pathway members and eukaryotic translation initiation factors. <i>European Journal of Cancer</i> , 2017, 83, 56-70.	2.8	82
49	NOD2 gene variants confer risk for secondary sclerosing cholangitis in critically ill patients. <i>Scientific Reports</i> , 2017, 7, 7026.	3.3	9
50	Niacin-Associated Acute Hepatotoxicity Leading to Emergency Liver Transplantation. <i>American Journal of Gastroenterology</i> , 2017, 112, 1345-1346.	0.4	10
51	Structural and functional differences in gut microbiome composition in patients undergoing haemodialysis or peritoneal dialysis. <i>Scientific Reports</i> , 2017, 7, 15601.	3.3	59
52	Life-threatening sinusoidal obstruction syndrome after high-dose chemotherapy linked to compound heterozygous mutations in <i>ABCB11</i> . <i>Pediatric Blood and Cancer</i> , 2017, 64, e26666.	1.5	1
53	Bad memories from the gut may cause nightmares for the bile ducts. <i>Journal of Hepatology</i> , 2017, 66, 5-7.	3.7	2
54	Separation of low and high grade colon and rectum carcinoma by eukaryotic translation initiation factors 1, 5 and 6. <i>Oncotarget</i> , 2017, 8, 101224-101243.	1.8	34

#	ARTICLE	IF	CITATIONS
55	Secretin and cholestasis, two sides of a coin. <i>Hepatology</i> , 2016, 64, 714-716.	7.3	0
56	Autophagy induced by exogenous bile acids is therapeutic in a model of Î±1-AT deficiency liver disease. <i>American Journal of Physiology - Renal Physiology</i> , 2016, 311, G156-G165.	3.4	27
57	Reply. <i>Hepatology</i> , 2016, 63, 346-347.	7.3	1
58	Indications for liver transplantation in adults. <i>Wiener Klinische Wochenschrift</i> , 2016, 128, 679-690.	1.9	39
59	Inhibition of intestinal bile acid absorption improves cholestatic liver and bile duct injury in a mouse model of sclerosing cholangitis. <i>Journal of Hepatology</i> , 2016, 64, 674-681.	3.7	143
60	Lysosomal Acid Lipase Hydrolyzes Retinyl Ester and Affects Retinoid Turnover. <i>Journal of Biological Chemistry</i> , 2016, 291, 17977-17987.	3.4	40
61	Role of interleukin-1 and its antagonism of hepatic stellate cell proliferation and liver fibrosis in the Abcb4 ^{-/-} mouse model. <i>World Journal of Hepatology</i> , 2016, 8, 401.	2.0	40
62	The chronic kidney disease epidemiology collaboration equation combining creatinine and cystatin C accurately assesses renal function in patients with cirrhosis. <i>BMC Nephrology</i> , 2015, 16, 196.	1.8	30
63	Loss of keratin 19 favours the development of cholestatic liver disease through decreased ductular reaction. <i>Journal of Pathology</i> , 2015, 237, 343-354.	4.5	24
64	<i>Lactobacillus casei</i> Shirota Supplementation Does Not Restore Gut Microbiota Composition and Gut Barrier in Metabolic Syndrome: A Randomized Pilot Study. <i>PLoS ONE</i> , 2015, 10, e0141399.	2.5	45
65	24-nor-ursodeoxycholic acid ameliorates inflammatory response and liver fibrosis in a murine model of hepatic schistosomiasis. <i>Journal of Hepatology</i> , 2015, 62, 871-878.	3.7	55
66	Clinical "Pathological Conference Series from the Medical University of Graz. <i>Wiener Klinische Wochenschrift</i> , 2015, 127, 151-159.	1.9	4
67	Bile Acid-Induced Cholemic Nephropathy. <i>Digestive Diseases</i> , 2015, 33, 367-375.	1.9	48
68	Potential of α -MCD and α -MCD- α -MCD-Ursodeoxycholic Acid in Cholestatic and Metabolic Disorders. <i>Digestive Diseases</i> , 2015, 33, 433-439.	1.9	38
69	Emergency Double-Stenting and Surgery for the Successful Management of Massive Upper Gastrointestinal Bleeding Caused by Mycotic Aortic Aneurysm. <i>Clinical Gastroenterology and Hepatology</i> , 2015, 13, e171-e172.	4.4	0
70	Serum alkaline phosphatase levels accurately reflect cholestasis in mice. <i>Hepatology</i> , 2015, 62, 981-983.	7.3	20
71	Animal Models in Primary Biliary Cirrhosis and Primary Sclerosing Cholangitis. <i>Clinical Reviews in Allergy and Immunology</i> , 2015, 48, 207-217.	6.5	42
72	Inflammatory Bowel Disease Alters Intestinal Bile Acid Transporter Expression. <i>Drug Metabolism and Disposition</i> , 2014, 42, 1423-1431.	3.3	70

#	ARTICLE	IF	CITATIONS
73	Alterations of Canalicular ATP-Binding Cassette Transporter Expression in Drug-Induced Liver Injury. <i>Digestion</i> , 2014, 90, 81-88.	2.3	19
74	Osteopontin is an initial mediator of inflammation and liver injury during obstructive cholestasis after bile duct ligation in mice. <i>Toxicology Letters</i> , 2014, 224, 186-195.	0.8	52
75	Chronic cholestatic liver diseases: Clues from histopathology for pathogenesis. <i>Molecular Aspects of Medicine</i> , 2014, 37, 35-56.	6.4	37
76	Vitamin D modulates biliary fibrosis in ABCB4-deficient mice. <i>Hepatology International</i> , 2014, 8, 443-452.	4.2	32
77	Time to say goodbye to the drug or the model? “Why do drugs fail to live up to their promise in bile duct ligated mice?”. <i>Journal of Hepatology</i> , 2014, 60, 12-15.	3.7	5
78	Molecular pathogenesis of chronic cholestatic liver disease: Impact on novel therapeutic approaches. <i>Molecular Aspects of Medicine</i> , 2014, 37, 1-2.	6.4	6
79	Characterization of animal models for primary sclerosing cholangitis (PSC). <i>Journal of Hepatology</i> , 2014, 60, 1290-1303.	3.7	129
80	Lithocholic acid feeding results in direct hepato-toxicity independent of neutrophil function in mice. <i>Toxicology Letters</i> , 2014, 228, 56-66.	0.8	81
81	Differential effects of norUDCA and UDCA in obstructive cholestasis in mice. <i>Journal of Hepatology</i> , 2013, 58, 1201-1208.	3.7	84
82	Animal Models of Cholestasis. , 2013, , 331-349.		3
83	PDX-1/Hes-1 interactions determine cholangiocyte proliferative response to injury in rodents: Possible implications for sclerosing cholangitis. <i>Journal of Hepatology</i> , 2013, 58, 750-756.	3.7	24
84	Bile Acids as Modulators of Gut Microbiota Linking Dietary Habits and Inflammatory Bowel Disease: A Potentially Dangerous Liaison. <i>Gastroenterology</i> , 2013, 144, 844-846.	1.3	13
85	Pleuro-Pulmonary Nocardiosis as Opportunistic Infection in a Patient with Chronic Hepatitis C under Combination Treatment with Pegylated Interferon, Ribavirin, and Boceprevir. <i>Case Reports in Hepatology</i> , 2013, 2013, 1-4.	0.7	1
86	Bile acids trigger cholemic nephropathy in common bile-duct-ligated mice. <i>Hepatology</i> , 2013, 58, 2056-2069.	7.3	130
87	Sulphatation Does Not Appear to Be a Protective Mechanism to Prevent Oxysterol Accumulation in Humans and Mice. <i>PLoS ONE</i> , 2013, 8, e68031.	2.5	5
88	Evolving concepts in primary sclerosing cholangitis. <i>Liver International</i> , 2012, 32, 352-369.	3.9	25
89	Genetic background effects of keratin 8 and 18 in a DDC-induced hepatotoxicity and Mallory-Denk body formation mouse model. <i>Laboratory Investigation</i> , 2012, 92, 857-867.	3.7	38
90	Alterations in Lipid Metabolism Mediate Inflammation, Fibrosis, and Proliferation in a Mouse Model of Chronic Cholestatic Liver Injury. <i>Gastroenterology</i> , 2012, 142, 140-151.e12.	1.3	139

#	ARTICLE	IF	CITATIONS
91	Primary Sclerosing Cholangitis: New Approaches to Diagnosis, Surveillance and Treatment. Digestive Diseases, 2012, 30, 39-47.	1.9	26
92	Combined Rifampicin and Ursodeoxycholic Acid Treatment Does Not Amplify Rifampicin Effects on Hepatic Detoxification and Transport Systems in Humans. Digestion, 2012, 86, 244-249.	2.3	6
93	Hepatobiliary transporter expression and postoperative jaundice in patients undergoing partial hepatectomy. Liver International, 2012, 32, 119-127.	3.9	6
94	Will we ever model PSC? â€œ It's hard to be a PSC model!â€ Clinics and Research in Hepatology and Gastroenterology, 2011, 35, 792-804.	1.5	56
95	Pathogenesis of primary sclerosing cholangitis. Bailliere's Best Practice and Research in Clinical Gastroenterology, 2011, 25, 727-739.	2.4	104
96	Mycosis as a Cause of Secondary Sclerosing Cholangitis Requiring Liver Retransplantation. Transplantation, 2011, 91, e14-e16.	1.0	2
97	Dual farnesoid X receptor/TGR5 agonist INT-767 reduces liver injury in the <i>Mdr2</i> ^{-/-} (<i>Abcb4</i> ^{-/-}) mouse cholangiopathy model by promoting biliary HCO ₃ ⁻ output. Hepatology, 2011, 54, 1303-1312.	7.3	193
98	Targeting Nuclear Bile Acid Receptors for Liver Disease. Digestive Diseases, 2011, 29, 98-102.	1.9	24
99	Ursodeoxycholic Acid for Treatment of Fatty Liver Disease and Dyslipidemia in Morbidly Obese Patients. Digestive Diseases, 2011, 29, 117-118.	1.9	8
100	Hepatobiliäre Funktionsstörungen und Leberversagen. , 2011, , 567-578.		0
101	Conjugation is essential for the anticholestatic effect of NorUrsodeoxycholic acid in taurolithocholic acid-induced cholestasis in rat liver. Hepatology, 2010, 52, 1758-1768.	7.3	36
102	The role of osteopontin and tumor necrosis factor alpha receptor-1 in xenobiotic-induced cholangitis and biliary fibrosis in mice. Laboratory Investigation, 2010, 90, 844-852.	3.7	38
103	Curcumin improves sclerosing cholangitis in <i>Mdr2</i> ^{-/-} mice by inhibition of cholangiocyte inflammatory response and portal myofibroblast proliferation. Gut, 2010, 59, 521-530.	12.1	83
104	New Insights into Autoimmune Cholangitis through Animal Models. Digestive Diseases, 2010, 28, 99-104.	1.9	28
105	Signal Transducer and Activator of Transcription 3 Protects From Liver Injury and Fibrosis in a Mouse Model of Sclerosing Cholangitis. Gastroenterology, 2010, 138, 2499-2508.	1.3	71
106	Bile Acids as Regulators of Hepatic Lipid and Glucose Metabolism. Digestive Diseases, 2010, 28, 220-224.	1.9	254
107	Side chain structure determines unique physiologic and therapeutic properties of norursodeoxycholic acid in <i>Mdr2</i> ^{-/-} mice. Hepatology, 2009, 49, 1972-1981.	7.3	135
108	The role of the hepatocyte cytokeratin network in bile formation and resistance to bile acid challenge and cholestasis in mice. Hepatology, 2009, 50, 893-899.	7.3	10

#	ARTICLE	IF	CITATIONS
109	Imbalance of pro- and antifibrogenic genes and bile duct injury in murine <i>Schistosoma mansoni</i> infection-induced liver fibrosis. <i>Tropical Medicine and International Health</i> , 2009, 14, 1418-1425.	2.3	13
110	Impact of experimental colitis on hepatobiliary transporter expression and bile duct injury in mice. <i>Liver International</i> , 2009, 29, 1316-1325.	3.9	31
111	When lightning strikes twice: The plot thickens for a dual role of the anion exchanger 2 (AE2/SLC4A2) in the pathogenesis and treatment of primary biliary cirrhosis. <i>Journal of Hepatology</i> , 2009, 50, 633-635.	3.7	13
112	Farnesoid X Receptor Critically Determines the Fibrotic Response in Mice but Is Expressed to a Low Extent in Human Hepatic Stellate Cells and Periductal Myofibroblasts. <i>American Journal of Pathology</i> , 2009, 175, 2392-2405.	3.8	154
113	Lessons from the toxic bile concept for the pathogenesis and treatment of cholestatic liver diseases. <i>Wiener Medizinische Wochenschrift</i> , 2008, 158, 542-548.	1.1	102
114	Role of hepatic phospholipids in development of liver injury in <i>Mdr2</i> (<i>Abcb4</i>) knockout mice. <i>Liver International</i> , 2008, 28, 948-958.	3.9	23
115	<i>MDR3</i> (<i>ABCB4</i>) Defects: A Paradigm for the Genetics of Adult Cholestatic Syndromes. <i>Seminars in Liver Disease</i> , 2007, 27, 077-098.	3.6	188
116	Hepatobiliary Transporter Expression in Intercellular Adhesion Molecule 1 Knockout and Fas Receptor-Deficient Mice after Common Bile Duct Ligation Is Independent of the Degree of Inflammation and Oxidative Stress. <i>Drug Metabolism and Disposition</i> , 2007, 35, 1694-1699.	3.3	12
117	A New Xenobiotic-Induced Mouse Model of Sclerosing Cholangitis and Biliary Fibrosis. <i>American Journal of Pathology</i> , 2007, 171, 525-536.	3.8	293
118	Primary sclerosing cholangitis--the arteriosclerosis of the bile duct?. <i>Lipids in Health and Disease</i> , 2007, 6, 3.	3.0	30
119	Expression of bile acid synthesis and detoxification enzymes and the alternative bile acid efflux pump MRP4 in patients with primary biliary cirrhosis. <i>Liver International</i> , 2007, 27, 920-929.	3.9	103
120	Lithocholic Acid Feeding Induces Segmental Bile Duct Obstruction and Destructive Cholangitis in Mice. <i>American Journal of Pathology</i> , 2006, 168, 410-422.	3.8	161
121	24-norUrsodeoxycholic Acid Is Superior to Ursodeoxycholic Acid in the Treatment of Sclerosing Cholangitis in <i>Mdr2</i> (<i>Abcb4</i>) Knockout Mice. <i>Gastroenterology</i> , 2006, 130, 465-481.	1.3	282
122	Mechanisms of Disease: mechanisms and clinical implications of cholestasis in sepsis. <i>Nature Reviews Gastroenterology & Hepatology</i> , 2006, 3, 574-585.	1.7	193
123	Coordinated induction of bile acid detoxification and alternative elimination in mice: role of FXR-regulated organic solute transporter-1 in the adaptive response to bile acids. <i>American Journal of Physiology - Renal Physiology</i> , 2006, 290, G923-G932.	3.4	154
124	<i>Fxr</i> ^{-/-} mice adapt to biliary obstruction by enhanced phase I detoxification and renal elimination of bile acids. <i>Journal of Lipid Research</i> , 2006, 47, 582-592.	4.2	98
125	Hepatobiliary transporter expression in human hepatocellular carcinoma. <i>Liver International</i> , 2005, 25, 367-379.	3.9	112
126	Cytokine-independent repression of rodent <i>Ntcp</i> in obstructive cholestasis. <i>Hepatology</i> , 2005, 41, 470-477.	7.3	40

#	ARTICLE	IF	CITATIONS
127	CAR and PXR agonists stimulate hepatic bile acid and bilirubin detoxification and elimination pathways in mice. <i>Hepatology</i> , 2005, 42, 420-430.	7.3	295
128	Role of nuclear receptors and hepatocyte-enriched transcription factors for Ntcp repression in biliary obstruction in mouse liver. <i>American Journal of Physiology - Renal Physiology</i> , 2005, 289, G798-G805.	3.4	67
129	Phosphatidylinositol 3-kinase-dependent signaling modulates taurochenodeoxycholic acid-induced liver injury and cholestasis in perfused rat livers. <i>American Journal of Physiology - Renal Physiology</i> , 2005, 289, G88-G94.	3.4	34
130	Pathophysiological Role of Poly(ADP-Ribose) Polymerase (PARP) Activation during Acetaminophen-Induced Liver Cell Necrosis in Mice. <i>Toxicological Sciences</i> , 2005, 84, 201-208.	3.1	32
131	Molecular Regulation of Hepatobiliary Transport Systems. <i>Journal of Clinical Gastroenterology</i> , 2005, 39, S111-S124.	2.2	148
132	Complementary Stimulation of Hepatobiliary Transport and Detoxification Systems by Rifampicin and Ursodeoxycholic Acid in Humans. <i>Gastroenterology</i> , 2005, 129, 476-485.	1.3	268
133	Oncosis represents the main type of cell death in mouse models of cholestasis. <i>Journal of Hepatology</i> , 2005, 42, 378-385.	3.7	80
134	Mdr2 (Abcb4) ^{-/-} mice spontaneously develop severe biliary fibrosis via massive dysregulation of pro- and antifibrogenic genes. <i>Journal of Hepatology</i> , 2005, 43, 1045-1054.	3.7	228
135	Complementary Stimulation of Hepatobiliary Transport and Detoxification Systems by Rifampicin and Ursodeoxycholic Acid in Humans. <i>Gastroenterology</i> , 2005, 129, 476-485.	1.3	235
