#	ARTICLE	IF	CITATIONS
1	Association of Genetic Risk Factors for Psychiatric Disorders and Traits of These Disorders in a Swedish Population Twin Sample. <i>JAMA Psychiatry</i> , 2019, 76, 280.	11.0	114
2	Assessing the evidence for shared genetic risks across psychiatric disorders and traits. <i>Psychological Medicine</i> , 2018, 48, 1759-1774.	4.5	110
3	Etiology of Autism Spectrum Disorders and Autistic Traits Over Time. <i>JAMA Psychiatry</i> , 2020, 77, 936.	11.0	89
4	Early environmental risk factors for neurodevelopmental disorders – a systematic review of twin and sibling studies. <i>Development and Psychopathology</i> , 2021, 33, 1448-1495.	2.3	69
5	Do sleep disturbances and psychotic-like experiences in adolescence share genetic and environmental influences?. <i>Journal of Abnormal Psychology</i> , 2015, 124, 674-684.	1.9	68
6	Developmental associations between traits of autism spectrum disorder and attention deficit hyperactivity disorder: a genetically informative, longitudinal twin study. <i>Psychological Medicine</i> , 2013, 43, 1735-1746.	4.5	62
7	Genetic and environmental contribution to the overlap between ADHD and ASD trait dimensions in young adults: a twin study. <i>Psychological Medicine</i> , 2019, 49, 1713-1721.	4.5	56
8	Where are the strongest associations between autistic traits and traits of ADHD? evidence from a community-based twin study. <i>European Child and Adolescent Psychiatry</i> , 2015, 24, 1129-1138.	4.7	53
9	Is There a Female Protective Effect Against Attention-Deficit/Hyperactivity Disorder? Evidence From Two Representative Twin Samples. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2016, 55, 504-512.e2.	0.5	52
10	Sex-specific manifestation of genetic risk for attention deficit hyperactivity disorder in the general population. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2018, 59, 908-916.	5.2	38
11	Etiological influences on the stability of autistic traits from childhood to early adulthood: evidence from a twin study. <i>Molecular Autism</i> , 2017, 8, 5.	4.9	29
12	Examining the Association Between Autistic Traits and Atypical Sensory Reactivity: A Twin Study. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2018, 57, 96-102.	0.5	29
13	A longitudinal twin study of the association between childhood autistic traits and psychotic experiences in adolescence. <i>Molecular Autism</i> , 2015, 6, 44.	4.9	24
14	Taxometric analyses and predictive accuracy of callous-unemotional traits regarding quality of life and behavior problems in non-conduct disorder diagnoses. <i>Psychiatry Research</i> , 2017, 253, 351-359.	3.3	19
15	Dimensional psychotic experiences in adolescence: Evidence from a taxometric study of a community-based sample. <i>Psychiatry Research</i> , 2016, 241, 35-42.	3.3	16
16	The Babytwins Study Sweden (BATSS): A Multi-Method Infant Twin Study of Genetic and Environmental Factors Influencing Infant Brain and Behavioral Development. <i>Twin Research and Human Genetics</i> , 2021, 24, 217-227.	0.6	15
17	Anorexia nervosa and autism: a prospective twin cohort study. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2021, 62, 316-326.	5.2	14
18	Language and traits of autism spectrum conditions: Evidence of limited phenotypic and etiological overlap. <i>American Journal of Medical Genetics Part B: Neuropsychiatric Genetics</i> , 2014, 165, 587-595.	1.7	13

#	ARTICLE	IF	CITATIONS
19	What Causes Internalising Traits and Autistic Traits to Co-occur in Adolescence? A Community-Based Twin Study. <i>Journal of Abnormal Child Psychology</i> , 2014, 42, 601-610.	3.5	13
20	Genetic and environmental contributions to the association between ADHD and affective problems in early childhoodâ€”A Swedish populationâ€based twin study. <i>American Journal of Medical Genetics Part B: Neuropsychiatric Genetics</i> , 2017, 174, 538-546.	1.7	13
21	Association of Genetic and Environmental Risks for Attention-Deficit/Hyperactivity Disorder With Hypomanic Symptoms in Youths. <i>JAMA Psychiatry</i> , 2019, 76, 1150.	11.0	13
22	Investigating the childhood symptom profile of communityâ€based individuals diagnosed with attentionâ€deficit/hyperactivity disorder as adults. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2019, 60, 259-266.	5.2	13
23	Attentionâ€deficit/hyperactivity disorder symptoms and dietary habits in adulthood: A large populationâ€based twin study in Sweden. <i>American Journal of Medical Genetics Part B: Neuropsychiatric Genetics</i> , 2020, 183, 475-485.	1.7	13
24	A Twin Study on the Association Between Psychotic Experiences and Tobacco Use During Adolescence. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2019, 58, 267-276.e8.	0.5	11
25	A co-twin-control study of altered sensory processing in autism. <i>Autism</i> , 2021, 25, 136236132199125.	4.1	9
26	Familial confounding on the ability to read minds: A co-twin control study. <i>Autism</i> , 2019, 23, 1948-1956.	4.1	8
27	Medications for attention-deficit/hyperactivity disorder in individuals with or without coexisting autism spectrum disorder: analysis of data from the Swedish prescribed drug register. <i>Journal of Neurodevelopmental Disorders</i> , 2020, 12, 44.	3.1	7
28	Genetic and environmental influences on the stability of psychotic experiences and negative symptoms in adolescence. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2019, 60, 784-792.	5.2	6
29	Association of etiological factors across the extreme end and continuous variation in disordered eating in female Swedish twins. <i>Psychological Medicine</i> , 2021, 51, 750-760.	4.5	6
30	Etiological links between autism and difficulties in initiating and maintaining sleep: a familial coâ€aggregation and twin study. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2022, 63, 315-323.	5.2	6
31	Familial and genetic associations between autism spectrum disorder and other neurodevelopmental and psychiatric disorders. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2021, 62, 1274-1284.	5.2	6
32	Perceived child impairment and the â€autism epidemicâ€™. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2022, 63, 591-598.	5.2	6
33	Investigating gender-specific effects of familial risk for attention-deficit hyperactivity disorder and other neurodevelopmental disorders in the Swedish population. <i>BJPsych Open</i> , 2020, 6, e65.	0.7	4
34	Pupil size and pupillary light reflex in early infancy: heritability and link to genetic liability to schizophrenia. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2022, 63, 1068-1077.	5.2	4
35	Gene-Environment Interactions in Attention-Deficit/Hyperactivity Disorder Symptom Dimensions: The Role of Unhealthy Food Habits. <i>Genes</i> , 2022, 13, 47.	2.4	4
36	Introduction to the Special Issue on â€The Genetic Architecture of Neurodevelopmental Disordersâ€™. <i>Behavior Genetics</i> , 2020, 50, 185-190.	2.1	3

#	ARTICLE	IF	CITATIONS
37	The need for genetically informative designs in developmental science: Commentary on Gustavson et al. (2021) and Myers et al. (2021). <i>JCPP Advances</i> , 2021, 1, e12025.	2.4	3
38	Examining the association between childhood autistic traits and adolescent hypomania: a longitudinal twin study. <i>Psychological Medicine</i> , 2021, , 1-10.	4.5	2
39	Association of Etiological Factors for Hypomanic Symptoms, Bipolar Disorder, and Other Severe Mental Illnesses. <i>JAMA Psychiatry</i> , 2022, 79, 143.	11.0	2
40	Association of cumulative early medical factors with autism and autistic symptoms in a population-based twin sample. <i>Translational Psychiatry</i> , 2022, 12, 73.	4.8	2
41	Understanding the relationship between asthma and autism spectrum disorder: a population-based family and twin study. <i>Psychological Medicine</i> , 2022, , 1-9.	4.5	2
42	Shared familial risk factors between autism spectrum disorder and obesity – a register-based familial coaggregation cohort study. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2021, ,	5.2	2
