#	ARTICLE	IF	CITATIONS
1	Large-scale replication study reveals a limit on probabilistic prediction in language comprehension. <i>ELife</i> , 2018, 7, .	6.0	177
2	Dissociable effects of prediction and integration during language comprehension: evidence from a large-scale study using brain potentials. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2020, 375, 20180522.	4.0	115
3	In dialogue with an avatar, language behavior is identical to dialogue with a human partner. <i>Behavior Research Methods</i> , 2017, 49, 46-60.	4.0	47
4	A change detection approach to study visual working memory of the macaque monkey. <i>Journal of Vision</i> , 2011, 11, 11-11.	0.3	36
5	The role of nondeclarative memory in the skill for language: Evidence from syntactic priming in patients with amnesia. <i>Neuropsychologia</i> , 2017, 101, 97-105.	1.6	22
6	How social opinion influences syntactic processing? An investigation using virtual reality. <i>PLoS ONE</i> , 2017, 12, e0174405.	2.5	14
7	Structural priming is supported by different components of nondeclarative memory: Evidence from priming across the lifespan.. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2021, 47, 820-837.	0.9	13
8	Do we predict upcoming speech content in naturalistic environments?. <i>Language, Cognition and Neuroscience</i> , 2021, 36, 440-461.	1.2	12
9	Does Syntactic Alignment Effectively Influence How Speakers Are Perceived by Their Conversation Partner?. <i>PLoS ONE</i> , 2016, 11, e0153521.	2.5	12
10	Changes in alpha activity reveal that social opinion modulates attention allocation during face processing. <i>NeuroImage</i> , 2018, 174, 432-440.	4.2	10
11	Do We Take a Robot's Needs into Account? The Effect of Humanization on Prosocial Considerations Toward Other Human Beings and Robots. <i>Cyberpsychology, Behavior, and Social Networking</i> , 2021, 24, 332-336.	3.9	10
12	Using Theory of Mind to Assess Users' Sense of Agency in Social Chatbots. <i>Lecture Notes in Computer Science</i> , 2020, , 158-169.	1.3	8
13	Memory encoding of syntactic information involves domain-general attentional resources: Evidence from dual-task studies. <i>Quarterly Journal of Experimental Psychology</i> , 2019, 72, 1285-1296.	1.1	3
14	Structural priming persists for (at least) one month in young adults, but not in healthy older adults.. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2022, 48, 1219-1234.	0.9	3
15	What Happens When You Have A Speech Disorder?. <i>Frontiers for Young Minds</i> , 0, 7, .	0.8	1
16	Linking Theory of Mind in Human-Agent Interactions to Validated Evaluations. , 2021, , .		0
17	The capacity limit of the visual working memory of the macaque monkey. <i>Journal of Vision</i> , 2010, 10, 725-725.	0.3	0
