#	ARTICLE	IF	CITATIONS
1	Nonlinear effects in natural and artificial aurora. , 2022, , 345-479.		0
2	Auroral geospace. , 2022, , 199-343.		0
3	Subauroral geospace. , 2022, , 481-610.		3
4	Resonant Alfvén Waves in the Lower Auroral Ionosphere: Evidence for the Nonlinear Evolution of the Ionospheric Feedback Instability. Journal of Geophysical Research: Space Physics, 2022, 127, .	2.4	3
5	Whistlers in the Plasmasphere. Journal of Geophysical Research: Space Physics, 2021, 126, e2020JA028933.	2.4	5
6	Whistler on a Shelf. Journal of Geophysical Research: Space Physics, 2021, 126, e2021JA029403.	2.4	3
7	Whistlers in Micro Ducts. Journal of Geophysical Research: Space Physics, 2021, 126, .	2.4	7
8	Determining Parameters of Whistler Waves Trapped in High-Density Ducts. Journal of Geophysical Research: Space Physics, 2021, 126, e2021JA029228.	2.4	7
9	Observations and Modeling of Whistler Mode Waves in the Magnetospheric Density Ducts. Journal of Geophysical Research: Space Physics, 2020, 125, e2020JA028398.	2.4	19
10	ULF waves observed in solar wind and on the ground at high, mid, and low latitudes. Journal of Atmospheric and Solar-Terrestrial Physics, 2020, 200, 105220.	1.6	2
11	Prebreakup Arc Intensification due to Short Circuiting of Mesoscale Plasma Flows Over the Plasmapause. Journal of Geophysical Research: Space Physics, 2020, 125, e2019JA027666.	2.4	14
12	ULF Waves Generated Near the Plasmapause by the Magnetosphere-Ionosphere Interactions. Journal of Geophysical Research: Space Physics, 2020, 125, e2019JA027353.	2.4	5
13	Effects of the Hall Conductivity in Ionospheric Heating Experiments. Geophysical Research Letters, 2019, 46, 6188-6194.	4.0	2
14	Artificial Aurora Produced by HAARP. Journal of Geophysical Research: Space Physics, 2019, 124, 3255-3265.	2.4	2
15	STEVE and the Picket Fence: Evidence of Feedback-Unstable Magnetosphere-Ionosphere Interaction. Geophysical Research Letters, 2019, 46, 14247-14255.	4.0	21
16	Ultralow Frequency Electrodynamics of Magnetosphere-Ionosphere Interactions Near the Plasmapause During Substorms. Journal of Geophysical Research: Space Physics, 2018, 123, 7441-7451.	2.4	21
17	Past, Present and Future of Active Radio Frequency Experiments in Space. Space Science Reviews, 2018, 214, 1.	8.1	62
18	On the Existence of Ionospheric Feedback Instability in the Earth's Magnetosphere-Ionosphere System. Journal of Geophysical Research: Space Physics, 2018, 123, 8951-8957.	2.4	21

#	ARTICLE	IF	CITATIONS
19	On the Asymmetry Between Upward and Downward Field-Aligned Currents Interacting With the Ionosphere. <i>Journal of Geophysical Research: Space Physics</i> , 2018, 123, 9275-9285.	2.4	6
20	Van Allen Probes observations of structured whistler mode activity and coincident electron Landau acceleration inside a remnant plasmaspheric plume. <i>Journal of Geophysical Research: Space Physics</i> , 2017, 122, 3073-3086.	2.4	17
21	Ionospheric Alfvén resonator and aurora: Modeling of MICA observations. <i>Journal of Geophysical Research: Space Physics</i> , 2017, 122, 7530-7540.	2.4	5
22	Magnetospheric resonances at low and middle latitudes. <i>Journal of Geophysical Research: Space Physics</i> , 2015, 120, 7718-7727.	2.4	1
23	Discrete auroral arcs generated by ionospheric feedback instability. , 2014, , .		0
24	Propagation of whistler-mode waves through the ionosphere to the radiation belt. , 2014, , .		0
25	Ionospheric feedback instability and active discrete auroral forms. <i>Journal of Geophysical Research: Space Physics</i> , 2014, 119, 2243-2254.	2.4	19
26	Hybrid simulation of whistler excitation by electron beams in two-dimensional non-periodic domains. <i>Journal of Computational Physics</i> , 2014, 276, 468-478.	3.8	2
27	Whistler interaction with field-aligned density irregularities in the ionosphere: Refraction, diffraction, and interference. <i>Journal of Geophysical Research: Space Physics</i> , 2014, 119, 5790-5799.	2.4	10
28	Whistler interactions with density gradients in the magnetosphere. , 2013, , .		0
29	Whistler propagation in ionospheric density ducts: Simulations and DEMETER observations. <i>Journal of Geophysical Research: Space Physics</i> , 2013, 118, 7011-7018.	2.4	22
30	Whistler interactions with density gradients in the magnetosphere. <i>Journal of Geophysical Research: Space Physics</i> , 2013, 118, 167-172.	2.4	8
31	Production of small-scale Alfvén waves by ionospheric depletion, nonlinear magnetosphere-ionosphere coupling and phase mixing. <i>Journal of Geophysical Research: Space Physics</i> , 2013, 118, 1450-1460.	2.4	22
32	Auroral Current and Electrodynamics Structure (ACES) observations of ionospheric feedback in the Alfvén resonator and model responses. <i>Journal of Geophysical Research: Space Physics</i> , 2013, 118, 3288-3296.	2.4	19
33	Modeling the propagation of whistler-mode waves in the presence of field-aligned density irregularities. <i>Physics of Plasmas</i> , 2012, 19, .	1.9	14
34	ULF waves and discrete aurora. <i>Journal of Geophysical Research</i> , 2012, 117, .	3.3	11
35	Propagation of whistler mode waves through the ionosphere. <i>Journal of Geophysical Research</i> , 2012, 117, .	3.3	7
36	Effect of heavy ions on coupling between density structures and electromagnetic waves in the auroral zone. <i>Journal of Geophysical Research</i> , 2011, 116, n/a-n/a.	3.3	4

#	ARTICLE	IF	CITATIONS
37	Excitation of the ionospheric Alfvén resonator from the ground: Theory and experiments. Journal of Geophysical Research, 2011, 116, n/a-n/a.	3.3	8
38	Excitation of zero-frequency magnetic field-aligned currents by ionospheric heating. Annales Geophysicae, 2011, 29, 1147-1152.	1.6	2
39	Ionospheric feedback instability and substorm development. Journal of Geophysical Research, 2010, 115, .	3.3	25
40	Propagation of whistler mode waves with a modulated frequency in the magnetosphere. Journal of Geophysical Research, 2010, 115, .	3.3	13
41	An alternative method for generation of ULF waves by ionospheric heating. Geophysical Research Letters, 2010, 37, .	4.0	7
42	Effect of frequency modulation on whistler mode waves in the magnetosphere. Journal of Geophysical Research, 2009, 114, .	3.3	9
43	Coupling between density structures, electromagnetic waves and ionospheric feedback in the auroral zone. Journal of Geophysical Research, 2008, 113, .	3.3	62
44	Small-scale, localized electromagnetic waves observed by Cluster: Result of magnetosphere-ionosphere interactions. Geophysical Research Letters, 2008, 35, .	4.0	17
45	Effects of ionospheric heating on feedback-unstable electromagnetic waves. Journal of Geophysical Research, 2008, 113, .	3.3	4
46	Effect of the radial boundary condition on Alfvén wave dynamics in reduced magnetohydrodynamics. Physics of Plasmas, 2008, 15, 032106.	1.9	2
47	Whistler propagation in nonsymmetrical density channels. Journal of Geophysical Research, 2007, 112, n/a-n/a.	3.3	16
48	Narrowing of the discrete auroral arc by the ionosphere. Journal of Geophysical Research, 2007, 112, .	3.3	9
49	Spectral properties of high-density ducts. Journal of Geophysical Research, 2007, 112, .	3.3	7
50	Divergent electric fields in downward current channels. Journal of Geophysical Research, 2006, 111, .	3.3	24
51	Whistler propagation in inhomogeneous plasma. Journal of Geophysical Research, 2006, 111, .	3.3	79
52	Quasineutral particle simulation technique for whistlers. Journal of Computational Physics, 2006, 214, 284-298.	3.8	8
53	Simulation of ULF field-aligned currents generated by HF heating of the ionosphere. Journal of Geophysical Research, 2005, 110, .	3.3	16
54	Ultra-low-frequency electrodynamics of the magnetosphere-ionosphere interaction. Journal of Geophysical Research, 2005, 110, .	3.3	23

#	ARTICLE	IF	CITATIONS
55	Electrodynamics of the magnetosphere-ionosphere coupling in the nightside subauroral zone. <i>Physics of Plasmas</i> , 2004, 11, 1260-1267.	1.9	23
56	Microwave Image Reconstruction From 3-D Fields Coupled to 2-D Parameter Estimation. <i>IEEE Transactions on Medical Imaging</i> , 2004, 23, 475-484.	8.9	88
57	Multiscale electrodynamics of the ionosphere-magnetosphere system. <i>Journal of Geophysical Research</i> , 2004, 109, .	3.3	81
58	Simulations of resonant Alfvén waves generated by artificial HF heating of the auroral ionosphere. <i>Annales Geophysicae</i> , 2004, 22, 2943-2949.	1.6	9
59	Reflection and absorption of Alfvénic power in the low-altitude magnetosphere. <i>Journal of Geophysical Research</i> , 2003, 108, .	3.3	31
60	Small-scale electric fields in downward auroral current channels. <i>Journal of Geophysical Research</i> , 2003, 108, .	3.3	50
61	Numerical modeling of localized electromagnetic waves in the nightside subauroral zone. <i>Journal of Geophysical Research</i> , 2003, 108, .	3.3	36
62	Effects of the seasonal asymmetry in ionospheric Pedersen conductance on the appearance of discrete aurora. <i>Geophysical Research Letters</i> , 2002, 29, 79-1-79-4.	4.0	28
63	Harmonic structure of field line eigenmodes generated by ionospheric feedback instability. <i>Journal of Geophysical Research</i> , 2002, 107, SMP 14-1.	3.3	29
64	Numerical modeling of Alfvén waves observed by the Polar spacecraft in the nightside plasma sheet boundary layer. <i>Journal of Geophysical Research</i> , 2002, 107, SMP 9-1-SMP 9-8.	3.3	21
65	Large Alfvén wave power in the plasma sheet boundary layer during the expansion phase of substorms. <i>Geophysical Research Letters</i> , 2000, 27, 3169-3172.	4.0	78
66	Dispersive width of the Alfvénic field line resonance. <i>Journal of Geophysical Research</i> , 1999, 104, 22657-22666.	3.3	16
67	Discrete auroral arc, electrostatic shock and suprathermal electrons powered by dispersive, anomalously resistive field line resonance. <i>Geophysical Research Letters</i> , 1998, 25, 4449-4452.	4.0	92
68	Small-scale, dispersive field line resonances in the hot magnetospheric plasma. <i>Journal of Geophysical Research</i> , 1998, 103, 26559-26572.	3.3	76
69	The formation and nonlinear evolution of convective cells in the auroral plasma. <i>Physica Scripta</i> , 1990, 41, 686-692.	2.5	26
70	Alfvén vortices and related phenomena in the ionosphere and the magnetosphere. <i>Physica Scripta</i> , 1988, 38, 841-854.	2.5	171
71	Feedback Interactions Between the Ionosphere and Magnetosphere at Middle Latitude.. <i>Journal of Geophysical Research: Space Physics</i> , 0, , .	2.4	0
