#	Article	IF	Citations
1	Validation Study of Diabetes Definitions Using Japanese Diagnosis Procedure Combination Data Among Hospitalized Patients. Journal of Epidemiology, 2023, 33, 165-169.	1.1	4
2	Effectiveness of Screening Using Fecal Occult Blood Testing and Colonoscopy on the Risk of Colorectal Cancer: The Japan Public Health Center-based Prospective Study. Journal of Epidemiology, 2023, 33, 91-100.	1.1	3
3	Long-term Response of <i>Helicobacter pylori</i> Antibody Titer After Eradication Treatment in Middle-aged Japanese: JPHC-NEXT Study. Journal of Epidemiology, 2023, 33, 1-7.	1.1	3
4	Exploratory Research on Determinants of Place of Death in a Large-scale Cohort Study: The JPHC Study. Journal of Epidemiology, 2023, 33, 120-126.	1.1	3
5	Hobby Engagement and Risk of Disabling Dementia. Journal of Epidemiology, 2023, 33, 456-463.	1.1	5
6	Association Between Birth Weight and Risk of Pregnancy-Induced Hypertension and Gestational Diabetes in Japanese Women: JPHC-NEXT Study. Journal of Epidemiology, 2022, 32, 168-173.	1.1	6
7	Reduction in total and major cause-specific mortality from tobacco smoking cessation: a pooled analysis of 16 population-based cohort studies in Asia. International Journal of Epidemiology, 2022, 50, 2070-2081.	0.9	11
8	Association between sugar and starch intakes and type 2 diabetes risk in middle-aged adults in a prospective cohort study. European Journal of Clinical Nutrition, 2022, 76, 746-755.	1.3	5
9	Coffee and tea consumption and mortality from all causes, cardiovascular disease and cancer: a pooled analysis of prospective studies from the Asia Cohort Consortium. International Journal of Epidemiology, 2022, 51, 626-640.	0.9	37
10	Circulating Inflammation Markers and Pancreatic Cancer Risk: A Prospective Case-Cohort Study in Japan. Cancer Epidemiology Biomarkers and Prevention, 2022, 31, 236-241.	1.1	2
11	Alcohol intake and stomach cancer risk in Japan: A pooled analysis of six cohort studies. Cancer Science, 2022, 113, 261-276.	1.7	3
12	Low‐carbohydrate diet and risk of cancer incidence: The Japan Public Health Center‐based prospective study. Cancer Science, 2022, 113, 744-755.	1.7	17
13	Association of B Vitamins and Methionine Intake with the Risk of Gastric Cancer: The Japan Public Health Center–based Prospective Study. Cancer Prevention Research, 2022, 15, 101-110.	0.7	3
14	Association of <i>Escherichia coli</i> containing polyketide synthase in the gut microbiota with colorectal neoplasia in Japan. Cancer Science, 2022, 113, 277-286.	1.7	13
15	Burden of cancer attributable to modifiable factors in Japan in 2015. Global Health & Medicine, 2022, 4, 26-36.	0.6	15
16	Body Mass Index and Thyroid Cancer Risk: A Pooled Analysis of Half a Million Men and Women in the Asia Cohort Consortium. Thyroid, 2022, 32, 306-314.	2.4	17
17	Toward a third term of Health Japan 21 – implications from the rise in non-communicable disease burden and highly preventable risk factors. The Lancet Regional Health - Western Pacific, 2022, 21, 100377.	1.3	11
18	Association between body mass index and oesophageal cancer mortality: a pooled analysis of prospective cohort studies with &gt;800 000 individuals in the Asia Cohort Consortium. International Journal of Epidemiology, 2022, 51, 1190-1203.	0.9	8

#	Article	IF	Citations
19	Association between C-reactive protein and risk of overall and 18 site-specific cancers in a Japanese case-cohort. British Journal of Cancer, 2022, 126, 1481-1489.	2.9	9
20	A Predictive Model of Noncardia Gastric Adenocarcinoma Risk Using Antibody Response to <i>Helicobacter pylori</i> Proteins and Pepsinogen. Cancer Epidemiology Biomarkers and Prevention, 2022, 31, 811-820.	1.1	2
21	Applicability of a web-based 24-hour dietary recall tool for Japanese populations in large-scale epidemiological studies. Journal of Epidemiology, 2022, , .	1.1	0
22	Vegetable and fruit intake and the risk of bladder cancer: Japan Public Health Center-based prospective study. British Journal of Cancer, 2022, 126, 1647-1658.	2.9	4
23	Dietary fibre intake is associated with reduced risk of lung cancer: a Japan public health centre-based prospective study (JPHC). International Journal of Epidemiology, 2022, 51, 1142-1152.	0.9	2
24	Association Between Physical Activity and Risk of Disabling Dementia in Japan. JAMA Network Open, 2022, 5, e224590.	2.8	16
25	Long-term exposure to fine particle matter and all-cause mortality and cause-specific mortality in Japan: the JPHC Study. BMC Public Health, 2022, 22, 466.	1.2	10
26	Polygenic risk scores for prediction of breast cancer risk in Asian populations. Genetics in Medicine, 2022, 24, 586-600.	1.1	27
27	Adult height in relation to the risk of colorectal cancer among the Japanese population: an evaluation based on systematic review and meta-analysis. Japanese Journal of Clinical Oncology, 2022, 52, 322-330.	0.6	2
28	Total, animal, and plant protein intake and pneumonia mortality in the Japan Public Health Center–based Prospective Study. American Journal of Clinical Nutrition, 2022, 115, 781-789.	2.2	1
29	Cross-sectional associations between the types/amounts of beverages consumed and the glycemia status: The Japan public health center-based Prospective Diabetes study. Metabolism Open, 2022, 14, 100185.	1.4	1
30	A nationally representative cross€sectional survey on health information access for consumers in Japan: A protocol for the INFORM Study. World Medical and Health Policy, 2022, 14, 225-275.	0.9	11
31	Relevance of the MHC region for breast cancer susceptibility in Asians. Breast Cancer, 2022, 29, 869-879.	1.3	1
32	Sleep duration and risk of cancer incidence and mortality: A pooled analysis of six population€based cohorts in Japan. International Journal of Cancer, 2022, 151, 1068-1080.	2.3	10
33	Association of Marital Status With Total and Cause-Specific Mortality in Asia. JAMA Network Open, 2022, 5, e2214181.	2.8	9
34	Association between Meat, Fish, and Fatty Acid Intake and Non-Hodgkin Lymphoma Incidence: The Japan Public Health Center€Based Prospective Study. Journal of Nutrition, 2022, 152, 1895-1906.	1.3	3
35	Inverse Association between Fruit and Vegetable Intake and All-Cause Mortality: Japan Public Health Center-Based Prospective Study. Journal of Nutrition, 2022, 152, 2245-2254.	1.3	6
36	Prediagnostic plasma polyphenol concentrations and colon cancer risk: The JPHC nested case€control study. Clinical Nutrition, 2022, 41, 1950-1960.	2.3	6

#	Article	IF	Citations
37	Soy product intake and risk of incident disabling dementia: the JPHC Disabling Dementia Study. European Journal of Nutrition, 2022, 61, 4045-4057.	1.8	12
38	Association of Plasma Iron Status with Subsequent Risk of Total and Site-Specific Cancer: A Large Case–Cohort Study within JPHC Study. Cancer Prevention Research, 2022, 15, 669-678.	0.7	1
39	Associations between changes in fruit and vegetable consumption and weight change in Japanese adults. European Journal of Nutrition, 2021, 60, 217-227.	1.8	11
40	Quantifying the association of low-intensity and late initiation of tobacco smoking with total and cause-specific mortality in Asia. Tobacco Control, 2021, 30, 328-335.	1.8	7
41	The Association Between Habitual Sleep Duration and Mortality According to Sex and Age: The Japan Public Health Center-based Prospective Study. Journal of Epidemiology, 2021, 31, 109-118.	1.1	9
42	Comparison between the impact of fermented and unfermented soy intake on the risk of liver cancer: the JPHC Study. European Journal of Nutrition, 2021, 60, 1389-1401.	1.8	10
43	Association between adherence to the Japanese diet and all-cause and cause-specific mortality: the Japan Public Health Center-based Prospective Study. European Journal of Nutrition, 2021, 60, 1327-1336.	1.8	37
44	Low carbohydrate diet and all cause and cause-specific mortality. Clinical Nutrition, 2021, 40, 2016-2024.	2.3	28
45	Associations of coffee and tea consumption with lung cancer risk. International Journal of Cancer, 2021, 148, 2457-2470.	2.3	10
46	Dietary fiber intake and risk of gastric cancer: The <scp>Japan Public Health Center</scp>–based prospective study. International Journal of Cancer, 2021, 148, 2664-2673.	2.3	8
47	Green tea and cancer and cardiometabolic diseases: a review of the current epidemiological evidence. European Journal of Clinical Nutrition, 2021, 75, 865-876.	1.3	47
48	Fermented soy products intake and risk of cardiovascular disease and total cancer incidence: The Japan Public Health Center-based Prospective study. European Journal of Clinical Nutrition, 2021, 75, 954-968.	1.3	19
49	Smoking and colorectal cancer: A pooled analysis of 10 population–based cohort studies in Japan. International Journal of Cancer, 2021, 148, 654-664.	2.3	21
50	Intake of Vegetables and Fruits and the Risk of Cataract Incidence in a Japanese Population: The Japan Public Health Center-Based Prospective Study. Journal of Epidemiology, 2021, 31, 21-29.	1.1	6
51	OUP accepted manuscript. International Journal of Epidemiology, 2021, , .	0.9	6
52	Working cancer survivors' physical and mental characteristics compared to cancer-free workers in Japan: a nationwide general population-based study. Journal of Cancer Survivorship, 2021, 15, 912-921.	1.5	9
53	Sugary Drink Consumption and Subsequent Colorectal Cancer Risk: The Japan Public Health Center–Based Prospective Cohort Study. Cancer Epidemiology Biomarkers and Prevention, 2021, 30, 782-788.	1.1	7
54	Body mass index and colorectal cancer risk: A Mendelian randomization study. Cancer Science, 2021, 112, 1579-1588.	1.7	25

#	Article	IF	Citations
55	Dietary Acrylamide Intake and the Risks of Renal Cell, Prostate, and Bladder Cancers: A Japan Public Health Center-Based Prospective Study. Nutrients, 2021, 13, 780.	1.7	10
56	Alcohol consumption and breast cancer risk in Japan: A pooled analysis of eight population‐based cohort studies. International Journal of Cancer, 2021, 148, 2736-2747.	2.3	12
57	Dietary Acrylamide Intake and the Risk of Hematological Malignancies: The Japan Public Health Center-Based Prospective Study. Nutrients, 2021, 13, 590.	1.7	12
58	Risk of stroke in cancer survivors using a propensity score-matched cohort analysis. Scientific Reports, 2021, 11, 5599.	1.6	2
59	Impact of reproductive factors on breast cancer incidence: Pooled analysis of nine cohort studies in Japan. Cancer Medicine, 2021, 10, 2153-2163.	1.3	2
60	Effectiveness of a Cancer Risk Prediction Tool on Lifestyle Habits: A Randomized Controlled Trial. Cancer Epidemiology Biomarkers and Prevention, 2021, 30, 1063-1071.	1.1	2
61	Risk Stratification Score Improves Sensitivity for Advanced Colorectal Neoplasia in Colorectal Cancer Screening: The Oshima Study Workgroup. Clinical and Translational Gastroenterology, 2021, 12, e00319.	1.3	4
62	Long‐term antihypertensive drug use and risk of cancer: The Japan Public Health Center‐based prospective study. Cancer Science, 2021, 112, 1997-2005.	1.7	9
63	Reproductive Factors and Lung Cancer Risk among Never-Smoking Japanese Women with 21 Years of Follow-Up: A Cohort Study. Cancer Epidemiology Biomarkers and Prevention, 2021, 30, 1185-1192.	1.1	10
64	Effects of *Helicobacter pylori* eradication on gastric cancer incidence in the Japanese population: a systematic evidence review. Japanese Journal of Clinical Oncology, 2021, 51, 1158-1170.	0.6	14
65	Dietary Inflammatory Index Is Associated With Inflammation in Japanese Men. Frontiers in Nutrition, 2021, 8, 604296.	1.6	23
66	Apolipoprotein A2 Isoforms in Relation to the Risk of Myocardial Infarction: A Nested Case-Control Analysis in the JPHC Study. Journal of Atherosclerosis and Thrombosis, 2021, 28, 483-490.	0.9	3
67	Dietary glycemic index, glycemic load and mortality: Japan Public Health Center-based prospective study. European Journal of Nutrition, 2021, 60, 4607-4620.	1.8	2
68	Body Mass Index, Height, Weight Change, and Subsequent Lung Cancer Risk: The Japan Public Health Center–Based Prospective Study. Cancer Epidemiology Biomarkers and Prevention, 2021, 30, 1708-1716.	1.1	4
69	Validity of dietary isothiocyanate intake estimates from a food frequency questionnaire using 24‰h urinary isothiocyanate excretion as an objective biomarker: the JPHC-NEXT protocol area. European Journal of Clinical Nutrition, 2021, , .	1.3	1
70	Dietary glycemic index, glycemic load, and endometrial cancer risk: The Japan Public Health Center‐based Prospective Study. Cancer Science, 2021, 112, 3682-3690.	1.7	5
71	Relationship between unhealthy sleep status and dry eye symptoms in a Japanese population: The JPHC-NEXT study. Ocular Surface, 2021, 21, 306-312.	2.2	14
72	Urinary neonicotinoids level among pregnant women in Japan. International Journal of Hygiene and Environmental Health, 2021, 236, 113797.	2.1	13

#	Article	IF	Citations
73	Functional annotation of the 2q35 breast cancer risk locus implicates a structural variant in influencing activity of a long-range enhancer element. American Journal of Human Genetics, 2021, 108, 1190-1203.	2.6	6
74	A Personal Breast Cancer Risk Stratification Model Using Common Variants and Environmental Risk Factors in Japanese Females. Cancers, 2021, 13, 3796.	1.7	4
75	Relation Between Body Mass Index and Dry Eye Disease: The Japan Public Health Centerâ€"Based Prospective Study for the Next Generation. Eye and Contact Lens, 2021, 47, 449-455.	0.8	8
76	Public Health Interventions for Gastric Cancer Control. Gastrointestinal Endoscopy Clinics of North America, 2021, 31, 441-449.	0.6	8
77	Association of sugary drink consumption with all-cause and cause-specific mortality: the Japan Public Health Center-based Prospective Study. Preventive Medicine, 2021, 148, 106561.	1.6	5
78	Dietary heterocyclic aromatic amine intake and cancer risk: epidemiological evidence from Japanese studies. Genes and Environment, 2021, 43, 33.	0.9	6
79	Prediagnostic circulating inflammation-related biomarkers and gastric cancer: A case-cohort study in Japan. Cytokine, 2021, 144, 155558.	1.4	6
80	Reliability of self-reported questionnaire for epidemiological investigation of Helicobacter pylori eradication in a population-based cohort study. Scientific Reports, 2021, 11, 15605.	1.6	5
81	International strategy in cancer epidemiology: Japan's involvement in global projects and future role. Global Health & Medicine, 2021, 3, 187-195.	0.6	2
82	Association of Sleep Duration With All- and Major-Cause Mortality Among Adults in Japan, China, Singapore, and Korea. JAMA Network Open, 2021, 4, e2122837.	2.8	58
83	Association of dietary intakes of vitamin B12, vitamin B6, folate, and methionine with the risk of esophageal cancer: the Japan Public Health Center-based (JPHC) prospective study. BMC Cancer, 2021, 21, 982.	1.1	8
84	Alcohol consumption, tobacco smoking, and subsequent risk of renal cell carcinoma: The JPHC study. Cancer Science, 2021, 112, 5068-5077.	1.7	7
85	Peanut Consumption and Risk of Stroke and Ischemic Heart Disease in Japanese Men and Women: The JPHC Study. Stroke, 2021, 52, 3543-3550.	1.0	5
86	Serum perfluoroalkyl substances and breast cancer risk in Japanese women: A case-control study. Science of the Total Environment, 2021, 800, 149316.	3.9	15
87	Fermented and nonfermented soy foods and the risk of breast cancer in a Japanese populationâ€"based cohort study. Cancer Medicine, 2021, 10, 757-771.	1.3	14
88	Sugary drink consumption and risk of kidney and bladder cancer in Japanese adults. Scientific Reports, 2021, 11, 21701.	1.6	8
89	Association between coffee consumption and risk of prostate cancer in Japanese men: a population-based cohort study in Japan. Cancer Epidemiology Biomarkers and Prevention, 2021, , cebp.0484.2021.	1.1	3
90	Meat consumption and gastric cancer risk: The Japan Public Health Center-based Prospective Study. American Journal of Clinical Nutrition, 2021, , .	2.2	6

#	Article	IF	Citations
91	Low *MICA* gene expression confers an increased risk of Graves' disease: a Mendelian randomization study. Thyroid, 2021, , .	2.4	0
92	Burden of cancer attributable to consumption of alcohol in Japan in 2015. GHM Open, 2021, 1, 51-55.	0.1	5
93	Burden of cancer attributable to exogenous hormone use in Japan in 2015. GHM Open, 2021, 1, 97-101.	0.1	2
94	Burden of cancer attributable to tobacco smoke in Japan in 2015. GHM Open, 2021, 1, 43-50.	0.1	6
95	Burden of cancer attributable to excess bodyweight and physical inactivity in Japan in 2015. GHM Open, 2021, 1, 56-62.	0.1	3
96	Burden of cancer attributable to infection in Japan in 2015. GHM Open, 2021, 1, 63-69.	0.1	4
97	Burden of cancer attributable to consumption of highly salted food in Japan in 2015. GHM Open, 2021, 1, 85-90.	0.1	2
98	Burden of cancer attributable to insufficient vegetable, fruit and dietary fiber consumption in Japan in 2015. GHM Open, 2021, 1, 70-75.	0.1	3
99	Burden of cancer attributable to excess red and processed meat consumption in Japan in 2015. GHM Open, 2021, 1, 91-96.	0.1	2
100	Burden of cancer attributable to never breastfeeding in Japan in 2015. GHM Open, 2021, 1, 102-105.	0.1	2
101	Burden of cancer attributable to air pollution in Japan in 2015. GHM Open, 2021, 1, 76-84.	0.1	2
102	COT-6 Body mass index and height in relation to brain tumor risk in a Japanese population. Neuro-Oncology Advances, 2021, 3, vi29-vi29.	0.4	0
103	The Japan Public Health Center-based Prospective Study for the Next Generation (JPHC-NEXT): Study Design and Participants. Journal of Epidemiology, 2020, 30, 46-54.	1.1	30
104	Association of Vegetable, Fruit, and Okinawan Vegetable Consumption With Incident Stroke and Coronary Heart Disease. Journal of Epidemiology, 2020, 30, 37-45.	1.1	11
105	The influence of birth cohort and calendar period on global trends in ovarian cancer incidence. International Journal of Cancer, 2020, 146, 749-758.	2.3	40
106	Diabetes and cancer risk: A Mendelian randomization study. International Journal of Cancer, 2020, 146, 712-719.	2.3	52
107	Association of dietary diversity with total mortality and major causes of mortality in the Japanese population: JPHC study. European Journal of Clinical Nutrition, 2020, 74, 54-66.	1.3	29
108	Non-High-Density Lipoprotein Cholesterol and Risk of Stroke Subtypes and Coronary Heart Disease: The Japan Public Health Center-Based Prospective (JPHC) Study. Journal of Atherosclerosis and Thrombosis, 2020, 27, 363-374.	0.9	30

#	Article	IF	Citations
109	Validating the dietary inflammatory index using inflammatory biomarkers in a Japanese population: A cross-sectional study of the JPHC-FFQ validation study. Nutrition, 2020, 69, 110569.	1.1	35
110	Family history of cancer and subsequent risk of cancer: A large‐scale population‐based prospective study in Japan. International Journal of Cancer, 2020, 147, 331-337.	2.3	6
111	Physical inactivity, prolonged sedentary behaviors, and use of visual display terminals as potential risk factors for dry eye disease: JPHC-NEXT study. Ocular Surface, 2020, 18, 56-63.	2.2	42
112	Cross-Sectional Association Between Employment Status and Self-Rated Health Among Middle-Aged Japanese Women: The Influence of Socioeconomic Conditions and Work-Life Conflict. Journal of Epidemiology, 2020, 30, 396-403.	1.1	11
113	Alcohol Drinking and Bladder Cancer Risk From a Pooled Analysis of Ten Cohort Studies in Japan. Journal of Epidemiology, 2020, 30, 309-313.	1.1	2
114	Tuberculosis infection and lung adenocarcinoma: Mendelian randomization and pathway analysis of genome-wide association study data from never-smoking Asian women. Genomics, 2020, 112, 1223-1232.	1.3	15
115	Soy food and isoflavones are not associated with changes in serum lipids and glycohemoglobin concentrations among Japanese adults: a cohort study. European Journal of Nutrition, 2020, 59, 2075-2087.	1.8	8
116	Meta-regression Analysis of Sex- and Birth Year-Specific Prevalence of HBsAg and Anti-HCV Among Un-diagnosed Japanese: Data From the First-time Blood Donors, Periodical Health Checkup, and the Comprehensive Health Checkup With Lifestyle Education (Ningen Dock). Journal of Epidemiology, 2020, 30, 420-425.	1.1	7
117	Prediagnostic circulating inflammation biomarkers and esophageal squamous cell carcinoma: A case‐cohort study in Japan. International Journal of Cancer, 2020, 147, 686-691.	2.3	19
118	Relationship between Meat/Fish Consumption and Biliary Tract Cancer: The Japan Public Health Center‐Based Prospective Study. Cancer Epidemiology Biomarkers and Prevention, 2020, 29, 95-102.	1.1	4
119	Fine-mapping of 150 breast cancer risk regions identifies 191 likely target genes. Nature Genetics, 2020, 52, 56-73.	9.4	120
120	High-Negative Anti‐*Helicobacter pylori* IgG Antibody Titers and Long-Term Risk of Gastric Cancer: Results from a Large-Scale Population-Based Cohort Study in Japan. Cancer Epidemiology Biomarkers and Prevention, 2020, 29, 420-426.	1.1	19
121	Doneness preferences, meat and meat-derived heterocyclic amines intake, and N-acetyltransferase 2 polymorphisms: association with colorectal adenoma in Japanese Brazilians. European Journal of Cancer Prevention, 2020, 29, 7-14.	0.6	8
122	Soy and isoflavone consumption and subsequent risk of prostate cancer mortality: the Japan Public Health Center-based Prospective Study. International Journal of Epidemiology, 2020, 49, 1553-1561.	0.9	6
123	Epidemiology of nonmelanoma skin cancer in Japan: Occupational type, lifestyle, and family history of cancer. Cancer Science, 2020, 111, 4257-4265.	1.7	14
124	Intensity-specific validity and reliability of the Japan Public Health Center-based prospective study-physical activity questionnaire. Preventive Medicine Reports, 2020, 20, 101169.	0.8	18
125	Population-specific and trans-ancestry genome-wide analyses identify distinct and shared genetic risk loci for coronary artery disease. Nature Genetics, 2020, 52, 1169-1177.	9.4	206
126	Soy Intake and Colorectal Cancer Risk: Results from a Pooled Analysis of Prospective Cohort Studies Conducted in China and Japan. Journal of Nutrition, 2020, 150, 2442-2450.	1.3	5
