#	Article	IF	CITATIONS
1	Exercise Intolerance in Adult Congenital Heart Disease. Circulation, 2005, 112, 828-835.	1.6	742
2	Survival Prospects and Circumstances of Death in Contemporary Adult Congenital Heart Disease Patients Under Follow-Up at a Large Tertiary Centre. Circulation, 2015, 132, 2118-2125.	1.6	471
3	Has there been any progress made on pregnancy outcomes among women with pulmonary arterial hypertension?. European Heart Journal, 2008, 30, 256-265.	2.2	446
4	Immediate angioplasty versus standard therapy with rescue angioplasty after thrombolysis in the Combined Abciximab REteplase Stent Study in Acute Myocardial Infarction (CARESS-in-AMI): an open, prospective, randomised, multicentre trial. Lancet, The, 2008, 371, 559-568.	13.7	371
5	Improved Survival Among Patients With Eisenmenger Syndrome Receiving Advanced Therapy for Pulmonary Arterial Hypertension. Circulation, 2010, 121, 20-25.	1.6	346
6	Prevalence, Predictors, and Prognostic Value of Renal Dysfunction in Adults With Congenital Heart Disease. Circulation, 2008, 117, 2320-2328.	1.6	335
7	Reference values for exercise limitations among adults with congenital heart disease. Relation to activities of daily life-single centre experience and review of published data. European Heart Journal, 2012, 33, 1386-1396.	2.2	326
8	Predictors of morbidity and mortality in contemporary Fontan patients: results from a multicenter study including cardiopulmonary exercise testing in 321 patients. European Heart Journal, 2010, 31, 3073-3083.	2.2	282
9	Presentation, survival prospects, and predictors of death in Eisenmenger syndrome: a combined retrospective and case-control study. European Heart Journal, 2006, 27, 1737-1742.	2.2	273
10	Abnormal Ventilatory Response to Exercise in Adults With Congenital Heart Disease Relates to Cyanosis and Predicts Survival. Circulation, 2006, 113, 2796-2802.	1.6	272
11	Chronic Heart Failure in Congenital Heart Disease. Circulation, 2016, 133, 770-801.	1.6	271
12	An optical coherence tomography study of a biodegradable vs. durable polymer-coated limus-eluting stent: a LEADERS trial sub-study. European Heart Journal, 2010, 31, 165-176.	2.2	239
13	Left Ventricular Longitudinal Function Predicts Life-Threatening Ventricular Arrhythmia and Death in Adults With Repaired Tetralogy of Fallot. Circulation, 2012, 125, 2440-2446.	1.6	235
14	Comprehensive Use of Cardiopulmonary Exercise Testing Identifies Adults With Congenital Heart Disease at Increased Mortality Risk in the Medium Term. Circulation, 2012, 125, 250-259.	1.6	232
15	Congenital heart disease beyond the age of 60: emergence of a new population with high resource utilization, high morbidity, and high mortality. European Heart Journal, 2014, 35, 725-732.	2.2	218
16	Heart Rate Response During Exercise Predicts Survival in Adults With Congenital Heart Disease. Journal of the American College of Cardiology, 2006, 48, 1250-1256.	2.8	207
17	Abnormal Lung Function in Adults With Congenital Heart Disease: Prevalence, Relation to Cardiac Anatomy, and Association With Survival. Circulation, 2013, 127, 882-890.	1.6	184
18	Bosentan in Pulmonary Hypertension Associated with Fibrotic Idiopathic Interstitial Pneumonia. American Journal of Respiratory and Critical Care Medicine, 2014, 190, 208-217.	5.6	177

#	Article	IF	CITATIONS
19	Early routine percutaneous coronary intervention after fibrinolysis vs. standard therapy in ST-segment elevation myocardial infarction: a meta-analysis. European Heart Journal, 2010, 31, 2156-2169.	2.2	165
20	Pulmonary hypertension related to congenital heart disease: a call for action. European Heart Journal, 2014, 35, 691-700.	2.2	150
21	Burden of Coronary Artery Disease in Adults With Congenital Heart Disease and Its Relation to Congenital and Traditional Heart Risk Factors. American Journal of Cardiology, 2009, 103, 1445-1450.	1.6	147
22	Machine learning algorithms estimating prognosis and guiding therapy in adult congenital heart disease: data from a single tertiary centre including 10 019 patients. European Heart Journal, 2019, 40, 1069-1077.	2.2	142
23	Evaluating operability in adults with congenital heart disease and the role of pretreatment with targeted pulmonary arterial hypertension therapy. International Journal of Cardiology, 2008, 129, 163-171.	1.7	130
24	Right Ventricular Mechanics and QRS Duration in Patients With Repaired Tetralogy of Fallot. Circulation, 2007, 116, 1532-1539.	1.6	123
25	The influence of strut thickness and cell design on immediate apposition of drug-eluting stents assessed by optical coherence tomography. International Journal of Cardiology, 2009, 134, 180-188.	1.7	123
26	New York Heart Association (NYHA) classification in adults with congenital heart disease: relation to objective measures of exercise and outcome. European Heart Journal Quality of Care & Clinical Outcomes, 2018, 4, 51-58.	4.0	122
27	Replacement therapy for iron deficiency improves exercise capacity and quality of life in patients with cyanotic congenital heart disease and/or the Eisenmenger syndrome. International Journal of Cardiology, 2011, 151, 307-312.	1.7	121
28	Ventilatory Efficiency and Aerobic Capacity Predict Event-Free Survival in Adults With Atrial Repair for Complete Transposition of the Great Arteries. Journal of the American College of Cardiology, 2009, 53, 1548-1555.	2.8	120
29	Transplantation and Mechanical Circulatory Support in Congenital Heart Disease. Circulation, 2016, 133, 802-820.	1.6	118
30	Predictors of Death in Contemporary Adult Patients With Eisenmenger Syndrome. Circulation, 2017, 135, 1432-1440.	1.6	118
31	Echocardiographic Predictors of Outcome in Eisenmenger Syndrome. Circulation, 2012, 126, 1461-1468.	1.6	114
32	The curvaton as a pseudo-Nambu-Goldstone boson. Journal of High Energy Physics, 2003, 2003, 053-053.	4.7	102
33	Systemic right ventricular longitudinal strain is reduced in adults with transposition of the great arteries, relates to subpulmonary ventricular function, and predicts adverse clinical outcome. American Heart Journal, 2012, 163, 859-866.	2.7	101
34	Randomised trial of ramipril in repaired tetralogy of Fallot and pulmonary regurgitation. International Journal of Cardiology, 2012, 154, 299-305.	1.7	99
35	Usefulness of Natriuretic Peptide Levels to Predict Mortality in Adults With Congenital Heart Disease. American Journal of Cardiology, 2010, 105, 869-873.	1.6	91
36	Long-term safety, tolerability and efficacy of bosentan in adults with pulmonary arterial hypertension associated with congenital heart disease. Heart, 2007, 93, 974-976.	2.9	87

#	Article	IF	CITATIONS
37	B-type natriuretic peptide concentrations in contemporary Eisenmenger syndrome patients: predictive value and response to disease targeting therapy. Heart, 2012, 98, 736-742.	2.9	87
38	Outcome in adult patients after arterial switch operation for transposition of the great arteries. International Journal of Cardiology, 2013, 167, 2588-2593.	1.7	85
39	Pulmonary arterial hypertension in adults with congenital heart disease: distinct differences from other causes of pulmonary arterial hypertension and management implications. Current Opinion in Cardiology, 2008, 23, 545-554.	1.8	83
40	Models of inflation liberated by the curvaton hypothesis. Physical Review D, 2004, 69, .	4.7	82
41	Atrial tachyarrhythmias late after Fontan operation are related to increase in mortality and hospitalization. International Journal of Cardiology, 2012, 157, 221-226.	1.7	77
42	Nuclear Factor κ-B Is Activated in the Pulmonary Vessels of Patients with End-Stage Idiopathic Pulmonary Arterial Hypertension. PLoS ONE, 2013, 8, e75415.	2.5	77
43	Survival prospects of treatment naÃ <sup>-</sup> ve patients with Eisenmenger: a systematic review of the literature and report of own experience. Heart, 2014, 100, 1366-1372.	2.9	77
44	Cardiothoracic ratio from postero-anterior chest radiographs: A simple, reproducible and independent marker of disease severity and outcome in adults with congenital heart disease. International Journal of Cardiology, 2013, 166, 453-457.	1.7	75
45	Determinants of outpatient clinic attendance amongst adults with congenital heart disease and outcome. International Journal of Cardiology, 2016, 203, 245-250.	1.7	75
46	Curvaton hypothesis and thel̂·problem of quintessential inflation, with and without branes. Physical Review D, 2003, 68, .	4.7	71
47	Quality of life and functional capacity can be improved in patients with Eisenmenger syndrome with oral sildenafil therapy. International Journal of Cardiology, 2011, 149, 372-376.	1.7	69
48	Anemia in Adults With Congenital Heart Disease Relates to Adverse Outcome. Journal of the American College of Cardiology, 2009, 54, 2093-2100.	2.8	68
49	Disease targeting therapies in patients with Eisenmenger syndrome: Response to treatment and long-term efficiency. International Journal of Cardiology, 2013, 167, 840-847.	1.7	68
50	Past and current cause-specific mortality in Eisenmenger syndrome. European Heart Journal, 2017, 38, 2060-2067.	2.2	68
51	The Peccei-Quinn field as curvaton. Journal of High Energy Physics, 2003, 2003, 057-057.	4.7	60
52	Infective endocarditis in adults with congenital heart disease remains a lethal disease. Heart, 2018, 104, 161-165.	2.9	59
53	Exercise Intolerance in Adults with Congenital Heart Disease. Cardiology Clinics, 2006, 24, 641-660.	2.2	57
54	Hyponatraemia: a strong predictor of mortality in adults with congenital heart disease. European Heart Journal, 2010, 31, 595-601.	2.2	57

#	Article	IF	CITATIONS
55	Utility of machine learning algorithms in assessing patients with a systemic right ventricle. European Heart Journal Cardiovascular Imaging, 2019, 20, 925-931.	1.2	56
56	Physiological differences between various types of Eisenmenger syndrome and relation to outcome. International Journal of Cardiology, 2015, 179, 455-460.	1.7	55
57	Quantitative analysis of intracoronary optical coherence tomography measurements of stent strut apposition and tissue coverage. International Journal of Cardiology, 2010, 141, 151-156.	1.7	54
58	Six-minute walk test distance and resting oxygen saturations but not functional class predict outcome in adult patients with Eisenmenger syndrome. International Journal of Cardiology, 2013, 168, 4784-4789.	1.7	53
59	Right Heart Catheterization for the Diagnosis of Pulmonary Hypertension. Heart Failure Clinics, 2018, 14, 467-477.	2.1	49
60	Outcome of cardiac surgery in patients with congenital heart disease in England between 1997 and 2015. PLoS ONE, 2017, 12, e0178963.	2.5	49
61	Body mass index in adult congenital heart disease. Heart, 2017, 103, 1250-1257.	2.9	48
62	Clinical course and potential complications of small ventricular septal defects in adulthood: Late development of left ventricular dysfunction justifies lifelong care. International Journal of Cardiology, 2016, 208, 102-106.	1.7	47
63	A new quantitative analysis system for the evaluation of coronary bifurcation lesions: Comparison with current conventional methods. Catheterization and Cardiovascular Interventions, 2007, 69, 172-180.	1.7	45
64	Structural Abnormalities of the Pulmonary Trunk in Tetralogy of Fallot and Potential Clinical Implications. Journal of the American College of Cardiology, 2009, 54, 1883-1890.	2.8	45
65	Perioperative management of patients with pulmonary hypertension undergoing non-cardiothoracic, non-obstetric surgery: a systematic review and expert consensus statement. British Journal of Anaesthesia, 2021, 126, 774-790.	3.4	45
66	Optical coherence tomography to assess malapposition in overlapping drug-eluting stents. EuroIntervention, 2008, 3, 580-583.	3.2	45
67	Meta-analyses of mortality and morbidity effects of an angiotensin receptor blocker in patients with chronic heart failure already receiving an ACE inhibitor (alone or with a β-blocker). International Journal of Cardiology, 2004, 93, 105-111.	1.7	43
68	Low scale inflation and the curvaton mechanism. Journal of High Energy Physics, 2005, 2005, 055-055.	4.7	43
69	Culotte versus T-stenting in bifurcation lesions: Immediate clinical and angiographic results and midterm clinical follow-up. American Heart Journal, 2007, 154, 336-343.	2.7	42
70	Definition and Management of Segmental Pulmonary Hypertension. Journal of the American Heart Association, 2018, 7, .	3.7	41
71	Model of chronic adaptation: right ventricular function in Eisenmenger syndrome. Country Review Ukraine, 2007, 9, H54-H60.	0.8	39
72	Impaired heart rate response to exercise in adult patients with a systemic right ventricle or univentricular circulation: Prevalence, relation to exercise, and potential therapeutic implications. International Journal of Cardiology, 2009, 134, 59-66.	1.7	39

#	Article	IF	CITATIONS
73	Meeting the challenge: The evolving global landscape of adult congenital heart disease. International Journal of Cardiology, 2013, 168, 5182-5189.	1.7	39
74	Arrhythmias in adult patients with congenital heart disease and pulmonary arterial hypertension. Heart, 2018, 104, 1963-1969.	2.9	39
75	Myocardial fibrosis in Eisenmenger syndrome: a descriptive cohort study exploring associations of late gadolinium enhancement with clinical status and survival. Journal of Cardiovascular Magnetic Resonance, 2014, 16, 32.	3.3	38
76	Pulmonary tumour thrombotic microangiopathy: unclassifiable pulmonary hypertension?. European Respiratory Journal, 2015, 46, 1214-1217.	6.7	38
77	Echocardiographic Screening for Pulmonary Hypertension in CongenitalÂHeart Disease. Journal of the American College of Cardiology, 2018, 72, 2778-2788.	2.8	38
78	Depression requiring anti-depressant drug therapy in adult congenital heart disease: prevalence, risk factors, and prognostic value. European Heart Journal, 2016, 37, 771-782.	2.2	37
79	Predicting Survival in Repaired Tetralogy of Fallot. JACC: Cardiovascular Imaging, 2022, 15, 257-268.	5.3	37
80	Curvaton and QCD axion in supersymmetric theories. Physical Review D, 2004, 70, .	4.7	34
81	Parity Violating Statistical Anisotropy. Journal of High Energy Physics, 2012, 2012, 1.	4.7	34
82	Long-term natural history and postoperative outcome of double-chambered right ventricle—Experience from two tertiary adult congenital heart centres and review of the literature. International Journal of Cardiology, 2014, 174, 662-668.	1.7	34
83	Acceptance and psychological impact of implantable defibrillators amongst adults with congenital heart disease. International Journal of Cardiology, 2015, 181, 218-224.	1.7	33
84	Hypoalbuminaemia predicts outcome in adult patients with congenital heart disease. Heart, 2015, 101, 699-705.	2.9	32
85	Impaired Right, Left, or Biventricular Function and Resting Oxygen Saturation Are Associated With Mortality in Eisenmenger Syndrome. Circulation: Cardiovascular Imaging, 2015, 8, .	2.6	32
86	Supergravity inspired vector curvaton. Physical Review D, 2007, 76, .	4.7	31
87	Cardiac remodelling amongst adults with various aetiologies of pulmonary arterial hypertension including Eisenmenger syndrome—implications on survival and the role of right ventricular transverse strain. European Heart Journal Cardiovascular Imaging, 2017, 18, 1262-1270.	1.2	31
88	Peripartum outcomes in a large population of women with pulmonary arterial hypertension associated with congenital heart disease. European Journal of Preventive Cardiology, 2019, 26, 1067-1076.	1.8	31
89	Exercise training in congenital heart disease: Should we follow the heart failure paradigm?. International Journal of Cardiology, 2010, 138, 109-111.	1.7	30
90	C-reactive protein in adults with pulmonary arterial hypertension associated with congenital heart disease and its prognostic value. Heart, 2014, 100, 1335-1341.	2.9	30

#	Article	IF	CITATIONS
91	Multimodality imaging in congenital heart disease-related pulmonary arterial hypertension. Heart, 2016, 102, 910-918.	2.9	30
92	The CRASH report: emergency management dilemmas facing acute physicians in patients with pulmonary arterial hypertension. Thorax, 2017, 72, 1035-1045.	5.6	30
93	Hybrid inflation without flat directions and without primordial black holes. Journal of Cosmology and Astroparticle Physics, 2005, 2005, 008-008.	5.4	29
94	EmPHasis-10 health-related quality of life score predicts outcomes in patients with idiopathic and connective tissue disease-associated pulmonary arterial hypertension: results from a UK multicentre study. European Respiratory Journal, 2021, 57, 2000124.	6.7	29
95	Magnetic navigation in adults with atrial isomerism (heterotaxy syndrome) and supraventricular arrhythmias. Europace, 2013, 15, 877-885.	1.7	28
96	Primordial magnetic fields from superconducting cosmic strings. Physical Review D, 1998, 57, 4629-4641.	4.7	27
97	Peak oxygen uptake correlates with disease severity and predicts outcome in adult patients with Ebstein's anomaly of the tricuspid valve. International Journal of Cardiology, 2013, 163, 305-308.	1.7	27
98	Atrial septal defects and pulmonary arterial hypertension. Journal of Thoracic Disease, 2018, 10, S2953-S2965.	1.4	27
99	Platelet count and mean platelet volume predict outcome in adults with Eisenmenger syndrome. Heart, 2018, 104, 45-50.	2.9	26
100	Efficacy of catheter ablation for atrial fibrillation in patients with congenital heart disease. Europace, 2019, 21, 1334-1344.	1.7	25
101	EmPHasis-10 score for the assessment of quality of life in various types of pulmonary hypertension and its relation to outcome. European Journal of Preventive Cardiology, 2019, 26, 1338-1340.	1.8	25
102	Incidence, mortality and bleeding rates associated with pulmonary embolism in England between 1997 and 2015. International Journal of Cardiology, 2019, 277, 229-234.	1.7	25
103	Three-Dimensional Late Gadolinium Enhancement Cardiovascular Magnetic Resonance Predicts Inducibility of Ventricular Tachycardia in Adults With Repaired Tetralogy of Fallot. Circulation: Arrhythmia and Electrophysiology, 2020, 13, e008321.	4.8	25
104	Inflation at the TeV scale with a PNGB curvaton. Physics Letters, Section B: Nuclear, Elementary Particle and High-Energy Physics, 2006, 634, 331-339.	4.1	22
105	Use of intravenous iron in cyanotic patients with congenital heart disease and/or pulmonary hypertension. International Journal of Cardiology, 2018, 267, 79-83.	1.7	22
106	AHA/ACC vs ESC Guidelines forÂManagement of Adults WithÂCongenital Heart Disease. Journal of the American College of Cardiology, 2021, 78, 1904-1918.	2.8	21
107	Cosmic superstrings and primordial magnetogenesis. Physical Review D, 2005, 72, .	4.7	20
108	A modelling study of atrial septostomy for pulmonary arterial hypertension, and its effect on the state of tissue oxygenation and systemic blood flow. Cardiology in the Young, 2010, 20, 25-32.	0.8	20

#	Article	IF	CITATIONS
109	Histopathology of the great vessels in patients with pulmonary arterial hypertension in association with congenital heart disease: Large pulmonary arteries matter too. International Journal of Cardiology, 2013, 168, 2248-2254.	1.7	20
110	Dyssynchrony and electromechanical delay are associated with focal fibrosis in the systemic right ventricle — Insights from echocardiography. International Journal of Cardiology, 2016, 220, 382-388.	1.7	20
111	Enhanced Assessment of Perioperative Mortality Risk in Adults With Congenital Heart Disease. Journal of the American College of Cardiology, 2021, 78, 234-242.	2.8	20
