Version: 2024-02-01

189 papers	29,422 citations	4641 85 h-index	5364 164 g-index
194 all docs	194 docs citations	194 times ranked	22477 citing authors

#	Article	IF	Citations
1	Pit and tracheid anatomy explain hydraulic safety but not hydraulic efficiency of 28 conifer species. Journal of Experimental Botany, 2022, 73, 1033-1048.	2.4	22
2	Small and slow is safe: On the drought tolerance of tropical tree species. Global Change Biology, 2022, 28, 2622-2638.	4.2	35
3	The number of tree species on Earth. Proceedings of the National Academy of Sciences of the United States of America, 2022, 119, .	3.3	86
4	Aboveground forest biomass varies across continents, ecological zones and successional stages: refined IPCC default values for tropical and subtropical forests. Environmental Research Letters, 2022, 17, 014047.	2.2	21
5	Stem Trait Spectra Underpin Multiple Functions of Temperate Tree Species. Frontiers in Plant Science, 2022, 13, 769551.	1.7	9
6	Stem traits, compartments and tree species affect fungal communities on decaying wood. Environmental Microbiology, 2022, 24, 3625-3639.	1.8	4
7	Temperature and soils predict the distribution of plant species along the Himalayan elevational gradient. Journal of Tropical Ecology, 2022, 38, 58-70.	0.5	10
8	Drought resilience of conifer species is driven by leaf lifespan but not by hydraulic traits. New Phytologist, 2022, 235, 978-992.	3.5	17
9	Water table depth modulates productivity and biomass across Amazonian forests. Global Ecology and Biogeography, 2022, 31, 1571-1588.	2.7	17
10	Considering inner and outer bark as distinctive tissues helps to disentangle the effects of bark traits on decomposition. Journal of Ecology, 2022, 110, 2359-2373.	1.9	1
11	Ten simple rules for managing communications with a large number of coauthors. PLoS Computational Biology, 2022, 18, e1010185.	1.5	1
12	Strong floristic distinctiveness across Neotropical successional forests. Science Advances, 2022, 8, .	4.7	10
13	Landscape openness has different effects on the structure, diversity and functional composition of Brazilian rainforests. Forest Ecology and Management, 2022, 520, 120395.	1.4	4
14	Fauna Community Convergence During Decomposition of Deadwood Across Tree Species and Forests. Ecosystems, 2021, 24, 926-938.	1.6	12
15	Above- and Below-ground Cascading Effects of Wild Ungulates in Temperate Forests. Ecosystems, 2021, 24, 153-167.	1.6	25
16	Pantropical variability in tree crown allometry. Global Ecology and Biogeography, 2021, 30, 459-475.	2.7	27
17	Edaphic characteristics drive functional traits distribution in Amazonian floodplain forests. Plant Ecology, 2021, 222, 349-360.	0.7	9
18	Temperate forests respond in a non-linear way to a population gradient of wild deer. Forestry, 2021, 94, 502-511.	1.2	12

#	Article	IF	Citations
19	Lianas have more acquisitive traits than trees in a dry but not in a wet forest. Journal of Ecology, 2021, 109, 2367-2384.	1.9	22
20	Traits, strategies, and niches of liana species in a tropical seasonal rainforest. Oecologia, 2021, 196, 499-514.	0.9	10
21	Forest structure drives changes in light heterogeneity during tropical secondary forest succession. Journal of Ecology, 2021, 109, 2871-2884.	1.9	45
22	Growth of 19 conifer species is highly sensitive to winter warming, spring frost and summer drought. Annals of Botany, 2021, 128, 545-557.	1.4	15
23	Taking the pulse of Earth's tropical forests using networks of highly distributed plots. Biological Conservation, 2021, 260, 108849.	1.9	71
24	Functional traits shape tree species distribution in the Himalayas. Journal of Ecology, 2021, 109, 3818-3834.	1.9	19
25	Dead wood diversity promotes fungal diversity. Oikos, 2021, 130, 2202-2216.	1.2	20
26	Functional recovery of secondary tropical forests. Proceedings of the National Academy of Sciences of the United States of America, 2021, 118, .	3.3	34
27	Multidimensional tropical forest recovery. Science, 2021, 374, 1370-1376.	6.0	165
28	Tree mode of death and mortality risk factors across Amazon forests. Nature Communications, 2020, 11, 5515.	5.8	62
29	Long-term thermal sensitivity of Earthâ€™s tropical forests. Science, 2020, 368, 869-874.	6.0	198
30	Methodology matters for comparing coarse wood and bark decay rates across tree species. Methods in Ecology and Evolution, 2020, 11, 828-838.	2.2	14
31	Assessing the reliability of predicted plant trait distributions at the global scale. Global Ecology and Biogeography, 2020, 29, 1034-1051.	2.7	36
32	Competition influences tree growth, but not mortality, across environmental gradients in Amazonia and tropical Africa. Ecology, 2020, 101, e03052.	1.5	57
33	The global abundance of tree palms. Global Ecology and Biogeography, 2020, 29, 1495-1514.	2.7	62
34	Liana species decline in Congo basin contrasts with global patterns. Ecology, 2020, 101, e03004.	1.5	21
35	Scaling relationships among functional traits are similar across individuals, species, and communities. Journal of Vegetation Science, 2020, 31, 571-580.	1.1	8
36	Estimating aboveground net biomass change for tropical and subtropical forests: Refinement of IPCC default rates using forest plot data. Global Change Biology, 2019, 25, 3609-3624.	4.2	78

#	Article	IF	Citations
37	Evolutionary diversity is associated with wood productivity in Amazonian forests. Nature Ecology and Evolution, 2019, 3, 1754-1761.	3.4	32
38	Amazonian rainforest tree mortality driven by climate and functional traits. Nature Climate Change, 2019, 9, 384-388.	8.1	159
39	Wet and dry tropical forests show opposite successional pathways in wood density but converge over time. Nature Ecology and Evolution, 2019, 3, 928-934.	3.4	120
40	A 7000â€year history of changing plant trait composition in an Amazonian landscape; the role of humans and climate. Ecology Letters, 2019, 22, 925-935.	3.0	36
41	Biodiversity recovery of Neotropical secondary forests. Science Advances, 2019, 5, eaau3114.	4.7	291
42	Cattle affect regeneration of the palm species Attalea princeps in a Bolivian forestâ€“savanna mosaic. Biotropica, 2019, 51, 28-38.	0.8	17
43	The hydraulic efficiencyâ€“safety tradeâ€off differs between lianas and trees. Ecology, 2019, 100, e02666.	1.5	65
44	Trait divergence and habitat specialization in tropical floodplain forests trees. PLoS ONE, 2019, 14, e0212232.	1.1	25
45	Compositional response of Amazon forests to climate change. Global Change Biology, 2019, 25, 39-56.	4.2	265
46	Embolism resistance drives the distribution of Amazonian rainforest tree species along hydroâ€topographic gradients. New Phytologist, 2019, 221, 1457-1465.	3.5	123
47	Long-term effects of wild ungulates on the structure, composition and succession of temperate forests. Forest Ecology and Management, 2019, 432, 478-488.	1.4	52
48	Is there a tree economics spectrum of decomposability?. Soil Biology and Biochemistry, 2018, 119, 135-142.	4.2	25
49	Disturbance intensity is a stronger driver of biomass recovery than remaining treeâ€community attributes in a managed Amazonian forest. Journal of Applied Ecology, 2018, 55, 1647-1657.	1.9	33
50	Phylogenetic classification of the worldâ€™s tropical forests. Proceedings of the National Academy of Sciences of the United States of America, 2018, 115, 1837-1842.	3.3	144
51	Relationships between leaf mass per area and nutrient concentrations in 98 Mediterranean woody species are determined by phylogeny, habitat and leaf habit. Trees - Structure and Function, 2018, 32, 497-510.	0.9	35
52	Soil fertility and species traits, but not diversity, drive productivity and biomass stocks in a Guyanese tropical rainforest. Functional Ecology, 2018, 32, 461-474.	1.7	90
53	Rainfall seasonality and drought performance shape the distribution of tropical tree species in Ghana. Ecology and Evolution, 2018, 8, 8582-8597.	0.8	16
54	Legume abundance along successional and rainfall gradients in Neotropical forests. Nature Ecology and Evolution, 2018, 2, 1104-1111.	3.4	107

#	Article	IF	Citations
55	Nearâ€infrared spectrometry allows fast and extensive predictions of functional traits from dry leaves and branches. Ecological Applications, 2018, 28, 1157-1167.	1.8	18
56	Effects of wild ungulates on the regeneration, structure and functioning of temperate forests: A semi-quantitative review. Forest Ecology and Management, 2018, 424, 406-419.	1.4	101
57	Can traits predict individual growth performance? A test in a hyperdiverse tropical forest. New Phytologist, 2018, 219, 109-121.	3.5	98
58	Carbon uptake by mature Amazon forests has mitigated Amazon nationsâ€™ carbon emissions. Carbon Balance and Management, 2017, 12, 1.	1.4	98
59	Abiotic and biotic drivers of biomass change in a Neotropical forest. Journal of Ecology, 2017, 105, 1223-1234.	1.9	112
60	Biodiversity in species, traits, and structure determines carbon stocks and uptake in tropical forests. Biotropica, 2017, 49, 593-603.	0.8	52
61	The integration of empirical, remote sensing and modelling approaches enhances insight in the role of biodiversity in climate change mitigation by tropical forests. Current Opinion in Environmental Sustainability, 2017, 26-27, 69-76.	3.1	11
62	Unleached Prosopis litter inhibits germination but leached stimulates seedling growth of dry woodland species. Journal of Arid Environments, 2017, 138, 44-50.	1.2	13
63	Demographic drivers of functional composition dynamics. Ecology, 2017, 98, 2743-2750.	1.5	30
64	Biodiversity and climate determine the functioning of Neotropical forests. Global Ecology and Biogeography, 2017, 26, 1423-1434.	2.7	193
65	Allometric equations for integrating remote sensing imagery into forest monitoring programmes. Global Change Biology, 2017, 23, 177-190.	4.2	254
66	Improved representation of plant functional types and physiology in the Joint UK Land Environment Simulator (JULES v4.2) using plant trait information. Geoscientific Model Development, 2016, 9, 2415-2440.	1.3	115
67	Conservative species drive biomass productivity in tropical dry forests. Journal of Ecology, 2016, 104, 817-827.	1.9	180
68	Faunal community consequence of interspecific bark trait dissimilarity in earlyâ€stage decomposing logs. Functional Ecology, 2016, 30, 1957-1966.	1.7	31
69	Evolutionary heritage influences Amazon tree ecology. Proceedings of the Royal Society B: Biological Sciences, 2016, 283, 20161587.	1.2	43
70	Resilience of Amazon forests emerges from plant traitÂdiversity. Nature Climate Change, 2016, 6, 1032-1036.	8.1	201
71	The importance of biodiversity and dominance for multiple ecosystem functions in a humanâ€modified tropical landscape. Ecology, 2016, 97, 2772-2779.	1.5	119
72	Carbon sequestration potential of second-growth forest regeneration in the Latin American tropics. Science Advances, 2016, 2, e1501639.	4.7	423

#	Article	IF	Citations
73	Landâ€use intensification effects on functional properties in tropical plant communities. Ecological Applications, 2016, 26, 174-189.	1.8	33
74	Variation in stem mortality rates determines patterns of aboveâ€ground biomass in <scp>A</scp>mazonian forests: implications for dynamic global vegetation models. Global Change Biology, 2016, 22, 3996-4013.	4.2	116
75	Testing for functional convergence of temperate rainforest tree assemblages in Chile and New Zealand. New Zealand Journal of Botany, 2016, 54, 175-203.	0.8	9
76	Oldâ€growth Neotropical forests are shifting in species and trait composition. Ecological Monographs, 2016, 86, 228-243.	2.4	61
77	Biomass resilience of Neotropical secondary forests. Nature, 2016, 530, 211-214.	13.7	763
78	Plant functional traits have globally consistent effects on competition. Nature, 2016, 529, 204-207.	13.7	655
79	Structure and composition of the liana assemblage of a mixed rain forest in the Congo Basin. Plant Ecology and Evolution, 2015, 148, 29-42.	0.3	10
80	Diversity enhances carbon storage in tropical forests. Global Ecology and Biogeography, 2015, 24, 1314-1328.	2.7	366
81	The Effects of Drought and Shade on the Performance, Morphology and Physiology of Ghanaian Tree Species. PLoS ONE, 2015, 10, e0121004.	1.1	36
82	Functional Trait Strategies of Trees in Dry and Wet Tropical Forests Are Similar but Differ in Their Consequences for Succession. PLoS ONE, 2015, 10, e0123741.	1.1	102
83	Land-use intensification effects on functional properties in tropical plant communities. , 2015, , 150521083605001.		0
84	An estimate of the number of tropical tree species. Proceedings of the National Academy of Sciences of the United States of America, 2015, 112, 7472-7477.	3.3	335
85	Amazonian Dark Earth Shapes the Understory Plant Community in a Bolivian Forest. Biotropica, 2015, 47, 152-161.	0.8	24
86	Leaf and stem economics spectra drive diversity of functional plant traits in a dynamic global vegetation model. Global Change Biology, 2015, 21, 2711-2725.	4.2	162
87	Global variability in leaf respiration in relation to climate, plant functional types and leaf traits. New Phytologist, 2015, 206, 614-636.	3.5	350
88	Nutrient resorption is associated with leaf vein density and growth performance of dipterocarp tree species. Journal of Ecology, 2015, 103, 541-549.	1.9	43
89	Effects of Amazonian Dark Earths on growth and leaf nutrient balance of tropical tree seedlings. Plant and Soil, 2015, 396, 241-255.	1.8	8
90	Hyperdominance in Amazonian forest carbon cycling. Nature Communications, 2015, 6, 6857.	5.8	214

#	Article	IF	Citations
91	Long-term decline of the Amazon carbon sink. Nature, 2015, 519, 344-348.	13.7	796
92	BAAD: a Biomass And Allometry Database for woody plants. Ecology, 2015, 96, 1445-1445.	1.5	122
93	The potential of secondary forests. Science, 2015, 348, 642-643.	6.0	41
94	Globally, functional traits are weak predictors of juvenile tree growth, and we do not know why. Journal of Ecology, 2015, 103, 978-989.	1.9	131
95	Does functional trait diversity predict aboveâ€ground biomass and productivity of tropical forests? Testing three alternative hypotheses. Journal of Ecology, 2015, 103, 191-201.	1.9	265
96	Biomass is the main driver of changes in ecosystem process rates during tropical forest succession. Ecology, 2015, 96, 1242-1252.	1.5	200
97	Rainfall and temperature affect tree species distribution in Ghana. Journal of Tropical Ecology, 2014, 30, 435-446.	0.5	48
98	Leaf Vein Length per Unit Area Is Not Intrinsically Dependent on Image Magnification: Avoiding Measurement Artifacts for Accuracy and Precision Â Â. Plant Physiology, 2014, 166, 829-838.	2.3	43
99	Markedly divergent estimates of <scp>A</scp>mazon forest carbon density from ground plots and satellites. Global Ecology and Biogeography, 2014, 23, 935-946.	2.7	248
100	Bark traits and lifeâ€history strategies of tropical dryâ€•and moist forest trees. Functional Ecology, 2014, 28, 232-242.	1.7	74
101	Functional traits predict drought performance and distribution of Mediterranean woody species. Acta Oecologica, 2014, 56, 10-18.	0.5	75
102	Changing drivers of species dominance during tropical forest succession. Functional Ecology, 2014, 28, 1052-1058.	1.7	111
103	Relative growth rate variation of evergreen and deciduous savanna tree species is driven by different traits. Annals of Botany, 2014, 114, 315-324.	1.4	52
104	Sapling performance along resource gradients drives tree species distributions within and across tropical forests. Ecology, 2014, 95, 2514-2525.	1.5	49
105	Linking sizeâ€dependent growth and mortality with architectural traits across 145 coâ€occurring tropical tree species. Ecology, 2014, 95, 353-363.	1.5	90
106	Monodominance of Parashorea chinensis on fertile soils in a Chinese tropical rain forest. Journal of Tropical Ecology, 2014, 30, 311-322.	0.5	12
107	Large trees drive forest aboveground biomass variation in moist lowland forests across the tropics. Global Ecology and Biogeography, 2013, 22, 1261-1271.	2.7	365
108	Are functional traits good predictors of species performance in restoration plantings in tropical abandoned pastures?. Forest Ecology and Management, 2013, 303, 35-45.	1.4	125

#	Article	IF	Citations
109	Successional changes in functional composition contrast for dry and wet tropical forest. Ecology, 2013, 94, 1211-1216.	1.5	239
110	Ecological impact of Prosopis species invasion in Turkwel riverine forest, Kenya. Journal of Arid Environments, 2013, 92, 89-97.	1.2	34
111	Are lianas more drought-tolerant than trees? A test for the role of hydraulic architecture and other stem and leaf traits. Oecologia, 2013, 172, 961-972.	0.9	48
112	New handbook for standardised measurement of plant functional traits worldwide. Australian Journal of Botany, 2013, 61, 167.	0.3	2,818
113	Leaf adaptations of evergreen and deciduous trees of semiâ€arid and humid savannas on three continents. Journal of Ecology, 2013, 101, 430-440.	1.9	100
114	Effects of ENSO and Temporal Rainfall Variation on the Dynamics of Successional Communities in Old-Field Succession of a Tropical Dry Forest. PLoS ONE, 2013, 8, e82040.	1.1	64
115	Photosynthetic thermotolerance of woody savanna species in China is correlated with leaf life span. Annals of Botany, 2012, 110, 1027-1033.	1.4	29
116	Effects of disturbance intensity on species and functional diversity in a tropical forest. Journal of Ecology, 2012, 100, 1453-1463.	1.9	138
117	Productive leaf functional traits of Chinese savanna species. Plant Ecology, 2012, 213, 1449-1460.	0.7	18
118	Functional diversity changes during tropical forest succession. Perspectives in Plant Ecology, Evolution and Systematics, 2012, 14, 89-96.	1.1	110
119	Ecosystem services research in Latin America: The state of the art. Ecosystem Services, 2012, 2, 56-70.	2.3	170
120	Controls on Coarse Wood Decay in Temperate Tree Species: Birth of the LOGLIFE Experiment. Ambio, 2012, 41, 231-245.	2.8	92
121	Architecture of Iberian canopy tree species in relation to wood density, shade tolerance and climate. Plant Ecology, 2012, 213, 707-722.	0.7	63
122	Distribution patterns of tropical woody species in response to climatic and edaphic gradients. Journal of Ecology, 2012, 100, 253-263.	1.9	128
123	Wood density explains architectural differentiation across 145 coâ€occurring tropical tree species. Functional Ecology, 2012, 26, 274-282.	1.7	85
124	Driving factors of forest growth: a reply to Ferry etÂal. (2012). Journal of Ecology, 2012, 100, 1069-1073.	1.9	3
