#	ARTICLE	IF	CITATIONS
1	Infections, hospitalisations, and deaths averted via a nationwide vaccination campaign using the Pfizerâ€BioNTech BNT162b2 mRNA COVID-19 vaccine in Israel: a retrospective surveillance study. <i>Lancet Infectious Diseases</i> , The, 2022, 22, 357-366.	9.1	79
2	Indirect protection of children from SARS-CoV-2 infection through parental vaccination. <i>Science</i> , 2022, 375, 1155-1159.	12.6	39
3	Identifying and Alleviating Bias Due to Differential Depletion of Susceptible People in Postmarketing Evaluations of COVID-19 Vaccines. <i>American Journal of Epidemiology</i> , 2022, 191, 800-811.	3.4	53
4	Risk of persistent and new clinical sequelae among adults aged 65 years and older during the post-acute phase of SARS-CoV-2 infection: retrospective cohort study. <i>BMJ</i> , The, 2022, 376, e068414.	6.0	105
5	SARS-CoV-2 breakthrough infections in vaccinated individuals: measurement, causes and impact. <i>Nature Reviews Immunology</i> , 2022, 22, 57-65.	22.7	217
6	Antibiotic prescribing across age groups in the Kaiser Permanente Northern California population in association with different diagnoses, and with influenza incidence, 2010-2018. <i>Epidemiology and Infection</i> , 2022, 150, 1-25.	2.1	1
7	Near real-time surveillance of the SARS-CoV-2 epidemic with incomplete data. <i>PLoS Computational Biology</i> , 2022, 18, e1009964.	3.2	8
8	Analysis of multiple bacterial species and antibiotic classes reveals large variation in the association between seasonal antibiotic use and resistance. <i>PLoS Biology</i> , 2022, 20, e3001579.	5.6	12
9	Deep-sequence phylogenetics to quantify patterns of HIV transmission in the context of a universal testing and treatment trial â€ BCPP/Ya Tsie trial. <i>ELife</i> , 2022, 11, .	6.0	12
10	Fourth Dose of BNT162b2 mRNA Covid-19 Vaccine in a Nationwide Setting. <i>New England Journal of Medicine</i> , 2022, 386, 1603-1614.	27.0	213
11	Wrong question and the wrong standard of proof. <i>Journal of Medical Ethics</i> , 2022, , medethics-2022-108320.	1.8	1
12	Mission, Organization, and Future Direction of the Serological Sciences Network for COVID-19 (SeroNet) Epidemiologic Cohort Studies. <i>Open Forum Infectious Diseases</i> , 2022, 9, .	0.9	5
13	BNT162b2 Vaccine Effectiveness against Omicron in Children 5 to 11 Years of Age. <i>New England Journal of Medicine</i> , 2022, 387, 227-236.	27.0	68
14	On the Effect of Age on the Transmission of SARS-CoV-2 in Households, Schools, and the Community. <i>Journal of Infectious Diseases</i> , 2021, 223, 362-369.	4.0	257
15	Potential Biases Arising From Epidemic Dynamics in Observational Seroprotection Studies. <i>American Journal of Epidemiology</i> , 2021, 190, 328-335.	3.4	11
16	Nowcasting for Real-Time COVID-19 Tracking in New York City: An Evaluation Using Reportable Disease Data From Early in the Pandemic. <i>JMIR Public Health and Surveillance</i> , 2021, 7, e25538.	2.6	23
17	Negative frequency-dependent selection and asymmetrical transformation stabilise multi-strain bacterial population structures. <i>ISME Journal</i> , 2021, 15, 1523-1538.	9.8	17
18	Estimating internationally imported cases during the early COVID-19 pandemic. <i>Nature Communications</i> , 2021, 12, 311.	12.8	35

#	ARTICLE	IF	CITATIONS
19	The Ethics of Continuing Placebo in SARS-CoV-2 Vaccine Trials. JAMA - Journal of the American Medical Association, 2021, 325, 219.	7.4	31
20	How to Test Severe Acute Respiratory Syndrome Coronavirus 2 Vaccines Ethically Even After One Is Available. Clinical Infectious Diseases, 2021, 73, 2332-2334.	5.8	9
21	Antibiotic Use and Presumptive Pathogens in the Veterans Affairs Healthcare System. Clinical Infectious Diseases, 2021, , .	5.8	3
22	Model-informed COVID-19 vaccine prioritization strategies by age and serostatus. Science, 2021, 371, 916-921.	12.6	588
23	How to detect and reduce potential sources of biases in studies of SARS-CoV-2 and COVID-19. European Journal of Epidemiology, 2021, 36, 179-196.	5.7	93
24	Burden of Antimicrobial Resistance: Compared to What?. Epidemiologic Reviews, 2021, 43, 53-64.	3.5	24
25	Testing SARS-CoV-2 vaccine efficacy through deliberate natural viral exposure. Clinical Microbiology and Infection, 2021, 27, 372-377.	6.0	10
26	BNT162b2 mRNA Covid-19 Vaccine in a Nationwide Mass Vaccination Setting. New England Journal of Medicine, 2021, 384, 1412-1423.	27.0	2,179
27	Concerns about SARS-CoV-2 evolution should not hold back efforts to expand vaccination. Nature Reviews Immunology, 2021, 21, 330-335.	22.7	98
28	Modeling the impact of racial and ethnic disparities on COVID-19 epidemic dynamics. ELife, 2021, 10, .	6.0	22
29	Leveraging Pathogen Sequence and Contact Tracing Data to Enhance Vaccine Trials in Emerging Epidemics. Epidemiology, 2021, 32, 698-704.	2.7	3
30	Risk of clinical sequelae after the acute phase of SARS-CoV-2 infection: retrospective cohort study. BMJ, The, 2021, 373, n1098.	6.0	267
31	Estimating the cumulative incidence of COVID-19 in the United States using influenza surveillance, virologic testing, and mortality data: Four complementary approaches. PLoS Computational Biology, 2021, 17, e1008994.	3.2	28
32	Interpreting vaccine efficacy trial results for infection and transmission. Vaccine, 2021, 39, 4082-4088.	3.8	55
33	Estimating epidemiologic dynamics from cross-sectional viral load distributions. Science, 2021, 373, .	12.6	148
34	Evaluation of post-introduction COVID-19 vaccine effectiveness: Summary of interim guidance of the World Health Organization. Vaccine, 2021, 39, 4013-4024.	3.8	110
35	Covid-19 Breakthrough Infections in Vaccinated Health Care Workers. New England Journal of Medicine, 2021, 385, 1474-1484.	27.0	1,162
36	Decreased infectivity following BNT162b2 vaccination: A prospective cohort study in Israel. Lancet Regional Health - Europe, The, 2021, 7, 100150.	5.6	101

#	ARTICLE	IF	CITATIONS
37	Estimating Vaccine Efficacy Against Transmission via Effect on Viral Load. <i>Epidemiology</i> , 2021, 32, 820-828.	2.7	9
38	Assessing the feasibility of Nipah vaccine efficacy trials based on previous outbreaks in Bangladesh. <i>Vaccine</i> , 2021, 39, 5600-5606.	3.8	11
39	Safety of the BNT162b2 mRNA Covid-19 Vaccine in a Nationwide Setting. <i>New England Journal of Medicine</i> , 2021, 385, 1078-1090.	27.0	735
40	Effectiveness of the BNT162b2 mRNA COVID-19 vaccine in pregnancy. <i>Nature Medicine</i> , 2021, 27, 1693-1695.	30.7	222
41	Big data and simple models used to track the spread of COVID-19 in cities. <i>Nature</i> , 2021, 589, 26-28.	27.8	15
42	Effectiveness of BNT162b2 Vaccine against Delta Variant in Adolescents. <i>New England Journal of Medicine</i> , 2021, 385, 2101-2103.	27.0	82
43	Effectiveness of a third dose of the BNT162b2 mRNA COVID-19 vaccine for preventing severe outcomes in Israel: an observational study. <i>Lancet, The</i> , 2021, 398, 2093-2100.	13.7	748
44	Population impact of SARS-CoV-2 variants with enhanced transmissibility and/or partial immune escape. <i>Cell</i> , 2021, 184, 6229-6242.e18.	28.9	72
45	Effectiveness of BNT162b2 mRNA COVID-19 vaccine against SARS-CoV-2 variant Beta (B.1.351) among persons identified through contact tracing in Israel: A prospective cohort study. <i>EClinicalMedicine</i> , 2021, 42, 101190.	7.1	22
46	Depletion-of-susceptibles Bias in Analyses of Intra-season Waning of Influenza Vaccine Effectiveness. <i>Clinical Infectious Diseases</i> , 2020, 70, 1484-1486.	5.8	26
47	Novel methods for the analysis of stepped wedge cluster randomized trials. <i>Statistics in Medicine</i> , 2020, 39, 815-844.	1.6	17
48	The Use of Test-negative Controls to Monitor Vaccine Effectiveness. <i>Epidemiology</i> , 2020, 31, 43-64.	2.7	102
49	Understanding COVID-19 vaccine efficacy. <i>Science</i> , 2020, 370, 763-765.	12.6	200
50	Cross-reactive memory T cells and herd immunity to SARS-CoV-2. <i>Nature Reviews Immunology</i> , 2020, 20, 709-713.	22.7	229
51	Reply to Hasford and to Spinola et al. <i>Journal of Infectious Diseases</i> , 2020, 222, 1574-1575.	4.0	0
52	Statistical Properties of Stepped Wedge Cluster-Randomized Trials in Infectious Disease Outbreaks. <i>American Journal of Epidemiology</i> , 2020, 189, 1324-1332.	3.4	7
53	Testing COVID-19 therapies to prevent progression of mild disease. <i>Lancet Infectious Diseases, The</i> , 2020, 20, 1367.	9.1	12
54	Macrolide and Nonmacrolide Resistance with Mass Azithromycin Distribution. <i>New England Journal of Medicine</i> , 2020, 383, 1941-1950.	27.0	93
