CADIALODES

#	Article	IF	CITATIONS
1	Nutritional intake and malnutrition in institutionalised and non-institutionalised older adults. British Journal of Nutrition, 2022, 128, 921-931.	1.2	2
2	Dietary glycemic load and its association with glucose metabolism and lipid profile in young adults. Nutrition, Metabolism and Cardiovascular Diseases, 2022, 32, 125-133.	1.1	4
3	Longitudinal bidirectional relationship between children's appetite and diet quality: A prospective cohort study. Appetite, 2022, 169, 105801.	1.8	16
4	Is the association between dietary patterns and cognition mediated by children's adiposity? A longitudinal approach in Generation XXI birth cohort. Clinical Nutrition, 2022, 41, 231-237.	2.3	4
5	Sex-Heterogeneity on the Association between Dietary Patterns at 4 Years of Age with Adiposity and Cardiometabolic Risk Factors at 10 Years of Age. Nutrients, 2022, 14, 540.	1.7	2
6	Active and sedentary behaviors in youth (6–14 years old): Data from the IAN-AF survey (2015–2016). Porto Biomedical Journal, 2022, 7, e161.	0.4	2
7	Risk characterization of dietary acrylamide exposure and associated factors in the Portuguese population. Food Additives and Contaminants - Part A Chemistry, Analysis, Control, Exposure and Risk Assessment, 2022, 39, 888-900.	1.1	6
8	Quantitative risk–benefit assessment of Portuguese fish and other seafood species consumption scenarios. British Journal of Nutrition, 2022, 128, 1997-2010.	1.2	3
9	Association of dietary macronutrient intake with adiposity during childhood according to sex: Findings from the generation <scp>XXI</scp> birth cohort. Pediatric Obesity, 2022, 17, e12916.	1.4	1
10	Socioâ€demographic factors associated with physical activity and sitting time patterns in adults: An analysis based on the Portuguese Food, Nutrition and Physical Activity Survey. European Journal of Sport Science, 2021, 21, 250-260.	1.4	6
11	Ultra-processed food consumption, appetitive traits and BMI in children: a prospective study. British Journal of Nutrition, 2021, 125, 1427-1436.	1.2	33
12	Deoxynivalenol exposure assessment through a modelling approach of food intake and biomonitoring data – A contribution to the risk assessment of an enteropathogenic mycotoxin. Food Research International, 2021, 140, 109863.	2.9	12
13	The association between dietary patterns and nutritional status in community-dwelling older adults—the PEN-3S study. European Journal of Clinical Nutrition, 2021, 75, 521-530.	1.3	7
14	The Southern European Atlantic Diet and all-cause mortality in older adults. BMC Medicine, 2021, 19, 36.	2.3	23
15	Association between parental and offspring BMI: results from EPACI Portugal 2012. Public Health Nutrition, 2021, 24, 2798-2807.	1.1	2
16	Healthy eating: a privilege for the better-off?. European Journal of Clinical Nutrition, 2021, , .	1.3	2
17	Dietary Patterns and Oral Health Behaviours Associated with Caries Development from 4 to 7 Years of Age. Life, 2021, 11, 609.	1.1	4
18	Risk-Benefit Assessment of Cereal-Based Foods Consumed by Portuguese Children Aged 6 to 36 Months—A Case Study under the RiskBenefit4EU Project. Nutrients, 2021, 13, 3127.	1.7	3

#	Article	IF	CITATIONS
19	Associated factors to the consumption of ultra-processed foods and its relation with dietary sources in Portugal. Journal of Nutritional Science, 2021, 10, e89.	0.7	16
20	Interaction effects of socioeconomic position in the association between eating location and diet quality in Portuguese children and adolescents: results from the National Food, Nutrition and Physical activity survey 2015-2016. British Journal of Nutrition, 2021, , 1-23.	1.2	0
21	Dietary Patterns in Portuguese Children and Adolescent Population: The UPPER Project. Nutrients, 2021, 13, 3851.	1.7	5
22	Application of a Latent Transition Model to Estimate the Usual Prevalence of Dietary Patterns. Nutrients, 2021, 13, 133.	1.7	1
23	An Ultra-Processed Food Dietary Pattern Is Associated with Lower Diet Quality in Portuguese Adults and the Elderly: The UPPER Project. Nutrients, 2021, 13, 4119.	1.7	4
24	Energy intake misreport: how different methods affect its prevalence and nutrient intake estimates. Annals of Human Biology, 2021, 48, 557-566.	0.4	0
25	Dietary patterns at 7 year-old and their association with cardiometabolic health at 10 year-old. Clinical Nutrition, 2020, 39, 1195-1202.	2.3	16
26	Characterizing energy intake misreporting and its effects on intake estimations, in the Portuguese adult population. Public Health Nutrition, 2020, 23, 1031-1040.	1.1	10
27	Total, added and free sugar intakes, dietary sources and determinants of consumption in Portugal: the National Food, Nutrition and Physical Activity Survey (IAN-AF 2015–2016). Public Health Nutrition, 2020, 23, 869-881.	1.1	31
28	Food insecurity and social determinants of health among immigrants and natives in Portugal. Food Security, 2020, 12, 579-589.	2.4	15
29	Association between living setting and malnutrition among older adults: The PEN-3S study. Nutrition, 2020, 73, 110660.	1.1	8
30	Self-perceived general health among community-dwelling Portuguese older adults: do men and women differ?. Ageing and Society, 2020, , 1-23.	1.2	1
31	Consumption of packaged foods by the Portuguese population: type of materials and its associated factors. British Food Journal, 2020, 123, 833-846.	1.6	4
32	Geriatric Assessment of the Portuguese Population Aged 65 and Over Living in the Community: The PEN-3S Study. Acta Medica Portuguesa, 2020, 33, 475.	0.2	1
33	Evaluating the association of free sugars intake and glycemic load on cardiometabolic outcomes: A prospective analysis throughout adolescence into early adulthood. Obesity Research and Clinical Practice, 2020, 14, 142-150.	0.8	2
34	Validation of the Telephone-Administered Version of the Mediterranean Diet Adherence Screener (MEDAS) Questionnaire. Nutrients, 2020, 12, 1511.	1.7	26
35	Potassium Intake and Blood Pressure: A Doseâ€Response Metaâ€Analysis of Randomized Controlled Trials. Journal of the American Heart Association, 2020, 9, e015719.	1.6	132
36	Food Consumption Data as a Tool to Estimate Exposure to Mycoestrogens. Toxins, 2020, 12, 118.	1.5	10

#	Article	IF	CITATIONS
37	Projected impact of the Portuguese sugar-sweetened beverageÂtax on obesity incidence across different age groups: AÂmodelling study. PLoS Medicine, 2020, 17, e1003036.	3.9	26
38	Validation of a new software eAT24 used to assess dietary intake in the adult Portuguese population. Public Health Nutrition, 2020, 23, 3093-3103.	1.1	14
39	The role of socio-economic factors in food consumption of Portuguese children and adolescents: results from the National Food, Nutrition and Physical Activity Survey 2015–2016. British Journal of Nutrition, 2020, 124, 591-601.	1.2	19
40	Evaluation of a short food frequency questionnaire for dietary intake assessment among children. European Journal of Clinical Nutrition, 2019, 73, 679-691.	1.3	39
41	Building capacity in risk-benefit assessment of foods: Lessons learned from the RB4EU project. Trends in Food Science and Technology, 2019, 91, 541-548.	7.8	13
42	Adherence to a healthy eating index from pre-school to school age and its associations with sociodemographic and early life factors. British Journal of Nutrition, 2019, 122, 220-230.	1.2	11
43	Eating frequency and weight status in Portuguese children aged 3–9 years: results from the cross-sectional National Food, Nutrition and Physical Activity Survey 2015–2016. Public Health Nutrition, 2019, 22, 2793-2802.	1.1	7
44	Chrono-Nutrition: The Relationship between Time-of-Day Energy and Macronutrient Intake and Children's Body Weight Status. Journal of Biological Rhythms, 2019, 34, 332-342.	1.4	15
45	RiskBenefit4EU – Partnering to strengthen Riskâ€Benefit Assessment within the EU using a holistic approach. EFSA Supporting Publications, 2019, 16, 1768E.	0.3	3
46	Child and family characteristics are associated with a dietary variety index in 4-year-old children from the Generation XXI cohort. Nutrition Research, 2019, 63, 76-85.	1.3	6
47	Malnutrition among older adults living in Portuguese nursing homes: the PEN-3S study. Public Health Nutrition, 2019, 22, 486-497.	1.1	16
48	Association between eating frequency and eating behaviours related to appetite from 4 to 7 years of age: Findings from the population-based birth cohort generation XXI. Appetite, 2019, 132, 82-90.	1.8	7
49	Modelling impacts of food industry co-regulation on noncommunicable disease mortality, Portugal. Bulletin of the World Health Organization, 2019, 97, 450-459.	1.5	15
50	Validation of a picture book to be used in a pan-European dietary survey. Public Health Nutrition, 2018, 21, 1654-1663.	1.1	16
51	Anthropometric Indices Based on Waist Circumference as Measures of Adiposity in Children. Obesity, 2018, 26, 810-813.	1.5	17
52	Dairy products and total calcium intake at 13 years of age and its association with obesity at 21 years of age. European Journal of Clinical Nutrition, 2018, 72, 541-547.	1.3	7
53	Tracking diet variety in childhood and its association with eating behaviours related to appetite: The generation XXI birth cohort. Appetite, 2018, 123, 241-248.	1.8	21
54	Tracking of food and nutrient intake from adolescence into early adulthood. Nutrition, 2018, 55-56, 84-90.	1.1	52

#	Article	IF	CITATIONS
55	Dietary patterns at 4 years old: Association with appetite-related eating behaviours in 7 year-old children. Clinical Nutrition, 2018, 37, 189-194.	2.3	6
56	Relationship between dietary vitamin D and serum 25-hydroxyvitamin D levels in Portuguese adolescents. Public Health Nutrition, 2018, 21, 325-332.	1.1	4
57	Prevalence of general and abdominal obesity in Portugal: comprehensive results from the National Food, nutrition and physical activity survey 2015–2016. BMC Public Health, 2018, 18, 614.	1.2	53
58	National Food, Nutrition, and Physical Activity Survey of the Portuguese General Population (2015-2016): Protocol for Design and Development. JMIR Research Protocols, 2018, 7, e42.	0.5	71
59	Association of maternal characteristics and behaviours with 4â€yearâ€old children's dietary patterns. Maternal and Child Nutrition, 2017, 13, .	1.4	33
60	The effect of early feeding practices on growth indices and obesity at preschool children from four European countries and UK schoolchildren and adolescents. European Journal of Pediatrics, 2017, 176, 1181-1192.	1.3	11
61	Weight following birth and childhood dietary intake: AÂprospective cohort study. Nutrition, 2017, 33, 58-64.	1.1	6
62	National Food, Nutrition and Physical Activity Survey of the Portuguese general population. EFSA Supporting Publications, 2017, 14, 1341E.	0.3	27
63	Association between dietary patterns and adiposity from 4 to 7 years of age. Public Health Nutrition, 2017, 20, 1973-1982.	1.1	22
64	Vitamin D levels and cardiometabolic risk factors in Portuguese adolescents. International Journal of Cardiology, 2016, 220, 501-507.	0.8	14
65	National survey of the Portuguese elderly nutritional status: study protocol. BMC Geriatrics, 2016, 16, 139.	1.1	21
66	Folate and folic acid in the periconceptional period: recommendations from official health organizations in thirty-six countries worldwide and WHO. Public Health Nutrition, 2016, 19, 176-189.	1.1	110
67	Social and health behavioural determinants of maternal childâ€feeding patterns in preschoolâ€aged children. Maternal and Child Nutrition, 2016, 12, 314-325.	1.4	16
68	Bidirectional association between parental child-feeding practices and body mass index at 4 and 7 y of age. American Journal of Clinical Nutrition, 2016, 103, 861-867.	2.2	88
69	Gender and obesity modify the impact of salt intake on blood pressure in children. Pediatric Nephrology, 2016, 31, 279-288.	0.9	28
70	Predictive equations for estimating regional body composition: a validation study using DXA as criterion and associations with cardiometabolic risk factors. Annals of Human Biology, 2016, 43, 219-228.	0.4	8
71	How Do Tracking and Changes in Dietary Pattern during Adolescence Relate to the Amount of Body Fat in Early Adulthood?. PLoS ONE, 2016, 11, e0149299.	1.1	18
72	An exploratory trial of parental advice for increasing vegetable acceptance in infancy. British Journal of Nutrition, 2015, 114, 328-336.	1.2	37

#	Article	IF	CITATIONS
73	Eating out of home and dietary adequacy in preschool children. British Journal of Nutrition, 2015, 114, 297-305.	1.2	22
74	Eating out is different from eating at home among individuals who occasionally eat out. A cross-sectional study among middle-aged adults from eleven European countries. British Journal of Nutrition, 2015, 113, 1951-1964.	1.2	45
75	The influence of early feeding practices on healthy diet variety score among pre-school children in four European birth cohorts. Public Health Nutrition, 2015, 18, 1774-1784.	1.1	37
76	Maternal child-feeding practices and dietary inadequacy of 4-year-old children. Appetite, 2015, 92, 15-23.	1.8	41
77	Serum Uric Acid and Cardiovascular Risk Among Portuguese Adolescents. Journal of Adolescent Health, 2015, 56, 376-381.	1.2	5
78	Evaluating the effect of energy-dense foods consumption on preschool children's body mass index: a prospective analysis from 2 to 4Âyears of age. European Journal of Nutrition, 2015, 54, 835-843.	1.8	25
79	Birth Weight and Eating Behaviors of Young Children. Journal of Pediatrics, 2015, 166, 59-65.e3.	0.9	32
80	Dietary patterns among 13-y-old Portuguese adolescents. Nutrition, 2015, 31, 148-154.	1.1	21
81	Associations between a posteriori defined dietary patterns and bone mineral density in adolescents. European Journal of Nutrition, 2015, 54, 273-282.	1.8	12
82	Association between energy-dense food consumption at 2 years of age and diet quality at 4 years of age. British Journal of Nutrition, 2014, 111, 1275-1282.	1.2	18
83	Longitudinal changes in adiposity during adolescence: a population-based cohort. BMJ Open, 2014, 4, e004380.	0.8	12
84	Determinants of Weight Loss Dieting Among Adolescents: A Longitudinal Analysis. Journal of Adolescent Health, 2014, 54, 360-363.	1.2	19
85	Could the Food Neophobia Scale be adapted to pregnant women? A confirmatory factor analysis in a Portuguese sample. Appetite, 2014, 75, 110-116.	1.8	21
86	Combination and adaptation of two tools to assess parental feeding practices in pre-school children. Eating Behaviors, 2014, 15, 383-387.	1.1	19
87	Multivariate analysis of lifestyle, constitutive and body composition factors influencing bone health in community-dwelling older adults from Madeira, Portugal. Archives of Gerontology and Geriatrics, 2014, 59, 83-90.	1.4	8
88	Identifying adolescents with high fasting glucose: The importance of adding grandparents' data when assessing family history of diabetes. Preventive Medicine, 2013, 57, 500-504.	1.6	4
89	Systematic review of saturated fatty acids on inflammation and circulating levels of adipokines. Nutrition Research, 2013, 33, 687-695.	1.3	97
90	Effect of television viewing on food and nutrient intake among adolescents. Nutrition, 2013, 29, 1362-1367.	1.1	26

#	Article	IF	CITATIONS
91	Saturated fatty acids intake in relation to C-reactive protein, adiponectin, and leptin: A population-based study. Nutrition, 2013, 29, 892-897.	1.1	28
92	Caffeine intake reduces sleep duration in adolescents. Nutrition Research, 2013, 33, 726-732.	1.3	47
93	The Southern European Atlantic Diet is associated with lower concentrations of markers of coronary risk. Atherosclerosis, 2013, 226, 502-509.	0.4	35
94	The influence of early feeding practices on fruit and vegetable intake among preschool children in 4 European birth cohorts. American Journal of Clinical Nutrition, 2013, 98, 804-812.	2.2	113
95	Pilot study in the view of a Panâ€European dietary survey – adolescents, adults and elderly. EFSA Supporting Publications, 2013, 10, 508E.	0.3	41
96	Short-Time Variation in Serum Uric Acid Concentrations in Post-Myocardial Infarction Patients. Clinical Laboratory, 2013, 59, 263-70.	0.2	2
97	Body image and depressive symptoms in 13â€yearâ€old adolescents. Journal of Paediatrics and Child Health, 2012, 48, E165-71.	0.4	34
98	A Review of Methods to Assess Parental Feeding Practices and Preschool Children's Eating Behavior: The Need for Further Development of Tools. Journal of the Academy of Nutrition and Dietetics, 2012, 112, 1578-1602.e8.	0.4	89
99	Association between dietary patterns and metabolic syndrome in a sample of portuguese adults. Nutrition Journal, 2012, 11, 64.	1.5	37
100	A restricted mixture model for dietary pattern analysis in small samples. Statistics in Medicine, 2012, 31, 2137-2150.	0.8	5
101	Comparison of Modes of Administration and Response Options in the Assessment of Subjective Health Using the First Question of SF-36. Social Indicators Research, 2012, 107, 305-315.	1.4	3
102	Social and behavioural determinants of alcohol consumption. Annals of Human Biology, 2011, 38, 337-344.	0.4	21
103	Family history of coronary heart disease, health care and health behaviors. Revista Portuguesa De Cardiologia, 2011, 30, 703-710.	0.2	3
104	Family history of coronary heart disease, health care and health behaviors. Revista Portuguesa De Cardiologia (English Edition), 2011, 30, 703-710.	0.2	5
105	Food sources of nutrients among 13-year-old Portuguese adolescents. Public Health Nutrition, 2011, 14, 1970-1978.	1.1	21
106	After a quarter of century, reduction in Coronary Heart Disease Mortality bypassed young adult males in Portugal. International Journal of Cardiology, 2011, 152, 279-281.	0.8	3
107	Food sources of nutrients among 13-year-old Portuguese adolescents—Erratum. Public Health Nutrition, 2011, 14, 2270-2270.	1.1	1
108	The Role of Physical Activity and Diet on Overall and Central Obesity Incidence. Journal of Physical Activity and Health, 2011, 8, 811-819.	1.0	9

#	Article	IF	CITATIONS
109	Major Habitual Dietary Patterns Are Associated with Acute Myocardial Infarction and Cardiovascular Risk Markers in a Southern European Population. Journal of the American Dietetic Association, 2011, 111, 241-250.	1.3	24
110	Clustering behaviours among 13-year-old Portuguese adolescents. Zeitschrift Fur Gesundheitswissenschaften, 2011, 19, 21-27.	0.8	10
111	Dietary intake of α-linolenic acid and low ratio of <i>n</i> -6: <i>n</i> -3 PUFA are associated with decreased exhaled NO and improved asthma control. British Journal of Nutrition, 2011, 106, 441-450.	1.2	69
112	Sugar-sweetened beverage intake and overweight in children from a Mediterranean country. Public Health Nutrition, 2011, 14, 127-132.	1.1	25
113	Dietary patterns and gastric cancer in a Portuguese urban population. International Journal of Cancer, 2010, 127, 433-441.	2.3	21
114	Food Patterns According to Sociodemographics, Physical Activity, Sleeping and Obesity in Portuguese Children. International Journal of Environmental Research and Public Health, 2010, 7, 1121-1138.	1.2	80
115	Alcohol Intake and Systemic Markers of InflammationShape of the Association According to Sex and Body Mass Index. Alcohol and Alcoholism, 2010, 45, 119-125.	0.9	51
116	Adherence to the Southern European Atlantic Diet and occurrence of nonfatal acute myocardial infarction. American Journal of Clinical Nutrition, 2010, 92, 211-217.	2.2	45
117	Testing an adaptation of the EPIC Physical Activity Questionnaire in Portuguese adults: A validation study that assesses the seasonal bias of self-report. Annals of Human Biology, 2010, 37, 186-198.	0.4	25
118	Overall and central obesity incidence in an urban Portuguese population. Preventive Medicine, 2010, 50, 50-55.	1.6	32
119	Measurement of Dietary Intake of Fatty Acids in Pregnant Women: Comparison of Self-Reported Intakes with Adipose Tissue Levels. Annals of Epidemiology, 2010, 20, 599-603.	0.9	12
120	Salt Intake and Type of Intestinal Metaplasia inHelicobacter Pylori-Infected Portuguese Men. Nutrition and Cancer, 2010, 62, 1153-1160.	0.9	3
121	Gender heterogeneity in the association between lifestyles and non-fatal acute myocardial infarction. Public Health Nutrition, 2009, 12, 1799-1806.	1.1	3
122	Self-reporting weight and height: misclassification effect on the risk estimates for acute myocardial infarction. European Journal of Public Health, 2009, 19, 548-553.	0.1	26
123	Impact of risk factors for non-fatal acute myocardial infarction. European Journal of Epidemiology, 2009, 24, 425-432.	2.5	29
124	Validity and reproducibility of a semi-quantitative food frequency questionnaire for use among Portuguese pregnant women. Maternal and Child Nutrition, 2009, 6, 105-19.	1.4	37
125	Modelling over week patterns of alcohol consumption. Alcohol and Alcoholism, 2008, 43, 215-222.	0.9	12
126	Dietary intake and different types of physical activity: full-day energy expenditure, occupational and leisure-time. Public Health Nutrition, 2008, 11, 841-848.	1.1	21

#	Article	IF	CITATIONS
127	Fruit and vegetable consumption and gastric cancer by location and histological type: case–control and meta-analysis. European Journal of Cancer Prevention, 2007, 16, 312-327.	0.6	153
128	Tobacco smoking and acute myocardial infarction in young adults: A population-based case-control study. Preventive Medicine, 2007, 44, 311-316.	1.6	44
129	Intake and Adipose Tissue Composition of Fatty Acids and Risk of Myocardial Infarction in a Male Portuguese Community Sample. Journal of the American Dietetic Association, 2007, 107, 276-286.	1.3	188
130	Physical activity and risk of myocardial infarction after the fourth decade of life. Revista Portuguesa De Cardiologia, 2005, 24, 1191-207.	0.2	9
131	Investigating the effect of nonparticipation using a population-based case–control study on myocardial infarction. Annals of Epidemiology, 2004, 14, 437-441.	0.9	132
132	The influence of item order of the Household Food Security Survey Module on the assessment of food insecurity in households with children. Public Health Nutrition, 0, , 1-21.	1.1	0
133	Dietary exposure to artificial sweeteners and associated factors in the Portuguese population. Food Additives and Contaminants - Part A Chemistry, Analysis, Control, Exposure and Risk Assessment, 0, , 1-16.	1.1	1
