#	ARTICLE	IF	CITATIONS
1	Sex-specific effects of developmental exposure to polychlorinated biphenyls on neuroimmune and dopaminergic endpoints in adolescent rats. <i>Neurotoxicology and Teratology</i> , 2020, 79, 106880.	2.4	16
2	Comparing Postnatal Development of Gonadal Hormones and Associated Social Behaviors in Rats, Mice, and Humans. <i>Endocrinology</i> , 2018, 159, 2596-2613.	2.8	150
3	Sex differences in effects of gestational polychlorinated biphenyl exposure on hypothalamic neuroimmune and neuromodulator systems in neonatal rats. <i>Toxicology and Applied Pharmacology</i> , 2018, 353, 55-66.	2.8	17
4	Aging and estradiol effects on gene expression in the medial preoptic area, bed nucleus of the stria terminalis, and posterodorsal medial amygdala of male rats. <i>Molecular and Cellular Endocrinology</i> , 2017, 442, 153-164.	3.2	5
5	Adolescence and Reward: Making Sense of Neural and Behavioral Changes Amid the Chaos. <i>Journal of Neuroscience</i> , 2017, 37, 10855-10866.	3.6	122
6	Pubertal pairing facilitates adult sexual behavior in male rats. <i>Developmental Psychobiology</i> , 2017, 59, 111-117.	1.6	7
7	Two-hit exposure to polychlorinated biphenyls at gestational and juvenile life stages: 2. Sex-specific neuromolecular effects in the brain. <i>Molecular and Cellular Endocrinology</i> , 2016, 420, 125-137.	3.2	34
8	Two-hit exposure to polychlorinated biphenyls at gestational and juvenile life stages: 1. Sexually dimorphic effects on social and anxiety-like behaviors. <i>Hormones and Behavior</i> , 2016, 78, 168-177.	2.1	54
9	Endocrine-disrupting actions of PCBs on brain development and social and reproductive behaviors. <i>Current Opinion in Pharmacology</i> , 2014, 19, 134-144.	3.5	66
10	Dopamine Mediates Testosterone-Induced Social Reward in Male Syrian Hamsters. <i>Endocrinology</i> , 2013, 154, 1225-1234.	2.8	46
11	Adolescent brain maturation is necessary for adult-typical mesocorticolimbic responses to a rewarding social cue. <i>Developmental Neurobiology</i> , 2013, 73, 856-869.	3.0	13
12	Adolescent gain in positive valence of a socially relevant stimulus: engagement of the mesocorticolimbic reward circuitry. <i>European Journal of Neuroscience</i> , 2013, 37, 457-468.	2.6	28
13	The Teenage Brain. <i>Current Directions in Psychological Science</i> , 2013, 22, 128-133.	5.3	23
14	Maturation of social reward in adult male Syrian hamsters does not depend on organizational effects of pubertal testosterone. <i>Hormones and Behavior</i> , 2012, 62, 180-185.	2.1	12
15	Male Syrian hamsters demonstrate a conditioned place preference for sexual behavior and female chemosensory stimuli. <i>Hormones and Behavior</i> , 2010, 58, 410-414.	2.1	26
