Version: 2024-02-01

94 papers	3,061 citations	147801 31 h-index	175258 52 g-index
94 all docs	94 docs citations	94 times ranked	2222 citing authors

#	Article	IF	Citations
1	Vasodilatory mechanisms in contracting skeletal muscle. Journal of Applied Physiology, 2004, 97, 393-403.	2.5	348
2	Intensity and duration threshold for aerobic exercise-induced analgesia to pressure pain. Archives of Physical Medicine and Rehabilitation, 2004, 85, 1183-1187.	0.9	164
3	The Paradox of Sympathetic Vasoconstriction in Exercising Skeletal Muscle. Exercise and Sport Sciences Reviews, 2001, 29, 159-163.	3.0	120
4	Mechanical compression elicits vasodilatation in rat skeletal muscle feed arteries. Journal of Physiology, 2006, 572, 561-567.	2.9	112
5	Effect of head-out water immersion on cardiorespiratory response to dynamic exercise. Journal of the American College of Cardiology, 1987, 10, 1254-1258.	2.8	93
6	Experimentally induced pain perception is acutely reduced by aerobic exercise in people with chronic low back pain. Journal of Rehabilitation Research and Development, 2005, 42, 183.	1.6	90
7	Skeletal muscle vasodilatation at the onset of exercise. Journal of Physiology, 2007, 583, 825-833.	2.9	90
8	Rapid vasodilation in response to a brief tetanic muscle contraction. Journal of Applied Physiology, 1999, 87, 1741-1746.	2.5	76
9	Exercise attenuates Î±-adrenergic-receptor responsiveness in skeletal muscle vasculature. Journal of Applied Physiology, 2001, 90, 172-178.	2.5	76
10	Local control of blood flow. American Journal of Physiology - Advances in Physiology Education, 2011, 35, 5-15.	1.6	76
11	Sympathetic vasoconstriction in active skeletal muscles during dynamic exercise. Journal of Applied Physiology, 1997, 83, 1575-1580.	2.5	68
12	Spatial Distribution and Mechanical Function of Elastin in Resistance Arteries. Arteriosclerosis, Thrombosis, and Vascular Biology, 2011, 31, 2889-2896.	2.4	68
13	Maximal inspiratory pressure following maximal exercise in trained and untrained subjects. Medicine and Science in Sports and Exercise, 1990, 22, 811.	0.4	63
14	Arterial blood pressure response to rowing. Medicine and Science in Sports and Exercise, 1994, 26, 715-719.	0.4	62
15	Poling forces during roller skiing: effects of technique and speed. Medicine and Science in Sports and Exercise, 1998, 30, 1645-1653.	0.4	60
16	Vasodilatation is obligatory for contraction-induced hyperaemia in canine skeletal muscle. Journal of Physiology, 2004, 557, 1013-1020.	2.9	58
17	Î±-Adrenergic vasoconstriction in active skeletal muscles during dynamic exercise. American Journal of Physiology - Heart and Circulatory Physiology, 1999, 277, H33-H39.	3.2	53
18	Physiological responses to different cross country skiing techniques on level terrain. Medicine and Science in Sports and Exercise, 1990, 22, 841.	0.4	52

#	Article	IF	Citations
19	Role of nitric oxide in exercise sympatholysis. Journal of Applied Physiology, 2004, 97, 417-423.	2.5	49
20	Mechanical activation of angiotensin II type 1 receptors causes actin remodelling and myogenic responsiveness in skeletal muscle arterioles. Journal of Physiology, 2016, 594, 7027-7047.	2.9	49
21	Muscle blood flow response to contraction: influence of venous pressure. Journal of Applied Physiology, 2005, 98, 72-76.	2.5	47
22	The future of graduate and postdoctoral training in the biosciences. ELife, 2017, 6, .	6.0	47
23	Muscle pump does not enhance blood flow in exercising skeletal muscle. Journal of Applied Physiology, 2003, 94, 6-10.	2.5	42
24	Skeletal muscle vasodilation at the onset of exercise. Journal of Applied Physiology, 1998, 85, 1649-1654.	2.5	38
25	Attenuated vascular responsiveness to noradrenaline release during dynamic exercise in dogs. Journal of Physiology, 2002, 541, 637-644.	2.9	38
26	Rapid Vascular Responses to Muscle Contraction. Exercise and Sport Sciences Reviews, 2008, 36, 25-29.	3.0	38
27	Physiological aspects of competitive crossâ€country skiing. Journal of Sports Sciences, 1992, 10, 3-27.	2.0	37
28	Autonomic control of skeletal muscle blood flow at the onset of exercise. American Journal of Physiology - Heart and Circulatory Physiology, 1999, 277, H1872-H1877.	3.2	37
29	Poling forces during roller skiing: effects of grade. Medicine and Science in Sports and Exercise, 1998, 30, 1637-1644.	0.4	36
30	Is the blood flow response to a single contraction determined by work performed?. Journal of Applied Physiology, 2004, 96, 2146-2152.	2.5	35
31	Thermal Pain Perception After Aerobic Exercise. Archives of Physical Medicine and Rehabilitation, 2005, 86, 1019-1023.	0.9	35
32	Influence of Body Mass on Energy Cost of Roller Skiing. International Journal of Sport Biomechanics, 1990, 6, 374-385.	2.0	33
33	Î±₁-Adrenergic-receptor responsiveness in skeletal muscle during dynamic exercise. Journal of Applied Physiology, 1998, 85, 2277-2283.	2.5	31
34	Integration of Central and Peripheral Regulation of the Circulation during Exercise: Acute and Chronic Adaptations. , 2017, 8, 103-151.		31
35	Blood flow response to muscle contractions is more closely related to metabolic rate than contractile work. Journal of Applied Physiology, 2005, 98, 2096-2100.	2.5	29
36	Putting PhDs to Work: Career Planning for Today's Scientist. CBE Life Sciences Education, 2014, 13, 49-53.	2.3	29

#	Article	IF	Citations
37	Physiological comparison of uphill roller skiing. Medicine and Science in Sports and Exercise, 1994, 26, 1284???1289.	0.4	28
38	Vasoconstriction in active skeletal muscles: a potential role for P2X purinergic receptors?. Journal of Applied Physiology, 2003, 95, 953-959.	2.5	28
39	Does the amount of exercising muscle alter the aerobic demand of dynamic exercise?. European Journal of Applied Physiology and Occupational Physiology, 1996, 74, 541-547.	1.2	27
40	Relationships among heart rate, lactate concentration, and perceived effort for different types of rhythmic exercise in women. Archives of Physical Medicine and Rehabilitation, 1996, 77, 237-241.	0.9	27
41	Renal hemodynamic responses to dynamic exercise in rabbits. Journal of Applied Physiology, 1998, 85, 1605-1614.	2.5	26
42	Elevated temperature decreases sensitivity of P2X purinergic receptors in skeletal muscle arteries. Journal of Applied Physiology, 2005, 99, 995-998.	2.5	26
43	Sympathetic restraint of muscle blood flow at the onset of dynamic exercise. Journal of Applied Physiology, 2002, 92, 2452-2456.	2.5	24
44	Do P2X purinergic receptors regulate skeletal muscle blood flow during exercise?. American Journal of Physiology - Heart and Circulatory Physiology, 2004, 286, H633-H639.	3.2	24
45	Delta Efficiency of Uphill Roller Skiing With the Double Pole and Diagonal Stride Techniques. Applied Physiology, Nutrition, and Metabolism, 1995, 20, 465-479.	1.7	23
46	Vasoconstriction in exercising skeletal muscles: a potential role for neuropeptide Y?. American Journal of Physiology - Heart and Circulatory Physiology, 2004, 287, H144-H149.	3.2	23
47	Development of Baroreflex Control of Heart Rate in Swine. Pediatric Research, 1990, 27, 148-152.	2.3	22
48	Neuropeptide Y1receptor vasoconstriction in exercising canine skeletal muscles. Journal of Applied Physiology, 2005, 99, 2115-2120.	2.5	22
49	Effect of Velocity on Cycle Rate and Length for Three Roller Skiing Techniques. Journal of Applied Biomechanics, 1995, 11, 257-266.	0.8	21
50	Autonomic control of skeletal muscle vasodilation during exercise. Journal of Applied Physiology, 1997, 83, 2037-2042.	2.5	21
51	Effect of rolling resistance on poling forces and metabolic demands of roller skiing. Medicine and Science in Sports and Exercise, 1998, 30, 755-762.	0.4	21
52	Positional differences in reactive hyperemia provide insight into initial phase of exercise hyperemia. Journal of Applied Physiology, 2015, 119, 569-575.	2.5	20
53	Acidosis attenuates P2X purinergic vasoconstriction in skeletal muscle arteries. American Journal of Physiology - Heart and Circulatory Physiology, 2005, 288, H129-H132.	3.2	19
54	Physiological effects of technique and rolling resistance in uphill roller skiing. Medicine and Science in Sports and Exercise, 1998, 30, 311-317.	0.4	19

#	Article	IF	Citations
55	Dynamic exercise attenuates sympathetic responsiveness of canine vascular smooth muscle. Journal of Applied Physiology, 2000, 89, 2294-2299.	2.5	17
56	Elevation in resting blood flow attenuates exercise hyperemia. Journal of Applied Physiology, 2002, 93, 134-140.	2.5	17
57	Endogenous vascular remodeling in ischemic skeletal muscle: a role for nitric oxide. Journal of Applied Physiology, 2003, 94, 935-940.	2.5	17
58	Physiological Responses to Specific Maximal Exercise Tests for Cross-Country Skiing. Applied Physiology, Nutrition, and Metabolism, 1993, 18, 359-365.	1.7	16
59	Muscle chemoreflex increases renal sympathetic nerve activity during exercise. Journal of Applied Physiology, 1997, 82, 1818-1825.	2.5	16
60	Small Artery Elastin Distribution and Architectureâ€"Focus on Three Dimensional Organization. Microcirculation, 2016, 23, 614-620.	1.8	14
61	Physiologic comparison of forward and reverse wheelchair propulsion. Archives of Physical Medicine and Rehabilitation, 1998, 79, 36-40.	0.9	12
62	Leveraging a collaborative consortium model of mentee/mentorÂtraining to foster career progression of underrepresented postdoctoral researchers and promote institutional diversity and inclusion. PLoS ONE, 2020, 15, e0238518.	2.5	12
63	Brief serotonin exposure initiates arteriolar inward remodeling processes in vivo that involve transglutaminase activation and actin cytoskeleton reorganization. American Journal of Physiology - Heart and Circulatory Physiology, 2016, 310, H188-H198.	3.2	11
64	Acute effects of ski waxing on pulmonary function. Medicine and Science in Sports and Exercise, 1997, 29, 1379-1382.	0.4	10
65	Counterpoint: The muscle pump is not an important determinant of muscle blood flow during exercise. Journal of Applied Physiology, 2005, 99, 372-4; discussion 374-5.	2.5	9
66	An individual development plan will help you get where you want to go. Physiologist, 2013, 56, 43-4.	0.0	9
67	Functional anatomy of the vagal innervation of the cervical trachea of the dog. Journal of Applied Physiology, 2000, 89, 139-142.	2.5	7
68	Parasympathetic innervation of canine tracheal smooth muscle. Journal of Applied Physiology, 2001, 90, 23-28.	2.5	6
69	Î±-Adrenergic receptor-mediated restraint of skeletal muscle blood flow during prolonged exercise. Journal of Applied Physiology, 2006, 100, 1563-1568.	2.5	6
70	Frequency and pattern dependence of adrenergic and purinergic vasoconstriction in rat skeletal muscle arteries. Experimental Physiology, 2006, 91, 1051-1058.	2.0	6
71	Development of an Image-Based System for Measurement of Membrane Potential, Intracellular Ca2+ and Contraction in Arteriolar Smooth Muscle Cells. Microcirculation, 2010, 17, 629-640.	1.8	6
72	Tracheal tone and the role of ionotropic glutamate receptors in the nucleus ambiguus. Brain Research, 2004, 1021, 54-62.	2.2	5

#	Article	IF	Citations
73	Feedforward vasodilatation at the onset of exercise. Journal of Physiology, 2007, 583, 811-811.	2.9	5
74	Central and Peripheral Postexercise Blood Pressure and Vascular Responses in Young Adults with Obesity. Medicine and Science in Sports and Exercise, 2021, 53, 994-1002.	0.4	5
75	Arteriolar vasodilation involves actin depolymerization. American Journal of Physiology - Heart and Circulatory Physiology, 2018, 315, H423-H428.	3.2	4
76	Laser revascularization of ischemic skeletal muscle. Journal of Surgical Research, 2003, 115, 257-264.	1.6	3
77	Î±-Adrenergic receptor responsiveness is preserved during prolonged exercise. American Journal of Physiology - Heart and Circulatory Physiology, 2007, 292, H392-H398.	3.2	3
78	Preserved ability to blunt sympatheticallyâ€•mediated vasoconstriction in exercising skeletal muscle of young obese humans. Physiological Reports, 2019, 7, e14068.	1.7	3
79	RESPIRATORY ALTERATIONS WITH INTRAPERICARDIAL PROCAINE IN THE CONSCIOUS RABBIT. Clinical and Experimental Pharmacology and Physiology, 1993, 20, 753-762.	1.9	2
80	Tripartite function of ATP in vascular signalling. Journal of Physiology, 2008, 586, 4783-4784.	2.9	2
81	Does the amount of exercising muscle alter the aerobic demand of dynamic exercise?. European Journal of Applied Physiology, 1996, 74, 541-547.	2.5	2
82	Reactive hyperaemia augments local heatâ€•induced skin hyperaemia. Experimental Physiology, 2022, 107, 383-389.	2.0	2
83	Attenuated sympathetic vasoconstriction in contracting muscles: just say NO. Journal of Physiology, 2002, 540, 2-2.	2.9	1
84	Biobusiness consulting to prepare scientists for industry careers. Nature Biotechnology, 2019, 37, 821-825.	17.5	1
85	Limb position affects magnitude of reactive hyperemia. FASEB Journal, 2010, 24, 804.12.	0.5	1
86	Role of Nitric Oxide and Î±-Adrenergic Receptor Responsiveness in Exercising Skeletal Muscle. Journal of Applied Physiology, 2005, 98, 1584-1585.	2.5	0
87	Isoflurane abolishes purinergic receptor mediated restraint of skeletal muscle blood flow. FASEB Journal, 2007, 21, A886.	0.5	0
88	Differential effects of collagenase and elastase on arteriolar vasomotor responses. FASEB Journal, 2009, 23, 951.5.	0.5	0
89	Non â€•adrenergic receptor mediated tonic vasoconstriction in skeletal muscle does not change with age. FASEB Journal, 2009, 23, 787.11.	0.5	0
90	How the National Postdoctoral Association Can Help You to Maximize Your Postdoc Experience.. Biology of Reproduction, 2010, 83, 45-45.	2.7	0

#	Article	IF	Citations
91	Ageâ€Related Changes in the Expression of Elastin in Small cerebral and Mesenteric Arteries. FASEB Journal, 2012, 26, 861.4.	0.5	0
92	Development of the elastin network in the walls of resistance arteries from neonatal and adult rats. FASEB Journal, 2013, 27, 679.8.	0.5	0
93	Endothelium Mediated Dilation Does Not Blunt Î± 1 â€adrenergic Vasoconstriction in First Order Arterioles. FASEB Journal, 2018, 32, 726.5.	0.5	0
94	Spectral Changes in Skin Blood Flow Do Not Reflect Pressure Manipulations. FASEB Journal, 2022, 36, .	0.5	0
