#	ARTICLE	IF	CITATIONS
1	Autologous Posterior Rectus Sheath as a Vascularized Onlay Flap: a Novel Approach to Hiatal Hernia Repair. <i>Journal of Gastrointestinal Surgery</i> , 2022, 26, 268-274.	0.9	2
2	Defining Microbiome Readiness for Surgery: Dietary Prehabilitation and Stool Biomarkers as Predictive Tools to Improve Outcome. <i>Annals of Surgery</i> , 2022, 276, e361-e369.	2.1	17
3	OUP accepted manuscript. <i>Clinical Infectious Diseases</i> , 2022, 74, S251-S256.	2.9	0
4	“The invisible enemy: Gut microbiota and their role in anastomotic leak”. <i>Seminars in Colon and Rectal Surgery</i> , 2022, , 100880.	0.2	1
5	<i>Enterococcus faecalis</i> promotes a migratory and invasive phenotype in colon cancer cells. <i>Neoplasia</i> , 2022, 27, 100787.	2.3	18
6	Misinformation About the Human Gut Microbiome in YouTube Videos: Cross-sectional Study. <i>JMIR Formative Research</i> , 2022, 6, e37546.	0.7	2
7	<i>Letter to the Editor:</i> Between-Group Comparison Fallacy (Re: <i>Surg Infect</i> 2022;3:1-8; doi: 10.1093/sid/tiab114) Tj ETQq1 1 0.784314 rgBT /Overlock 1	0.7	4
8	Emerging Paradigms in the Prevention of Surgical Site Infection: The Patient Microbiome and Antimicrobial Resistance. <i>Anesthesiology</i> , 2022, 137, 252-262.	1.3	13
9	Prevention of Anastomotic Leak Via Local Application of Tranexamic Acid to Target Bacterial-mediated Plasminogen Activation. <i>Annals of Surgery</i> , 2021, 274, e1038-e1046.	2.1	15
10	Sepsis and the Microbiome: A Vicious Cycle. <i>Journal of Infectious Diseases</i> , 2021, 223, S264-S269.	1.9	40
11	Clinical predictors of donor antibody titre and correlation with recipient antibody response in a COVID-19 convalescent plasma clinical trial. <i>Journal of Internal Medicine</i> , 2021, 289, 559-573.	2.7	41
12	Western-type diet influences mortality from necrotising pancreatitis and demonstrates a central role for butyrate. <i>Gut</i> , 2021, 70, 915-927.	6.1	66
13	The Benefits of Robotic Surgery: Are They Technical or Molecular?. <i>Journal of Gastrointestinal Surgery</i> , 2021, 25, 578-580.	0.9	0
14	Bowel preparation in colorectal surgery: the day of reckoning is here. <i>British Journal of Surgery</i> , 2021, 108, 340-341.	0.1	3
15	Peer Review and the Quest for Technical Excellence in Surgery—A Lesson in Self-awareness. <i>JAMA Surgery</i> , 2021, 156, e205557.	2.2	0
16	Patient Acceptance of Routine Serial Postoperative Endoscopy Following Low Anterior Resection (LAR) and Its Ability to Detect Biomarkers in Anastomotic Lavage Fluid. <i>World Journal of Surgery</i> , 2021, 45, 2227-2234.	0.8	7
17	Harnessing the Microbiome to Optimize Surgical Outcomes in the COVID-19 Era. <i>Annals of Surgery Open</i> , 2021, 2, e056.	0.7	0
18	Anastomotic Leak: Toward an Understanding of Its Root Causes. <i>Journal of Gastrointestinal Surgery</i> , 2021, 25, 2966-2975.	0.9	15

#	ARTICLE	IF	CITATIONS
19	<i>Enterococcus faecalis</i> Is Associated with Anastomotic Leak in Patients Undergoing Colorectal Surgery. <i>Surgical Infections</i> , 2021, 22, 1047-1051.	0.7	12
20	Case presentation and panel discussion: critical illness. <i>Journal of Parenteral and Enteral Nutrition</i> , 2021, , .	1.3	0
21	Re-examining chemically defined liquid diets through the lens of the microbiome. <i>Nature Reviews Gastroenterology and Hepatology</i> , 2021, 18, 903-911.	8.2	8
22	Spatioregional assessment of the gut microbiota in experimental necrotizing pancreatitis. <i>BJS Open</i> , 2021, 5, .	0.7	9
23	Influence of the Microbiome on Anastomotic Leak. <i>Clinics in Colon and Rectal Surgery</i> , 2021, 34, 439-446.	0.5	15
24	<i>Enterococcus faecalis</i> exploits the human fibrinolytic system to drive excess collagenolysis: implications in gut healing and identification of druggable targets. <i>American Journal of Physiology - Renal Physiology</i> , 2020, 318, G1-G9.	1.6	25
25	Western Diet Promotes Intestinal Colonization by Collagenolytic Microbes and Promotes Tumor Formation After Colorectal Surgery. <i>Gastroenterology</i> , 2020, 158, 958-970.e2.	0.6	53
26	Low-fat/high-fibre diet prehabilitation improves anastomotic healing via the microbiome: an experimental model. <i>British Journal of Surgery</i> , 2020, 107, 743-755.	0.1	48
27	Bowel preparation under siege. <i>British Journal of Surgery</i> , 2020, 107, 167-170.	0.1	20
28	Infliximab Does Not Promote the Presence of Collagenolytic Bacteria in a Mouse Model of Colorectal Anastomosis. <i>Journal of Gastrointestinal Surgery</i> , 2020, 24, 2637-2642.	0.9	3
29	Surgical site infections following elective surgery – Authors' reply. <i>Lancet Infectious Diseases</i> , The, 2020, 20, 899.	4.6	3
30	Examining the Effects of Unintentionally Created Stress-Focusing Centers on Anastomotic Healing as Sequelae of Non-Linear Geometry. <i>Journal of the American College of Surgeons</i> , 2020, 231, S95-S96.	0.2	0
31	Fecal microbiota transplant rescues mice from human pathogen mediated sepsis by restoring systemic immunity. <i>Nature Communications</i> , 2020, 11, 2354.	5.8	75
32	Can the Cecal Ligation and Puncture Model Be Repurposed To Better Inform Therapy in Human Sepsis?. <i>Infection and Immunity</i> , 2020, 88, .	1.0	32
33	Is bariatric surgery resolving NAFLD via microbiota-mediated bile acid ratio reversal? A comprehensive review. <i>Surgery for Obesity and Related Diseases</i> , 2020, 16, 1361-1369.	1.0	19
34	Spatial Compartmentalization of the Microbiome between the Lumen and Crypts Is Lost in the Murine Cecum following the Process of Surgery, Including Overnight Fasting and Exposure to Antibiotics. <i>MSystems</i> , 2020, 5, .	1.7	21
35	The Biology of Anastomotic Healing—the Unknown Overwhelms the Known. <i>Journal of Gastrointestinal Surgery</i> , 2020, 24, 2160-2166.	0.9	28
36	The use of fecal microbiota transplant in sepsis. <i>Translational Research</i> , 2020, 226, 12-25.	2.2	25

#	ARTICLE	IF	CITATIONS
37	An <i>in vitro</i> tissue model for screening sustained release of phosphate-based therapeutic attenuation of pathogen-induced proteolytic matrix degradation. <i>Journal of Materials Chemistry B</i> , 2020, 8, 2454-2465.	2.9	3
38	Re-examining causes of surgical site infections following elective surgery in the era of asepsis. <i>Lancet Infectious Diseases</i> , The, 2020, 20, e38-e43.	4.6	76
39	Comparative genetics of <i>Enterococcus faecalis</i> intestinal tissue isolates before and after surgery in a rat model of colon anastomosis. <i>PLoS ONE</i> , 2020, 15, e0232165.	1.1	5
40	Involvement of the Commensal Organism <i>Bacillus subtilis</i> in the Pathogenesis of Anastomotic Leak. <i>Surgical Infections</i> , 2020, 21, 865-870.	0.7	9
41	Sustained Release of Phosphates From Hydrogel Nanoparticles Suppresses Bacterial Collagenase and Biofilm Formation <i>in vitro</i> . <i>Frontiers in Bioengineering and Biotechnology</i> , 2019, 7, 153.	2.0	8
42	Mice Fed an Obesogenic Western Diet, Administered Antibiotics, and Subjected to a Sterile Surgical Procedure Develop Lethal Septicemia with Multidrug-Resistant Pathobionts. <i>MBio</i> , 2019, 10, .	1.8	34
43	Preparing the bowel for surgery: rethinking the strategy. <i>Nature Reviews Gastroenterology and Hepatology</i> , 2019, 16, 708-709.	8.2	11
44	Surgeon as Basic Bench Scientist: A Play in Three Acts. <i>Journal of Surgical Research</i> , 2019, 241, 336-342.	0.8	9
45	International Cancer Microbiome Consortium consensus statement on the role of the human microbiome in carcinogenesis. <i>Gut</i> , 2019, 68, 1624-1632.	6.1	173
46	Identification of Collagenolytic Bacteria in Human Samples: Screening Methods and Clinical Implications for Resolving and Preventing Anastomotic Leaks and Wound Complications. <i>Diseases of the Colon and Rectum</i> , 2019, 62, 972-979.	0.7	17
47	Geometric Singularities in Anastomotic Wall Stress and Perturbed Flow as Applied to Gastrointestinal Surgery. <i>Journal of the American College of Surgeons</i> , 2019, 229, S97-S98.	0.2	0
48	Microbiome Medicine: This Changes Everything. <i>Journal of the American College of Surgeons</i> , 2018, 226, 719-729.	0.2	28
49	Novel <i>de novo</i> synthesized phosphate carrier compound ABA-PEG20k-Pi20 suppresses collagenase production in <i>Enterococcus faecalis</i> and prevents colonic anastomotic leak in an experimental model. <i>British Journal of Surgery</i> , 2018, 105, 1368-1376.	0.1	40
50	Hypermetabolism and Nutritional Support in Sepsis. <i>Surgical Infections</i> , 2018, 19, 163-167.	0.7	11
51	Gut microbiome influences on anastomotic leak and recurrence rates following colorectal cancer surgery. <i>British Journal of Surgery</i> , 2018, 105, e131-e141.	0.1	120
52	Oral Polyphosphate Suppresses Bacterial Collagenase Production and Prevents Anastomotic Leak Due to <i>Serratia marcescens</i> and <i>Pseudomonas aeruginosa</i> . <i>Annals of Surgery</i> , 2018, 267, 1112-1118.	2.1	61
53	Can Methicillin-resistant <i>Staphylococcus aureus</i> Silently Travel From the Gut to the Wound and Cause Postoperative Infection? Modeling the "Trojan Horse Hypothesis". <i>Annals of Surgery</i> , 2018, 267, 749-758.	2.1	69
54	Influence of the intestinal microbiome on anastomotic healing in the colon and rectum. <i>Seminars in Colon and Rectal Surgery</i> , 2018, 29, 2-7.	0.2	2

#	ARTICLE	IF	CITATIONS
55	The influence of intestinal microbiome on wound healing and infection. <i>Seminars in Colon and Rectal Surgery</i> , 2018, 29, 17-20.	0.2	4
56	El ambiente de la herida, la virulencia microbiana y la infección postoperatoria: lecciones prácticas para el cirujano. <i>Cirugía Española</i> , 2018, 96, 612-619.	0.1	6
57	The Wound Environment, Microbial Virulence and Postoperative Infection: Practical Lessons for the Surgeon. <i>Cirugía Española (English Edition)</i> , 2018, 96, 612-619.	0.1	2
58	Ionic Modulation of Bacterial Virulence and Its Role in Surgical Infection. <i>Surgical Infections</i> , 2018, 19, 769-773.	0.7	4
59	Lack of evidence for tissue hypoxia as a contributing factor in anastomotic leak following colon anastomosis and segmental devascularization in rats. <i>International Journal of Colorectal Disease</i> , 2017, 32, 539-547.	1.0	15
60	The gut microbiome and the mechanism of surgical infection. <i>British Journal of Surgery</i> , 2017, 104, e14-e23.	0.1	75
61	Smoking and Postoperative Surgical Site Infection. <i>JAMA Surgery</i> , 2017, 152, 484.	2.2	6
62	Critical role of microbiota within cecal crypts on the regenerative capacity of the intestinal epithelium following surgical stress. <i>American Journal of Physiology - Renal Physiology</i> , 2017, 312, G112-G122.	1.6	27
63	Stochasticity among Antibiotic-Resistance Profiles of Common Burn-Related Pathogens over a Six-Year Period. <i>Surgical Infections</i> , 2017, 18, 327-335.	0.7	11
64	Collapse of the Microbiome, Emergence of the Pathobiome, and the Immunopathology of Sepsis. <i>Critical Care Medicine</i> , 2017, 45, 337-347.	0.4	134
65	Optimum Operating Room Environment for the Prevention of Surgical Site Infections. <i>Surgical Infections</i> , 2017, 18, 503-507.	0.7	22
66	Fecal Microbiota Transplantation to Treat Sepsis of Unclear Etiology*. <i>Critical Care Medicine</i> , 2017, 45, 1106-1107.	0.4	10
67	Preparing the Bowel for Surgery: Learning from the Past and Planning for the Future. <i>Journal of the American College of Surgeons</i> , 2017, 225, 324-332.	0.2	17
68	Bacterial colonization and succession in a newly opened hospital. <i>Science Translational Medicine</i> , 2017, 9, .	5.8	248
69	Influence of nutrition therapy on the intestinal microbiome. <i>Current Opinion in Clinical Nutrition and Metabolic Care</i> , 2017, 20, 131-137.	1.3	34
70	Modeling <i>Acinetobacter baumannii</i> wound infections. <i>Journal of Trauma and Acute Care Surgery</i> , 2017, 82, 557-565.	1.1	17
71	De Novo Synthesis of Phosphorylated Triblock Copolymers with Pathogen Virulence-Suppressing Properties That Prevent Infection-Related Mortality. <i>ACS Biomaterials Science and Engineering</i> , 2017, 3, 2076-2085.	2.6	9
72	De Novo Synthesis and Functional Analysis of Polyphosphate-Loaded Poly(Ethylene) Glycol Hydrogel Nanoparticles Targeting Pyocyanin and Pyoverdine Production in <i>Pseudomonas aeruginosa</i> as a Model Intestinal Pathogen. <i>Annals of Biomedical Engineering</i> , 2017, 45, 1058-1068.	1.3	20

#	ARTICLE	IF	CITATIONS
73	The gut microbiota and gastrointestinal surgery. <i>Nature Reviews Gastroenterology and Hepatology</i> , 2017, 14, 43-54.	8.2	142
74	The Influence of Host Stress on the Mechanism of Infection: Lost Microbiomes, Emergent Pathobiomes, and the Role of Interkingdom Signaling. <i>Frontiers in Microbiology</i> , 2017, 08, 322.	1.5	37
75	Media from macrophages co-incubated with <i>Enterococcus faecalis</i> induces epithelial cell monolayer reassembly and altered cell morphology. <i>PLoS ONE</i> , 2017, 12, e0182825.	1.1	7
76	The Shift of an Intestinal "Microbiome" to a "Pathobiome" Governs the Course and Outcome of Sepsis Following Surgical Injury. <i>Shock</i> , 2016, 45, 475-482.	1.0	130
77	The role of the microbiota in surgical recovery. <i>Current Opinion in Clinical Nutrition and Metabolic Care</i> , 2016, 19, 347-352.	1.3	17
78	A Video Is Worth a Thousand Words. <i>JAMA Surgery</i> , 2016, 151, e160476.	2.2	1
79	Characteristics and Outcomes of Complicated Intra-abdominal Infections Involving <i>Pseudomonas aeruginosa</i> from a Randomized, Double-Blind, Phase 3 Ceftolozane-Tazobactam Study. <i>Antimicrobial Agents and Chemotherapy</i> , 2016, 60, 4387-4390.	1.4	31
80	Morphine Promotes Colonization of Anastomotic Tissues with Collagenase - Producing <i>Enterococcus faecalis</i> and Causes Leak. <i>Journal of Gastrointestinal Surgery</i> , 2016, 20, 1744-1751.	0.9	43
81	Long-term comparison of nutritional deficiencies after duodenal switch versus gastric bypass in the super-obese (BMI ≥ 50 kg/m ²). <i>Surgery for Obesity and Related Diseases</i> , 2016, 12, S42-S43.	1.0	1
82	The intestinal microbiome and surgical disease. <i>Current Problems in Surgery</i> , 2016, 53, 257-293.	0.6	24
83	Insights into the pathogenesis of ulcerative colitis from a murine model of stasis-induced dysbiosis, colonic metaplasia, and genetic susceptibility. <i>American Journal of Physiology - Renal Physiology</i> , 2016, 310, G973-G988.	1.6	22
84	Prevention of Perioperative Anastomotic Healing Complications. <i>Advances in Surgery</i> , 2016, 50, 129-141.	0.6	53
85	<i>C. elegans</i> mutants with chronic nicotine exposure as a novel model of cancer phenotype. <i>Cancer Biology and Therapy</i> , 2016, 17, 91-103.	1.5	3
86	Stool consistency as a major confounding factor affecting microbiota composition: an ignored variable?. <i>Gut</i> , 2016, 65, 1-2.	6.1	27
87	<i>Pseudomonas aeruginosa</i> wound infection involves activation of its iron acquisition system in response to fascial contact. <i>Journal of Trauma and Acute Care Surgery</i> , 2015, 78, 823-829.	1.1	22
88	Collagen degradation and MMP9 activation by <i>Enterococcus faecalis</i> contribute to intestinal anastomotic leak. <i>Science Translational Medicine</i> , 2015, 7, 286ra68.	5.8	287
89	Valuable heartburn data that may be difficult to swallow. <i>Surgery for Obesity and Related Diseases</i> , 2015, 11, 229.	1.0	0
90	Critical Illness and Intestinal Microflora: pH as a Surrogate Marker. , 2015, , 397-404.		0

#	ARTICLE	IF	CITATIONS
91	Membership and Behavior of Ultra-Low-Diversity Pathogen Communities Present in the Gut of Humans during Prolonged Critical Illness. <i>MBio</i> , 2014, 5, e01361-14.	1.8	278
92	Emergence of the P2 Phenotype in <i>Pseudomonas aeruginosa</i> PAO1 Strains Involves Various Mutations in <i>mexT</i> or <i>mexF</i> . <i>Journal of Bacteriology</i> , 2014, 196, 504-513.	1.0	34
93	Intestinal anastomotic injury alters spatially defined microbiome composition and function. <i>Microbiome</i> , 2014, 2, 35.	4.9	126
94	Phosphate-Containing Polyethylene Glycol Polymers Prevent Lethal Sepsis by Multidrug-Resistant Pathogens. <i>Antimicrobial Agents and Chemotherapy</i> , 2014, 58, 966-977.	1.4	53
95	The Opposing Forces of the Intestinal Microbiome and the Emerging Pathobiome. <i>Surgical Clinics of North America</i> , 2014, 94, 1151-1161.	0.5	42
96	Localization of DING proteins on PstS-containing outer-surface appendages of <i>Pseudomonas aeruginosa</i> . <i>FEMS Microbiology Letters</i> , 2014, 352, 54-61.	0.7	10
97	Surgery for fulminant <i>Clostridium difficile</i> infection. <i>Seminars in Colon and Rectal Surgery</i> , 2014, 25, 150-152.	0.2	0
98	Microscopic Analysis: Morphotypes and Cellular Appendages. <i>Methods in Molecular Biology</i> , 2014, 1149, 99-107.	0.4	0
99	Critical Illness and the Intestinal Microflora: pH as a Surrogate Marker. , 2014, , 1-9.		1
100	Do We Really Know Why Colorectal Anastomoses Leak?. <i>Journal of Gastrointestinal Surgery</i> , 2013, 17, 1698-1707.	0.9	187
101	High molecular weight polyethylene glycol (PEG 15-20) maintains mucosal microbial barrier function during intestinal graft preservation. <i>Journal of Surgical Research</i> , 2013, 183, 869-875.	0.8	24
102	Duodenal switch associated with higher frequency of post-operative nutritional deficiency in the super-obese (BMI > 50 kg/m ²) compared with gastric bypass. <i>Journal of the American College of Surgeons</i> , 2013, 217, S15.	0.2	0
103	Agent-based model of epithelial host-pathogen interactions in anastomotic leak. <i>Journal of Surgical Research</i> , 2013, 184, 730-738.	0.8	17
104	Predictors of Unsuccessful Laparoscopic Resection of Gastric Submucosal Neoplasms. <i>Journal of Gastrointestinal Surgery</i> , 2013, 17, 244-256.	0.9	2
105	The intestinal environment of surgical injury transforms <i>Pseudomonas aeruginosa</i> into a discrete hypervirulent morphotype capable of causing lethal peritonitis. <i>Surgery</i> , 2013, 153, 36-43.	1.0	47
106	A Catheter-Based Suture-Free Approach to Bilioenteric Anastomosis. <i>Surgical Innovation</i> , 2013, 20, 142-149.	0.4	1
