#	ARTICLE	IF	CITATIONS
1	The magnitude, direction, and tempo of forest change in Greater Yellowstone in a warmer world with more fire. <i>Ecological Monographs</i> , 2022, 92, e01485.	2.4	26
2	A short-interval reburn catalyzes departures from historical structure and composition in a mesic mixed-conifer forest. <i>Forest Ecology and Management</i> , 2022, 504, 119814.	1.4	18
3	Limitations to Propagule Dispersal Will Constrain Postfire Recovery of Plants and Fungi in Western Coniferous Forests. <i>BioScience</i> , 2022, 72, 347-364.	2.2	21
4	Combined effects of climate and fire-driven vegetation change constrain the distributions of forest vertebrates during the 21st century. <i>Diversity and Distributions</i> , 2022, 28, 727-744.	1.9	1
5	Young forests and fire: Using lidar imagery fusion to explore fuels and burn severity in a subalpine forest reburn. <i>Ecosphere</i> , 2022, 13, .	1.0	3
6	Post-disturbance reorganization of forest ecosystems in a changing world. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2022, 119, .	3.3	69
7	Can we manage a future with more fire? Effectiveness of defensible space treatment depends on housing amount and configuration. <i>Landscape Ecology</i> , 2021, 36, 309-330.	1.9	21
8	The propagule doesn't fall far from the tree, especially after short-interval, high-severity fire. <i>Ecology</i> , 2021, 102, e03194.	1.5	27
9	Land-use intensity mediates ecosystem service tradeoffs across regional social-ecological systems. <i>Ecosystems and People</i> , 2021, 17, 264-278.	1.3	21
10	Decadal changes in fire frequencies shift tree communities and functional traits. <i>Nature Ecology and Evolution</i> , 2021, 5, 504-512.	3.4	41
11	Widespread regeneration failure in forests of Greater Yellowstone under scenarios of future climate and fire. <i>Global Change Biology</i> , 2021, 27, 4339-4351.	4.2	42
12	Ready, Set, Go: Community Science Field Campaign Reveals Habitat Preferences of Nonnative Asian Earthworms in an Urban Landscape. <i>BioScience</i> , 2021, 71, 280-291.	2.2	5
13	Can wildland fire management alter 21st-century subalpine fire and forests in Grand Teton National Park, Wyoming, USA?. <i>Ecological Applications</i> , 2020, 30, e02030.	1.8	21
14	Topographic position amplifies consequences of short-interval stand-replacing fires on postfire tree establishment in subalpine conifer forests. <i>Forest Ecology and Management</i> , 2020, 478, 118523.	1.4	28
15	Simulating forest resilience: A review. <i>Global Ecology and Biogeography</i> , 2020, 29, 2082-2096.	2.7	51
16	Pervasive shifts in forest dynamics in a changing world. <i>Science</i> , 2020, 368, .	6.0	576
17	Climate change and ecosystems: threats, opportunities and solutions. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2020, 375, 20190104.	1.8	333
18	Climate change, ecosystems and abrupt change: science priorities. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2020, 375, 20190105.	1.8	169

#	ARTICLE	IF	CITATIONS
19	Effects of bird community dynamics on the seasonal distribution of cultural ecosystem services. <i>Ambio</i> , 2019, 48, 280-292.	2.8	17
20	No evidence of co-facilitation between a non-native Asian earthworm ( <i>Amyntas tokioensis</i> ) and invasive common buckthorn ( <i>Rhamnus cathartica</i> ) in experimental mesocosms. <i>Biological Invasions</i> , 2019, 21, 111-122.	1.2	6
21	Comparing the effects of climate and land use on surface water quality using future watershed scenarios. <i>Science of the Total Environment</i> , 2019, 693, 133484.	3.9	20
22	Feast not famine: Nitrogen pools recover rapidly in 25-year-old postfire lodgepole pine. <i>Ecology</i> , 2019, 100, e02626.	1.5	9
23	Short-interval severe fire erodes the resilience of subalpine lodgepole pine forests. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2019, 116, 11319-11328.	3.3	156
24	Post-fire vegetation and climate dynamics in low-elevation forests over the last three millennia in Yellowstone National Park. <i>Ecography</i> , 2019, 42, 1226-1236.	2.1	4
25	Scale-dependent interactions between tree canopy cover and impervious surfaces reduce daytime urban heat during summer. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2019, 116, 7575-7580.	3.3	348
26	Reply to Drescher: Interdisciplinary collaboration is essential to understand and implement climate-resilient strategies in cities. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2019, 116, 26155-26156.	3.3	2
27	Origins of abrupt change? Postfire subalpine conifer regeneration declines nonlinearly with warming and drying. <i>Ecological Monographs</i> , 2019, 89, e01340.	2.4	69
28	It takes a few to tango: changing climate and fire regimes can cause regeneration failure of two subalpine conifers. <i>Ecology</i> , 2018, 99, 966-977.	1.5	87
29	Current and historical land use influence soil-based ecosystem services in an urban landscape. <i>Ecological Applications</i> , 2018, 28, 643-654.	1.8	61
30	Understanding relationships among ecosystem services across spatial scales and over time. <i>Environmental Research Letters</i> , 2018, 13, 054020.	2.2	76
31	Scenarios reveal pathways to sustain future ecosystem services in an agricultural landscape. <i>Ecological Applications</i> , 2018, 28, 119-134.	1.8	34
32	Physical drivers of seagrass spatial configuration: the role of thresholds. <i>Landscape Ecology</i> , 2018, 33, 2253-2272.	1.9	17
33	Microhabitat conditions and landscape pattern explain nocturnal rodent activity, but not seed removal, in burned and unburned lodgepole pine forests. <i>Landscape Ecology</i> , 2018, 33, 1895-1909.	1.9	9
34	Patterns and drivers of recent disturbances across the temperate forest biome. <i>Nature Communications</i> , 2018, 9, 4355.	5.8	167
35	Looking beyond the mean: Drivers of variability in postfire stand development of conifers in Greater Yellowstone. <i>Forest Ecology and Management</i> , 2018, 430, 460-471.	1.4	23
36	Abrupt Change in Ecological Systems: Inference and Diagnosis. <i>Trends in Ecology and Evolution</i> , 2018, 33, 513-526.	4.2	178

#	ARTICLE	IF	CITATIONS
37	Landscape dynamics of floral resources affect the supply of a biodiversity-dependent cultural ecosystem service. <i>Landscape Ecology</i> , 2017, 32, 415-428.	1.9	25
38	Adapt to more wildfire in western North American forests as climate changes. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2017, 114, 4582-4590.	3.3	536
39	How do land-use legacies affect ecosystem services in United States cultural landscapes?. <i>Landscape Ecology</i> , 2017, 32, 2205-2218.	1.9	44
40	Using Spatial Statistics and Landscape Metrics to Compare Disturbance Mosaics. , 2017, , 175-190.		5
41	Understanding Landscape Metrics. , 2017, , 45-63.		9
42	Regional and Continental-Scale Perspectives on Landscape Pattern. , 2017, , 157-173.		0
43	Species richness alone does not predict cultural ecosystem service value. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2017, 114, 3774-3779.	3.3	73
44	Historical foundations and future directions in macrosystems ecology. <i>Ecology Letters</i> , 2017, 20, 147-157.	3.0	49
45	Unpacking ecosystem service bundles: Towards predictive mapping of synergies and trade-offs between ecosystem services. <i>Global Environmental Change</i> , 2017, 47, 37-50.	3.6	229
46	When, Where, and How Nature Matters for Ecosystem Services: Challenges for the Next Generation of Ecosystem Service Models. <i>BioScience</i> , 2017, 67, 820-833.	2.2	114
47	Ecosystem Modeling for the 21st Century. <i>Ecosystems</i> , 2017, 20, 211-214.	1.6	12
48	Twenty Years of Ecosystems: Emerging Questions and Challenges. <i>Ecosystems</i> , 2017, 20, 1-3.	1.6	20
49	Spatial fit between water quality policies and hydrologic ecosystem services in an urbanizing agricultural landscape. <i>Landscape Ecology</i> , 2017, 32, 59-75.	1.9	27
50	Annual precipitation regulates spatial and temporal drivers of lake water clarity. <i>Ecological Applications</i> , 2017, 27, 632-643.	1.8	59
51	Effects of non-native Asian earthworm invasion on temperate forest and prairie soils in the Midwestern US. <i>Biological Invasions</i> , 2017, 19, 73-88.	1.2	37
52	Simulated fire behaviour in young, postfire lodgepole pine forests. <i>International Journal of Wildland Fire</i> , 2017, 26, 852.	1.0	15
53	High and dry: post-fire tree seedling establishment in subalpine forests decreases with post-fire drought and large stand-replacing burn patches. <i>Global Ecology and Biogeography</i> , 2016, 25, 655-669.	2.7	213
54	Deterministic and stochastic processes lead to divergence in plant communities 25 years after the 1988 Yellowstone fires. <i>Ecological Monographs</i> , 2016, 86, 327-351.	2.4	75

#	ARTICLE	IF	CITATIONS
55	Alternative scenarios of bioenergy crop production in an agricultural landscape and implications for bird communities. <i>Ecological Applications</i> , 2016, 26, 42-54.	1.8	11
56	Landscape patterns of bioenergy in a changing climate: implications for crop allocation and land-use competition. <i>Ecological Applications</i> , 2016, 26, 515-529.	1.8	10
57	Twenty-four years after the Yellowstone Fires: Are postfire lodgepole pine stands converging in structure and function?. <i>Ecology</i> , 2016, 97, 1260-1273.	1.5	66
58	Changing disturbance regimes, ecological memory, and forest resilience. <i>Frontiers in Ecology and the Environment</i> , 2016, 14, 369-378.	1.9	947
59	Landscape variation in tree regeneration and snag fall drive fuel loads in 24-year old post-fire lodgepole pine forests. <i>Ecological Applications</i> , 2016, 26, 2424-2438.	1.8	22
60	Regeneration of montane forests 24 years after the 1988 Yellowstone fires: A fire-catalyzed shift in lower treelines?. <i>Ecosphere</i> , 2016, 7, e01410.	1.0	82
61	From qualitative to quantitative environmental scenarios: Translating storylines into biophysical modeling inputs at the watershed scale. <i>Environmental Modelling and Software</i> , 2016, 85, 80-97.	1.9	44
62	Spatial variability in tree regeneration after wildfire delays and dampens future bark beetle outbreaks. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2016, 113, 13075-13080.	3.3	65
63	Drivers and trends in landscape patterns of stand-replacing fire in forests of the US Northern Rocky Mountains (1984-2010). <i>Landscape Ecology</i> , 2016, 31, 2367-2383.	1.9	89
64	Burn me twice, shame on who? Interactions between successive forest fires across a temperate mountain region. <i>Ecology</i> , 2016, 97, 2272-2282.	1.5	83
65	Shifting ecological filters mediate postfire expansion of seedling aspen ( <i>Populus tremuloides</i> ) in Yellowstone. <i>Forest Ecology and Management</i> , 2016, 362, 218-230.	1.4	44
66	Importance of landscape heterogeneity in sustaining hydrologic ecosystem services in an agricultural watershed. <i>Ecosphere</i> , 2015, 6, 1-19.	1.0	91
67	Plausible futures of a social-ecological system: Yahara watershed, Wisconsin, USA. <i>Ecology and Society</i> , 2015, 20, .	1.0	70
68	Landscape Ecology in Theory and Practice. , 2015, , .		338
69	Introduction to Landscape Ecology and Scale. , 2015, , 1-32.		6
70	Landscape Metrics. , 2015, , 97-142.		10
71	Ecosystem Processes in Heterogeneous Landscapes. , 2015, , 287-332.		9
72	Landscape Dynamics in a Rapidly Changing World. , 2015, , 333-381.		3

#	ARTICLE	IF	CITATIONS
73	Celebrating the past, embracing the future. <i>Frontiers in Ecology and the Environment</i> , 2015, 13, 291-291.	1.9	7
74	Causes of Landscape Pattern. , 2015, , 33-62.		2
75	Introduction to Models. , 2015, , 63-95.		7
76	Spatial Statistics. , 2015, , 143-174.		2
77	Landscape Disturbance Dynamics. , 2015, , 175-228.		15
78	Organisms and Landscape Pattern. , 2015, , 229-285.		4
79	Earth Stewardship: An Initiative by the Ecological Society of America to Foster Engagement to Sustain Planet Earth. <i>Ecology and Ethics</i> , 2015, , 173-194.	0.2	14
80	Bird Communities and Biomass Yields in Potential Bioenergy Grasslands. <i>PLoS ONE</i> , 2014, 9, e109989.	1.1	20
81	Fire severity and tree regeneration following bark beetle outbreaks: the role of outbreak stage and burning conditions. <i>Ecological Applications</i> , 2014, 24, 1608-1625.	1.8	73
82	Logging Legacies Affect Insect Pollinator Communities in Southern Appalachian Forests. <i>Southeastern Naturalist</i> , 2014, 13, 317.	0.2	27
83	Recent mountain pine beetle outbreaks, wildfire severity, and postfire tree regeneration in the US Northern Rockies. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2014, 111, 15120-15125.	3.3	118
84	Carbon fluxes and storage in forests and landscapes. , 2014, , 139-166.		7
85	Spatial interactions among ecosystem services in an urbanizing agricultural watershed. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2013, 110, 12149-12154.	3.3	342
86	Predicting <i>Microstegium vimineum</i> invasion in natural plant communities of the southern Blue Ridge Mountains, USA. <i>Biological Invasions</i> , 2013, 15, 1217-1230.	1.2	13
87	A 27-year perspective on landscape ecology from the US-IALE annual meeting. <i>Landscape Ecology</i> , 2013, 28, 1845-1848.	1.9	6
88	Salvage harvest effects on advance tree regeneration, soil nitrogen, and fuels following mountain pine beetle outbreak in lodgepole pine. <i>Forest Ecology and Management</i> , 2013, 291, 228-239.	1.4	27
89	Evaluating post-outbreak management effects on future fuel profiles and stand structure in bark beetle-impacted forests of Greater Yellowstone. <i>Forest Ecology and Management</i> , 2013, 303, 160-174.	1.4	27
90	Performance and population dynamics of a native understory herb differ between young and old forest stands in the Southern Appalachians. <i>Forest Ecology and Management</i> , 2013, 304, 444-454.	1.4	3

#	ARTICLE	IF	CITATIONS
91	Consequences of spatial heterogeneity for ecosystem services in changing forest landscapes: priorities for future research. <i>Landscape Ecology</i> , 2013, 28, 1081-1097.	1.9	245
92	Influence of recent bark beetle outbreak on fire severity and postfire tree regeneration in montane Douglas-fir forests. <i>Ecology</i> , 2013, 94, 2475-2486.	1.5	90
93	Postfire changes in forest carbon storage over a 300-year chronosequence of <i>Pinus contorta</i> -dominated forests. <i>Ecological Monographs</i> , 2013, 83, 49-66.	2.4	100
94	Why does land-use history facilitate non-native plant invasion? A field experiment with <i>Celastrus orbiculatus</i> in the southern Appalachians. <i>Biological Invasions</i> , 2013, 15, 613-626.	1.2	14
95	Managing Forests and Fire in Changing Climates. <i>Science</i> , 2013, 342, 41-42.	6.0	378
96	Bark beetle effects on fuel profiles across a range of stand structures in Douglas-fir forests of Greater Yellowstone. <i>Ecological Applications</i> , 2013, 23, 3-20.	1.8	73
97	Monitoring forest regrowth following large scale fire using satellite data-A case study of Yellowstone National Park, USA-. <i>European Journal of Remote Sensing</i> , 2013, 46, 551-569.	1.7	46
98	Changes to the N cycle following bark beetle outbreaks in two contrasting conifer forest types. <i>Oecologia</i> , 2012, 170, 551-565.	0.9	29
99	Seeing the forest and the trees: multilevel models reveal both species and community patterns. <i>Ecosphere</i> , 2012, 3, 1-16.	1.0	49
100	Effects of Climate and Exurban Development on Nest Predation and Predator Presence in the southern Appalachian Mountains (U.S.A.). <i>Conservation Biology</i> , 2012, 26, 679-688.	2.4	14
101	What explains landscape patterns of tree mortality caused by bark beetle outbreaks in Greater Yellowstone?. <i>Global Ecology and Biogeography</i> , 2012, 21, 556-567.	2.7	69
102	Post-Fire Spatial Patterns of Soil Nitrogen Mineralization and Microbial Abundance. <i>PLoS ONE</i> , 2012, 7, e50597.	1.1	27
103	Agricultural land-use history increases non-native plant invasion in a southern Appalachian forest a century after abandonment. <i>Canadian Journal of Forest Research</i> , 2011, 41, 920-929.	0.8	49
104	Nitrogen cycling following mountain pine beetle disturbance in lodgepole pine forests of Greater Yellowstone. <i>Forest Ecology and Management</i> , 2011, 261, 1077-1089.	1.4	100
105	Integrating aquatic and terrestrial components to construct a complete carbon budget for a north temperate lake district. <i>Global Change Biology</i> , 2011, 17, 1193-1211.	4.2	151
106	Variation in Aboveground Cover Influences Soil Nitrogen Availability at Fine Spatial Scales Following Severe Fire in Subalpine Conifer Forests. <i>Ecosystems</i> , 2011, 14, 1081-1095.	1.6	25
107	Twenty Years After the 1988 Yellowstone Fires: Lessons About Disturbance and Ecosystems. <i>Ecosystems</i> , 2011, 14, 1196-1215.	1.6	126
108	Continued warming could transform Greater Yellowstone fire regimes by mid-21st century. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2011, 108, 13165-13170.	3.3	536

#	ARTICLE	IF	CITATIONS
109	Do mountain pine beetle outbreaks change the probability of active crown fire in lodgepole pine forests?. <i>Ecological Monographs</i> , 2011, 81, 3-24.	2.4	237
110	Effects of land-use history and the contemporary landscape on non-native plant invasion at local and regional scales in the forest-dominated southern Appalachians. <i>Landscape Ecology</i> , 2010, 25, 1433-1445.	1.9	72
