#	Article	IF	CITATIONS
1	Lifestyle Changes for Improving Disease-specific Quality of Life in Sedentary Men on Long-term Androgen-Deprivation Therapy for Advanced Prostate Cancer: A Randomised Controlled Trial. European Urology, 2014, 65, 865-872.	1.9	164
2	Lifestyle Intervention in Men with Advanced Prostate Cancer Receiving Androgen Suppression Therapy: A Feasibility Study. Cancer Epidemiology Biomarkers and Prevention, 2011, 20, 647-657.	2.5	136
3	Effects of short-term, medium-term and long-term resistance exercise training on cardiometabolic health outcomes in adults: systematic review with meta-analysis. British Journal of Sports Medicine, 2020, 54, 341-348.	6.7	84
4	Prehabilitation for adults diagnosed with cancer: A systematic review of longâ€ŧerm physical function, nutrition and patientâ€reported outcomes. European Journal of Cancer Care, 2019, 28, e13023.	1.5	56
5	Effects of a lifestyle intervention on endothelial function in men on long-term androgen deprivation therapy for prostate cancer. British Journal of Cancer, 2016, 114, 401-408.	6.4	48
6	Pragmatic exercise intervention in people with mild to moderate multiple sclerosis: A randomised controlled feasibility study. Contemporary Clinical Trials, 2013, 35, 40-47.	1.8	43
7	A qualitative study evaluating experiences of a lifestyle intervention in men with prostate cancer undergoing androgen suppression therapy. Trials, 2012, 13, 208.	1.6	41
8	Exerciseâ€induced attenuation of treatment sideâ€effects in patients with newly diagnosed prostate cancer beginning androgenâ€deprivation therapy: a randomised controlled trial. BJU International, 2020, 125, 28-37.	2.5	36
9	Vigorous intensity aerobic interval exercise in bladder cancer patients prior to radical cystectomy: a feasibility randomised controlled trial. Supportive Care in Cancer, 2017, 26, 1515-1523.	2.2	29
10	Cancer survivorship, excess body fatness and weight-loss intervention—where are we in 2020?. British Journal of Cancer, 2021, 124, 1057-1065.	6.4	29
11	Prehabilitation with wearables versus standard of care before major abdominal cancer surgery: a randomised controlled pilot study (trial registration: NCT04047524). Surgical Endoscopy and Other Interventional Techniques, 2022, 36, 1008-1017.	2.4	22
12	Vagal modulation and symptomatology following a 6-month aerobic exercise program for women with fibromyalgia. Clinical and Experimental Rheumatology, 2015, 33, S41-5.	0.8	20
13	Acute aerobic exerciseâ€conditioned serum reduces colon cancer cell proliferation in vitro through interleukinâ€6â€induced regulation of <scp>DNA</scp> damage. International Journal of Cancer, 2022, 151, 265-274.	5.1	20
14	The Siconolfi step test: a valid and reliable assessment of cardiopulmonary fitness in older men with prostate cancer. European Review of Aging and Physical Activity, 2019, 16, 1.	2.9	18
15	Patient perspectives of vigorous intensity aerobic interval exercise prehabilitation prior to radical cystectomy: a qualitative focus group study. Disability and Rehabilitation, 2021, 43, 1084-1091.	1.8	18
16	Participant recruitment into a randomised controlled trial of exercise therapy for people with multiple sclerosis. Trials, 2015, 16, 468.	1.6	17
17	Effect of age on cutaneous vasomotor responses during local skin heating. Microvascular Research, 2017, 112, 47-52.	2.5	16
18	Qualitative Investigation of Exercise Perceptions and Experiences in People With Multiple Sclerosis Before, During, and After Participation in a Personally Tailored Exercise Program. Archives of Physical Medicine and Rehabilitation, 2017, 98, 2520-2525.	0.9	16

JOHN M SAXTON

#	Article	IF	CITATIONS
19	The serological responses to acute exercise in humans reduce cancer cell growth in vitro: A systematic review and metaâ€analysis. Physiological Reports, 2020, 8, e14635.	1.7	15
20	Patient recruitment into a randomised controlled trial of supervised exercise therapy in sedentary women treated for breast cancer. Contemporary Clinical Trials, 2007, 28, 603-613.	1.8	14
21	Epstein Barr virus shedding in multiple sclerosis: Similar frequencies of EBV in saliva across separate patient cohorts. Multiple Sclerosis and Related Disorders, 2018, 25, 197-199.	2.0	14
22	Cancer prevention through weight control—where are we in 2020?. British Journal of Cancer, 2021, 124, 1049-1056.	6.4	12
23	Neurostructural and Neurophysiological Correlates of Multiple Sclerosis Physical Fatigue: Systematic Review and Meta-Analysis of Cross-Sectional Studies. Neuropsychology Review, 2021, , 1.	4.9	12
24	Effectiveness of diet and physical activity interventions amongst adults attending colorectal and breast cancer screening: a systematic review and meta-analysis. Cancer Causes and Control, 2021, 32, 13-26.	1.8	11
25	Community pharmacy lifestyle intervention to increase physical activity and improve cardiovascular health of men with prostate cancer: a phase II feasibility study. BMJ Open, 2019, 9, e025114.	1.9	10
26	Cross-sectional study of patient-reported fatigue, physical activity and cardiovascular status in men after robotic-assisted radical prostatectomy. Supportive Care in Cancer, 2019, 27, 4763-4770.	2.2	10
27	SupPoRtive Exercise Programmes for Accelerating REcovery after major ABdominal Cancer surgery trial (PREPAREâ€ABC): Pilot phase of a multicentre randomised controlled trial. Colorectal Disease, 2021, 23, 3008-3022.	1.4	10
28	Using qualitative and co-design methods to inform the development of an intervention to support and improve physical activity in childhood cancer survivors: a study protocol for BEing Active after ChildhOod caNcer (BEACON). BMJ Open, 2020, 10, e041073.	1.9	8
29	Objectively-assessed physical activity and self-reported activity pacing in adults with multiple sclerosis: A pilot study. Clinical Rehabilitation, 2021, 35, 1781-1788.	2.2	7
30	Patient activation and patient-reported outcomes of men from a community pharmacy lifestyle intervention after prostate cancer treatment. Supportive Care in Cancer, 2022, 30, 347-358.	2.2	7
31	Supported progressive resistance exercise training to counter the adverse side effects of robot-assisted radical prostatectomy: a randomised controlled trial. Supportive Care in Cancer, 2021, 29, 4595-4605.	2.2	6
32	Recall, perceptions and determinants of receiving physical activity advice amongst cancer survivors: a mixed-methods survey. Supportive Care in Cancer, 2021, 29, 6369-6378.	2.2	5
33	Exercise and testosterone supplementation in male chronic heart failure patients with low testosterone status. American Heart Journal, 2013, 166, e23.	2.7	3
34	BiCyCLE NMES—neuromuscular electrical stimulation in the perioperative treatment of sarcopenia and myosteatosis in advanced rectal cancer patients: design and methodology of a phase II randomised controlled trial. Trials, 2021, 22, 621.	1.6	2
35	Creating a teachable moment in community pharmacy for men with prostate cancer: A qualitative study of lifestyle changes. Psycho-Oncology, 2019, 28, 593-599.	2.3	1
36	Obesity and low levels of physical activity impact on cardiopulmonary fitness in older men after treatment for prostate cancer. European Journal of Cancer Care, 2021, 30, e13476.	1.5	1
