#	ARTICLE	IF	CITATIONS
1	Multi-scale response of the high-latitude topside ionosphere to geospace forcing. <i>Advances in Space Research</i> , 2023, 72, 5490-5502.	2.6	3
2	Adaptive Phase Detrending for GNSS Scintillation Detection: A Case Study Over Antarctica. <i>IEEE Geoscience and Remote Sensing Letters</i> , 2022, 19, 1-5.	3.1	17
3	Intrinsic Mode Cross Correlation: A Novel Technique to Identify Scale-Dependent Lags Between Two Signals and Its Application to Ionospheric Science. <i>IEEE Geoscience and Remote Sensing Letters</i> , 2022, 19, 1-3.	3.1	4
4	Climatology of ionospheric amplitude scintillation on GNSS signals at south American sector during solar cycle 24. <i>Journal of Atmospheric and Solar-Terrestrial Physics</i> , 2022, 231, 105872.	1.6	5
5	Challenges to Equatorial Plasma Bubble and Ionospheric Scintillation Short-Term Forecasting and Future Aspects in East and Southeast Asia. <i>Surveys in Geophysics</i> , 2021, 42, 201-238.	4.6	53
6	Preface to the Special Issue on Recent Advances in the study of Equatorial Plasma Bubbles and Ionospheric Scintillation. <i>Earth and Planetary Physics</i> , 2021, 5, 365-367.	1.1	1
7	Quo vadis, European Space Weather community?. <i>Journal of Space Weather and Space Climate</i> , 2021, 11, 26.	3.3	1
8	Ionospheric Response Over Brazil to the August 2018 Geomagnetic Storm as Probed by CSESâ€‘01 and Swarm Satellites and by Local Groundâ€‘Based Observations. <i>Journal of Geophysical Research: Space Physics</i> , 2021, 126, e2020JA028368.	2.4	45
9	Ionospheric Disturbances Over the Indian Sector During 8 September 2017 Geomagnetic Storm: Plasma Structuring and Propagation. <i>Space Weather</i> , 2021, 19, e2020SW002607.	3.7	31
10	IONORING: Real-Time Monitoring of the Total Electron Content over Italy. <i>Remote Sensing</i> , 2021, 13, 3290.	4.0	10
11	Space Weather Services for Civil Aviationâ€‘Challenges and Solutions. <i>Remote Sensing</i> , 2021, 13, 3685.	4.0	22
12	Possible Lithosphere-Atmosphere-Ionosphere Coupling effects prior to the 2018 Mwâ€‘=â€‘7.5 Indonesia earthquake from seismic, atmospheric and ionospheric data. <i>Journal of Asian Earth Sciences</i> , 2020, 188, 104097.	2.3	57
13	Disentangling ionospheric refraction and diffraction effects in GNSS raw phase through fast iterative filtering technique. <i>GPS Solutions</i> , 2020, 24, 1.	4.3	43
14	Scintillation modeling. , 2020, , 277-299.		2
15	Revised Accelerated Moment Release Under Test: Fourteen Worldwide Real Case Studies in 2014â€‘2018 and Simulations. <i>Pure and Applied Geophysics</i> , 2020, 177, 4057-4087.	1.9	13
16	Neural network based model for global Total Electron Content forecasting. <i>Journal of Space Weather and Space Climate</i> , 2020, 10, 11.	3.3	57
17	A case study of correspondence between Pc1 activity and ionospheric irregularities at polar latitudes. <i>Earth, Planets and Space</i> , 2020, 72, .	2.5	6
18	A Comparative Study of Different Phase Detrending Algorithms for Scintillation Monitoring. , 2020, , .		2

#	ARTICLE	IF	CITATIONS
19	Multi-instrumental analyses of the September 2017 space weather storm over Brazil. , 2019, , .		1
20	User-Oriented ICT Cloud Architecture for High-Accuracy GNSS-Based Services. Sensors, 2019, 19, 2635.	3.8	2
21	Magnetic Field and Electron Density Data Analysis from Swarm Satellites Searching for Ionospheric Effects by Great Earthquakes: 12 Case Studies from 2014 to 2016. Atmosphere, 2019, 10, 371.	2.3	46
22	Role of the external drivers in the occurrence of low-latitude ionospheric scintillation revealed by multi-scale analysis. , 2019, , .		2
23	The ionospheric irregularities climatology over Svalbard from solar cycle 23. Scientific Reports, 2019, 9, 9232.	3.3	38
24	On some features characterizing the plasmasphereâ€“magnetosphereâ€“ionosphere system during the geomagnetic storm of 27 May 2017. Earth, Planets and Space, 2019, 71, 77.	2.5	18
25	Geosystemics View of Earthquakes. Entropy, 2019, 21, 412.	2.2	29
26	Space Weather effects on GNSS at low latitudes: climatological perspectives. , 2019, , .		0
27	Regional short-term forecasting model to predict ionospheric scintillation and TEC at low latitudes. , 2019, , .		0
28	Precursory worldwide signatures of earthquake occurrences on Swarm satellite data. Scientific Reports, 2019, 9, 20287.	3.3	85
29	Role of the external drivers in the occurrence of low-latitude ionospheric scintillation revealed by multi-scale analysis. Journal of Space Weather and Space Climate, 2019, 9, A35.	3.3	17
30	The ionosphere prediction service prototype for GNSS users. Journal of Space Weather and Space Climate, 2019, 9, A41.	3.3	8
31	The Total Electron Content From InSAR and GNSS: A Midlatitude Study. IEEE Journal of Selected Topics in Applied Earth Observations and Remote Sensing, 2018, 11, 1725-1733.	4.9	5
32	Adaptive Local Iterative Filtering: A Promising Technique for the Analysis of Nonstationary Signals. Journal of Geophysical Research: Space Physics, 2018, 123, 1031-1046.	2.4	40
33	A statistical approach to estimate Global Navigation Satellite Systems (GNSS) receiver signal tracking performance in the presence of ionospheric scintillation. Journal of Space Weather and Space Climate, 2018, 8, A51.	3.3	7
34	Regional Shortâ€“Term Forecasting of Ionospheric TEC and Scintillation. Radio Science, 2018, 53, 1254-1268.	1.6	9
35	The use of GNSS Signals for Space Weather Monitoring and Prediction. , 2018, , .		0
36	The response of high latitude ionosphere to the 2015 St. Patrickâ€™s day storm from in situ and ground based observations. Advances in Space Research, 2018, 62, 638-650.	2.6	17

#	ARTICLE	IF	CITATIONS
37	Analysis of the Regional Ionosphere at Low Latitudes in Support of the Biomass ESA Mission. IEEE Transactions on Geoscience and Remote Sensing, 2018, 56, 6412-6424.	6.3	4
38	Ionospheric anomalies detected by ionosonde and possibly related to crustal earthquakes in Greece. Annales Geophysicae, 2018, 36, 361-371.	1.6	19
39	Effects of Phase Scintillation on the GNSS Positioning Error During the September 2017 Storm at Svalbard. Space Weather, 2018, 16, 1317-1329.	3.7	53
40	Polar traveling ionospheric disturbances inferred with the B-spline method and associated scintillations in the Southern Hemisphere. Advances in Space Research, 2018, 62, 3249-3266.	2.6	7
41	The response of high latitude ionosphere to the 2015 June 22 storm. Annals of Geophysics, 2018, 61, .	1.0	5
42	The HEPD particle detector and the EFD electric field detector for the CSES satellite. Radiation Physics and Chemistry, 2017, 137, 187-192.	2.8	9
43	Modelling ionospheric scintillation under the crest of the equatorial anomaly. Advances in Space Research, 2017, 60, 1698-1707.	2.6	12
44	Ionosphere Monitoring in South East Asia in the ERICA Study. Navigation, Journal of the Institute of Navigation, 2017, 64, 273-287.	2.8	9
45	Does TEC react to a sudden impulse as a whole? The 2015 Saint Patrick's day storm event. Advances in Space Research, 2017, 60, 1807-1816.	2.6	23
46	Comprehensive Analysis of the Geoeffective Solar Event of 21 June 2015: Effects on the Magnetosphere, Plasmasphere, and Ionosphere Systems. Solar Physics, 2017, 292, 1.	2.5	62
47	Analysis of the ionospheric scintillations during 2016 January 21 from SANAE by means of the DemoGRAPE scintillation receivers. , 2017, , .		3
48	GPS phase scintillation and auroral electrojet currents during geomagnetic storms of March 17, 2013 and 2015. , 2017, , .		1
49	The Ionosphere Prediction Service. Proceedings of the International Astronomical Union, 2017, 13, 352-354.	0.0	3
50	Ionospheric F-region response to the 26 September 2011 geomagnetic storm in the Antarctica American and Australian sectors. Annales Geophysicae, 2017, 35, 1113-1129.	1.6	13
51	Comprehensive Analysis of the Geoeffective Solar Event of 21 June 2015: Effects on the Magnetosphere, Plasmasphere, and Ionosphere Systems. , 2017, , 225-280.		0
52	Performance of ionospheric maps in support of long baseline GNSS kinematic positioning at low latitudes. Radio Science, 2016, 51, 429-442.	1.6	12
53	DemoGRAPE: Managing Scientific Applications in a Cloud-Federated Environment. , 2016, , .		1
54	Satellite-beacon Ionospheric Scintillation Global Model of the upper Atmosphere (SIGMA) II: Inverse modeling with high-latitude observations to deduce irregularity physics. Journal of Geophysical Research: Space Physics, 2016, 121, 9188-9203.	2.4	26

#	ARTICLE	IF	CITATIONS
55	Formation of ionospheric irregularities over Southeast Asia during the 2015 St. Patrick's Day storm. <i>Journal of Geophysical Research: Space Physics</i> , 2016, 121, 12,211.	2.4	47
56	The ESPAS e-infrastructure: Access to data from near-Earth space. <i>Advances in Space Research</i> , 2016, 58, 1177-1200.	2.6	12
57	Ionosphere monitoring in South East Asia: Activities in GINESTRA and ERICA projects. , 2015, , .		6
58	GNSS scintillation climatology at SANAE-IV, Antarctica: 2006 to 2014. , 2015, , .		0
59	L-band scintillations and calibrated total electron content gradients over Brazil during the last solar maximum. <i>Journal of Space Weather and Space Climate</i> , 2015, 5, A36.	3.3	58
60	GNSS data filtering optimization for ionospheric observation. <i>Advances in Space Research</i> , 2015, 56, 2552-2562.	2.6	7
61	Geospace perturbations induced by the Earth: The state of the art and future trends. <i>Physics and Chemistry of the Earth</i> , 2015, 85-86, 17-33.	2.9	56
62	International cloud infrastructure for space weather data management: The DemoGRAPE challenge. , 2015, , .		0
63	GPS phase scintillation at high latitudes during geomagnetic storms of 7 th March 2012 – Part 2: Interhemispheric comparison. <i>Annales Geophysicae</i> , 2015, 33, 657-670.	1.6	16
64	Polar Data Management Based on Cloud Technology. , 2015, , .		1
65	A Filtering Method Developed to Improve GNSS Receiver Data Quality in the CALIBRA Project. , 2014, , .		5
66	Assessing the GNSS scintillation climate over Brazil under increasing solar activity. <i>Journal of Atmospheric and Solar-Terrestrial Physics</i> , 2013, 105-106, 199-206.	1.6	45
67	GNSS station characterisation for ionospheric scintillation applications. <i>Advances in Space Research</i> , 2013, 52, 1237-1246.	2.6	12
68	GNSS Based Services on Cloud Environment. , 2013, , .		2
69	Space weather challenges of the polar cap ionosphere. <i>Journal of Space Weather and Space Climate</i> , 2013, 3, A02.	3.3	112
70	Comparative analysis of spread σ F signature and GPS scintillation occurrences at Tucumán, Argentina. <i>Journal of Geophysical Research: Space Physics</i> , 2013, 118, 4483-4502.	2.4	85
71	An interhemispheric comparison of GPS phase scintillation with auroral emission observed at the South Pole and from the DMSP satellite. <i>Annals of Geophysics</i> , 2013, 56, .	1.0	10
72	GPS scintillations and total electron content climatology in the southern low, middle and high latitude regions. <i>Annals of Geophysics</i> , 2013, 56, .	1.0	15

#	ARTICLE	IF	CITATIONS
73	Measuring GNSS ionospheric total electron content at Concordia, and application to L-band radiometers. <i>Annals of Geophysics</i> , 2013, 56, .	1.0	2
74	The IDIPOS project: is a multidisciplinary data infrastructure for weather and space weather feasible?. <i>Annals of Geophysics</i> , 2013, 56, .	1.0	2
75	Bipolar climatology of GPS ionospheric scintillation at solar minimum. <i>Radio Science</i> , 2011, 46, .	1.6	114
76	Tackling ionospheric scintillation threat to GNSS in Latin America. <i>Journal of Space Weather and Space Climate</i> , 2011, 1, A05.	3.3	28
77	Measurement of inclusive jet and dijet cross sections in proton-proton collisions at 7 TeV centre-of-mass energy with the ATLAS detector. <i>European Physical Journal C</i> , 2011, 71, 1.	3.9	114
78	GPS scintillation and TEC gradients at equatorial latitudes in April 2006. <i>Advances in Space Research</i> , 2011, 47, 1750-1757.	2.6	38
79	Low latitude scintillations: A comparison of modeling and observations within the CIGALA project. , 2011, , .		0
80	Interhemispheric comparison of GPS phase scintillation at high latitudes during the magnetic-cloud-induced geomagnetic storm of 5-7 April 2010. <i>Annales Geophysicae</i> , 2011, 29, 2287-2304.	1.6	45
81	Performance of the ATLAS detector using first collision data. <i>Journal of High Energy Physics</i> , 2010, 2010, 1.	4.7	18
82	Measurement of the $W \rightarrow e \nu_e$ and $Z \rightarrow e^+ e^-$ production cross sections in proton-proton collisions at $\sqrt{s} = 7$ TeV with the ATLAS detector. <i>Journal of High Energy Physics</i> , 2010, 2010, 1.	4.7	64
83	Climatology of GPS ionospheric scintillations over high and mid-latitude European regions. <i>Annales Geophysicae</i> , 2009, 27, 3429-3437.	1.6	165
84	Study of the ATLAS MDT spectrometer using high energy CERN combined test beam data. <i>Nuclear Instruments and Methods in Physics Research, Section A: Accelerators, Spectrometers, Detectors and Associated Equipment</i> , 2009, 598, 400-415.	1.6	10
85	In-Situ Determination of the Performance of the ATLAS Muon Spectrometer. <i>Nuclear Physics, Section B, Proceedings Supplements</i> , 2008, 177-178, 326-327.	0.4	0
86	A muon identification and combined reconstruction procedure for the ATLAS detector at the LHC at CERN. <i>IEEE Transactions on Nuclear Science</i> , 2004, 51, 3030-3033.	2.0	10
