25 papers	682 citations	687363 13 h-index	642732 23 g-index
28 all docs	28 docs citations	28 times ranked	755 citing authors

#	Article	IF	Citations
1	Small-Quantity Lipid-Based Nutrient Supplements Increase Infantsâ€™ Plasma Essential Fatty Acid Levels in Ghana and Malawi: A Secondary Outcome Analysis of the iLiNS-DYAD Randomized Trials. Journal of Nutrition, 2022, 152, 286-301.	2.9	1
2	Calcium supplementation during pregnancy and maternal and offspring bone health: a systematic review and metaâ€analysis. Annals of the New York Academy of Sciences, 2022, 1509, 23-36.	3.8	11
3	Calcium supplementation for the prevention of hypertensive disorders of pregnancy: current evidence and programmatic considerations. Annals of the New York Academy of Sciences, 2022, 1510, 52-67.	3.8	16
4	Calcium supplementation during pregnancy and longâ€term offspring outcome: a systematic literature review and metaâ€analysis. Annals of the New York Academy of Sciences, 2022, 1510, 36-51.	3.8	5
5	Postureâ€Related Differences in Cardiovascular Function Between Young Men and Women: Study of Noninvasive Hemodynamics in Rural Malawi. Journal of the American Heart Association, 2022, 11, e022979.	3.7	3
6	Infant Growth After Maternal Dietary Supplementation Before and During Pregnancy. Journal of Pediatrics, 2021, 229, 14-16.	1.8	0
7	Associations of human milk oligosaccharides and bioactive proteins with infant growth and development among Malawian mother-infant dyads. American Journal of Clinical Nutrition, 2021, 113, 209-220.	4.7	32
8	Human Protoparvovirus DNA and IgG in Children and Adults with and without Respiratory or Gastrointestinal Infections. Viruses, 2021, 13, 483.	3.3	10
9	Wasting and Stunting in Infants and Young Children as Risk Factors for Subsequent Stunting or Mortality: Longitudinal Analysis of Data from Malawi, South Africa, and Pakistan. Journal of Nutrition, 2021, 151, 2022-2028.	2.9	9
10	Characteristics that modify the effect of small-quantity lipid-based nutrient supplementation on child anemia and micronutrient status: an individual participant data meta-analysis of randomized controlled trials. American Journal of Clinical Nutrition, 2021, 114, 68S-94S.	4.7	24
11	Characteristics that modify the effect of small-quantity lipid-based nutrient supplementation on child growth: an individual participant data meta-analysis of randomized controlled trials. American Journal of Clinical Nutrition, 2021, 114, 15S-42S.	4.7	41
12	Small-quantity lipid-based nutrient supplements for children age 6â€“24 months: a systematic review and individual participant data meta-analysis of effects on developmental outcomes and effect modifiers. American Journal of Clinical Nutrition, 2021, 114, 43S-67S.	4.7	24
13	Association of maternal prenatal selenium concentration and preterm birth: a multicountry meta-analysis. BMJ Global Health, 2021, 6, e005856.	4.7	13
14	Supplementation with Small-Quantity Lipid-Based Nutrient Supplements Does Not Increase Child Morbidity in a Semiurban Setting in Ghana: A Secondary Outcome Noninferiority Analysis of the International Lipid-Based Nutrient Supplements (iLiNS)â€“DYAD Randomized Controlled Trial. Journal of Nutrition, 2020, 150, 382-393.	2.9	8
15	Lipid-based nutrient supplements and all-cause mortality in children 6â€“24 months of age: a meta-analysis of randomized controlled trials. American Journal of Clinical Nutrition, 2020, 111, 207-218.	4.7	51
16	The availability of global guidance for the promotion of womenâ€™s, newbornsâ€™, childrenâ€™s and adolescentsâ€™ health and nutrition in conflicts. BMJ Global Health, 2020, 5, e002060.	4.7	8
17	Impact of food supplements on early child development in children with moderate acute malnutrition: A randomised 2 x 2 x 3 factorial trial in Burkina Faso. PLoS Medicine, 2020, 17, e1003442.	8.4	14
18	Lipid based nutrient supplements during pregnancy may improve foetal growth in HIV infected women â€“ A cohort study. PLoS ONE, 2019, 14, e0215760.	2.5	2

#	Article	IF	Citations
19	Prenatal Iron Deficiency and Replete Iron Status Are Associated with Adverse Birth Outcomes, but Associations Differ in Ghana and Malawi. Journal of Nutrition, 2019, 149, 513-521.	2.9	17
20	Early development of visual attention in infants in rural Malawi. Developmental Science, 2019, 22, e12761.	2.4	16
21	Maternal Supplementation with Small-Quantity Lipid-Based Nutrient Supplements Compared with Multiple Micronutrients, but Not with Iron and Folic Acid, Reduces the Prevalence of Low Gestational Weight Gain in Semi-Urban Ghana: A Randomized Controlled Trial. Journal of Nutrition, 2017, 147, 697-705.	2.9	35
22	Effectiveness of food supplements in increasing fat-free tissue accretion in children with moderate acute malnutrition: A randomised 2 Ã— 2 Ã— 3 factorial trial in Burkina Faso. PLoS Medicine, 2017, 14, e1002387.	8.4	63
23	Small-quantity, lipid-based nutrient supplements provided to women during pregnancy and 6 mo postpartum and to their infants from 6 mo of age increase the mean attained length of 18-mo-old children in semi-urban Ghana: a randomized controlled trial,. American Journal of Clinical Nutrition, 2016, 104, 797-808.	4.7	106
24	Effects of maternal and child lipid-based nutrient supplements on infant development: a randomized trial in Malawi. American Journal of Clinical Nutrition, 2016, 103, 784-793.	4.7	47
25	Supplementation of Maternal Diets during Pregnancy and for 6 Months Postpartum and Infant Diets Thereafter with Small-Quantity Lipid-Based Nutrient Supplements Does Not Promote Child Growth by 18 Months of Age in Rural Malawi: A Randomized Controlled Trial. Journal of Nutrition, 2015, 145, 1345-1353.	2.9	119
