| #  | ARTICLE                                                                                                                                                                                              | IF  | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Influence of intra-aortic balloon pump on mortality as a function of cardiogenic shock severity. <i>Catheterization and Cardiovascular Interventions</i> , 2022, 99, 293-304.                        | 1.7 | 14        |
| 2  | Women in procedural leadership roles in cardiology: The Women In Local Leadership (WILL) observational study. <i>Heart Rhythm</i> , 2022, 19, 623-629.                                               | 0.7 | 5         |
| 3  | Comorbidity burden in patients undergoing left atrial appendage closure. <i>Heart</i> , 2021, 107, 1246-1253.                                                                                        | 2.9 | 5         |
| 4  | Utilization and procedural adverse outcomes associated with Watchman device implantation. <i>Europace</i> , 2021, 23, 247-253.                                                                       | 1.7 | 13        |
| 5  | Fibrinolysis vs. primary percutaneous coronary intervention for ST-segment elevation myocardial infarction cardiogenic shock. <i>ESC Heart Failure</i> , 2021, 8, 2025-2035.                         | 3.1 | 7         |
| 6  | Treatment-Related Changes in Left Atrial Structure in Atrial Fibrillation: Findings From the CABANA Imaging Substudy. <i>Circulation: Arrhythmia and Electrophysiology</i> , 2021, 14, e008540.      | 4.8 | 9         |
| 7  | Carotid Intraplaque Hemorrhage. <i>JACC: Cardiovascular Interventions</i> , 2021, 14, 1950-1952.                                                                                                     | 2.9 | 3         |
| 8  | Influence of age and shock severity on short-term survival in patients with cardiogenic shock. <i>European Heart Journal: Acute Cardiovascular Care</i> , 2021, 10, 604-612.                         | 1.0 | 45        |
| 9  | Intravascular ultrasound, optical coherence tomography, and fractional flow reserve use in acute myocardial infarction. <i>Catheterization and Cardiovascular Interventions</i> , 2020, 96, E59-E66. | 1.7 | 34        |
| 10 | Age and shock severity predict mortality in cardiac intensive care unit patients with and without heart failure. <i>ESC Heart Failure</i> , 2020, 7, 3971-3982.                                      | 3.1 | 25        |
| 11 | Influence of seasons on the management and outcomes acute myocardial infarction: An 18-year US study. <i>Clinical Cardiology</i> , 2020, 43, 1175-1185.                                              | 1.8 | 14        |
| 12 | Complications from percutaneous-left ventricular assist devices versus intra-aortic balloon pump in acute myocardial infarction-cardiogenic shock. <i>PLoS ONE</i> , 2020, 15, e0238046.             | 2.5 | 17        |
| 13 | Complications in Patients with Acute Myocardial Infarction Supported with Extracorporeal Membrane Oxygenation. <i>Journal of Clinical Medicine</i> , 2020, 9, 839.                                   | 2.4 | 29        |
| 14 | Left ventricular remodelling after ST-segment elevation myocardial infarction: sex differences and prognosis. <i>ESC Heart Failure</i> , 2020, 7, 474-481.                                           | 3.1 | 14        |
| 15 | Pulmonary artery catheter use in acute myocardial infarction-cardiogenic shock. <i>ESC Heart Failure</i> , 2020, 7, 1234-1245.                                                                       | 3.1 | 54        |
| 16 | Relation of Postdischarge Care Fragmentation and Outcomes in Transcatheter Aortic Valve Implantation from the STS/ACC TVT Registry. <i>American Journal of Cardiology</i> , 2019, 124, 912-919.      | 1.6 | 9         |
| 17 | The Medical Device Innovation Consortium and Its Goal to Further the Efficiency of Early Feasibility Studies in the United States. <i>Journal of Endovascular Therapy</i> , 2019, 26, 423-424.       | 1.5 | 5         |
| 18 | Implantable Cardiac Alert System for Early Recognition of ST-Segment Elevation Myocardial Infarction. <i>Journal of the American College of Cardiology</i> , 2019, 73, 1919-1927.                    | 2.8 | 25        |

| #  | ARTICLE                                                                                                                                                                                                                                                                                                                                  | IF   | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 19 | Evaluation of Lower-Dose Spiral Head CT for Detection of Intracranial Findings Causing Neurologic Deficits. <i>American Journal of Neuroradiology</i> , 2019, 40, 1855-1863.                                                                                                                                                             | 2.4  | 9         |
| 20 | Cardiovascular Therapies Targeting Left Atrial Appendage. <i>Journal of the American College of Cardiology</i> , 2018, 72, 448-463.                                                                                                                                                                                                      | 2.8  | 39        |
| 21 | Revascularization for Left Main and Multivessel Coronary Artery Disease: Current Status and Future Prospects after the EXCEL and NOBLE Trials. <i>Korean Circulation Journal</i> , 2018, 48, 447.                                                                                                                                        | 1.9  | 6         |
| 22 | Clinical Impact of Diabetes Mellitus on Outcomes After Transcatheter Aortic Valve Replacement. <i>Circulation: Cardiovascular Interventions</i> , 2017, 10, .                                                                                                                                                                            | 3.9  | 22        |
| 23 | Left atrial appendage occlusion for stroke prevention in patients with atrial fibrillation: a systematic review and network meta-analysis of randomized controlled trials. <i>Journal of Cardiovascular Surgery</i> , 2017, 59, 128-139.                                                                                                 | 0.6  | 8         |
| 24 | Revascularization in stable coronary artery disease: a combined perspective from an interventional cardiologist and a cardiac surgeon. <i>European Heart Journal</i> , 2016, 37, 1873-1882.                                                                                                                                              | 2.2  | 17        |
| 25 | Left Atrial Appendage Closure for Atrial Fibrillation—Reply. <i>JAMA - Journal of the American Medical Association</i> , 2015, 313, 1057.                                                                                                                                                                                                | 7.4  | 1         |
| 26 | Review of Reported Causes of Device Embolization Following Trans-Catheter Aortic Valve Implantation. <i>American Journal of Cardiology</i> , 2015, 115, 1767-1772.                                                                                                                                                                       | 1.6  | 41        |
| 27 | Measurements of the left atrium and pulmonary veins for analysis of reverse structural remodeling following cardiac ablation therapy. <i>Computer Methods and Programs in Biomedicine</i> , 2015, 118, 198-206.                                                                                                                          | 4.7  | 12        |
| 28 | Percutaneous Left Atrial Appendage Closure vs Warfarin for Atrial Fibrillation. <i>JAMA - Journal of the American Medical Association</i> , 2014, 312, 1988.                                                                                                                                                                             | 7.4  | 765       |
| 29 | Coronary artery bypass grafting vs. percutaneous coronary intervention for patients with three-vessel disease: final five-year follow-up of the SYNTAX trial. <i>European Heart Journal</i> , 2014, 35, 2821-2830.                                                                                                                       | 2.2  | 292       |
| 30 | Five-Year Outcomes in Patients With Left Main Disease Treated With Either Percutaneous Coronary Intervention or Coronary Artery Bypass Grafting in the Synergy Between Percutaneous Coronary Intervention With Taxus and Cardiac Surgery Trial. <i>Circulation</i> , 2014, 129, 2388-2394.                                               | 1.6  | 440       |
| 31 | Outcomes in Patients With De Novo Left Main Disease Treated With Either Percutaneous Coronary Intervention Using Paclitaxel-Eluting Stents or Coronary Artery Bypass Graft Treatment in the Synergy Between Percutaneous Coronary Intervention With TAXUS and Cardiac Surgery (SYNTAX) Trial. <i>Circulation</i> . 2010. 121. 2645-2653. | 1.6  | 561       |
| 32 | Percutaneous Coronary Intervention versus Coronary-Artery Bypass Grafting for Severe Coronary Artery Disease. <i>New England Journal of Medicine</i> , 2009, 360, 961-972.                                                                                                                                                               | 27.0 | 3,634     |
| 33 | Treatment options for angina pectoris and the future role of enhanced external counterpulsation. <i>Clinical Cardiology</i> , 2002, 25, 22-25.                                                                                                                                                                                           | 1.8  | 17        |
| 34 | Laser wire for crossing chronic total occlusions: “Learning phase” results from the U.S. TOTAL trial. , 1998, 44, 235-243.                                                                                                                                                                                                               |      | 13        |
| 35 | Laser wire for crossing chronic total occlusions: “Learning phase” results from the U.S. TOTAL trial. <i>Catheterization and Cardiovascular Diagnosis</i> , 1998, 44, 235-243.                                                                                                                                                           | 0.3  | 2         |
