Mary E Nevill

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/8377531/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Contribution of phosphocreatine and aerobic metabolism to energy supply during repeated sprint exercise. Journal of Applied Physiology, 1996, 80, 876-884.	2.5	498
2	Recovery of power output and muscle metabolites following 30 s of maximal sprint cycling in man Journal of Physiology, 1995, 482, 467-480.	2.9	294
3	Mental health and movement behaviour during the COVID-19 pandemic in UK university students: Prospective cohort study. Mental Health and Physical Activity, 2020, 19, 100357.	1.8	221
4	Correlates of Participation in Physical Activity for Adolescent Girls: A Systematic Review of Recent Literature. Journal of Physical Activity and Health, 2005, 2, 423-434.	2.0	201
5	Power output and muscle metabolism during and following recovery from 10 and $20\hat{e}_f$ s of maximal sprint exercise in humans. Acta Physiologica Scandinavica, 1998, 163, 261-272.	2.2	190
6	Effect of training on muscle metabolism during treadmill sprinting. Journal of Applied Physiology, 1989, 67, 2376-2382.	2.5	168
7	The metabolic responses of human type I and II muscle fibres during maximal treadmill sprinting Journal of Physiology, 1994, 478, 149-155.	2.9	126
8	Effects of active recovery on power output during repeated maximal sprint cycling. European Journal of Applied Physiology and Occupational Physiology, 1996, 74, 461-469.	1.2	115
9	Modelling the relationship between isokinetic muscle strength and sprint running performance. Journal of Sports Sciences, 1998, 16, 257-265.	2.0	106
10	A heat acclimation protocol for team sports. British Journal of Sports Medicine, 2008, 42, 327-333.	6.7	100
11	Breakfast consumption and cognitive function in adolescent schoolchildren. Physiology and Behavior, 2011, 103, 431-439.	2.1	95
12	Effect of a school-based intervention to promote healthy lifestyles in 7–11 year old children. International Journal of Behavioral Nutrition and Physical Activity, 2009, 6, 5.	4.6	88
13	Physiological responses to maximal intermittent exercise: Differences between enduranceâ€trained runners and games players. Journal of Sports Sciences, 1991, 9, 371-382.	2.0	87
14	Effect of menstrual cycle phase on sprinting performance. European Journal of Applied Physiology, 2010, 109, 659-667.	2.5	72
15	Breakfast glycaemic index and cognitive function in adolescent school children. British Journal of Nutrition, 2012, 107, 1823-1832.	2.3	69
16	The effects of oral creatine supplementation on performance in single and repeated sprint swimming. Journal of Sports Sciences, 1998, 16, 271-279.	2.0	68
17	The hormonal responses to repetitive brief maximal exercise in humans. European Journal of Applied Physiology and Occupational Physiology, 1990, 60, 144-148.	1.2	63
18	Repeated bouts of sprint running after induced alkalosis. Journal of Sports Sciences, 1991, 9, 355-370.	2.0	62

#	Article	IF	CITATIONS
19	Sprint-based exercise and cognitive function in adolescents. Preventive Medicine Reports, 2016, 4, 155-161.	1.8	61
20	Growth hormone responses to treadmill sprinting in sprint- and endurance-trained athletes. European Journal of Applied Physiology and Occupational Physiology, 1996, 72-72, 460-467.	1.2	56
21	High-intensity intermittent running and field hockey skill performance in the heat. Journal of Sports Sciences, 2005, 23, 531-540.	2.0	48
22	Influence of Ingesting versus Mouth Rinsing a Carbohydrate Solution during a 1-h Run. Medicine and Science in Sports and Exercise, 2011, 43, 468-475.	0.4	48
23	Muscle Metabolism, Temperature, and Function During Prolonged, Intermittent, High-Intensity Running in Air Temperatures of 33 ° and 17 °C. International Journal of Sports Medicine, 2005, 26, 805-814.	1.7	47
24	High intensity intermittent games-based activity and adolescents' cognition: moderating effect of physical fitness. BMC Public Health, 2018, 18, 603.	2.9	46
25	Human growth hormone responses to repeated bouts of sprint exercise with different recovery periods between bouts. Journal of Applied Physiology, 2005, 99, 1254-1261.	2.5	45
26	Accumulated oxygen deficit and shortâ€distance running performance. Journal of Sports Sciences, 1994, 12, 447-453.	2.0	44
27	Effects of previous dynamic arm exercise on power output during repeated maximal sprint cycling. Journal of Sports Sciences, 1994, 12, 363-370.	2.0	43
28	Effect of the menstrual cycle on performance of intermittent, high-intensity shuttle running in a hot environment. European Journal of Applied Physiology, 2003, 88, 345-352.	2.5	42
29	Longitudinal development of matchâ€running performance in elite male youth soccer players. Scandinavian Journal of Medicine and Science in Sports, 2016, 26, 933-942.	2.9	42
30	Absorption of creatine supplied as a drink, in meat or in solid form. Journal of Sports Sciences, 2002, 20, 147-151.	2.0	41
31	Growth hormone responses to repeated maximal cycle ergometer exercise at different pedaling rates. Journal of Applied Physiology, 2002, 92, 602-608.	2.5	38
32	Motion analysis of U11 to U16 elite English Premier League Academy players. Journal of Sports Sciences, 2015, 33, 1248-1258.	2.0	38
33	Effect of a hot environment on performance of prolonged, intermittent, high-intensity shuttle running. Journal of Sports Sciences, 1998, 16, 677-686.	2.0	37
34	Physiological and metabolic responses of female games and endurance athletes to prolonged, intermittent, high-intensity running at 30° and 16°C ambient temperatures. European Journal of Applied Physiology and Occupational Physiology, 2000, 81, 84-92.	1.2	36
35	School-based interventions modestly increase physical activity and cardiorespiratory fitness but are least effective for youth who need them most: an individual participant pooled analysis of 20 controlled trials. British Journal of Sports Medicine, 2021, 55, 721-729.	6.7	36
36	A model for phosphocreatine resynthesis. Journal of Applied Physiology, 1997, 82, 329-335.	2.5	34

#	Article	IF	CITATIONS
37	A Field-Test Battery for Elite, Young Soccer Players. International Journal of Sports Medicine, 2013, 34, 302-311.	1.7	32
38	Match Analysis of U9 and U10 English Premier League Academy Soccer Players Using a Global Positioning System. Journal of Strength and Conditioning Research, 2015, 29, 954-963.	2.1	32
39	The time course of the human growth hormone response to a 6 s and a 30 s cycle ergometer sprint. Journal of Sports Sciences, 2002, 20, 487-494.	2.0	31
40	Exercise and Postprandial Plasma Triacylglycerol Concentrations in Healthy Adolescent Boys. Medicine and Science in Sports and Exercise, 2007, 39, 116-122.	0.4	31
41	Estimating the energy contribution during single and repeated sprint swimming. Scandinavian Journal of Medicine and Science in Sports, 2014, 24, 369-376.	2.9	30
42	Influence of Biological Maturity on the Match Performance of 8- to 16-Year-Old, Elite, Male, Youth Soccer Players. Journal of Strength and Conditioning Research, 2019, 33, 3078-3084.	2.1	29
43	The effects of a mid-morning bout of exercise on adolescents' cognitive function. Mental Health and Physical Activity, 2012, 5, 183-190.	1.8	28
44	High-Intensity Intermittent Exercise: Effect on Young People's Cardiometabolic Health and Cognition. Current Sports Medicine Reports, 2016, 15, 245-251.	1.2	26
45	The influence of a 6.5% carbohydrate-electrolyte solution on performance of prolonged intermittent high-intensity running at 30ŰC. Journal of Sports Sciences, 2003, 21, 371-381.	2.0	25
46	Effect of repeated sprints on postprandial endothelial function and triacylglycerol concentrations in adolescent boys. Journal of Sports Sciences, 2015, 33, 806-816.	2.0	24
47	Effect of diet on performance during recovery from intermittent sprint exercise. Journal of Sports Sciences, 1993, 11, 119-126.	2.0	23
48	Effects of active and passive recovery on performance during repeated-sprint swimming. Journal of Sports Sciences, 2008, 26, 1497-1505.	2.0	23
49	Breakfast glycaemic index and exercise: Combined effects on adolescents' cognition. Physiology and Behavior, 2015, 139, 104-111.	2.1	23
50	Effect of football activity and physical fitness on information processing, inhibitory control and working memory in adolescents. BMC Public Health, 2020, 20, 1398.	2.9	23
51	Effect of 62weeks of sprint training on growth hormone responses to sprinting. European Journal of Applied Physiology, 2004, 92, 26-32.	2.5	22
52	Effects of Intermittent Games Activity on Postprandial Lipemia in Young Adults. Medicine and Science in Sports and Exercise, 2006, 38, 1282-1287.	0.4	22
53	Effect of the Great Activity Programme on healthy lifestyle behaviours in 7–11 year olds. Journal of Sports Sciences, 2013, 31, 1280-1293.	2.0	19
54	The Reliability and Validity of a Field Hockey Skill Test. International Journal of Sports Medicine, 2006, 27, 395-400.	1.7	18

#	Article	IF	CITATIONS
55	Effect of exercise on postprandial endothelial function in adolescent boys. British Journal of Nutrition, 2013, 110, 301-309.	2.3	18
56	Longitudinal Physical Development of Future Professional Male Soccer Players: Implications for Talent Identification and Development?. Frontiers in Sports and Active Living, 2020, 2, 578203.	1.8	18
57	The Daily Mileâ,,¢: Acute effects on children's cognitive function and factors affecting their enjoyment. Psychology of Sport and Exercise, 2021, 57, 102047.	2.1	18
58	Rapid recovery of power output in females. Acta Physiologica Scandinavica, 1998, 164, 79-87.	2.2	17
59	Accumulated oxygen deficit and shuttle run performance in physically active men and women. Journal of Sports Sciences, 1997, 15, 207-214.	2.0	15
60	Physical activity and body composition outcomes of the GreatFun2Run intervention at 20 month follow-up. International Journal of Behavioral Nutrition and Physical Activity, 2011, 8, 74.	4.6	15
61	The effect of playing status, maturity status, and playing position on the development of match skills in elite youth football players aged 11–18 years: A mixedâ€longitudinal study. European Journal of Sport Science, 2019, 19, 315-326.	2.7	15
62	Psychological characteristics of developing excellence in elite youth football players in English professional academies. Journal of Sports Sciences, 2020, 38, 1380-1386.	2.0	15
63	Social-Psychological and Physical Environmental Factors in Groups Differing by Levels of Physical Activity: A Study of Scottish Adolescent Girls. Pediatric Exercise Science, 2006, 18, 226-239.	1.0	14
64	Sex differences in adolescents' glycaemic and insulinaemic responses to high and low glycaemic index breakfasts: a randomised control trial. British Journal of Nutrition, 2017, 117, 541-547.	2.3	13
65	Cytokine, glycemic, and insulinemic responses to an acute bout of gamesâ€based activity in adolescents. Scandinavian Journal of Medicine and Science in Sports, 2019, 29, 597-605.	2.9	13
66	Physical fitness, physical activity and adiposity: associations with risk factors for cardiometabolic disease and cognitive function across adolescence. BMC Pediatrics, 2022, 22, 75.	1.7	13
67	Reproducibility of the growth hormone response to sprint exercise. Growth Hormone and IGF Research, 2003, 13, 336-340.	1.1	11
68	Multi-Stage Fitness Test Performance, V˙O2 Peak and Adiposity: Effect on Risk Factors for Cardio-Metabolic Disease in Adolescents. Frontiers in Physiology, 2019, 10, 629.	2.8	11
69	Effect of the number of preceding muscle actions on subsequent peak power output. Journal of Sports Sciences, 1997, 15, 201-206.	2.0	10
70	Effect of Creatine Supplementation on Training for Competition in Elite Swimmers. Medicine and Science in Sports and Exercise, 2005, 37, 2140-2147.	0.4	10
71	Effect of Differing Durations of High-Intensity Intermittent Activity on Cognitive Function in Adolescents. International Journal of Environmental Research and Public Health, 2021, 18, 11594.	2.6	9
72	Reliability of a musculoskeletal profiling test battery in elite academy soccer players. PLoS ONE, 2020, 15, e0236341.	2.5	8

#	Article	IF	CITATIONS
73	Effects of active recovery on power output during repeated maximal sprint cycling. European Journal of Applied Physiology, 1996, 74, 461-469.	2.5	8
74	Constant external work cycle exercise ? the performance and metabolic effects of all-out and even-paced strategies. European Journal of Applied Physiology, 1996, 75, 22-27.	2.5	7
75	The accumulation of exercise and postprandial endothelial function in boys. Scandinavian Journal of Medicine and Science in Sports, 2014, 24, e11-9.	2.9	7
76	The mechanisms underpinning the effects of self-control exertion on subsequent physical performance: a meta-analysis. International Review of Sport and Exercise Psychology, 0, , 1-28.	5.7	7
77	The relative contributions of anaerobic and aerobic energy supply during track 100-, 400- and 800-m performance. Journal of Sports Medicine and Physical Fitness, 2008, 48, 138-42.	0.7	7
78	Effects of Oral Creatine Supplementation on Power Output during Repeated Treadmill Sprinting. Nutrients, 2022, 14, 1140.	4.1	7
79	Editorial. Journal of Sports Sciences, 2003, 21, 881-881.	2.0	6
80	Effects of inertia correction and resistive load on fatigue during repeated sprints on a friction-loaded cycle ergometer. Journal of Sports Sciences, 2008, 26, 1437-1445.	2.0	6
81	Effect of Exercise Duration on Postprandial Glycaemic and Insulinaemic Responses in Adolescents. Nutrients, 2020, 12, 754.	4.1	6
82	Activity patterns of primary school children during participation in The Daily Mile. Scientific Reports, 2021, 11, 7462.	3.3	5
83	Effect of acute football activity and physical fitness on glycaemic and insulinaemic responses in adolescents. Journal of Sports Sciences, 2021, 39, 1127-1135.	2.0	4
84	Age Is an Important Determinant of the Growth Hormone Response to Sprint Exercise in Non-Obese Young Men. Hormone Research in Paediatrics, 2006, 65, 57-61.	1.8	3
85	Separate and combined influence of posture and sprint running on plasma volume changes. European Journal of Sport Science, 2014, 14, S267-74.	2.7	2
86	Predictors of postprandial glycaemia, insulinaemia and insulin resistance in adolescents. British Journal of Nutrition, 2021, 125, 1101-1110.	2.3	2
87	Editorial. Journal of Sports Sciences, 2002, 20, 949-949.	2.0	1
88	Motion analysis of U11 to U16 elite English Premier League Academy Players. Japanese Journal of Physical Fitness and Sports Medicine, 2015, 64, 111-111.	0.0	0
89	EFFECTS OF ENDURANCE TRAINING ON POWER OUTPUT RECOVERY AND BLOOD METABOLIC RESPONSES DURING REPEATED SPRINTS*. Medicine and Science in Sports and Exercise, 2003, 35, S94.	0.4	0
90	Growth hormone responses to repeated bouts of aerobic exercise with different recovery intervals. Journal of Applied Physiology, 2006, 100, 1093-1094.	2.5	0

#	Article	IF	CITATIONS
91	A Bout of Repeated Short Sprints Reduces Postprandial Triacylglycerol Concentrations in Young Men. Medicine and Science in Sports and Exercise, 2006, 38, S483.	0.4	0
